

# Heritage Signature® Auction #1130

## U.S. Coins

October 22-24, 2009 | Dallas, Texas

### LOT VIEWING

#### Heritage Auction Galleries, 17th Floor

3500 Maple Avenue • Dallas, Texas 75219

Wednesday, October 21, 2009 • 8:00 AM – 6:00 PM CT

Thursday, October 22, 2009 • 8:00 AM – 6:00 PM CT

Friday, October 23, 2009 • 8:00 AM – 6:00 PM CT

*View Lots and Video Lot Descriptions  
Online at HA.com/COINS*

### LIVE FLOOR BIDDING

Bid in person during the floor sessions.

### LIVE TELEPHONE BIDDING (floor sessions only)

Phone bidding must be arranged on or before

Wednesday, October 21, 2009, by 12:00 PM CT.

Client Service: 866-835-3243.

### HERITAGE Live!™ BIDDING

*Bid live* from your location, anywhere in the world,  
during the Auction using our HERITAGE Live!™ program  
at HA.com/Live

### INTERNET BIDDING

Internet absentee bidding ends at 10:00 PM CT  
the evening before each session. HA.com/Coins

### FAX BIDDING

Fax bids must be received on or before Wednesday,  
October 21, 2009, by 12:00 PM CT. Fax: 214-409-1425

### MAIL BIDDING

Mail bids must be received on or before  
Wednesday, October 21, 2009.

*Please see "Choose Your Bidding Method" in the back of this catalog for specific details about each of these bidding methods.*

### LIVE AUCTION

#### SIGNATURE® FLOOR SESSIONS 1-3

(Floor, Telephone, HERITAGE Live!,™ Internet, Fax, and Mail)

#### Heritage Auction Galleries, 1st Floor Auction Room

3500 Maple Avenue • Dallas, Texas 75219

#### SESSION 1

Thursday, October 22, 2009 • 6:00 PM CT • Lots 1–898

#### SESSION 2

Friday, October 23, 2009 • 1:00 PM CT • Lots 899–1246

#### SESSION 3

Friday, October 23, 2009 • 6:00 PM CT • Lots 1247–2002

### NON FLOOR/NON PHONE BIDDING SESSION 4

(HERITAGE Live!,™ Internet, Fax, and Mail only)

#### SESSION 4

Saturday, October 24, 2009 • 10:00 AM CT • Lots 7001–9365

### AUCTION RESULTS

Immediately available at HA.com/Coins

### LOT SETTLEMENT AND PICK-UP

Friday Oct 23, 2009 – by appointment only

*Extended Payment Terms available. See details in the back of this catalog.*

*Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.*

*This auction is subject to a 15% Buyer's Premium.*

THIS AUCTION IS PRESENTED AND CATALOGED BY HERITAGE NUMISMATIC AUCTIONS, INC.

Dear Bidder,

More than 170 consignors have provided some 4,000 coins for this important auction, so the broad range of material in this catalog includes items of interest to every collector of American coins. Our Dallas-based auctions, especially those of "medium size," have earned a reputation for such enticing diversity – in many ways a reflection of the wide-ranging interests of collectors. No wonder that our year-end auctions in Dallas and Houston continue to grow in size and popularity. Overall, prices at Heritage's numismatic auctions continue strong. Once again our pre-ANA auction was substantially larger than the Official event, but more importantly, the ANA has selected Heritage to be their Official Auctioneer for both 2010 events – Ft. Worth and Boston. Our FUN 2010 auctions are filling nicely. Consignors continue to be content with the health of the numismatic markets versus many other assets.

In this auction, our anchors include:

## The Little Rock Collection, Part One

Part One of the Little Rock Collection consists of seven gold coins, and what a wonderful assemblage: 1907 Wire Rim ten MS64 NGC; 1920-S ten MS62 NGC; 1930-S eagle MS64 NGC; 1871-CC double eagle AU55 NGC; 1885 twenty MS61 PCGS (one of only 751 struck); 1891 double eagle AU58 NGC (one of only 1,390 struck), and 1892 twenty MS62 PCGS. The consignor, a graduate of the Colorado School of Mines, has always been a successful buyer of precious metals and came to rare coins late in his career.

## The Mulkin Collection

The Mulkin Collection is an impressive offering of Territorial gold, early gold Federal issues, and gold rarities of the nineteenth century. The coins were purchased largely in the 1960s and 1970s from well-known dealers, and out of major collections with impressive pedigrees. After graduating from the University of the South in Sewanee, Tennessee, Jim Ed Mulkin entered the U.S. Air Force and served in the Korean Conflict. He then returned to his hometown in Alabama where he used his mustering-out pay to start his own business. His love of history and the appeal of numismatics soon led him to begin collecting. "When I had a little extra money," said Mulkin, "coins were what I invested in. These coins, including Territorials from the Carolinas, Georgia, and California, have been off the market for about forty years."

## The E.J. Mutton Collection of U.S. Gold, Part One

Edward J. Mutton, like many of today's collectors, was fascinated by unusual coins in the pocket change of his youth. Unlike many coin collectors, he did not immediately return to the hobby of numismatics as assets became more available – instead, he chose to focus his investment strategies on equities and precious metals. His interest in gold and platinum metals ultimately led to buying double eagles for diversification, in fulfillment of those childhood interests. With gold then under \$400/ounce, who can argue with his timing? From these decisions, a great collection of U.S. gold has grown.

I recommend that you begin your research in our free Auction Archives at HA.com. There you will find amazing full-color images, lot descriptions, and prices realized data for well more than a million and a half numismatic lots. This is the greatest numismatic resource on the Web, and it is still free! While our exclusive Interactive Internet bidding program enjoys strong usage, we note that increasing numbers of bidders are using HERITAGE Live!™ – many collectors really appreciate the excitement and the satisfaction of participating in “real time” without the expense of travel. Heritage has provided many ways for you to bid, and we hope that you use the ones that make you most comfortable and successful.

This observation may seem counterintuitive, but knowing which of your bids are unsuccessful – and that as soon as possible – is incredibly valuable information for making you a more successful bidder! This knowledge allows you to focus your demand and your resources on those items where you stand the greatest chances of success. You have my best wishes for adding a few of these wonderful coins to your collection. And if you can join us in Dallas, make sure you say “Hello.”

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg" followed by a surname.

Greg Rohan  
President

## COLONIALS

Scarce VF30 Oak Tree Sixpence, Crosby's Reverse D

- 1 1652 Oak Tree Sixpence VF30 PCGS. Dies of Noe-20 through Noe-22. More precise attribution is dubious since the distinguishing factor, the shape of the first S in MASATHVSETS, is absent due to mint-made clips, an obverse misaligned toward 10 o'clock, and concentrated wear on the left obverse border. The upper right portion of the tree is also worn, but the remainder of the designs are bold. Toned lavender and ice-blue with minor double striking on the base of the V in VI. Listed on page 37 of the 2010 Guide Book. (#19)

Near-Mint Oak Tree Shilling  
Scarce Noe-9 Variety, IN at Bottom

- 2 1652 Oak Tree Shilling AU58 NGC. IN at bottom. Crosby 4-C, Noe-9, W-500, R.5. 71.2 gn. A high grade example that glimmers with luster and displays low relief die engraving lines throughout the fields. Toned ocean-blue, lime, and chestnut-gold. Mint-made edge flaws on the obverse at 11 o'clock and the reverse at 12:30, and Boston Mint clips affect the tops of a few peripheral letters. A slight S-wave through the piece is also produced, from a rocker press. A wonderful museum-quality example of the Oak Tree design. Listed on page 37 of the 2010 Guide Book. Census: 6 in 58, 9 finer (9/09). (#20)

---

### Important MS63 Oak Tree Shilling, Noe-4

- 3 1652 Oak Tree Shilling MS63 NGC. IN at bottom. Crosby 3-D, Noe-4, W-460, R.4. 71.0 gm. Noe-4 through Noe-7 share a common reverse die, but Noe-4 is readily identified by the close TH in MASATHVSETS. This is a magnificent example with luminous luster and pastel sun-gold and lilac toning. The reverse is well centered, and the obverse is misaligned slightly toward 6 o'clock but all letters are intact or nearly so. Most areas are boldly struck, the exceptions are the obverse at 3 o'clock and the reverse between 9 and 10 o'clock. Devoid of noticeable marks. Mildly wavy, as always due to its method of manufacture. Listed on page 37 of the 2010 Guide Book. Census: 4 in 63, 2 finer (9/09). (#20)
- 

### Wonderful 1652 Noe-36 Pine Tree Threepence, VF35

- 4 1652 Pine Tree Threepence VF35 PCGS. Crosby 2a-B, Noe-36, W-640, R.4. A wonderful small Massachusetts silver piece with light gray devices and deeper gray-brown fields. The entire obverse legend is complete on the planchet, while the reverse is tight with the tops of NEW off the planchet. Listed on page 37 of the 2010 Guide Book. (#21)
- 

### Elusive 1652 Pine Tree Sixpence, Noe-33a, Fine 15

- 5 1652 Pine Tree Sixpence Fine 15 PCGS. CAC. Noe-33a, W-670, R.5. Deeply toned with steel-gray fields and lighter golden letters and devices. This is a pleasing example of the scarce sixpence denomination, seldom encountered when compared to the Pine Tree shillings. Listed on page 37 of the 2010 Guide Book. (#22)
- 

### Choice VF Pine Tree Sixpence Noe-33, Pellets at Trunk

- 6 1652 Pine Tree Sixpence VF35 PCGS. Pellets at trunk. Crosby 1-A, Noe-33, W-670, R.3. 32.10 gm. Dove-gray with lilac hues. One thin mark on the central reverse, otherwise problem-free. Moderately wavy, as made. Diagnostic for the Noe variety, the obverse is misaligned several degrees toward 12 o'clock. The reverse legends are fully intact. Listed on page 37 of the 2010 Guide Book. Population: 6 in 35, 28 finer (9/09). (#22)
-

---

**Large Planchet Pine Tree Shilling, VF30  
Noe-1, Pellets at Trunk**

- 7 1652 Pine Tree Shilling, Large Planchet VF30 ICG. Pellets at trunk. Crosby 12-I, Noe-1, W-690, R.2. A late die state with a bold die break between the 16 in the date. This oval-shaped example has a bold tree, date, and denomination. Mint-made clips affect a couple of letters, but most are complete. Wear is uneven only on the obverse between 6 and 8 o'clock. Listed on page 37 of the 2010 Guide Book. (#23)
- 8 1652 Pine Tree Shilling, Small Planchet—Holed and Plugged—PCGS Genuine. Crosby 13-S, Noe-30, W-935. Holed just to the right of 6 o'clock on the obverse with expert re-engraving at the corresponding area of the reverse. Off-center with peripheral weakness as usual, but the central devices are bold. Listed on page 37 of the 2010 Guide Book. (#24)
- 9 1652 Pine Tree Shilling, Small Planchet—Improperly Cleaned—NCS. Fine Details. Crosby 14-R, Noe-29, W-930, R.3. 72.8 grains. The 5 in the date is heavy and the top of the tree points to the lower right foot of the H in MASATHVSETS, which is diagnostic. Light gray patina covers the design elements, while the fields have a deeper complexion. Several of the upper right letters are partially struck off the flan, but the rest of the details are clearly defined. Still a nice example of this popular variety. Listed on page 37 of the 2010 Guide Book.  
From The Mulkin Collection. (#24)

---

**Late State St. Patrick Farthing, AU50**

- 10 (1670-75) St. Patrick Farthing AU50 PCGS. Breen-211. The variety with Sea Beasts below the King. This lovely piece has medium brown patina with olive accents on both sides. The St. Patrick coinage exists in a large number of die combinations, while survivors are usually in lower grades. Listed on page 39 of the 2010 Guide Book. Population: 5 in 50, 6 finer (9/09). (#42)

---

**Sidewise 4 American Plantations Token  
1/24 Part Real, Newman 8-C, AU55**

- 11 (1688) American Plantations 1/24 Part Real, Sidewise 4 AU55 PCGS. Newman 8-C, W-1175, R.7. The Sidewise 4 reverse was used to produce both the Newman 3-C and 8-C coins, which both he and Breen identify as originals made in the late 17th century. Different die pairs (4-E and 5-D) were used later on to produce the circa-1828 restrikes, which are considerably more available. These tin tokens often show tin pest on the originals, as here, appearing as light, pimply corrosion on both sides. The color is medium to darker gray, with a couple of larger marks appearing like an upside-down L in the obverse field. Population: 1 in 55, 2 finer (both MS60). One of those MS60 pieces, a Newman 8-C, brought \$21,850 in our Long Beach Signature Auction (5/2008, lot 1829). Listed on page 39 of the 2010 Guide Book. (#50)

American Plantations Token Restrike  
MS62, Newman 4-E

- 12 (c. 1828) American Plantations 1/24 Part Real, Restrike MS62 PCGS. Newman 4-E, W-1155, R.5. A charming example with medium steel-gray toning and unblemished, mildly granular surfaces. N. 4-E and N. 5-D are the restrike varieties, the latter distinguished by a heavy die break on the upper left obverse. Very scarce in Mint State. Listed on page 39 of the 2010 Guide Book. Population: 7 in 62, 5 finer (9/09). (#52)
- 13 1722 Rosa Americana Halfpenny, DEI GRATIA, UTILE AU50 PCGS. Martin 3-C, W-1222, R.2. Deep blue overtones and hints of rose grace otherwise rich brown surfaces. Scattered planchet flaws affect the modestly worn reverse. Listed on page 40 of the 2010 Guide Book. (#104)
- 14 1722 Rosa Americana Twopence XF45 PCGS. Martin 3-C, W-1326, R.6. The stop after REX is diagnostic. Well struck with light wear across butterscotch-accented chocolate-brown surfaces that are unusually smooth for a Rosa Americana issue. Minimally abraded, hence the Choice XF designation. Listed on page 41 of the 2010 Guide Book. (#116)

Desirable 1723 Rosa Americana Penny, MS62 Brown

- 15 1723 Rosa Americana Penny MS62 Brown PCGS. Stop after REX. No stop after 1723. Small 3. Martin 2-E, W-1278, R.2. PCGS has identified this piece as a halfpenny, although the size indicates that it is a penny. Deep ivory and steel patina permit traces of the original yellow color of the bath metal composition to shine through. An attractive example despite typical light surface roughness. Listed on page 43 of the 2010 Guide Book. (#125)
- 16 1723 Hibernia Farthing, D:G:REX MS63 Brown NGC. CAC. Martin 1.1-Bc.1, R.5. Breen calls the Nelson-6 the "First Prototype Farthing," after Nelson's earlier description of the variety as a pattern. It has the usual die break through NIA of HIBERNIA. The obverse has some lilac-brown with more steel-brown, the result of minute corrosion. The reverse is lilac-brown with semireflective fields. Listed on page 42 of the 2010 Guide Book. (#173)
- 17 1723 Hibernia Farthing, D:G:REX MS63 Brown PCGS. Martin 1.1-Bc.1, W-12240, R.5. Sharp details and ivory surfaces host splashes of deep red and steel patina. A popular issue that is frequently seen in higher grades but elusive in full Mint State. Listed on page 42 of the 2010 Guide Book. Population: 11 in 63 Brown, 6 finer (9/09). (#173)

Elusive 1724 Hibernia Halfpenny, MS65 Brown

- 18 1724 Hibernia Halfpenny MS65 Brown NGC. Martin 4.67-K.3, W-13690, R.2. The reverse has 11 harpstrings. Traces of original orange luster remain on each side of this glossy medium brown Gem. Some edge abnormalities are evident on each side, strictly as struck. The overall appearance is exceptional with pristine surfaces. Listed on page 43 of the 2010 Guide Book. (#190)
- 19 1788 Massachusetts Cent, Period XF40 PCGS. Ryder 2-B, W-6200, R.4. Attributed by the wide date and a die lump below the first T in MASSACHUSETTS. A lovely coin for the grade. The surfaces are pleasing with no spotting or significant roughness. We do note a faint planchet streak on the upper right of the obverse, matching on the reverse where there is also a minor streak found near the top. Listed on page 57 of the 2010 Guide Book. Ex: Long Beach Signature (Heritage, 9/2005), lot 530. (#311)
- 20 1787 ETLIB INDE Small Head Right Connecticut Copper VF20 PCGS. Miller 1.1-A, W-2700, R.3. Moderately worn with a degree of typical central planchet roughness. Weakly struck as usual yet pleasing. Listed on page 59 of the 2010 Guide Book. (#346)
- 21 1787 Nova Eborac Copper, Seated Left XF45 PCGS. Breen-986. An olive-brown example with dashes of plum-red near protected areas of the obverse. The reverse is misaligned toward 12 o'clock, while the obverse is perfectly centered. Listed on page 65 of the 2010 Guide Book. (#478)
- 22 1787 New Jersey Copper, M. 43-d, MS61 Brown
- 
- 22 1787 New Jersey Copper, Small Planchet, Plain Shield MS61 Brown NGC. M. 43-d, W-5225, R.1. Both sides of this lustrous Mint State piece have medium to dark brown toning with lighter tan on the reverse high points. An attractive representative of the New Jersey colonial series, destined for a specialist's cabinet or a high quality type set of early coinage. Listed on page 66 of the 2010 Guide Book. (#506)
- 23 1786 Vermont Copper, VERMONTENSIVM Fine 15 PCGS. RR-8, Bressett 6-E, W-2030, R.4. The rarest of the three 1786 Landscape varieties. A medium brown Vermont Republic copper with circulated but problem-free surfaces. LICA and DEC are faint but readable. Listed on page 68 of the 2010 Guide Book. (#545)

- 24** 1786 Vermont Copper, VERMONTENSIVM VF30 PCGS. RR-6, Bressett 4-D, W-2020, R.2. Typical of the variety, the dies were axially misaligned, creating strike weakness at the left side of the obverse and the left side of the reverse. The smooth light brown surfaces exhibit some abrasions and additional irregularities that indicate the appearance of the copper flan before this coin was struck. Listed on page 68 of the 2010 Guide Book. (#545)
- 25** 1787 Vermont Copper, BRITANNIA XF45 PCGS. RR-13, Bressett 17-V, W-2255, R.1. An olive-brown representative with impressive obverse definition. The BRITANNIA legend is partial, as always since the reverse die was lapped prior to coinage. Listed on page 68 of the 2010 Guide Book. Population: 8 in 45, 11 finer (9/09). (#554)
- 26** 1788 Vermont Copper, Bust Right XF40 PCGS. CAC. RR-25, Bressett 16-U, W-2195, R.3. A medium brown Republic copper with a mark-free appearance and proper centering. The lower reverse has scattered minor planchet flaws. The reverse is rotated double struck, evident on the legends. Listed on page 68 of the 2010 Guide Book. Population: 11 in 40, 17 finer (9/09). (#563)
- 27** 1783 Nova Constellatio Copper, Pointed Rays, Large US XF45 PCGS. Crosby 1-A, W-1860, R.4. A medium brown representative with a blush of charcoal-gray on the obverse between 3 and 4 o'clock. Unmarked, and evenly struck aside from softness on the reverse near 3 o'clock. Listed on page 52 of the 2010 Guide Book. Population: 15 in 45, 13 finer (9/09). (#804)
- 28** 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU53 PCGS. CAC. Crosby 5-E, W-1915, High R.4. Deep chocolate-brown surfaces show occasional lighter accents. Wispy abrasions in the fields contribute to the grade. Listed on page 52 of the 2010 Guide Book. (#813)
- Pleasing 1787 Fugio Cent, STATES UNITED  
4 Cinquefoils, Pointed Rays  
Newman 13-X, MS62 Brown**
- 
- 29** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown PCGS. Newman 13-X. A lovely Fugio and a well-centered example. The surfaces are even and medium brown in color with a pleasing glossiness that gives the coin immediate appeal. Sharply defined and also showing the usual heavy die clash marks on the obverse from the rings. A very attractive type coin. Listed on page 83 of the 2010 Guide Book. (#883)
- 
- 30** **Gem Copper New Haven Restrike Fugio**
- 
- 31** **1787 Fugio Cent, New Haven Restrike, Copper MS65 Brown PCGS.** Newman 104-FF, W-17560. Beautiful fire-red, aquamarine, and tan-gold toning ensures the eye appeal of this lustrous and well struck Gem, struck in the mid-19th century and avidly collected ever since. Listed on page 84 of the 2010 Guide Book. Population: 4 in 65 Brown, 2 finer (9/09). (#916)
- 
- 32** **1787 Immunis Columbia Copper Eagle Reverse, MS62 Brown**
- 
- 33** **1787 Immunis Columbia Piece, Eagle Reverse MS62 Brown NGC.** Crosby Pl. VIII, 8, Breen-1137, W-5680, High R.4. This deep brown Early American copper is nicely struck and shows only moderate incompleteness of detail at the highpoints. Thorough inspection reveals only minor planchet flaws. Believed to be a private pattern struck to secure a Federal coinage contract, but examples must have been coined for circulation as well, given the number of survivors. Listed on page 53 of the 2010 Guide Book. Census: 1 in 62 Brown, 3 finer (9/09). (#841)
- 
- 32** **1789 Mott Token, Thick Planchet, Plain Edge MS62 Brown NGC.** Breen-1020. In his Complete Encyclopedia, Walter Breen recorded three different weight standards for the plain edge Mott tokens. Breen-1020 is called a thick planchet piece, with weights in the range of 163 to 171 grains. Breen-1021 is recorded as a thin planchet variant, with weights ranging from 108 to 122 grains. Breen-1022 is called a "cent weight" variety, with weights approximating 208 grains. We are unable to state if this is Breen-1020 or 1022, in the absence of an actual weight on the NGC holder. This dark brown and steel piece is a late die state with a massive die break at the upper left corner of the clock, and with that die severely bulged, causing extreme weakness on the other side. Listed on page 70 of the 2010 Guide Book. (#603)
- 
- 33** **1789 Mott Token, Thin Planchet, Engrailed Edge AU55 PCGS.** Breen-1025. The thin planchet, engrailed edge variety is much scarcer than its thick planchet, plain edge counterpart. This early die state example features powder-blue, plum-mauve, and golden-brown patina. Granular in places, as made, and the reverse is misaligned several degrees toward 5 o'clock. Listed on page 70 of the 2010 Guide Book. Population: 4 in 55, 9 finer (9/09). (#607)

- 34** 1789 Mott Token, Thin Planchet, Engrailed Edge AU58 PCGS. Breen-1025. This representative of the scarce thin planchet variant displays olive and cinnamon-brown toning with some planchet flaws as struck. Edge anomalies are evident at 6 o'clock and 12 o'clock on both sides. Still considered part of the American colonial series, evidence suggests that these pieces were a product of the early 19th century. Listed on page 70 of the 2010 Guide Book. (#607)
- Late State 1789 Mott Token, MS61 Brown**
- 

- 35** 1789 Mott Token, Thin Planchet, Engrailed Edge MS61 Brown PCGS. Breen-1025. This late die state piece has a massive internal die break at the upper left corner of the obverse motif, affecting strike quality of other parts of the design elements, especially those opposing the break. This pleasing and glossy Mint State piece will surely garner spirited bidding at the sale. Listed on page 70 of the 2010 Guide Book. Population: 1 in 61 Brown, 6 finer (9/09). (#607)
- 36** 1783 Georgius Triumpho Token AU58 NGC. Baker-7, W-10100, R.3. Believed contemporaneous with its date, this token bears a portrait of General George that more closely resembles King George. The usual die state with a heavy vertical die break across the left (facing) shoulder of the standing figure. A charming medium brown representative with bold definition and only a hint of wear on Washington's nose and the chest of the reverse figure. Listed on page 75 of the 2010 Guide Book. (#664)
- Impressive 1783 Small Military Bust, Plain Edge Washington & Independence Cent, MS62 Brown**
- 

- 37** 1783 Washington & Independence Cent, Small Military Bust, Plain Edge MS62 Brown NGC. Baker-4A, W-10155, R.5. A chocolate-brown beauty that is far superior to the usually encountered XF to AU example. Sharply struck and satiny with exceptionally smooth surfaces and no indication of highpoint wear. Peripheral elements exhibit minor build-up. Listed on page 75 of the 2010 Guide Book. (#670)
- 38** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge PR64 Brown PCGS. Baker-3C, W-10310, R.6. The chocolate-brown surfaces transform into ocean-blue, sun-gold, and rose-red tints once contrasted with light. Fully struck and only minimally abraded. Listed on page 76 of the 2010 Guide Book. (#682)
- Gem Proof Red and Brown Baker-3**  
**1783 Washington & Independence Cent**  
**Draped Bust, Copper Restrike**
- 

- 39** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR65 Red and Brown NGC. CAC. Baker-3, W-10370, R.5. Well-defined with carefully preserved surfaces. This restrike has fresh copper-orange margins with dusky olive shadings closer to the centers. Listed on page 76 of the 2010 Guide Book. (#686)
- Wonderful 1791 Washington Liverpool Halfpenny, AU50**
- 

- 40** 1791 Washington Liverpool Halfpenny, Copper AU50 PCGS. Baker-17, W-10650, R.6. The Liverpool pieces were intended to circulate in the 1790s, and today these pieces are rare in higher grades. This wonderful representative has mostly deep brown patina, with lighter gray-brown high points. Listed on page 77 of the 2010 Guide Book. (#698)

AU 1795 Washington North Wales Halfpenny

- 41 1795 Washington North Wales Halfpenny, Plain Edge, One Star at Each Side of Harp AU50 PCGS. Baker-34, W-11150, R.3. A deep chocolate-brown halfpenny with pleasing smooth surfaces. The high technical grade is confirmed by the presence of die lines on the obverse exergue. Softly struck on portions of the devices, as always on this issue. The maker wanted to make new pieces appear worn, which implied prior acceptance in circulation. Listed on page 80 of the 2010 Guide Book. Population: 3 in 50, 3 finer (9/09). (#770)

- 42 Undated Washington Success Medal, Large Size, Reeded Edge AU53 PCGS. Baker-265, W-10900, R.5. This piece, from an early die state, lacks the usual die crack across the obverse top. Pleasing medium-brown patina covers the obverse, while the reverse has mostly tan coloration. A number of shallow scratches are noted on the bust of Washington, but they are nearly imperceptible without a loupe. Listed on page 80 of the 2010 Guide Book. (#780)

- 43 Undated Washington Success Medal, Small Size, Plain Edge AU58 PCGS. Baker-267A, W-10877, R.5. Brassy olive-green with light brown toning on the portrait. The centers are somewhat softly brought up, as always. One thin mark through the G in GEORGE. Listed on page 80 of the 2010 Guide Book. Population: 2 in 58, 5 finer (9/09). (#782)

Classic 1781 Libertas Americana Medal  
Struck in Copper, MS62 Brown

- 44 1781 Libertas Americana Medal in Bronzed Copper, Betts-615, MS62 Brown NGC. CAC. Medal aficionados need no introduction to the iconic Libertas Americana medal, one that indelibly captures the moment in time when France and the fledgling United States cast their lots together against the tyrant enemy, *inimica tyrannis*, Great Britain. The medal was conceived and financed by the great American statesman Benjamin Franklin and executed by the inimitable French master medal stylist Augustin Dupré. Its fame has endured for more than two and a quarter centuries now, and it was recently voted the #1 Greatest Medal of All Time in the reference by Katherine Jaeger and Q. David Bowers. The originals (of which this is one) were struck in gold, silver, and bronzed copper. Franklin presented the two gold pieces to King Louis XVI and Marie Antoinette of France, and unfortunately they are unaccounted for today. One likelihood is that they disappeared during the French Revolution and were melted.

Although the medal is usually mentioned with the 1781 date, along with 1777 on the reverse (symbolizing the victories over Burgoyne and Cornwallis at Yorktown and Saratoga, respectively), it bears mentioning that the obverse bears the iconic 4. JUIL 1776 date, marking its similarity in that regard to the popular Continental dollars which read 1776. This serves to further increase the medals' already broad appeal.

John Adams in 2007 presented a census in which he accounts for only 22 silver and 37 bronze examples today, a fraction of the numbers mentioned in Franklin's papers. This example shows the obverse rim break beneath the 4 in the date which is present on all known examples. A few miscellaneous field marks account for the grade. The appealing surfaces are a glossy mahogany-brown. A wonderful Mint State example of one of America's most historic medals.

## HALF CENTS

### Bold 1793 C-1 Half Cent, AU Details

- 45** 1793 PCGS Genuine. C-1, B-1, High R.3. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen with altered surfaces. Both sides are pleasing light to medium brown with perceptible granularity but few other imperfections of any consequence. The opportunity to acquire any boldly defined 1793 half cent is rarely encountered. MRB VF35. (#1000)

### Collectible Fine 1793 Half Cent, C-3, B-3

- 46** 1793 Fine 12 ANACS. C-3, B-3, R.3. A dark lilac-brown representative with mildly granular fields and a paucity of noticeable marks. All legends are clear, and the date and LIBERTY are bold, as is UNITED STATES OF. The only Liberty Cap date with the bust facing left. MRB VG8.  
Ex: Paulsboro Collection, Part Two (Heritage, 7/2004), lot 5027. (#1000)

### Distinctive 1794 C-1, B-1 Half Cent, VF30

- 47** 1794 VF30 NGC. C-1, B-1, R.3. The holder hides the edge, making the edge lettering size indistinguishable. A pleasing piece with Liberty high in the field, diagnostic for the variety. The date is also sharply doubled. The usual grade-consistent handling marks are visible on each side. MRB Fine 15. (#1003)

- 48** 1794—Corroded—ANACS. XF40 Details. C-2a, B-2b, High R.2. A sharply defined half cent that clearly shows the characteristic C-2 clash marks beneath the chin and along the profile. The dark brown fields are only moderately granular, save for a slender reverse streak from 3:30 to 5:30. MRB VF20. (#1003)

### No Pole 1795 Half Cent, VF30 C-6, B-6a, Plain Edge

- 49** 1795 Plain Edge, No Pole VF30 PCGS. C-6, B-6a, R.2. Walnut-brown with olive-green and cobalt-blue hues. A pleasantly detailed coin that has consistently bold legends and complete dentilation on the reverse. Only a couple of hair-thin marks on the left obverse field are worthy of description. MRB Fine 12. (#1018)

### Attractive 1795 C-6a Half Cent, XF40

- 50** 1795 Plain Edge XF40 PCGS. C-6a, B-6a, R.2. Faint traces of Talbot, Allum & Lee token designs remain visible in the fields, especially at the top of the reverse. This sharply detailed piece has pleasing surfaces for its grade. Both sides have a combination of medium and dark brown with steel highlights. MRB VF30. (#1018)

- 51** 1797 1 Above 1, Plain Edge Fine 12 PCGS. C-1, B-1, R.2. Manley Die State 5.0, "very scarce." The ICA in AMERICA, the RTY in LIBERTY, and the nose are weak to absent due to a sinking obverse die. A deep brown example with tan and gunmetal-blue undertones. A couple of hair-thin obverse marks, but the surfaces are generally unblemished. MRB Fine 12. (#1042)

- 52** 1800 AU53 PCGS. C-1, B-1, R.1. Manley Die State 3.0, "Very scarce." This deep brown representative appears bereft of marks and retains glimpses of faded red near the ribbons. The obverse is minutely granular, as is the reverse near 5 o'clock. MRB VF35. (#1051)

- 53** 1803 AU58 PCGS. CAC. C-3, B-3, R.1. Manley Die State 3.0 with a bulge through the 18 in the date. Olive-brown overall with glimpses of red near design elements and one small obverse spot at 3:30. Evenly struck save for the leaves on the right half of the wreath. MRB XF45. Population: 15 in 58, 13 finer (9/09). (#1060)

- 54** 1804 Plain 4, No Stems AU58 PCGS. C-13, B-10, R.1. Manley Die State 2.0. Faded orange-red clings to protected areas, while the fields and highpoints are steel-gray. Smooth aside from a pair of hair-thin marks above CENT. MRB XF45. (#1063)

- 55** 1804 Plain 4, No Stems MS61 Brown PCGS. C-13, B-10, R.1. Manley Die State 2.0. This medium brown Draped Bust type coin provides satin luster and a pleasing strike. Marks are absent aside from a thin line toward the obverse rim at 5 o'clock. MRB AU55. (#1063)

- 56** 1804 Crosslet 4, Stems AU55 PCGS. C-9, B-8, R.2. Manley Die State 1.0. This sharply struck medium brown half cent exhibits luster throughout the hair, wreath, and legends. Devoid of abrasions aside from one thin horizontal mark above the ear. MRB XF40. (#1069)

- 57** 1804 Spiked Chin XF45 PCGS. C-5, B-4, R.4. Manley Die State 5.0 with a heavy bisecting crack across the reverse. A well detailed and unblemished representative with consistent gray-brown color. Much scarcer than C-8 or C-6, the usually encountered Spiked Chin marriages. MRB XF40. (#1075)
- Outstanding 1804 C-7 Half Cent, AU50**
- 
- 58** 1804 Spiked Chin AU50 PCGS. C-7, B-5, High R.4. Breen Die State VIII. Manley Die State 7.0. Perhaps the best known 1804 Spiked Chin half cent variety is Cohen-6, with a nearly unlimited number of die states identified today. Although less well known, C-7 also has many amazing reverse die states from perfect to heavily broken. This example is a later die state, and "known only in lower grades" according to Ron Manley. In 1996 Manley conducted a survey of the variety, locating 100 examples, including 17 of the present die state. The grades of those 17 pieces ranged from Good 4 to VF20, with only four pieces better than VG.
- Both sides of this specimen have bold design details, with the sharpness of XF45 or finer. This piece may have been cleaned and recolored, but exhibits lovely cinnamon and steel-brown surfaces. Although both sides have scattered pit marks and minor scratches, the overall appearance is excellent. It may be one of the finest known for the die state, and ranks high among all known C-7 half cents. MRB VF20. (#1075)
- 59** 1804 Spiked Chin MS62 Brown NGC. C-8, B-7, R.1. Manley Die State 3.0. Golden-brown clings to the design, although the fields and devices are deep brown. Carbon and marks are trivial for the grade, and luster shimmers when the piece is rotated beneath a light. MRB AU55. (#1075)
- 60** 1810 MS61 Brown NGC. C-1, B-1, R.2. This medium brown half cent has shimmering luster and a paucity of marks. The right side stars are lightly impressed. The dies are widely rotated, as is often the case for this conditionally rare Classic Head date. MRB AU50. (#1132)
- 61** 1825 MS62 Brown PCGS. C-2, B-2, R.1. Both varieties of 1825 half cents are elusive and desirable in Mint State grades. This piece has satiny luster with dark brown toning on the obverse and lighter brown on the reverse. Traces of faded red are evident in the obverse fields. MRB AU55. (#1141)
- 62** 1825 MS62 Brown NGC. C-2, B-2, R.1. The more available variety with the curl centered between the last two digits of the date. A pleasing coin with warm rose-gold overtones against the deep chocolate-brown of the surfaces. MRB MS60. (#1141)
- 63** 1825 MS63 Brown PCGS. C-2, B-2, R-1. Manley Die State 3.0, "Scarce." Attractive semi-glossy surfaces display light tan patination with golden undertones and faded steel-blue accents around the borders. The design elements are generally well impressed, though some of Liberty's hair curls and the leaf ribbing on the lower wreath exhibit minor softness. Overall, a pleasing half cent with clean surfaces. MRB AU55. (#1141)
- 64** 1829 MS64 Brown PCGS. C-1, B-1, R.1. Hints of the initial fire-red cling to the devices, but chocolate-brown and steel-blue dominate. Satiny and evenly struck with splendidly mark-free surfaces. A plentiful date in circulated grades, but very scarce in the present quality. Only a single example has been certified as full Red by PCGS. MRB AU55. (#1153)
- 65** 1835 MS63 Red PCGS. CAC. C-2, B-2, R.1. An orange-red Classic half cent that boasts an exacting strike and nearly unmarked fields and devices. Minor carbon is scattered, and open areas have mellowed to steel-gray. MRB MS64. Population: 7 in 63 Red, 34 finer (9/09). (#1170)
- Choice Red C-2 1835 Half Cent**
- 
- 66** 1835 MS64 Red PCGS. C-2, B-2, R.1. Manley Die State 3.0 with reverse die cracks. Orange-gold luster sweeps well struck and nearly mark-free surfaces. One area of darker toning near the Y in LIBERTY is all that limits the grade. Encapsulated in a green label holder. MRB MS64. Population: 29 in 64 Red, 5 finer (9/09). (#1170)
- 67** 1849 Large Date MS64 Brown PCGS. C-1, B-1, R.1. Medium brown with hints of ice-blue. Intricately struck and satiny with a refreshingly mark-free appearance. Very scarce in the present quality. MRB MS60. Population: 19 in 64 Brown, 3 finer (9/09). (#1218)
- 68** 1851 MS65 Brown NGC. C-1, B-1, R.1. Solidly struck with excellent surface quality. Strong medium-brown color shows distinct rosewood accents in parts of the fields. MRB MS60. (#1224)

## PROOF BRAIDED HAIR HALF CENT

### 1844 B-3 Second Restrike Half Cent, PR63 Brown

- 69** 1844 Restrike PR63 Brown PCGS. B-3, R.6. Die file marks at the border above RICA identify this as a Second Restrike half cent. With the sole exception of the 1849 Large Date business strikes, all half cents dated in the 1840s are proof only issues, and they are known by the terms Original, First Restrike, and Second Restrike. This desirable proof is sharply detailed with olive and pale orange surfaces. The fields are moderately mirrored. MRB PR63. Population: 2 in 63 Brown, 5 finer (9/09). (#1275)

## LARGE CENTS

Prized 1793 Chain Cent, AG3  
S-3, B-4, AMERICA

70 1793 Chain AMERICA AG3 PCGS. S-3, B-4, Low R.3. All letters in LIBERTY and the date can be discerned on this widely coveted introductory type coin. On the reverse, ONE CENT, UNITED STATES OF, and ICA are also evident. The chain, of course, is bold. Liberty is well outlined and her eye socket is apparent. Dark and moderately granular with surprisingly few marks. MRB Fair 2. (#1341)

Popular 1793 S-3 Chain Cent, Fine Details

71 1793 Chain AMERICA—Corrosion, Improperly Cleaned—NGC. Fine Details. S-3, B-4, Low R.3. The surfaces are moderately corroded, and the coin has been cleaned and recolored, now with a noticeable violet and gold appearance over the medium brown surfaces. Considerable sharpness remains, including a bold chain, obvious hair detail, and mostly complete lettering. MRB Good 6. (#1341)

Sharp 1793 S-9, B-12 Cent, VF30

72 1793 Wreath Cent, Vine and Bars—Corroded—ANACS. Net VF30. S-9, B-12, R.2. This sharply detailed piece has deep steel surfaces that are mostly smooth, although there are splashes of minor corrosion on the reverse. A great coin for the date or type collector, the S-9 is the most plentiful 1793 Wreath cent variety. This piece will provide a lot of detail for the money. MRB Fine 15. (#1347)

73 1794 Head of 1794 VF30 ANACS. S-57, B-55, R.1. A deep brown example with steel-blue undertones. The rims have a few distributed small dings, the left reverse is mildly granular, the neck has a few hairlines, and a retained lamination passes through the cap. MRB Fine 12. (#901374)

Desirable 1794 S-63 Cent, VF30

74 1794 Head of 1794 VF30 PCGS. S-63, B-37, R.2. The distinctive "Fallen 4" variety. The name for this variety seems incorrect, as the 4 is on the same line as the 1 and 7, but the 9 is high and out of place. Although the surfaces have light verdigris and minor handling marks, this dark brown example is a pleasing representative. MRB VF20. (#901374)

Late State 1794 S-44 Cent, XF40

75 1794 Head of 1794 XF40 PCGS. S-44, B-33, R.1. Breen Die State V. Incorrectly called Head of 1795 on the PCGS holder, this piece is a late die state representative of S-44, with obverse and reverse die cracks. The heavy reverse die crack extends beyond the E in CENT, with a branch down nearly to the right ribbon bow. The surfaces are generally smooth medium brown with some deep reddish patina on each side, and some verdigris on the reverse. MRB VF25. (#901374)

76 1794 Head of 1794—Corrosion, Burnished—NGC. AU Details. S-24, B-8, R.1. Upon first glance, this Liberty Cap cent has excellent eye appeal, since the designs are bold and the medium brown toning is consistent and attractive. Close evaluation reveals moderate pitting, partly concealed by burnishing across the obverse field. MRB VF25. (#901374)

Pleasing 1795 S-78 Cent, XF40

77 1795 Plain Edge XF40 PCGS. S-78, B-8, R.1. Breen Die State IV. Faint clash marks are visible, especially on the reverse of this pleasing cent. The surfaces are dark brown with a few minor blemishes on each side as expected for a moderately circulated piece. The S-78 is the most plentiful 1795 cent, available in a wide range of grades, and ideal for the type collector. MRB VF30. (#1380)

---

Incredible 1796 Double Struck Cent, S-82, Good 6

- 78 **1796 Liberty Cap—Double Struck, Flipover—Good 6 NGC.** S-82, B-3, High R.4. Close date, leaf touches F in OF. This large cent was initially struck approximately 10% off center toward 11 o'clock. The error was detected by mint personnel, and the piece was sent through the dies a second time, this time properly centered. On the obverse (relative to the second strike) ES OF AMERI is visible from the initial strike, and on the reverse, Liberty's profile, pole, and the 796 in the date are recognizable from the first impression of the dies. A deep brown example that has a rough texture to the fields near the second strike portrait. MRB Good 6. (#1392)
- 79 **1798 Second Hair Style XF45 PCGS.** S-166, B-32, R.1. Promptly attributed by the heavy diagonal crack between the fraction and the E in UNITED. Luster emerges from the hair and wreath, and the medium brown toning occasional cedes to tan. A scarce issue in better circulated grades. MRB VF25. (#1434)
- 80 **1802—Environmental Damage—NGC. AU Details.** S-233, B-13, R.2. A well defined deep brown cent with few field marks and no rim detractions. A loupe confirms traces of verdigris, mostly near the bust tip and other design recesses. MRB VF25. (#1470)
- 81 **1802 AU50 PCGS.** S-230, B-8, R.1. Slender die cracks across LIBERTY and the upper reverse aid attribution. The cheek and forehead display light wear, but this brown-gray Draped Bust cent is pleasing aside from a minute obverse rim nick at 4:30 and a couple of faint lines on the cheek. MRB VF30. (#1470)
- 82 **1807/6 Large 7 XF45 PCGS.** S-273, B-3, R.1. Sole die pair for the variety. A luminous violet-brown piece, well struck with glints of gold in the lightly worn fields. Attractive for the grade and housed in a green label holder. MRB VF30. (#1528)
- 83 **1813 XF40 PCGS.** S-292, B-2, R.2. This deep brown example has ample design detail, and is smooth except for two tiny ticks above the O in ONE and a minor reverse rim ding at 5:30. Classic Head cents are notorious for their conditional scarcity relative to their design successors, the Matron Head cents. MRB VF30. (#1570)

---

Lovely 1818 N-10 Cent, MS64 Red

- 84 **1818 MS64 Red PCGS. N-10, R.1.** The famous Randall Hoard was the source of this cent, as it was for most surviving Mint State large cents dated from 1816 to 1820. The hoard is believed to have contained about 15,000 Mint State large cents from that narrow five year period. The 1818 N-10 and 1820 N-13 are the two most plentiful varieties from that hoard. This piece has full deep orange luster with splashes of brown toning and a few minor spots that ensures its originality. The strike is bold with excellent design definition on each side. A peripheral die crack joins the date and most of the stars, and provides instant recognition of the variety. MRB 64. (#1602)
- 85 **1820 Large Date MS65 Brown NGC. CAC. N-13, R.1.** The well known Randall Hoard cent of 1820, popular with type collectors who appreciate the usual spectacular quality of these coins. This boldly defined example has lustrous olive, gold, and steel surfaces with iridescent traces on the reverse. MRB MS60. (#1615)
- 86 **1820 Large Date MS65 Red and Brown NGC. N-13, R.1.** A lovely example of the popular and plentiful N-13 variety that is certainly from the famous Randall Hoard. This variety is an ideal candidate for a type collection due to its availability. MRB MS63. (#1616)
- 87 **1821—Improperly Cleaned—NCS. AU Details. N-2, R.1.** An important and scarce date with only two known die marriages, and no record of any quantity located in hoards. The Randall Hoard consisted of cents from 1816 to 1820. This is a glossy mauve-violet and olive-yellow example that has a few minor field marks, an occasional obverse rim nick, and only a hint of reverse verdigris. The fields are reflective and prooflike, suggesting an early strike just after the few proofs were coined. MRB XF40. (#1621)

- 88 1830 Large Letters MS64 Brown PCGS. CAC. N-1, R.1. The later die state with cracks near the first three stars. Medium to deep brown with glimpses of faded red in protected regions. Nearly devoid of marks. MRB 55. Population: 11 in 64 Brown, 1 finer (9/09). (#1672)
- 89 1834 Small 8, Large Stars, Medium Letters MS64 Brown PCGS. N-2, R.1. Obverse and reverse die cracks are present as always, although this is an earlier die state with little crumbling at the Y. Lustrous surfaces have olive-brown and light blue color with generous portions of orange-red on the reverse. MRB MS60. Ex: Craig A. Stevens Registry Collection of Large Cents (Heritage, 4/2006), lot 285, which realized \$1,610. (#1708)
- 90 1839 Booby Head MS62 Brown NGC. N-13, R.2. Ebony-brown with glimpses of tan and olive. Satiny and crisply struck with minor marks near star 8 and 13. From late in life dies with an orange peel texture (as made) across the fields. MRB MS60. (#1751)
- 91 1839 Booby Head MS64 Brown PCGS. N-7, High R.2. A die crack through stars 4 to 6 helps identify the Newcomb variety of this famous one-year design subtype. This satiny near-Gem has a chocolate-brown obverse and a predominantly olive-brown reverse. Mark-free with one spot on the leaf beneath the C in CENT. MRB MS60. (#1751)
- 92 1850 MS65 Red and Brown NGC. CAC. N-7, R.2. Grellman die state b. The reverse is nearly full Red, and the obverse is 50% Red. Crisply struck save for the usual incompleteness on several stars. No marks are evident, although a loupe locates occasional pinpoint carbon. MRB MS64. (#1890)

## FLYING EAGLE CENTS

### Choice Fine 1856 Flying Eagle Cent

- 93 1856 Fine 15 PCGS. Snow-3. A walnut-brown cent with ample wing feathers despite an extended stint in commerce. Many circulated examples of the 1856 Flying Eagle cent are from Snow-3 dies, since those pieces were struck for non-collectors, namely Washington officials and bureaucrats. Scarcer than the Snow-9 proofs made for collectors a few years after 1856. Encapsulated in a green label holder. (#2013)
- 94 1857 MS64 PCGS. The golden-tan surfaces of this highly attractive near-Gem feature crisply struck design elements, including the eagle's breast, thigh, and tail. A few unobtrusive obverse marks preclude Gem status. (#2016)
- 95 1857 MS64 PCGS. CAC. Pleasing reddish-tan patina enhances the lustrous surfaces of this sharply struck near-Gem. Close inspection with a loupe reveals only a couple of tiny flyspecks and handling marks. An appealing example of this popular issue. (#2016)
- 96 1857 MS64 NGC. Snow-11. The date is repunched with remnants of the original figures just inside the border, although they are extremely faint on this late die state example. A bold strike and stunning gold surfaces characterize this near-Gem Flying Eagle cent. (#2016)

- 97 1858 Large Letters MS64 PCGS. CAC. Golden-gray and light tan patina run over the lustrous surfaces of this near-Gem cent, and an above-average strike delivers excellent detail to the design elements. Small flecks are scattered over both sides. (#2019)
- 98 1858 Large Letters MS64 PCGS. CAC. High Leaves Reverse. Closed E in ONE. This lustrous and smooth near-Gem has orange centers framed by lime-green toning. Well struck except for the eagle's beak and opposite on the cotton leaves. (#2019)

### Exceptional 1858 Large Letters Flying Eagle Cent, MS65

- 99 1858 Large Letters MS65 PCGS. High Leaves Reverse. Closed E in ONE. This marvelously lustrous coin shows beautiful autumn leaves color on each side in deep shades of red with occasional tinges of lime green covering most of the original "white" surfaces of this copper-nickel composition. The design elements are sharply struck throughout and there are no obvious abrasions or noticeable spots. (#2019)
- 100 1858 Small Letters MS64 PCGS. Low Leaves Reverse, Closed E in ONE. Salmon and orange colors with a degree of streakiness at the right obverse and reverse. Striking softness also noted on the right-side devices. Lustrous and pleasing. (#2020)

## PROOF FLYING EAGLE CENT

### Key 1856 Flying Eagle Cent, XF Sharpness

- 101 1856—Repaired, Corroded, Whizzed—ANACS. XF40 Details. Snow-3. The obverse field is repaired above the date and tail, and both sides are granular from thorough whizzing. The reverse has glimpses of aqua-green PVC residue. The eagle's breast displays light wear, but most plumage detail remains. A genuine and affordable example of this famous introductory small cent issue. (#2037)

## INDIAN CENTS

### Essential 1859 Indian Cent, MS66

- 102 1859 MS66 NGC. CAC.** First year of the Indian cent design, and the only year with the laurel wreath reverse, which makes the 1859 an essential one-year type coin. The original "white" surfaces of this 88% copper, 12% nickel composition have taken on a slight overlay of reddish patina. The design elements are well, but not fully defined on each side. Light die cracking indicates the advanced state of this die pairing at the time this coin was produced. Both obverse and reverse are essentially unmarked. (#2052)
- 103 1864 Bronze No L MS66 Red NGC.** Attractive copper-gold color embraces the lustrous surfaces of this Premium Gem while a well executed strike emboldens the design elements. A few light reverse flecks are undisturbing. Census: 27 in 66 Red, 2 finer (9/09). (#2078)

### Elusive 1864 L on Ribbon Cent, MS66 Red

- 104 1864 L On Ribbon MS66 Red NGC.** Bright orange-red surfaces are the first of many appealing features on this Premium Gem Red coin. The bold strike encompasses not only the sharp L on the ribbon but all four diamonds nearby, and all but the first two feather tips. The With L cents are many times rarer than the No L cents, and most are well circulated. This example is one of just seven MS66 Red coins in the combined certified population, four at NGC and three at PCGS, with none numerically finer at either service (9/09). (#2081)
- 105 1869 MS65 Red and Brown NGC.** Variegated orange, sky-blue, and crimson patina resides on the obverse ceding to uniform copper-gold on the reverse. The design elements are quite well struck, featuring sharpness on the diamonds and feather tips. Both sides are nicely preserved. Census: 22 in 65 Red and Brown, 10 finer (9/09). (#2095)
- 106 1869 MS65 Red and Brown NGC.** FS-301, formerly FS-008.3. Snow-3. The 69 in the date is sharply repunched. Lavender centers are surrounded by a peripheral band of original and bright yellow-green luster. The details are nicely struck and seemingly unabraded. Faint fingerprint fragments on the reverse are all that prevent an even higher grade. (#2095)
- 107 1869 MS64 Red PCGS.** A touch of lilac is seen on the bright red-orange surfaces. There are no significant marks. The tips of the Indian's headdress are a trifle soft, but the rest of the details are bold. Housed in a green-label PCGS holder. Population: 42 in 64 Red, 35 finer (8/09). (#2096)

- 108 1870 MS64 Red PCGS.** Freckles of delicate reddish-tan run over the cherry-orange surfaces. Well but not fully struck, with the usual softness seen in some of the feather tips and the reverse shield. A shallow N in ONE is a characteristic of the reverse hub in use from 1864-early 1870, and not due to a weak strike. The surfaces are pristine, save for some minor flecks and a small graze through the I in UNITED. The entire obverse legend is recut, and signs of die clashing are seen, with an obvious impression from the C in CENT in the left obverse field. Population: 72 in 64 Red, 33 finer (8/09). (#2099)

### Splendid 1872 Cent, MS65 Red and Brown

- 109 1872 MS65 Red and Brown NGC.** Bold N in ONE. This issue's original mintage of 4 million pieces is modest by the standards of the Indian cent series. Furthermore, there were few collectors in the United States at the time who cared about preserving pristine Indian cents. These factors combine to explain the high grade rarity of the 1872 today. This is a lovely Gem with rich greenish-brown toning over glossy, partially lustrous features. The surfaces are free of most trivial distractions, and the strike is bold, if not sharp in all areas. (#2104)
- 110 1873 Open 3 MS65 Red and Brown NGC.** Delightful chestnut-brown and rose-red colors mix across the surfaces of this sharply struck Gem. A loupe fails to locate any noteworthy marks. NGC and PCGS combined have certified just five Red and Brown examples finer (8/09). (#2107)
- 111 1873 Closed 3 MS64 Red PCGS.** The 1873 Closed 3 cents are scarcer than their Open 3 counterparts, and Snow (2009) estimates that they account for about 25% of the survivors. As one might expect, Red examples are particularly challenging. Charming light red and tan patina embraces both sides of this lightly abraded piece. A few tiny flyspecks on the obverse barely affect the impressive eye appeal. Population: 17 in 64 Red, 16 finer (8/09). (#2111)

### Doubled LIBERTY 1873 Cent, XF40

- 112 1873 Doubled LIBERTY, Closed 3 XF40 PCGS.** Snow-1b. FS-101, formerly FS-009. A rare and highly collectible doubled die cent. This is an example of pivoted hub doubling with the pivot at 6 o'clock. The most noticeable effect of this doubling is the spread between the letters of LIBERTY on the headband. The surfaces show even brown patina, and the only surface flaws of note are numerous abrasions that are peppered over both obverse and reverse. (#2115)

---

Marvelous 1875 Cent, MS65 Red

- 113 1875 MS65 Red NGC. The 1875 cent is seldom seen with as much bright red-orange patina as the present piece. There is just a touch of light brown color at the center of the reverse. Careful inspection with a loupe reveals only a couple of pin-sized handling marks. This sharply struck Gem would make an excellent representative. Census: 6 in 65 Red, 4 finer (8/09). (#2123)

Desirable XF 1877 Indian Head Cent

- 114 1877 XF40 NGC. A moderately circulated example of this popular key date Indian Head cent. Lovely chocolate-brown patina envelops both sides. A trace of verdigris is seen around a few of the letters on the obverse. The details are well defined, and there are only a couple of inconsequential marks. (#2127)

Lovely XF45 1877 Cent

- 115 1877 XF45 PCGS. A lovely Choice XF representative of this ever-popular key-date Indian cent. Deep teak-brown surfaces exhibit faint gold and rose overtones, mostly at the margins. As befits a coin showing only slight wear, the devices remain bold, and significant marks are virtually absent, hence the XF45 designation. (#2127)

---

Charming Choice XF 1877 Cent

- 116 1877 XF45 PCGS. A lightly circulated example of this ever-popular Indian cent issue. The warm chocolate-brown surfaces are minimally marked, and while slight striking softness is noted at the right obverse lettering, the central definition remains relatively strong. Highly appealing for the XF grade range. (#2127)

---

Coveted MS61 Brown 1877 Cent

- 117 1877 MS61 Brown ANACS. The signature rarity of the Indian cent series, offered here as an unworn example with considerable muted copper-orange mixed in with the violet and rosewood "brown" color. Pleasingly detailed with few abrasions for the grade. A beautiful coin, housed in a small-format ANACS holder. (#2127)

---

Impressive 1883 Cent, MS66 Red

- 118 1883 MS66 Red PCGS. Vibrant red patina covers both sides of this resplendent Premium Gem. A few minuscule flyspecks are barely noticeable without magnification. The strike is razor-sharp, and the surfaces are virtually devoid of any marks. The collector would be hard-pressed to locate a better example. Population: 23 in 66 Red, 7 finer (8/09). (#2147)

- 119 1888 MS65 Red NGC. Attractive red and tan colors blend nicely over the surfaces of this sharply struck Gem. Close inspection under a glass reveals a few minor handling marks on the Indian's cheek. It would be difficult to locate a nicer example. Census: 18 in 65 Red, 3 finer (8/09). (#2168)

- 120 1899 MS66 Red PCGS. CAC. The 8 and second 9 are recut within their lower loops. A lustrous and mark-free Premium Gem that is orange and sun-gold aside from minuscule gray flecks above ONE and on the lower reverse rim. Population: 79 in 66 Red, 9 finer (9/09). (#2204)

121 1909 MS66 Red PCGS. Housed in a green label PCGS holder, this blazing and brilliant Indian cent has bright orange luster with delicate lemon accents. An impressive example with only a few tiny carbon flecks. PCGS has only certified four finer examples. (#2237)

122 1909-S MS63 Red and Brown NGC. Brown hues dominate the centers on this Select piece, but considerable faded reddish-orange clings to the margins. Slight striking softness appears on the tips of the feathers and the portrait's ribbon. (#2239)

## PROOF INDIAN CENTS

### Splendid 1859 Cent, Premium Gem Proof

123 1859 PR66 NGC. CAC. Only about 800 examples of this popular first-year issue were struck in proof format. Bright tan patina and peppered purple accents cover the highly lustrous surfaces of the present coin. A few minor specks and contact marks preclude a Superb Gem grade. This spectacular example would make an excellent addition to a top-drawer Indian Head cent collection. NGC reports only three examples finer (9/09). (#2247)

### Scarce High-Grade 1860 Cent, PR65

124 1860 PR65 PCGS. CAC. Of the 542 proofs struck of the 1860 cent, most show shallowly mirrored fields, field striations, and rounded edges. Conjecture by both Rick Snow and Ron Sirna is that this date was singly struck in proof format. This piece has confirmed reflectivity, but certainly not deep. The surfaces display pale lilac color in the fields with a light overlay of red on each side. Only a few light specks of carbon are present, and most will require magnification to see. Population: 35 in 65, 7 finer (9/09). (#2253)

### Gorgeous 1862 Indian Cent, PR66

125 1862 PR66 PCGS. Even though only 550 proofs were struck for this issue, it is usually more available than the two previous copper-nickel dates, and it also has a reputation for superior striking quality. The surfaces on this piece are exceptionally clean. Each side shows lovely honey-golden coloration with a slight accent of lilac intermixed. A lovely proof representative of the type. Population: 29 in 66, 1 finer (9/09). (#2259)

### Impressive, Strongly Contrasted 1862 Cent, PR66 Cameo

126 1862 PR66 Cameo PCGS. The copper-nickel series from 1860 through 1864 is a short and completable set. But if just one type coin is needed for a 19th century proof type set, the 1862 would be the most likely suspect. There are a surprising number of well-produced, high grade proofs extant. However, this is an exceptional coin even for this year. The surfaces retain much of the original whiteness, seen here more as a pale shade of lilac. Elsewhere there are soft touches of tan present. The fields are deeply mirrored and the devices show strong contrast on each side. Population: 18 in 66 Cameo, 3 finer (9/09). (#82259)

127 1864 Copper-Nickel PR64 PCGS. A touch of light brown patina visits the mostly bright tan surfaces of this highly reflective near-Gem. Several tiny blemishes are noted on both sides, but there appears to be no evidence of contact. (#2265)

### Stunning Cameo PR65 1864 Copper-Nickel Cent

128 1864 Copper Nickel PR65 Cameo PCGS. The 1864 has the lowest proof mintage of all the copper-nickel cents with only 370 pieces struck. While much scarcer than the 1862, the production quality is similar with deeply mirrored fields and several high-grade examples that exhibit frost on the devices—such as this piece. The surfaces are light in color, but not quite original “white” and show an even layer of red patina over each side. The only identifiable irregularity (and a slight one) that helps identify this coin is a patch of pale lilac in the lower left obverse field. Population: 21 in 65 Cameo, 6 finer (9/09). (#82265)

- 129** 1867 PR64 Red PCGS. A needle-sharp specimen with an unblemished and radiant sun-gold appearance. Only a small percentage of proofs from this year have survived in a Choice, relatively unmellowed state of preservation. Eagle Eye Photo Seal card included. Population: 33 in 64 Red, 12 finer (9/09).  
Ex: FUN Signature (Heritage, 1/2003), lot 875; FUN Signature (Heritage, 1/2005), lot 5193. (#2290)
- 130** 1871 PR65 Red NGC. Shallow N in ONE. Copper-gold surfaces display freckles of orange, somewhat more so on the obverse, and a well executed strike results in exquisite delineation on the design elements. There are no remotely consequential marks or carbon. In a prior generation holder. Census: 14 in 65 Red, 2 finer (3/09).  
Ex: Robert R. Rollins Collection, Part One (Heritage, 5/2008), lot 2378, which realized \$2,185. (#2302)
- 131** 1873 Closed 3 PR65 Red PCGS. Since they were struck early in the year, all proof 1873 cents are of the Closed 3 variety. An analysis of surviving examples seems to suggest that the Mint took little care with the preparation of this issue. The fields are usually moderately reflective, at best, and the attenuated nature of Liberty's eye and the first feather in the headdress further suggest excessive die polishing. Writing in 2002, Ron Sirna notes of the proof 1873: "This is a very tough coin to locate in gem full red condition. This is due to the sloppy die preparation, which produced coins that do not seem to excite very often."  
On this fortunate survivor, both the obverse and the reverse are aglow, showing copper-gold luster with some slight muting overall. Suitably vibrant reflectivity shimmers over crisp features that were obviously the recipient of a powerful impression. Some minor carbon spotting serves to limit the already high grade. Population: 27 in 65 Red, 3 finer (8/09). (#2308)

#### Amazing 1873 Closed 3 Indian Cent, PR66 Red

- 132** 1873 Closed 3 PR66 Red NGC. A stunning Premium Gem proof 1873 Closed 3 Indian cent, exhibiting extraordinary design elements and amazing orange proof luster on both sides. Close examination with a glass is required to see the few tiny spots on each side that invariably reside on these early proofs. (#2308)
- 133** 1875 PR66 Red and Brown ICG. A razor sharp specimen with subtle reflective qualities that come alive when held under a good light source. Mottled rose and olive toning along with a conspicuous lack of carbon add to the appeal. (#2313)

#### Full Red PR65 1875 Indian Cent

- 134** 1875 PR65 Red PCGS. With just 700 pieces struck, the 1875 proof cent poses a significant challenge, particularly with fully Red surfaces. The lemon and orange shadings of this Gem create lively eye appeal, and the mirrors are deeply reflective. The strike is complete throughout, and only a single flyspeck is noted just left of 12 o'clock on the obverse rim. Population: 12 in 65 Red, 2 finer (9/09). (#2314)

- 135** 1876 PR66 Red and Brown NGC. Pleasing walnut-brown and red-orange patina coats the lustrous surfaces. A trace of lilac color is seen in the obverse fields. This boldly struck Premium Gem has no marks of any significance and exhibits outstanding eye appeal. Census: 14 in 66 Red and Brown, 4 finer (8/09). (#2316)

- 136** 1878 PR64 Red and Brown Cameo NGC. CAC. This beautiful cent is primarily orange-gold, although cherry-red and jade-green are also evident, especially on the reverse. Flashy and needle-sharp with infrequent pinpoint carbon. (#2322)

- 137** 1880 PR65 Red PCGS. A stunning Gem with attractive light red patina over both sides. The obverse fields are enhanced by a trace of sky-blue color. Several minuscule flecks preclude an even higher grade. A tiny mark near the E in UNITED is noted for future pedigree purposes. Population: 62 in 65 Red, 23 finer (8/09). (#2329)

#### Fire-Red Premium Gem Proof 1883 Cent

- 138** 1883 PR66 Red NGC. Bright, even orange-red color covers both sides of this splendid high grade proof. Deeply mirrored fields and luminous motifs combine to provide noticeable contrast, although this older holder example is undesignated as Cameo. One small obverse spot at 5:30. Census: 3 in 66 Red, 2 finer (9/09).  
Ex: Alex Highland Collection (Heritage, 6/2002), lot 5221. (#2338)

- 139** 1891 PR65 Red PCGS. Pleasing light blue accents visit the deep red surfaces of this appealing Gem. A loupe locates just a few insignificant carbon spots. This outstanding example is encapsulated in a prior-generation PCGS holder. Population: 15 in 65 Red, 4 finer (8/09). (#2362)

- 140** 1901 PR67 Red and Brown NGC. Snow-PR1. The base of the 9 is obviously repunched east. The obverse is fire-red, and the reverse is sea-green and orange. Cartwheel luster abounds despite the proof designation. Snow states business strikes were also coined from these dies, as Snow-13. Razor-sharp and beautiful. In a former generation holder. (#2391)

#### LINCOLN CENTS

- 141** 1909 VDB MS67 Red PCGS. This fully struck fire-red and lime-green Superb Gem has dazzling luster and is bereft of abrasions. Inspection with a lens reveals only infrequent microscopic carbon. (#2425)

- 142** 1909-S VDB VF25 NGC. This series key cent is olive-brown and has pleasing sharpness despite 35 points of wear. The lower reverse has a few gray flecks. A small and inconspicuous spot on the obverse exergue is accompanied by a few faint pinscratches. (#2426)

- 143** 1909-S VDB XF45 NGC. This century-old key date cent is toned deep golden-brown with a blush of gunmetal-blue on each side. Well defined with some remaining luster and a smattering of inconspicuous thin marks. (#2426)

- 144** 1909-S VDB AU55 NGC. Rich chocolate-brown color with elegant gold and blue overtones. This briefly circulated key-date Lincoln cent would make an excellent addition to a same-condition or slightly finer set. (#2426)

- 145** 1909-S VDB MS63 Brown PCGS. Hints of underlying gold luster peek through the layer of tan patina. The design elements are well struck up, including the date, mintmark, and initials. Free of mentionable spots or flecks. Really a nice piece for the designated grade. (#2426)

**Impeccable 1909-S VDB Cent  
MS64 Red and Brown**

- 146** 1909-S VDB MS64 Red and Brown PCGS. This lustrous pumpkin-orange near-Gem approaches a full Red designation, but the open fields have mellowed slightly over the past four score and twenty years. Sharply struck with fully brought up initials and only a single minute fleck above the 0 in the date. (#2427)

**Appealing 1909-S VDB Cent, MS64 Red and Brown**

- 147** 1909-S VDB MS64 Red and Brown PCGS. This is a nice collectible grade and color for many collectors between much-costlier Red Gems and the Brown Lincoln keys and semikeys, which seem underrated but offer fertile collecting opportunities of their own. Much red remains on the present piece, but deeper pinks and oranges also complement. The reverse color offers some true brown along with the considerable red, and appealing luster prevails over all. A sharply struck and appealing example. (#2427)

- 148** 1910 MS67 Red NGC. A peach-red Superb Gem with beautiful peripheral bands of ice-blue, rose, and sun-yellow. Fully struck and lustrous with a nearly pristine reverse. Census: 14 in 67 Red, 0 finer (9/09). (#2437)

**Rich Red Gem 1912-D Cent**

- 149** 1912-D MS65 Red PCGS. Light copper-orange color dominates the eye appeal of this attractive Gem. The well-defined obverse displays beautifully, and both sides are minimally marked. Only a small flyspeck below the RI in AMERICA precludes an even finer designation. PCGS has graded just 11 finer Red representatives (9/09). (#2455)

- 150** 1912-S MS65 Red and Brown PCGS. Copper-gold surfaces are imbued with wisps of light green and reddish-tan. Crisply struck, save for weakness in the rightmost lines of the right wheat stalk. A faint pinscratch is visible on the shoulder. Population: 24 in 65 Red and Brown, 2 finer (9/09). (#2457)

**Attractive 1914-D Cent, AU58**

- 151** 1914-D AU58 PCGS. Glimpses of orange-gold luster show in the recessed areas of this near-Mint State key date Lincoln. The design elements are well defined, including the grains and lines in the wheat stalks. A few small flecks, seen on the majority of '14-D survivors, are concealed within the medium tan patination. (#2471)

**Avidly Sought Select 1914-D Cent**

- 152** 1914-D MS63 Brown PCGS. A satiny key date cent that retains a surprising amount of its initial apricot-gold color. The upper left obverse quadrant offers deep powder-blue patina, and the reverse borders display thin cobalt-blue streaks. Precisely struck throughout and devoid of apparent marks. (#2471)

**Impressive MS63 Brown 1914-D Cent**

- 153** 1914-D MS63 Brown NGC. Chocolate-brown dominates the right obverse, while the left field is sea-green. The reverse is lighter in color and displays chestnut and lime tints. Lustrous and meticulously struck with pleasing surfaces. A famous low mintage key date, less saved than its 1909-S VDB predecessor and 1931-S successor. (#2471)

---

Wonderful 1914-D Cent, MS65 Red and Brown

- 154 **1914-D MS65 Red and Brown PCGS.** This is a wonderful Red and Brown Gem example of this rare date. Its surfaces are devoid of mentionable spots or flecks, an unusual attribute for this issue. In addition, the design elements are sharply impressed, including Lincoln's hair detail and all of the letters. Close inspection reveals no contact marks that are worthy of individual mention. Difficult to locate any finer. Population: 39 in 65 Red and Brown, 0 finer (9/09). (#2472)
- 155 **1914-S MS64 Red and Brown PCGS.** The orange-gold obverse appears full Red, although the reverse field has partially mellowed to steel-gray. Only the O in ONE lacks a precise strike, and pinpoint obverse carbon is all that precludes an even higher grade. Ex: Central States Signature (Heritage, 4/2008), lot 240, which realized \$1,495. (#2475)
- 156 **1918-D MS65 Red and Brown PCGS.** Considerable fire-red beckons from the legends, borders, and device recesses, although apple-green is also prominent. A thin vertical mark left of OF, otherwise exquisite. (#2508)
- 157 **1919-S MS64 Red PCGS.** Ex: Ron Bozarth. Cherry-red and sun-gold enrich this shimmering early branch mint cent. A mark-free near-Gem with just enough carbon on the reverse to deny a higher grade. (#2521)
- 158 **1919-S MS64 Red PCGS.** Housed in a green label PCGS holder, this 1919-S exhibits attractive reddish-gold color with satiny luster. Only a few imperfections or spots are evident on each side. (#2521)
- 159 **1920 MS66 Red PCGS.** An intricately struck pumpkin-orange Premium Gem that has a small area of prooflike luster near UNUM. Splendidly preserved, and carbon is virtually absent. Struck from moderately rotated dies. (#2524)
- 160 **1921 MS66 Red PCGS.** Orange and yellow-green luster emanate from both sides of this exquisitely struck Premium Gem cent. A few tiny reverse flecks are barely noticeable. Population: 60 in 66 Red, 11 finer (9/09). (#2533)
- 161 **1921-S MS63 Red PCGS.** Booming luster and a good strike combine with consistent peach-gold color to ensure the eye appeal. A few minute gray obverse spots near 3 o'clock, and the reverse has two minor retained laminations above the E in ONE and on the LU in PLURIBUS. (#2536)
- 162 **1922 No D Strong Reverse VF25 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. A circulated but problem-free chocolate-brown representative of this famous key date. The portrait appears well worn, characteristic of the variety, but the lines in the wheat ears are bold aside from the one furthest right. (#3285)

---

Desirable 1922 No D Cent, Die Pair Two, XF45

- 163 **1922 No D Strong Reverse XF45 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. The sharp second 2 in the date and the well detailed wheat ears confirm the coveted Strong Reverse die pair. Although moderately circulated, this deep golden-brown example has pleasing surfaces and would occupy a place of honor within a complete collection of Lincoln Wheat cents. (#3285)

---

Pleasing AU 1922 No D, Strong Reverse Cent

- 164 **1922 No D Strong Reverse AU50 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. Faint blue overtones visit the deep walnut-brown surfaces. Both sides offer considerable luster, glossy on the characteristically weak obverse and more luminous on the sharp reverse. Minimally abraded for the grade and a highly desirable example of the variety. (#3285)

---

Superlative MS66 Red 1924 Lincoln Cent

- 165 **1924 MS66 Red PCGS.** All Philadelphia Mint Lincoln cents from the teens and twenties are not created equal. The mintage of the 1924 was "only" 75 million coins, a total dwarfed by 1920's 310 million, for example. This MS66 Red 1924 is one of 65 so graded at PCGS, with three Red coins finer (9/09). Lovely orange-red surfaces are well struck and completely free of visible carbon. The color is even on each side and presents a well-balanced coin. A superlative example. (#2551)

- 166 **1924-S MS63 Red PCGS.** This conditionally rare pumpkin-gold S-mint cent is lustrous and has a mark-free obverse. A few minute ticks on the letters in ONE CENT. An orange peel texture (from die wear) is noted across the obverse border. (#2557)

- 167 **1926-S MS64 Brown PCGS. CAC.** The 1926-S is the key date of the series for those who will only purchase full Red Gems. This satiny example offers orange-red near the margins, but the fields and devices are deep chocolate-brown. Refreshingly unspotted, and also nearly bereft of marks. (#2573)

### Sharp 1926-S Cent, MS64 Red

- 168 **1926-S MS64 Red PCGS.** This low-mintage cent (4,550,000 pieces) is a key date in the Lincoln cent series, and is especially difficult to locate in full Red. Indeed, PCGS and NGC have graded fewer than 100 Red examples in all grades. A scant two of these grade MS65, and none finer!

David Bowers, in his *A Guide Book of Lincoln Cents*, says of the 1926-S: "This is the rarity among pristine (undipped) Mint State Lincolns. Recently, Sam Lukes, a Lincoln cent specialist for many years, stated (in a July 23, 2007 letter to Bowers) that he has never seen a 1926-S that he would call MS-65 Red."

Copper-gold luster is splashed with orange on the reverse of this Red near-Gem specimen, and a well directed strike leaves strong delineation on the design elements. A few minute marks and tiny flecks deny Gem status. Housed in a green label holder. Population: 66 in 64 Red, 1 finer (9/09). (#2575)

### Doubled Die Obverse 1936 Cent MS66 Red, FS-102

- 169 **1936 Doubled Die Obverse Type Two MS66 Red PCGS.** FS-102, formerly FS-015. The date is prominently die doubled, and light doubling is apparent on LIBERTY and TRUST. Three major doubled dies are known for the 1936, making it a cherrypicker's delight. This is a gorgeous pumpkin-gold Premium Gem with exemplary preservation. Minor planchet marks over Lincoln's shoulder were present prior to striking. Population: 11 in 66 Red, 0 finer (9/09). (#2650)

### Lovely, Sharp MS68 1939-D Lincoln Cent Ex: Jack Lee

- 170 **1939-D MS68 Red PCGS.** Ex: Jack Lee. Lovely lime color graces the center, bounded by salmon-pink hues. A pinpoint-sharp and thoroughly lustrous example. The 1939-D is not rare in Mint State, but few Wheat reverse cents of any date (steel cents excepted) exceed the MS67 Red level. Population: 8 in 68, 0 finer (9/09).  
Ex: The Joshua and Ally Walsh Collection of United States Cents (Heritage, 1/2006), lot 282; Jack Lee Collection (Heritage, 12/2008), lot 227. (#2680)

- 171 **1943-D MS68 PCGS.** A well struck and virtually immaculate representative of the zinc-plated steel cent, coined only in 1943 aside from a handful of 1944-dated wrong planchet errors. Lustrous and exemplary. (#2714)

- 172 **1955 Doubled Die Obverse AU58 NGC.** FS-101, formerly FS-021.8. A medium-brown Borderline Uncirculated example of the best known doubled die error in numismatics. Each side has a couple of minor ticks. Unlike most other doubled die varieties, the spread on the obverse legends can be distinguished with the unaided eye. (#2825)

### Coveted 1955 Doubled Die Cent, MS62 Brown

- 173 **1955 Doubled Die Obverse MS62 Brown NGC.** FS-101, formerly FS-021.8. First discovered in 1956, the prominent doubling on the obverse of this famous variety makes it one of the most coveted varieties of 20th century numismatics. This specimen has sharp details with satiny tan surfaces. A few tiny spots limit the grade. Traces of mint red can still be seen on the obverse. (#2825)

### Key-Date 1955 Doubled Die Cent, MS64 Brown

- 174 **1955 Doubled Die Obverse MS64 Brown PCGS. CAC.** FS-101, formerly FS-021.8. A remarkable brown and iridescent presentation is visible on both sides. As always, the doubling is clearly visible, even without magnification. This is a delightful Choice Mint State example of the key date 1955 Doubled Die cent. (#2825)

### Red and Brown MS65 1955 Doubled Die Cent

- 175 **1955 Doubled Die Obverse MS65 Red and Brown NGC.** FS-101, FS-021.8. Dramatic die doubling across all obverse legends distinguishes this famous variety. Blended steel-blue and lavender with generous glimpses of the initial orange-red. Satiny and minimally abraded with a pleasing strike. Scarce as a Gem and especially rare with any remaining red luster. Census: 12 in 65 Red and Brown, 1 finer (9/09). (#2826)

---

## Remarkable AU55 1969-S Doubled Die Obverse Lincoln Cent, FS-101

176 1969-S Doubled Die AU55 PCGS. FS-101, formerly FS-028. The 1969-S Doubled Die is a remarkable rarity in the U.S. coin series, as one of the most prominent Doubled Die Obverse errors in the Lincoln cent series and indeed in all of American numismatics. A second 1969-S issue can sometimes be a major headache for coin dealers and others who specialize in Lincoln cents. Many, many Uncirculated rolls of 1969-S cents show strike doubling—also sometimes called shelf doubling, machine doubling, mechanical doubling, or ejection doubling—and beginning collectors often confuse the two “varieties.” One is remarkably rare and valuable; the other has no numismatic premium.

CONECA, the Combined Organizations of Numismatic Error Collectors of America, designates the 1969-S Doubled Die Obverse as CONECA 1-O-I, meaning it is die #1, with doubling on the obverse, and is a Class I or hub-doubled die. The 1969-S Doubled Die was produced during the manufacture of coinage dies at the Philadelphia Mint, which until 1996 was the sole supplier of dies to the various branch mints.

One of the last steps in production of the finished dies was the application of a mint mark via a punch tool. The working die for the 1969-S Doubled Die was produced when it shifted during annealing or work-hardening, between squeezes or impressions from a working hub. So the true 1969-S Doubled Die, while it shows remarkable separation between the doubled numbers and letters, *shows no doubling on the mint mark*, which was added later on. The separation between LIBER, IN GOD WE TRUST, and the date on the 1969-S Doubled Die is so great that there is “open space” between many of the characters. The strike-doubled 1969-S cents show somewhat flat, shelflike edges to the doubled legends, and the “separation” between the doubled images is minimal.

Although the number of surviving specimens is quite low, Heritage has been privileged to handle a number of recent appearances of this much-sought and dramatic variety. On this piece, the surfaces are a lovely chocolate-brown with faint tinges of original red still remaining around the devices. There is just a touch of rub over the high points of the design. This piece in AU55 is one of four at PCGS, with 11 Brown pieces finer and only 16 finer regardless of color (9/09).

### PCGS Set Registry Notes

This variety is included in the Lincoln Cents with Major Varieties, Circulation Strikes and Proof (1909-Present) collection, where it merits a whopping 10-point bonus. It is also included, of course, in the Lincoln Cents Complete Variety Set, Circulation Strikes and Proof (1909-Present), where it ranks the same. (#2921)

---

## Important MS63 Red 1969-S Doubled Die Cent

177 1969-S Doubled Die MS63 Red NGC. FS-101, formerly FS-028. This impressive variety has a rarity factor of "URS-6" according to the most recent edition of the *Cherrypickers' Guide*, a figure that suggests survival of between 17 and 32 pieces. While it is not so famous as doubled dies such as the 1955 and 1972, owing to its rarity, the 1969-S Doubled Die cent has seen several recent high-profile auction appearances that have raised its prominence.

In the 40 years since it was struck, the 1969-S Doubled Die cent has seen much controversy, most of it in its first years. Q. David Bowers writes in his *Guide Book of Lincoln Cents* that due to the appearance of counterfeit Philadelphia 1969 cents that simulated broad doubling, the initial government reaction was hostile: "The Secret Service went on a witch hunt for these, believing that they were counterfeit in the style of [the] fake Philadelphia Mint doubled dies ... By the time these were acknowledged as legitimate, five genuine coins had been destroyed ...".

This example is one of the survivors, whose true numbers are likely on the low end of the "17 to 32" range. Each side has fresh lemon-copper luster with just a bit of orange. Though faint, scattered abrasions are the norm and several copper spots are present on the reverse, neither type of fault affects the bold doubling that has captivated collectors. A great opportunity to own this famous Lincoln cent rarity, worth 10 points each in the PCGS Set Registry, Major Varieties and Complete Varieties Lincoln cent collections. (#2923)

## PROOF LINCOLN CENTS

- 178 1909 PR64 Red and Brown PCGS.** Generous blushes of plumbed red embrace the right obverse and the left reverse. Otherwise, this exactingly struck near-Gem is orange throughout. Bereft of contact, and pinpoint carbon is barely present.  
Ex: FUN Bullet (Heritage, 1/2002), lot 242. (#3304)

Incredible 1913 Lincoln Cent, PR67 Red

- 179 1913 PR67 Red NGC.** One of the most beautiful 1913 matte proof Lincoln cents any collector could imagine, this Superb Gem proof has brilliant orange luster with bold design elements and flawless satin surfaces. It would be a difficult task to form a set matched to this piece. Census: 5 in 67 Red, 0 finer (9/09). (#3317)

Rich PR66 Red Satin Finish 1936 Cent

- 180 1936 Type One—Satin Finish PR66 Red NGC.** The sharp strike and vivid copper-orange color of this Premium Gem cement its eye appeal. Both sides have wonderful, quasireflective satiny luster that is excellent for the type. Despite their popularity today, the Satin Finish 1936 proof cents were disliked by many collectors of the day, and later that same year, Brilliant Finish coins replaced them. (#3332)

Gorgeous 1936 Type Two Cent, PR66 Red

- 181 1936 Type Two—Brilliant Finish PR66 Red NGC.** A remarkable and fully brilliant Premium Gem with rich orange proof surfaces. The fields are fully and deeply mirrored with only a hint of frost on the devices. The use of a strong magnifier fails to reveal any spots or other imperfections on this pristine cent. Census: 20 in 66 Red, 2 finer (9/09). (#3335)

- 182 1956 PR67 Deep Cameo PCGS.** Marvelous orange-gold surfaces have been lovingly preserved. Well struck design features stand out against the deeply mirrored fields. Population: 33 in 67 Deep Cameo, 6 finer (9/09). (#93377)

- 183 1971-S Doubled Die Obverse, Type One PR67 ★ Red NGC.** FS-102, formerly FS-033. A bold obverse doubled die with the spread most prominent on LIBERTY and IN GOD WE. Gleaming copper-gold surfaces show only a couple of tiny flyspecks on the obverse. (#3548)

## TWO CENT PIECES

- 184 1864 Small Motto MS63 Brown NGC.** FS-401, formerly FS-000.5. This sharply struck Select representative has ample glimpses of orange-gold, particularly on the obverse. The reverse is predominantly medium brown, as are portions of the obverse. The introductory Small Motto subtype was only coined briefly, and constitutes a mere fraction of the 1864 two cent production. (#3579)

- 185 1868 MS65 Red and Brown PCGS.** Peppered light brown and lavender accents intermingle with tan patina on the surfaces of this carefully preserved Gem. There are only a couple of nearly imperceptible carbon spots. The strike is razor-sharp. Population: 37 in 65 Red and Brown, 3 finer (8/09). (#3598)

## PROOF TWO CENT PIECES

Delightful 1865 Two Cent, PR65 Red

- 186 1865 PR65 Red PCGS.** Plain 5. A hint of sky-blue in the margins and tan patina on the center of the reverse blends with the bright rose-red patina that covers the majority of the surfaces. Several tiny carbon spots are seen on both sides, but none are significant. One of about 500 proofs issued. Population: 16 in 65 Red, 8 finer (8/09). (#3629)

- 187 1867 PR65 Red and Brown PCGS.** Whispers of olive-green and crimson visit the luminous copper-gold surfaces of this Gem two cent proof, and a well executed strike leaves complete delineation on the design elements. Devoid of mentionable contact marks or spots. Population: 47 in 65 Red and Brown, 7 finer (8/09). (#3634)

Flashy 1869 Two Cent, PR65 Red

- 188 1869 PR65 Red NGC.** The highly reflective surfaces exude bright red-orange color, with peppered lilac accents on the reverse. A few nearly microscopic blemishes preclude an even higher grade. This fully struck Gem has spectacular eye appeal. Housed in a prior generation holder. Census: 14 in 65 Red, 8 finer (8/09). (#3641)

189 1870 PR65 Red and Brown PCGS. Wafts of mahogany-brown and faint purple combine with bright tan patina on the surfaces of this boldly struck Gem. Several tiny flyspecks are noted, but both sides appear virtually devoid of any contact. PCGS has certified just 12 Red and Brown examples finer (8/09). (#3643)

190 1872 PR64 Red and Brown NGC. Moderately reflective fields highlight the crisply defined motifs at most angles. The copper-gold surfaces are devoid of spots or flecks. 1872 proofs are highly sought because of the scarcity of business strikes. (#3649)

191 1872 PR64 Red PCGS. Exquisitely struck devices stand out against the reflective fields, more so on the obverse. Soft copper-gold, bluish-violet, and purple coloration visits both sides. Some tiny flecks are noted on the obverse. Housed in a green label holder. Population: 28 in 64 Red, 49 finer (9/09). (#3650)

### Appealing 1873 Closed 3 Two Cent PR66 Red and Brown

192 1873 Closed 3 PR66 Red and Brown NGC. The 1873 Closed 3 two cent piece was the final issue in the series and only about 600 specimens were struck, all in proof format. The obverse of this highly lustrous piece is mostly red, while the reverse has a touch of light brown patina over the center. Several minor carbon spots do not distract. A fully struck and well preserved representative. Census: 34 in 66 Red and Brown, 2 finer (8/09). (#3652)

## THREE CENT SILVER

### Colorful Gem 1857 Three Cent Silver

193 1857 MS65 PCGS. The 1850s through the start of the Civil War were the heyday for this "oddest" denomination, which after 1862 never saw a business-strike emission greater than the five-figure range. The 1857 production was 1.04 million coins, but Gems are much more plentiful than the next grade level finer. This MS65 example boasts silvery centers with a blush of color that deepens at the rims to blue and violet. Population: 35 in 65, 6 finer (9/09). (#3673)

194 1858 MS64 PCGS. A nearly brilliant Choice example with beautifully smooth fields and slight inexactness of strike on the shield. Last year of the scarce Type Two design. Encapsulated in a green label holder. (#3674)

### Pleasing Gem 1858 Three Cent Silver

195 1858 MS65 NGC. Light blue-green and olive peripheral elements frame pale silver-gray centers on this attractive, slightly satiny trime. Both sides are keenly detailed save for slight softness at the lower reverse stars. Marks are minimal. NGC has graded just 29 numerically finer pieces (9/09). (#3674)

### Superlative 1860 Three Cent Silver, MS67 ★

196 1860 MS67 ★ NGC. The only business strike 1860 three cent silver to receive NGC's coveted Star designation, the present piece has vivid iridescent obverse toning with cerulean, lilac, and violet predominating. The reverse is mostly untoned, except around the margin. This piece is tied for numerically finest with two other coins (9/09). A superlative example. (#3678)

197 1862 MS65 NGC. CAC. Blue-green, peach, and antique-gold shadings drape the fields of this Gem. Great liquid luster beneath the patina. Strong eye appeal for this issue, the last business strike to escape the mass melting of trimes in 1873. (#3680)

### Noteworthy 1862/1 Three Cent Silver, MS67

198 1862/1 MS67 PCGS. FS-301, formerly FS-007. The underdigit 1 is visible along the left side of the 2. As a Guide Book variety, this overdate appeals to a broad range of collectors, and a Superb Gem such as the present piece is a prize for the most discerning of numismatists. Hints of golden toning grace bright surfaces that are otherwise silver-white. Struck from clashed dies. Population: 12 in 67, 0 finer (9/09). (#3681)

199 1865 AU55 PCGS. Interestingly, according to Walter Breen (1988), this issue was unknown to exist in business strike form until discovered in 1956. Breen also indicates that most of the 8,000-piece circulation strike mintage was likely melted in July 1873. Soft champagne-gray patina rests on both sides of this Choice AU specimen, each of which exhibits a relatively sharp strike and clean surfaces. Clash marks occur on both obverse and reverse. Housed in a green label holder. (#3685)

### Pleasing 1871 Three Cent Silver, MS66 Prooflike

- 200 1871 MS66 Prooflike NGC. A mere eight 1871 three cent silver pieces out of a business strike mintage of 3,400 pieces have been designated as prooflike by NGC. The frosty devices of this Premium Gem specimen are nicely highlighted by the mirrored fields. Swaths of reddish-brown toning are deeper in hue on the obverse. Sharply struck and well preserved. Census: 2 in 66 Prooflike, 3 finer (9/09). (#3692)

### Exceptional 1871 Three Cent Silver MS67 Prooflike

- 201 1871 MS67 Prooflike NGC. An extraordinary 1871 three cent silver piece with deeply reflective surfaces that show attractive copper-gold and steel-blue iridescence. Just 3,400 business strikes were issued and the bulk of high grade survivors traces back to a single well-preserved hoard. Census: 16 in 67 Prooflike, 3 finer (9/09). Ex: New York Signature (Heritage, 7/2002), lot 6301. (#3692)

### Patinated Select 1872 Three Cent Silver

- 202 1872 MS63 NGC. One of just 1,000 pieces coined for this final business strike three cent silver issue, one that was heavily melted the next year. This Select survivor has characteristically reflective fields beneath rich blue-green and violet toning that also shows orange at the center of the reverse. Census: 6 in 63, 24 finer (9/09). (#3693)

### PROOF THREE CENT SILVER

#### Colorful 1856 Three Cent Silver PR64

- 203 1856 PR64 PCGS. Sun-gold, powder-blue, and lavender encompass the obverse of this fully struck Choice proof. The reverse displays consistent light honey patina. The 1856 proof mintage is unknown but undoubtedly low, probably 100 or fewer pieces. Population: 20 in 64, 3 finer (9/09). (#3703)

#### Rare 1857 Type Two Three Cent, PR63

- 204 1857 PR63 NGC. Both sides of this scarce Type Two proof three cent silver piece have light gray patina over mirrored fields and reflective devices. A trace of gold toning is evident on each side. While all five years of Type Two coins are known in proof, every date is rare in that format. Census: 4 in 63, 27 finer (9/09). (#3704)

#### Scarce Type Two 1857 Three Cent Silver, PR66

- 205 1857 PR66 NGC. Ex: Pittman. Pre-1858 proof three cent silver is rare. Akers in 1997 estimated that only 40 to 50 proof 1857 three cent silvers are known. The flashy mirrors and razor-sharp strike of the present specimen leaves no doubt concerning its status as a proof. The outlines of the shield are fully brought up, as are the centers of each tiny star that adorns the reverse margin. Attractively toned with delicate autumn-gold and deep blue on the obverse, while the reverse is peach aside from a brilliant-lilac center. Flawless except for a couple of trivial mint-made strike-throughs on the Roman numerals. Census: 5 in 66, 3 finer (9/09). Ex: 91st Sale, Barney Bluestone, 2/1946; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 407. (#3704)

- 206 1859 PR64 PCGS. The green-gold and blue peripheral shadings on each side are more intense on the reverse. Sharply struck with gleaming field luster, though a number of minor hairlines are also seen. Population: 45 in 64, 17 finer (9/09). (#3708)

**207** 1863 PR65 PCGS. CAC. Pinpoint-sharp and flashy despite comprehensive ocean-blue, lavender, and lime toning. Just 460 proofs were produced, along with only 21,000 business strikes, since silver coins failed to circulate in most sections of the nation. Encased in an old green label holder. Population: 21 in 65, 7 finer (9/09). (#3712)

**208** 1866 PR64 Cameo NGC. The highly reflective fields show impressive cameo contrast against the frosted devices. A loupe fails to locate any distracting marks. A sharply struck and brilliant specimen. Census: 13 in 64 Cameo, 17 finer (8/09). (#83716)

**209** 1866 PR64 Cameo PCGS. CAC. A sharply struck and essentially untoned Choice proof. White on black contrast is consistent throughout both sides. From a low proof mintage of 725 pieces. Population: 9 in 64 Cameo, 13 finer (9/09). (#83716)

#### Glittering 1868 Silver Three Cent, PR66

**210** 1868 PR66 PCGS. This glittering proof has incredible eye appeal with deep blue and iridescent toning on both sides, over deeply mirrored fields with noticeable underlying cameo contrast. This important proof is a remarkable coin that is destined for the finest specialized cabinet or advanced type set. (#3718)

**211** 1868 PR64 Cameo PCGS. CAC. A razor-sharp Choice proof with lovely chestnut-gold, plum-mauve, and electric-blue tints that are most prominent across the peripheries. A well mirrored specimen with frosty motifs. Just 600 proofs were issued. Population: 13 in 64 Cameo, 12 finer (9/09). (#83718)

#### Desirable PR66 1869 Three Cent Silver

**212** 1869 PR66 NGC. The upper left obverse and lower right reverse show swaths of blue-green and lavender toning, while dots of similar color grace the margins. The central obverse has a faint rose-gold tint, while the reverse is gleaming silver-white. Great eye appeal for this issue of just 600 pieces. Census: 17 in 66, 8 finer (9/09). (#3719)

**213** 1873 PR64 PCGS. CAC. Blue-green hues fill the obverse, while the reverse has lighter rose and aqua accents. Precisely struck and undisturbed with a few brief lintmarks (as made) on the central reverse. Closed 3, as is the case for all known examples of this elusive proof-only final-year issue. (#3724)

#### Astounding PR67 ★ Cameo 1873 Three Cent Silver

**214** 1873 PR67 ★ Cameo NGC. A singularly beautiful Superb Gem specimen of this final-year proof-only issue. At first glance, the rose and blue toning at the centers appears to be the lightest patina on the coin, but then at a different angle, the formerly "black" mirrors come to life with pale sea-green color. Incredibly appealing and tied for numerically finest Cameo coin in the combined certified population (9/09). (#83724)

### THREE CENT NICKELS

**215** 1868 MS66 PCGS. Gentle powder-blue and chestnut color graces this lustrous, undisturbed, and pleasingly detailed Premium Gem. Great visual appeal. Population: 29 in 66, 1 finer (9/09). (#3734)

**216** 1873 Closed 3 MS65 PCGS. Variegated almond-gold and silver-gray invigorate this satiny and mark-free Gem. Well struck overall with minor incompleteness on the middle of the first denominational pillar. Encapsulated in a green label holder. Population: 31 in 65, 9 finer (9/09). (#3739)

**217** 1881 MS66 PCGS. CAC. This outstanding Premium Gem is lustrous and virtually untoned. The strike is unimprovable, and there is no indication of contact. The 8s in the date are lightly repunched. The mintage of three cent nickels soared in 1881, then returned to token levels for the remainder of the series. Population: 43 in 66, 7 finer (9/09). (#3749)

### PROOF THREE CENT NICKELS

#### Low Mintage 1865 Three Cent Nickel, PR65

**218** 1865 PR65 NGC. The 1865 was the first year of issue for the three cent nickel, and only a small number of proofs were produced (estimated around 500 pieces). Far fewer are known today and many of those are cleaned or otherwise impaired, compared to the dates in the 1880s. This is an untoned example with nicely reflective mirrors in the fields, and there are no obvious or detracting marks on either side. Census: 57 in 65, 15 finer (9/09). (#3761)

**219** 1869 PR66 Cameo NGC. Light golden toning endows the unperturbed fields and intricately struck devices. An outstanding representative of this Reconstruction issue. A mere 600 pieces were coined. Census: 25 in 66 Cameo, 5 finer (9/09). (#83765)

- 220** 1870 PR66 Cameo PCGS. CAC. The early years of the three cent nickel series all had low mintages in proof format. In 1870 the mintage “spiked” to 1000 pieces. However, this larger mintage did not translate into a significantly larger number of high grade proofs that were saved. Only six other PCGS PR66 Cameo pieces have been certified with none finer (9/09). This is a beautiful and powerfully impressed example whose vibrant powder-blue surfaces have a touch of pastel lavender here and there. (#83766)

**Impressive PR67 1871 Three Cent Nickel**

- 221** 1871 PR67 NGC. Exquisitely detailed, even by proof standards, as evidenced by the individual hair strands in the curl over Liberty's ear. Minimally toned with flashy mirrors and eye appeal in spades. One of eight pieces awarded the PR67 grade by NGC, with none finer and none at that level known to PCGS (9/09). (#3767)

- 222** 1872 PR66 PCGS. Pale powder-blue patina complements the lavender-gray shadings on each side of this Premium Gem proof. Carefully preserved with elegant eye appeal. Population: 15 in 66, 0 finer (9/09). (#3768)

- 223** 1874 PR66 Cameo NGC. Essentially untoned surfaces exhibit crisp design elements. A few minuscule spots run over each side. Census: 23 in 66 Cameo, 5 finer (9/09). (#83770)

- 224** 1875 PR65 PCGS. CAC. A precisely struck Gem that boasts exemplary preservation. Both sides have pleasing light gray surfaces with wisps of gold and ice-blue toning. Encased in a green label holder. Just 700 proofs were struck. (#3771)

**Amazing PR66 Cameo 1877 Three Cent Nickel**

- 225** 1877 PR66 Cameo NGC. Pale champagne and nickel-white zones merge into one another on this charming Cameo coin, from a proof-only issue with a mintage slightly north of 510 pieces. Well struck with gleaming mirrors beneath the patina and readily appreciable contrast. Census: 44 in 66 Cameo, 15 finer (9/09). (#83773)

- 226** 1883 PR67 NGC. CAC. This Superb Gem proof displays a great deal of field-motif contrast on both sides, each of which displays soft gold, powder-blue, and lavender coloration. Crispy struck, including the lines in the III. Some tiny flecks do not detract. Census: 82 in 67, 4 finer (9/09). (#3779)

- 227** 1883 PR67 Cameo NGC. CAC. A pinpoint-sharp Superb Gem with imposing field reflectivity and noticeable white on black contrast. The wreath and portrait are particularly frosty. Census: 19 in 67 Cameo, 4 finer (9/09). (#83779)

- 228** 1885 PR67 PCGS. CAC. Pinpoint-sharp and essentially brilliant with flawless surfaces. This satiny Superb Gem appears unimprovable unless cameo contrast is requisite. Population: 31 in 67, 1 finer (9/09). (#3781)

**Stunning PR68 ★ Cameo  
1885 Three Cent Nickel**

- 229** 1885 PR68 ★ Cameo NGC. The 1885 proof three cent nickel, while not a particularly scarce issue overall, is popular thanks to its association with the same year's business strike mintage of just 1,000 pieces. More than that, condition rarity is key to this remarkably well-preserved coin's eye appeal. Among Cameo specimens of the issue known to NGC and PCGS, this is the only PR68 coin certified with none finer (9/09); that NGC gave it a well-deserved Star designation is simply icing on the cake. Just a blush of champagne-rose toning visits the centers, where thick frost drapes the devices, and the gleaming mirrors are nickel-white. (#83781)

- 230** 1887/6 PR66 Cameo NGC. The underdigit 6 is obvious, and the 8s are also recut. Fully struck and flashy with seamless surfaces and pleasing frost on the portrait and wreath. The reverse displays faint apricot toning. Census: 24 in 66 Cameo, 13 finer (9/09). (#83784)

## SHIELD NICKELS

Exceptional 1866 Rays Nickel, MS66

- 231** 1866 Rays MS66 PCGS. Freckles of tan-gold reside on the lustrous surfaces of this first-year-of-issue With Rays nickel. The design elements are better struck than usually seen and both sides are devoid of significant die cracks. All in all, this piece displays much better eye appeal than the typical representative. Population: 27 in 66, 0 finer (9/09). (#3790)

Lustrous Gem 1866/1866 Rays Nickel, FS-301

- 232** 1866/1866 Rays MS65 NGC. VP-002, FS-301, formerly FS-001. Fletcher-08. All four date digits are repunched prominently, with the first set visible without a loupe east of and higher than the second set. There are three other similar Repunched Date varieties listed in Fletcher and Cherrypickers' for the 1866 Rays. While the Mint had made copper-nickel Indian cents since 1859, that composition was 88:12 copper to nickel. The three cent nickels that debuted in 1865 and the 1866 Shield nickels were a much-harder 75:25 composition—one that the Mint employees clearly had much more difficulty in both die and coin production, judging by the many errors from the first years of both denominations. This piece has generous luster radiating from pristine nickel-gray surfaces. The strike is absolutely marvelous, and wispy die cracks on each side add even more character. (#93790)

Pristine Superb Gem 1883 Shield Nickel

- 233** 1883 MS67 NGC. Four varieties of 1883 nickel can be collected, including the popular but elusive 1883/2 overdate Shield nickel, the regular business strike (or proof) Shield (as here), and the With Cents and No Cents Liberty nickels. Like many examples of this Shield nickel issue, this piece shows a die crack from the rim through the 3 in the date and the ball above. The nickel-gray surfaces are essentially devoid of either color or contact. Neither NGC nor PCGS has ever certified a finer specimen (9/09). (#3813)

## PROOF SHIELD NICKELS

Wonderful 1866 With Rays Nickel, PR66

- 234** 1866 Rays PR66 PCGS. CAC. A sensational representative of the new Shield nickel design, struck in the first year of the denomination. This proof is the only collectible proof of the With Rays design, and the present example has gorgeous gray and pale gold surfaces. Population: 42 in 66, 1 finer (9/09). (#3817)

Starkly Contrasted 1866 With Rays Nickel, PR66 Cameo

- 235** 1866 Rays PR66 Cameo PCGS. Here is one of the finest 1866 With Rays Shield nickels available to collectors, with deeply mirrored fields, lustrous devices, and excellent cameo contrast. Few finer examples have ever been certified, and Deep Cameo proofs are extremely rare, with only two such pieces certified by PCGS. Population: 29 in 66 Cameo, 3 finer (9/09). (#83817)

Deeply Mirrored 1867 No Rays Nickel  
PR65 Cameo

- 236** 1867 No Rays PR65 Cameo PCGS. Reverse IIa. With an estimated proof mintage of 600 pieces, the 1867 No Rays Shield nickel is a rare coin at the Gem proof level. This specimen features a complete strike and reflective fields, culminating in the coveted Cameo designation. A die line is visible in the left obverse field, near the arrowhead. A few wisps of gold and lilac accent the brilliant surfaces. Population: 30 in 65 Cameo, 7 finer (9/09). (#83821)

- 237** 1872 PR66 PCGS. CAC. Luminous nearly untoned surfaces exhibit boldly impressed devices save for minor softness on some of the horizontal shield lines. Impeccably preserved throughout. Population: 42 in 66, 2 finer (9/09). (#3826)

- 238** 1876 PR66 PCGS. A crisply struck Centennial coin with lovely olive-green, sun-gold, and apricot toning. A solitary minuscule fleck is noted on the center of the shield. Population: 29 in 66, 1 finer (8/09). (#3830)

**Sharp PR67 1878 Nickel**

- 239** 1878 PR67 NGC. While this proof-only issue is not so elusive as its 1877 counterpart, it is a prize nonetheless, particularly at the Superb Gem level. This mildly contrasted, boldly impressed specimen has pastel blue and yellow patina over gleaming fields. Census: 20 in 67, 0 finer (9/09). (#3832)

- 240** 1879 PR66 ★ Cameo NGC. CAC. This nearly untoned Premium Gem has flashy fields and consistent frost throughout the motifs. Precisely struck and appealing. Census: 1 in 66 ★ Cameo, none finer with a Star designation (9/09). (#83833)

- 241** 1880 PR66 Cameo PCGS. Whispers of barely discernible champagne-gold color adhere to the cameoed surfaces of this Premium Gem. Sharply struck and devoid of mentionable contacts or spots. Population: 63 in 66 Cameo, 14 finer (9/09). (#83835)

**The Only 1880 Nickel Certified as Ultra Cameo by NGC, PR66**

- 242** 1880 PR66 Ultra Cameo NGC. As of (9/09), NGC has certified only one Ultra Cameo proof 1880 Shield nickel, which constitutes the present lot. As one might expect from its unique designation, this untoned Premium Gem has flashy fields and frosted designs. A minute retained lamination on the right arrow and a single tick to the lower right of the prominent 5 are all that deny perfection. (#93835)

- 243** 1881 PR67 Cameo NGC. Delicate gold and ice-blue accents invigorate this moderately contrasted Superb Gem. A tiny planchet flaw is noted in the area of the shield, but these do not affect the technical grade and the eye appeal is unhindered. With just one finer Cameo example known to NGC (2/09), this is a top-flight survivor. (#83836)

- 244** 1882 PR67 PCGS. The obverse and reverse fields of this Superb Gem proof are moderately reflective around frosty devices. This sharply struck specimen is enhanced by wispy gold toning. Population: 39 in 67, 0 finer (8/09). (#3837)

**LIBERTY NICKELS**

**Elusive 1886 Liberty Nickel, MS64**

- 245** 1886 MS64 PCGS. A wonderful Mint State example of this scarce date, one of the most difficult in the series. In fact, the 1885 is more highly regarded, but the 1886 in Mint State is possibly more difficult to locate. And the presence of two such pieces in this sale provides collectors with an extremely important opportunity. This Choice Mint State example has delightful satin luster with pale gold toning on both sides. PCGS has only certified 38 finer examples (9/09). (#3847)

## Sparkling, Nearly Perfect 1886 Liberty Nickel MS66, Tied for Finest Certified

**246** 1886 MS66 NGC. CAC. Traditional wisdom held for many years that the 1885 Liberty nickel was significantly scarcer than the 1886, and prices reflected this perception. That was not the case in reality, however, and with 23 years of certification data we now have empirical data to support the two years' equivalency. When one adds up all the coins certified by both of the major services the 1885 has had 424 pieces graded from MS60 through 67, while the 1886 has had 421 coins certified from MS60 to MS66. Notably, there are no pieces finer than MS66 (the grade of the present piece) among 1886 nickels. And there are only four such coins certified by NGC (9/09).

The surfaces of this exemplary coin are bright and present sparkling mint luster. Each side is essentially untoned, although there is a short, vertical grease stain (as struck) on the upper neck of Liberty that allows easy identification in the future. The devices are sharply struck throughout with complete definition on the star radials and hair curls, just the slightest softness can be made out on the left ear of corn on the reverse. As one would expect, the surfaces are free from any distracting abrasions.

This piece will undoubtedly find a place in the collection of an advanced collector of Liberty nickels. (#3847)

**247** 1888 MS65 PCGS. CAC. The second 8 is lightly repunched north. Light tan and stone-gray toning endows this lustrous and unabraded Gem. A crisp strike except for the left ear of corn. Population: 41 in 65, 11 finer (9/09). (#3849)

**248** 1891 MS65 ★ NGC. This coin and a single MS66 are the only two NGC certified coins that carry the coveted ★ designation. This piece has exceptional blue, violet, amber, and rose toning with frosty luster. The surfaces are delightful. Among 19th century Liberty nickels, the 1891 is an elusive date. (#3852)

**249** 1893 MS65 Prooflike NGC. This lightly toned Gem has dazzling luster and no remotely reportable marks. The strike is sharp save for the first two stars and the left ear of corn. A lower mintage date that becomes elusive in higher Mint State grades. As of (9/09), the only 1893 nickel certified as Prooflike by NGC. (#3854)

## Brilliant 1893 Liberty Nickel, MS66

**250** 1893 MS66 NGC. A fully brilliant Premium Gem, this 1893 Liberty nickel has frosty luster with nickel-gray surfaces and splashes of pale gold toning. The date is one of many rarities in the nickel series in such a fine grade. The population data tells the entire story. Census: 7 in 66, 2 finer (9/09). (#3854)

## Amazing Superb Gem 1899 Nickel

**251** 1899 MS67 NGC. Striking orange, rose, and olive-gray tints consume the satiny surfaces of this delightful Superb Gem. Overall definition is excellent, though softness is noted at star 1 on the obverse and the lower left ear of corn on the reverse. One of just four MS67 coins graded by NGC with none numerically finer (9/09). (#3860)

**252** 1900 MS66 PCGS. Caramel-gold and gunmetal-gray embrace this lustrous and sharply struck Premium Gem. Only star 7 lacks a complete impression. Among the nicest survivors from this turn of the century date. Population: 41 in 66, 5 finer (9/09). (#3861)

**253** 1903 MS66 PCGS. CAC. The base of the 1 in the date is obviously repunched. A remarkable Premium Gem with vivacious luster, light golden toning, a good strike, and nearly pristine preservation. Population: 73 in 66, 2 finer (9/09). (#3864)

**254** 1912-S AU55 PCGS. The cream-gray and tan-gold toning is illuminated by luster near the borders. This problem-free key date nickel is distinguished by a radial die crack on the reverse at 10:30. (#3875)

**255** 1912-S MS62 PCGS. Rich peach, powder-blue, lemon, and mauve toning endows this satiny, unmarked, and typically struck example. A popular and low mintage San Francisco issue from the only mintmarked year of the type. (#3875)

## PROOF LIBERTY NICKELS

- 256** 1883 No Cents PR66 PCGS. CAC. Lemon-gold and powder-blue with an intricate strike and a virtual absence of carbon or contact. An exemplary Premium Gem of this single year design. Encapsulated in a green label holder. Population: 90 in 66, 4 finer (9/09). (#3878)

### Popular 1883 No Cents Nickel, PR67

- 257** 1883 No Cents PR67 NGC. This one-off proof issue has become immensely popular with type and date collectors alike, and demand for the highest-graded examples, Superb Gems such as the present piece, far outstrips supply. This specimen sports pale blue and peach toning, the latter color appearing mostly on the reverse. A tiny contact mark is noted within the wreath. Census: 20 in 67, 0 finer (9/09). (#3878)

- 258** 1883 With Cents PR67 NGC. Beautifully patinated in orange, honey-gold, and steel-blue. Sharply struck and satiny with impeccable preservation. The 3 in the date is lightly repunched. Among the highest mintage 19th century proof issues, but the sole date of the With Cents type. Census: 11 in 67, 0 finer (9/09). (#3881)

- 259** 1885 PR63 NGC. Peppered russet toning combines with silver-gray on the obverse, while the reverse has an additional light blue tint. A tiny mark to the left of Liberty's eye is barely worthy of mention. Only 3,790 proofs were struck. (#3883)

### Remarkable PR67 Cameo 1885 Nickel

- 260** 1885 PR67 Cameo PCGS. CAC. Exquisitely detailed with distinct contrast, though the frost across the devices is light. Scarcely toned surfaces are wonderfully well-preserved. Thanks to its association with the year's business strikes, the proof 1885 Liberty nickel is avidly sought, but a Superb Gem of this quality can stand on its own merits. Population: 6 in 67 Cameo, 0 finer (9/09). (#83883)

- 261** 1886 PR67 ★ NGC. CAC. Delicate lavender, mint-green, and blue shadings visit the gleaming surfaces of this sharp Superb Gem proof. Simply outstanding eye appeal. Neither NGC nor PCGS has graded a numerically finer survivor (9/09). (#3884)

## Memorable 1886 Nickel, PR67 Cameo

- 262** 1886 PR67 Cameo NGC. The 1886 and 1885 Liberty nickels are the most elusive of the series (excluding the legendary 1913s, of course), and some collectors opt for a nice proof example rather than a high-priced circulation strike, usually of lower quality. This memorable 1886, one of 4,290 proofs produced, offers grayish-white surfaces with excellent contrast. Census: 6 in 67 Cameo, 0 finer (9/09). (#83884)

- 263** 1893 PR66 Cameo PCGS. Fully struck and flashy with brilliant and immaculate surfaces. The wreath, portrait, and legends exhibit consistent frost relative to the glassy fields. Population: 14 in 66 Cameo, 7 finer (9/09). (#83891)

### Exceptional 1901 Liberty Nickel, PR67 Cameo

- 264** 1901 PR67 Cameo NGC. An extraordinary Superb Gem Cameo proof, this lovely nickel has impressive pale gray surfaces with deeply mirrored fields and highly lustrous devices. The surfaces are exceptional and the overall aesthetic appeal is extremely high. Census: 8 in 67 Cameo, 0 finer (9/09). (#83899)

- 265** 1902 PR66 PCGS. CAC. A hint of golden toning adorns this satiny yet nicely mirrored high grade proof type coin. The strike is unimprovable, and the sole imperfection is trivial carbon near UNUM. Magnification reveals minor repunching near the ball of the 2 in the date. Population: 58 in 66, 11 finer (9/09). (#3900)

### Desirable 1905 Nickel, PR67 Cameo

- 266** 1905 PR67 Cameo PCGS. CAC. A bold strike, deeply mirrored fields, highly lustrous devices, and "ice-blue" toning provide a degree of aesthetic desirability that is seldom encountered in the Liberty nickel series. The surfaces are pristine without any consequential flaws. Population: 1 in 67 Cameo, 0 finer (9/09). (#83903)

### Amazing PR68 1910 Liberty Nickel

- 267 1910 PR68 NGC. What's not to like about this coin? The only thing it seems to lack is an official Cameo designation, and in fact there is significant contrast between the fields and devices. The top of each side has deep dip of lilac and rose patina and a crescent of rich, multicolored patina at the bottom. The surfaces appear perfect even under a loupe. Amazing quality. Census: 6 in 68, 0 finer (9/09). (#3908)

### BUFFALO NICKELS

- 268 1913 Type One MS67 PCGS. CAC. A magnificent Superb Gem of this single year design subtype. Light olive-green with blushes of rose-red near the rims. A good strike with occasional minor incompleteness on peripheral elements. (#3915)

#### Incredible 1913 Type Two Buffalo Nickel, MS67

- 269 1913 Type Two MS67 NGC. CAC. Tinges of lilac surround the ice-blue centers of this splendid Superb Gem. The bold strike, including a full horn and split tail on the reverse and nearly full braid on the obverse, complements surfaces that are essentially flawless, with incredible eye appeal. One of the dozen finest certified of this issue at NGC (9/09). (#3921)

#### Impressive 1915-S Nickel, MS66

- 270 1915-S MS66 PCGS. This impressively struck Premium Gem has shimmering luster and original olive and chestnut-gold toning. Carbon is minimal, and neither side shows any noticeable abrasions. The bison's head, shoulder, and tail are boldly defined, as are the mintmark and date. Outstanding quality for this low mintage issue. Population: 27 in 66, 3 finer (9/09). (#3929)

- 271 1917-S MS63 PCGS. Hints of golden toning grace shimmering and unmarked surfaces. One tiny spot on the Indian's forehead. An above average strike for this scarce early branch mint issue. (#3936)

- 272 1918/7-D Good 6 PCGS. FS-101, formerly FS-016.5. Olive-gray patina resides in most of the recesses of this key date representative, highlighting the motifs. The design elements retain a good amount of detail and the surfaces are quite clean for a coin having seen heavy circulation. An inoffensive graze on the bison's belly is mentioned only for complete accuracy. Housed in a green label holder. (#3939)

#### Coveted VF30 1918/7-D Nickel

- 273 1918/7-D VF30 PCGS. FS-101, formerly FS-016.5. A desirable midrange representative of this popular Buffalo nickel overdate. Faint tan overtones grace otherwise nickel-gray surfaces that are lightly abraded. Only the tip of the bison's horn shows any evidence of merging with the rest of the head. (#3939)

#### Patinated 1919-D Nickel, MS66

- 274 1919-D MS66 NGC. Despite a generous mintage of over 8 million pieces, the 1919-D nickel is a famous condition rarity in its series, since poor strikes and weak luster abound. This is a remarkably attractive example with substantially above-average definition and attractive quicksilver luster. Lovely rose, orange, and blue patina graces each side. Census: 6 in 66, 0 finer (9/09). (#3942)

- 275 1923 MS66 NGC. CAC. Low-intensity lilac, lime, and apricot patina graces the lustrous surfaces of this undisturbed Premium Gem. The strike is above-average, despite expected softness on the curve of the tail and the hair above the braid. Census: 41 in 66, 11 finer (9/09). (#3949)

- 276 1923 MS66 PCGS. Pastel sun-gold toning enriches the reverse, while the obverse is practically brilliant. Well struck save for the curl of the tail and the hair above the braid. An essentially pristine Premium Gem with dazzling luster and excellent eye appeal. (#3949)

**277** 1923-S MS64 NGC. Splashes of gold, sky-blue, steel-gray, and lilac run over the highly lustrous surfaces of this near-Gem. Generally well struck except for the usual weakness on the bison's head. Nicely preserved. The '23-S becomes more difficult any finer. (#3950)

**278** 1925-D MS64 NGC. Beautiful forest-green, orange-red, and navy-blue consume this lustrous Choice branch mint nickel. The date and mintmark are sharp, as is the bison's horn, although the centers show softness customary for the issue. (#3955)

**279** 1927-S MS63 PCGS. Gold patina with ice-blue accents bathes the luminous surfaces of this Select S-mint key-date representative. Well struck except for the usual weakness in the hair on the bison's head. Some light flecks are visible in the fields. (#3962)

#### Bright 1928-D Five Cent, MS66

**280** 1928-D MS66 PCGS. As with other Denver issues from the 1920s, the 1928-D is well known as a strike rarity, albeit to a lesser degree than earlier years. The obverse of this piece shows a bit of highpoint softness on the Indian's hair above the knot, but the remaining design features are well brought up. Each side is nearly untoned with attractive bright, satiny mint luster and no reportable abrasions. Population: 34 in 66, 0 finer (9/09). (#3964)

#### Important Gem 1928-S Nickel

**281** 1928-S MS65 NGC. Light nickel-gray central color with gold-orange peripheral tints, all over quicksilver luster. The strike is uncommonly sharp for this poorly produced San Francisco issue, though even this coin is not immune to slight softness on the bison's shoulder. Census: 43 in 65, 9 finer (9/09). (#3965)

#### Splendid 1928-S Buffalo Nickel, MS66 Tied for Finest at PCGS

**282** 1928-S MS66 PCGS. The 1928-S Buffalo nickels would not be on anyone's short list of the most elusive S-mint issues in the series, but they are nonetheless difficult in the higher Mint State grades, usually due to strike deficiencies or planchet quality. All examples known are of the Small S variety, although Lange's third edition series reference makes tantalizing note of the possibility (not probability) of a Large S variety awaiting discovery one day. In MS66 this piece is one of the finest half-dozen examples certified at PCGS (9/09). Both sides exhibit typical, original silver-gold coloration, with a better-than-average strike. Some light orange-peel effect is the product of die erosion. (#3965)

---

**Lightly Toned MS67 1930 Nickel**

**283 1930 MS67 NGC.** The 1930 Buffalo nickel, with a mintage approaching 23 million pieces, can be readily located in Mint State through the Gem level. Premium Gems are more difficult, and higher-grade specimens are elusive. Champagne-gold and ice-blue patina is slightly deeper on the reverse of this highly lustrous Superb Gem. Only minor softness is seen on the Indian's hair, but overall the strike is far better than usually seen on this issue. The only mark of note occurs in the field under the bison's neck. Census: 5 in 67, 0 finer (9/09). (#3969)

**284 1937-D Three-Legged XF40 NGC.** FS-901, formerly FS-020.2. Light to medium intensity golden-gray patina runs over both sides of this Three Legged representative. The design features are relatively strong, and show most all of the horn. Both sides are devoid of mentionable contacts or spots. (#3982)

**285 1937-D Three-Legged XF40 PCGS.** FS-901, formerly FS-020.2. Chestnut-gray and gunmetal embrace this key date nickel. The hip displays moderate wear, but the horn is intact and the diagnostics (such as the granular back leg) are obvious. Certified in a green label holder. (#3982)

**286 1937-D Three-Legged XF45 NGC.** FS-901, formerly FS-020.2. We present here a pleasing Choice XF example of this popular variety. Its nickel-gray surfaces are only lightly marked and exhibit well defined devices, including the horn. (#3982)

**287 1937-D Three-Legged AU50 PCGS.** FS-901, formerly FS-020.2. A pale nickel-gray example of this popular variety. Still lustrous despite modest wear, though a handful of abrasions are present on the bison's body. Certified in a green label holder. (#3982)

**288 1937-D Three-Legged AU58 NGC.** FS-901, formerly FS-020.2. The bison's flank shows a hint of friction, but shimmering tan-gold luster dominates both sides. No marks are remotely worthy of comment. A good balance between quality and affordability for this famous and widely pursued variety. (#3982)

---

**PROOF BUFFALO NICKELS**

**Delightful PR66 1913 Type One Nickel**

**289 1913 Type One PR66 NGC.** As the representatives of the Type One Buffalo nickel design with the best definition, the proofs of earlier 1913 are perhaps the ultimate expression of the Buffalo nickel in coined form. This exquisite Premium Gem has delightfully satiny surfaces that are pale nickel-gray with faint gold and rose accents. Marvelous visual appeal. (#3988)

---

**Wonderful 1913 Type Two Nickel, PR66**

**290 1913 Type Two PR66 PCGS. CAC.** The even golden surfaces of this lovely Premium Gem matte proof show why collectors today favor these pieces so highly, with a wealth of detail from the bold impression that is far in excess of any business strike. Examine the knot that binds the braid, or the horn and fur on the bison's back, and the instant conclusion is a plethora of fine details. A wonderful, problem-free type coin. Population: 88 in 66, 50 finer (9/09). (#3990)

---

**Superb Proof 1913 Type Two Nickel**

**291 1913 Type Two PR67 PCGS.** This proof Buffalo nickel variant struck later in 1913 has a mintage that is a hair smaller than that of the Type One proofs. The present Superb Gem is ruggedly detailed with subtle mauve and tan elements against otherwise light nickel-gray surfaces. Exquisitely preserved and gorgeous. Population: 46 in 67, 4 finer (9/09). (#3990)

---

**JEFFERSON NICKEL**

**292 1939 Doubled MONTICELLO MS65 NGC.** FS-801, formerly FS-022. This famous Guide Book variety is one of the most prominent doubled dies in the entire Jefferson nickel series. This Gem offers light nickel-white color with a hint of champagne. (#4004)

---

**EARLY HALF DIMES**

**Desirable 1795 V-4, LM-19 Half Dime, VF20**

**293 1795 VF20 ANACS. V-4, LM-10, R.3.** The late die state exhibits an obverse rim break over TY to the adjacent star. Light gray devices and deep natural gray fields are accented with pale gold hints on both sides. A few minor scratches and other tiny abrasions are consistent with the grade of this piece. A desirable type coin. (#4251)

---

Clashed Dies 1795 V-4, LM-10 Half Dime, XF Details

- 294 1795—Damaged—NGC. XF Details. V-4, LM-10, R.3. Surface nicks, scratches, and scrapes are evident on both sides of this light silver-gray example. A pleasing piece otherwise, the obverse fields exhibit prominent clash marks, as bold as any we have seen on this otherwise plentiful variety. (#4251)

Richly Toned 1797 13 Stars Half Dime, XF  
V-1, LM-4, R.6

- 295 1797 13 Stars XF40 PCGS. V-1, LM-4, R.6. A total of three obverses and three reverses were variously paired to produce the four known Logan-McCloskey varieties for this year. The obverse is easily identified as the only use of the 13 Stars die. The reverse displays an inner berry below the first I, that in UNITED. Both sides feature variegated orange-yellow and gray-lilac areas, and despite 20 points of circulation wear, much pleasing detail remains. A small dig is noted just in front of Liberty's eye, along with some adjustment marks in the center of each side. Population: 4 in 40, 8 finer (9/09). (#4260)

---

Pleasing 1801 V-1, 2, LM-2 Half Dime, VF35

- 296 1801 VF35 PCGS. V-1, 2, LM-2, R.4. Formerly considered two different varieties, V-1 and V-2 have now been combined to a single listing, LM-2. The separate varieties were determined to be early and late die states of a single die combination. Housed in a green-label PCGS holder, this pleasing half dime has light silver devices with deeper gray fields. Hints of gold accent both sides. (#4267)

Elusive 1805 Half Dime, V-1, LM-1, AU58

- 297 1805 AU58 PCGS. V-1, LM-1, R.4. The 1805 half dime is a very scarce issue, with a reported mintage of 15,600 pieces all produced from a single known die pairing. It is the last Heraldic Eagle Reverse issue, since the next striking of half dimes would not occur until 24 years later, the latter issue of the Capped Bust design by William Kneass. The Logan-McCloskey half dime reference, published in 1998, reminds us that the 1805 is “very difficult to obtain in grades above EF.”

The present piece is just a whisper of rub away from an MS63 grade or thereabouts. The rather deep coloration present on both sides resolves under a light into iridescent jade, orange, ice-blue, and lilac on the obverse. The reverse offers a similar palette. This elusive conditional rarity would represent a major acquisition for series specialists. (#4272)

## BUST HALF DIMES

### Beautiful 1829 V-3, LM-2 Half Dime, MS65

- 298 1829 MS65 PCGS. V-3, LM-2, R.1. Three vertical stripes in the shield, the I in UNITED is repunched. Splashes of orange, gold, apple-green, and lilac patina endow this exquisitely struck and lustrous Gem. Carefully preserved in addition to its beautiful toning, this first year type coin would be an impressive addition to any advanced collection. While a common variety of the year, this is one of the finest examples known. Proofs were also struck from these dies. Population: 23 in 65, 9 finer (9/09). (#4276)

### Dusky Gem 1830 Half Dime, V-7, LM-7

- 299 1830 MS65 PCGS. V-7, LM-7, R.2. The 8 in the date is lightly repunched. This satiny and exquisitely struck Gem displays rich tobacco-brown and slate-gray patina. Post-strike contact is inconsequential, and the originality and eye appeal are unchallenged. Population: 36 in 65, 28 finer (9/09). (#4277)

- 300 1832 MS64 NGC. V-8, LM-5, R.1. Star 7 points to the center of a dentil, and on the reverse the foot of the R in AMERICA is slightly above the base of the I. Attractively toned, with mottled violet, blue, orange, and red. Flashy luster shines beneath the patina. Housed in a prior generation NGC holder. (#4279)

### Undoubtedly Finest Known V-1, LM-10

### 1833 Half Dime, MS67 ★

- 301 1833 MS67 ★ NGC. V-1, LM-10, R.1. A magnificent type coin. The surfaces are bright and shimmer with semireflective mint luster. This bright lustrous finish serves to backlight the wondrous scarlet centers that are surrounded at the margins by deep cobalt-blue. The striking details are strong throughout, and there are no obvious abrasions (nor would we expect to see any on a coin in this grade). The LM reference lists the Bowers 11/1996 coin graded MS66 as the finest known, but that is definitely not this piece. This is undoubtedly the finest LM-10 known. (#4280)

- 302 1835 Large Date, Large 5C MS64 PCGS. V-11, LM-4, R.3. The 5 in the denomination is large and almost touches a feather. This variety was discovered by W.W. Neil in 1927, but was not listed by Valentine in his 1931 monograph. Later collectors assigned it V-11. Pleasing lavender, green, and deep orange intermingle on the surfaces of this lustrous and well preserved near-Gem. The strike is razor-sharp. (#4282)

### Superb Gem 1835 Half Dime Small Date, Small 5C, V-7, LM-10

- 303 1835 Small Date, Small 5C MS67 PCGS. V-7, LM-10, R.1. Faint canary-gold toning adorns this vivaciously lustrous Superb Gem. Even prolonged inspection beneath a loupe is unable to locate any abrasions. Well struck overall, with any incompleteness limited to the curl left of the ear and opposite on the left border of the shield. LM-10 is the usually encountered of the two Small Date, Small 5C die marriages. The other variety, LM-11, is very scarce. Many different punches were used to form the dates and denominations of 1835 half dimes, which makes identification of the 12 different die pairings a relatively easy task. Population: 3 in 67, 1 finer (9/09). (#4285)

## SEATED HALF DIMES

- 304** 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS. PCGS misattributed this near-Gem as the Large Date. Slate-gray surfaces are accented with sky-blue and exhibit well struck design elements. Some light scrapes are noted in the upper reverse field. Population: 31 in 64, 27 finer (9/09). (#4312)

### Sharp 1837 No Stars, Small Date Half Dime, MS66

- 305** 1837 No Stars, Small Date (Flat Top 1) MS66 NGC. Gunmetal-blue and reddish-silver patination along with soft luster reside on the impeccably preserved surfaces of this attractive Premium Gem. A decisive strike lends strong definition to the design elements. This is an excellent choice for the high-end type collector. Census: 10 in 66, 4 finer (9/09). (#4312)

- 306** 1838-O No Stars AU50 PCGS. Gold-orange color overall with a swath of blue-gray at the upper reverse. A well struck example of this austere but elegant subtype. Population: 3 in 50, 18 finer (9/09). (#4314)

- 307** 1840 No Drapery MS65 NGC. Dusky ocean-blue patina invigorates this satiny Gem of a short-lived design subtype. Visually delightful with crisp design elements and smooth, beautifully preserved surfaces. Census: 20 in 65, 20 finer (9/09). (#4321)

### Seldom-Seen 1840-O No Drapery Half Dime V-4, Small O, MS62

- 308** 1840-O No Drapery MS62 PCGS. V-4. Small O. This Valentine variety has a prominently recut star 5. The reverse has numerous spindly die cracks, including three that converge on the mintmark and one that runs from the left of the right ribbon-bow to the rim. Golden-gray surfaces exhibit well struck devices. A diagonal pin scratch on Liberty's midsection is not overly detracting. Al Blythe assigns this variety an R.5 rarity rating. (#4322)

- 309** 1846 VF25 PCGS. CAC. Philadelphia produced meager amounts of half dimes and dimes in 1846, concentrating instead on half dollar and cent production. Today, the 1846 is rare in all grades. This problem-free full LIBERTY example is cream-gray and pale rose with a couple of small splashes of aqua-blue on the reverse. Population: 4 in 25, 27 finer (9/09). (#4336)

## Beautifully Toned MS66 1847 Half Dime

- 310** 1847 MS66 PCGS. The 1847 is a larger mintage With Stars half dime and there is also a relatively large survival rate in Uncirculated grades. This is a lovely, high-grade example that has soft, frosted mint luster and reddish patina around a near-brilliant center with wide margins of blue on each side. The obverse is fully struck, and the reverse only shows slight high point softness on the leaves in the wreath. Population: 12 in 66, 2 finer (9/09). (#4337)

- 311** 1849/8 MS63 PCGS. V-2, FS-302, formerly FS-001.55. The 1 in the date is centered below the point of the shield, and the 4 in the date has an indent. A lustrous Select coin with orange elements at the upper left periphery and silver-white color elsewhere. (#4343)

- 312** 1851-O MS64 PCGS. CAC. Ocean-blue, honey-gold, and pastel peach patina invigorates this satiny and nicely struck near-Gem. The reverse appears unabraded, and the obverse field has only a few wispy marks. Population: 18 in 64, 5 finer (9/09). (#4348)

### Impressive 1853 No Arrows Half Dime, MS66

- 313** 1853 No Arrows MS66 NGC. The silver-white surfaces of this Premium Gem exude pleasing luster and an exacting strike imparts sharp delineation to the design features. Impeccably preserved and yielding impressive eye appeal. Al Blythe (1992) writes that: "Most of the mintage was melted because the coins were worth over face value." Census: 9 in 66, 2 finer (9/09). (#4351)

- 314** 1853 Arrows MS65 PCGS. Prevailing blue-green color with a touch of dusky orange at the rims. Strong detail overall and an excellent choice for a similarly toned type set. Population: 53 in 65, 37 finer (9/09). (#4356)

- 315** 1854 Arrows MS65 PCGS. This lustrous and virtually brilliant Gem appears to be immaculate, as a loupe reveals only parallel roller marks (as produced) on each side. A boldly struck and attractive example of this briefly coined subtype. (#4358)

---

### Elusive Superb Gem 1857 Half Dime

- 316 1857 MS67 NGC. The 1857 is one of the highest-mintage dates in the Seated Liberty half dime series (7.280 million pieces), and consequently is available in most levels of preservation, including Mint State. Premium Gems are challenging, however, and finer-grade coins are highly elusive. Cobalt-blue, lavender, yellow-gold, and violet patination bathes the lustrous surfaces of this gorgeous Superb Gem. Generally well struck and impeccably preserved. Light horizontal roller marks are visible on the reverse. Census: 6 in 67, 1 finer (9/09). (#4365)

### Boldly Clashed, Originally Toned Superb Gem 1858 Half Dime

- 317 1858 MS67 NGC. This is a textbook coin not only for what original toning should look like, but also for its unusually bold die clashing, with much of the reverse design prominent on the obverse. Clashing is visible on the reverse, although not so starkly. Pinkish-gold centers cede to cobalt-blue at the peripheries on each side. As demanded of the grade, there are essentially no post-strike impairments. Census: 20 in 67, 4 finer (9/09). (#4367)

### Appealing 1858 Half Dime, MS67

- 318 1858 MS67 NGC. CAC. The present Superb Gem is one of about three dozen so certified at NGC and PCGS combined, with a small handful finer. Pinkish-gray patina predominates, with excellent eye appeal and a bold strike. This piece, like many of the 1858 half dimes we have seen, shows a curious gouge out of the lower left loop of the first 8 that has flattened that portion of the digit, similar to the coin shown under FS-301 in the *Cherrypickers' Guide*, fourth edition, volume II. Census: 20 in 67, 4 finer (9/09). (#4367)

---

### Near-Perfect 1858 Half Dime, MS68

- 319 1858 MS68 NGC. Dappled tobacco-brown and forest-green toning enriches this lustrous and precisely struck Superb Gem, a pristine antebellum half dime that has somehow remained undisturbed for more than 150 years. A prize for either the type collector or the Seated specialist.

This coin represents the final Philadelphia issue of this Stars Obverse subtype. In 1859 assistant engraver Anthony Paquet changed the obverse design, most noticeably on the stars, which have hollow centers. The portrait of Liberty was also modified. Those changes were set aside in 1860, when the Legend Obverse type was introduced. Census: 4 in 68, 0 finer (9/09). (#4367)

- 320 1861 MS66 NGC. Gorgeous silky luster with silver-gray centers and rich blue, umber, and tan peripheral toning, this favoring the left obverse and the lower and right reverse. A Premium Gem that is attractive in all respects. Census: 32 in 66, 6 finer (9/09). (#4379)

- 321 1862 MS66 ★ NGC. Blue-green, plum-red, and peach invigorate the margins. This outstanding half dime is well struck and essentially immaculate. Struck from widely rotated and boldly clashed dies. Census: 2 in 66 ★, 3 finer with a Star designation (9/09). (#4381)

- 322 1862 MS66 PCGS. Strongly defined with just a blush of peach toning at the right obverse rim. This shining Premium Gem is silver-white otherwise. A great coin for the type collector. Population: 35 in 66, 21 finer (9/09). (#4381)

---

### Scarce 1864 Half Dime, MS66

- 323 1864 MS66 NGC. The 48,000-piece business strike mintage of the 1864 half dime is highly suspect. Al Blythe (1992) cites research putting the mintage at a much lower figure. In any event, inspection of NGC/PCGS population reports indicates that this issue is very scarce in all grades. The lustrous silver-gray surfaces of this Premium Gem representative display hints of light peripheral gold-tan. Well struck except for the usual weakness on the upper left wreath elements. Clash marks are visible on the obverse. Census: 4 in 66, 4 finer (9/09). (#4384)

- 324 1866-S MS64 NGC. Blue, tan-gold, and pale silver colors mingle on each side of this post-Civil War half dime. Softly lustrous with slightly above-average definition. Census: 17 in 64, 12 finer (9/09). (#4389)

- 325 1868 MS64 PCGS. CAC. A coruscating near-Gem that provides light autumn-gold and slate toning. Marks are surprisingly scarce. An excellent opportunity to acquire a high quality example of this low mintage Reconstruction issue. Population: 11 in 64, 20 finer (9/09). (#4392)

## PROOF SEATED HALF DIMES

### Stunning PR66 Cameo 1859 Half Dime

- 326 1859 PR66 Cameo NGC. Both sides of this charming Seated half dime proof offer elegant, yet contrasting patina. The obverse has rose toning over the frosty portrait and the nearby fields, framed by blue-green patina, while the reverse has a thin band of similar peripheral color around a pale golden center. Census: 3 in 66 Cameo, 3 finer (9/09). (#84438)
- 327 1861 PR66 Cameo PCGS. This fully struck Premium Gem has blushes of navy-blue and brown on the lower left reverse, but most of the piece is only lightly toned. Much scarcer than suggested by its proof mintage of 1,000 pieces, since unsold sets were melted. Population: 1 in 66 Cameo, 0 finer (9/09). (#84444)
- 328 1862 PR65 NGC. This fully struck and nicely mirrored Gem proof is draped in light to medium almond-gold toning. A fleck or two of carbon is all that separates the coin from an even higher grade. Only 500 proofs were coined. Census: 19 in 65, 25 finer (9/09). (#4445)
- 329 1865 PR64 Deep Cameo PCGS. This Civil War near-Gem has icy devices and darkly mirrored fields. The strike is full, and the rose-gold toning is delicate. A meager 500 proofs were produced. (#94448)

### Flashy PR65 Cameo 1866 Half Dime

- 330 1866 PR65 Cameo NGC. This proof half dime is one of 725 examples coined in this post-Civil War year. The fields offer cameo contrast that is near to a Deep Cameo designation, with stark white frost on the devices and considerable depth in the mirrors. Several hairlines scattered around the fields on both sides preclude an even higher grade. Census: 3 in 65 Cameo, 5 finer (9/09). (#84449)
- 331 1867 PR66 Cameo PCGS. Peach-gold dominates the fields, but the borders exhibit cherry-red, olive-green, and cobalt-blue patina. Nicely struck and fully original. A scant 625 proofs were coined. Population: 5 in 66 Cameo, 1 finer (9/09). (#84450)

## EARLY DIMES

- 332 1796—Environmental Damage—NCS. Good Details. JR-1, R.3. The die break near star 1 is familiar to specialists and provides prompt attribution. Toned deep powder-blue and chestnut-tan. The date and LIBERTY are bold and all stars are clear. The reverse has greater wear, with portions of the wreath no longer discernible. Only mildly granular. (#4461)

### Difficult JR-2 1796 Dime, VF20

- 333 1796 VF20 ANACS. JR-2, R.4. The 1796 is important as the first date of the denomination, and one of only two dates with a Small Eagle reverse. The scarce JR-2 variety is quickly attributed by the I in AMERICA, which is distant from the point of the leaf. This is an attractively detailed VF example with rich powder-blue and canary-gold toning. All legends and stars are sharp, and much of Liberty's hair is present. Marks are surprisingly absent. (#4461)

- 334 1797 16 Stars—Scratched, Improperly Cleaned—NCS. Fine Details. JR-1, R.4. This cream-gray example has bold legends, and the eagle's wings display more than half their feather detail. A small curved clip at 3:30 is of mint origin. Dull from a chemical cleaning, and both sides exhibit several pinscratches. (#4462)

- 335 1797 13 Stars—Improperly Cleaned—NCS. VG Details. JR-2, R.4. This stone-gray early dime is dull and mildly granular from a moderate cleaning, but the obverse dentils are mostly distinct and the eagle shows partial plumage. Only two die pairings exist for the 1797, and they are separately collected due to differing star counts. (#4463)

- 336 1798 Small 8—Damaged—NCS. VG Details. JR-3, R.5. A cream-gray example with most letters in E PLURIBUS UNUM at least partly readable. Marks are noted on Liberty's forehead and bust tip, while the reverse has several pinpoint digs, mostly near the shield. Nonetheless, a collectible example of this very scarce Guide Book variety. (#4467)

- 337 1798/97 16 Stars on Reverse—Improperly Cleaned—NCS. VG Details. JR-1, R.3. Deep stone-gray with peripheral hints of tan and apple-green. Dull from a moderate cleaning, but the peripheral legends are generally clear. The obverse stars are faint but present. All four die marriages of 1798 dimes receive separate Guide Book listings. (#4468)

- 338 1798/97 16 Stars on Reverse VG10 PCGS. JR-1, R.3. The more available of the two overdated variants, but still scarce in an absolute sense. The obverse is almost uniformly pale silver-gray, while the reverse has deeper elements in the fields. (#4468)

**Bold VF25 1798/97 Dime, JR-1  
16 Stars Reverse**

- 339 1798/97 16 Stars on Reverse VF25 PCGS.** JR-1, R.3. Despite its VF25 grade, the present early dime has substantial design detail, including glimpses of luster within the wing feathers. All letters in E PLURIBUS UNUM are clear. The stone-gray surfaces are minutely granular, and there are no distracting marks. (#4468)

**1798/97 13 Stars Reverse Dime, JR-2, Good 6**

- 340 1798/97 13 Stars on Reverse Good 6 NGC.** JR-2, R.6. Both overdate die marriages of this year share a common obverse, described as Small 8 Over Large 7. The JR-2 is distinguished by the 13 Star Reverse, while the JR-1 is paired with the 16 Star Reverse. This piece shows the heavy wear expected of the grade, but all of the major details are clear, and the coin is well centered and free of major post-strike distractions. Some of the shield stripes and a couple of letters of the motto are still discernible on the reverse. (#4469)

**Pleasing 1800 Dime, XF40, JR-2**

- 341 1800 XF40 NGC.** JR-2, R.5. The more elusive variety with the first S in STATES centered over the first cloud. JR-1 has the same S over the right half of the cloud. This is a pleasing pearl-gray representative that has glimpses of golden-russet that deepens around the margins. Well defined, and certain to be avidly pursued by Draped Bust specialists. (#4470)

**Choice AU 1800 JR-1 Dime**

- 342 1800 AU55 NGC.** JR-1, R.4. An impressive piece with excellent detail on both sides. The reflective obverse has light silver-gray fields with darker toning within the devices and near the borders. The reverse has frosty luster with gold, pale blue, and iridescent toning. This scarce variety is seldom seen in such fine preservation. Census: 6 in 55, 9 finer (9/09). (#4470)

- 343 1802—Damaged, Improperly Cleaned—NCS. Fine Details.** JR-2, R.5. A very scarce variety identified by the wide separation between STATES and OF. Deeply toned steel-gray, sea-green, and tan. The reverse is well detailed and pleasing aside from damage to the R in AMERICA. The obverse is scraped near the profile with scratches near the date and star 4. (#4472)

**1804 13 Stars Dime, JR-1, VG Details**

- 344 1804 13 Stars on Reverse—Damaged, Improperly Cleaned—NCS. VG Details.** JR-1, R.5. The 1804 dime issue is a key date with a recorded mintage of 8,265 pieces, further divided between the 13 Star and 14 Star reverses which share a single obverse. The John Reich dime reference authors write, "Like its counterparts in other denominations, the 1804 dimes exude charisma." The cited "Damage" on this piece appears as a series of scratches near the obverse rim in two places and a couple of reverse scratches that are more shallow. The reverse only shows a pair of minor scrapes. Despite the impairments, significant appeal remains in the form of deep details. (#4474)

**Near-Mint 1805 Four Berries Dime, JR-2**

- 345 1805 4 Berries AU58 NGC.** JR-2, R.2. Both 1805 die marriages merit separate Guide Book listings, due to different berry counts on the olive branch. The present unmarked Borderline Uncirculated representative is sea-green and pale plum-red with the deeper toning on the reverse. The devices offer a wealth of detail, and luster exudes from the motifs. (#4477)

---

## Remarkable MS66 1805 Dime Four Berries, JR-2

346 1805 4 Berries MS66 PCGS. JR-2, R.2. The majority of 1805 dimes are from the JR-2 die pair, with four olives in the branch on the reverse. The only other variety has five olives, or berries as they are usually called. The 1805 JR-2 dime is the second commonest Draped Bust variety behind the 1807, and both coins are ideal for type collectors who want a single example of the design.

While an accurate census of Mint State pieces is unavailable, only a few could possibly exceed this piece for its quality. PCGS reports grading four in MS66 and just three finer pieces, although we doubt that the three finer examples represent more than one or two coins. This is only the third time that we have auctioned an MS66 1805 dime, and we have never handled a finer one.

Before this coin was struck, the planchet strip was rolled and drawn to the proper thickness, and evidence of those operations remains in the former of roller marks, thin parallel grooves that are visible across part of the design elements on each side. These are distinguished from adjustment marks since they are all oriented in exactly the same direction on both sides, and they are of consistent depth. The rolling marks are normally struck out, although slight weakness of the strike will allow them to remain. They are under no circumstances considered damage to the coin. Rather, the roller marks represent an integral part of the minting process and only add to the importance and desirability of the coin. Both sides have soft, frosty silver luster and brilliant, untoned surfaces. This amazing piece is destined for a top quality date or type collection. Population: 4 in 66, 3 finer (9/09). (#4477)

- 347** 1805 5 Berries—Improperly Cleaned—NCS. Fine Details, JR-1, R.3. A mildly luminous stone-gray early dime. All legends are bold aside from the 5 in the date and the central letters in E PLURIBUS UNUM. The wings are nicely detailed, and there are no obvious marks. The dies are rotated 170 degrees, close to medal turn. (#4478)

## BUST DIMES

### Exceptional 1821 JR-9 Dime, MS66

- 348** 1821 Small Date MS66 NGC. JR-9, R.2. Excellent design definition is noted on both sides of this Premium Gem 1821 dime. As a variety, JR-9 is rather common, but most known examples are in lower grades, while Gem or finer pieces are conditionally rare. This specimen has frosty luster beneath dark pastel shades of steel-blue, violet, rose, gold, teal, and amber. The surfaces are exceptional, and the eye appeal is first-rate. The present piece may be a contender for the finest known JR-9 dime, and certainly falls within the Condition Census of the variety. Census: 2 in 66, 0 finer (9/09). (#94496)

### Rare 1822 Dime, JR-1, XF Details

- 349** 1822—Improperly Cleaned—NCS. XF Details. JR-1, R.4. The only dies for this much better date, which has a Guide Book mintage of 100,000 pieces, less than a tenth of the prior year's production. The slate-gray centers are framed by lavender borders. Well detailed but minutely granular and somewhat bright. No marks merit mention. (#4497)

### Important 1825 JR-1 Dime, MS65 A Condition Census Contender

- 350** 1825 MS65 NGC. JR-1, R.4. The reported mintage for 1825 was 510,000 dimes, although most students of the series believe that the first 100,000 pieces were dated 1824. Five varieties are known, including three common marriages and two scarce marriages, produced from the combination of four obverse dies and three reverse dies. This lovely Gem has gold, gray, and lilac surfaces with frosty underlying luster. The eagle's head and neck are a trifle weak but all other design elements are bold. The quality of this piece is similar to the MS65 Eliasberg coin. This piece is clearly finer than the Lovejoy specimen, and possibly the second finest known. (#4503)

- 351** 1828 Small Date AU58 NGC. JR-1, R.2. Golden-russet and electric-blue deepen toward the borders of this partly lustrous near-Mint example. Smooth save for unobtrusive marks near the first two stars. Struck from prominently clashed dies. (#4510)

- 352** 1833 Last 3 High MS63 PCGS. JR-5, R.1. A sharply impressed Capped Bust type coin that exhibits delicate caramel-gold toning and blatant cartwheel sheen. Refreshingly unabraded for the Select level. Population: 29 in 63, 50 finer (9/09). (#4523)

- 353** 1833 Last 3 High MS63 NGC. JR-5, R.1. Richly patinated in orange-gold, lavender, and aqua. Precisely struck and minimally abraded with vivacious luster throughout the stars and reverse. (#4523)

## SEATED DIMES

### Desirable 1837 No Stars, Large Date Gem Dime

- 354** 1837 No Stars, Large Date MS65 NGC. Fortin-101a, repunched 7 showing below the 7 in the date. The Large Date has a flat-topped 3 whereas the Small Date shows a round-topped 3. The champagne-gray surfaces of this Gem display splashes of sky-blue and gold and the design elements exhibit sharp detail. Lustrous surfaces reveal some trivial grade-consistent marks. Highly desirable as a type coin. Census: 24 in 65 for the issue, 28 finer (9/09). (#4561)

### Lovely Large Date 1837 No Stars Dime, MS65

- 355** 1837 No Stars, Large Date MS65 NGC. Fortin-101a. The Large Date practically fills the exergue. An exquisite Gem representative of this first-year Seated dime issue, light silver-gray in the lustrous centers with intense blue and orange-tan peripheral toning. Sharply struck with a peculiar die crack that snakes through the lower right side of Liberty. Census: 24 in 65, 28 finer (9/09). (#4561)

- 356** 1838-O No Stars AU50 ANACS. Greer-102, Fortin-102. Normal mintmark. Lightly worn with rich orange-gray, violet, and blue patina. An old pinscratch appears in the right obverse field. (#4564)

- 357** 1838-O No Stars AU50 PCGS. Fortin-102. Normal mintmark. Rose-violet and dusky sun-yellow colors dominate the eye appeal. Though lightly worn, this still-lustrous No Stars dime has considerable charm. Certified in a green label holder. Population: 11 in 50, 66 finer (9/09). (#4564)

- 358** 1838-O No Stars AU50 PCGS. Soft bluish-gray and champagne patina resides on the surfaces of this well defined O-mint representative. Minor obverse rim bruises occur at 4:00 and 10:00 and a couple of light scrapes are located in the lower right reverse quadrant. (#4564)

- 359** 1838-O No Stars AU53 NGC. Fortin-101, repunched mintmark. An excellent example of this No Stars O-mint issue, the first half dime struck at that facility. Silver-gray, blue, and gold-orange toning elements mingle on each side. Census: 7 in 53, 62 finer (9/09). (#4564)

### Well Struck 1838-O No Stars Dime, AU58

- 360** 1838-O No Stars AU58 PCGS. Greer-101, Fortin-101. Repunched Mintmark. The design elements are sharply struck, including Liberty's head, the central obverse, and the reverse rim, areas that are typically weak. Ample luster is visible on both sides, each of which displays whispers of light green and rose under high magnification. A few light circulation marks in the right obverse field do not detract from the coin's overall appeal. Housed in a green label holder. (#4564)

- 361** 1841 MS64 PCGS. A resplendent near-Gem with just a hint of toning on the rims. Several stars are a touch soft, but the rest of the details are crisp. A few tiny abrasions are nearly imperceptible to the unaided eye. The 1841 is rare any finer. Population: 14 in 64, 6 finer (8/09). (#4579)

- 362** 1845-O XF45 PCGS. CAC. Fortin-101a, Large O. Golden-brown and cream-gray with glimpses of cobalt-blue along the left reverse margin. A richly detailed example of this difficult New Orleans issue. Population: 5 in 45, 9 finer (9/09). (#4587)

- 363** 1851-O AU55 PCGS. Well struck for this New Orleans issue with glints of gold that are most prominent at the margins. Moderately abraded yet attractive. Population: 3 in 55, 7 finer (9/09). (#4596)

- 364** 1853-O Arrows AU58 NGC. Bold gold-orange and blue toning dominates the obverse's eye appeal, while the reverse adds elements of rose-violet. A lustrous near-Mint coin with just a touch of friction on each side. Census: 11 in 58, 6 finer (9/09). (#4604)

- 365** 1858-S VF25 PCGS. CAC. Stone-gray with charcoal shades near the rims. Relatively free from marks, and all letters in LIBERTY are clear. Only 60,000 pieces were struck, since double eagle and half dollar production was of greater importance to West Coast commerce. Population: 3 in 25, 30 finer (9/09). (#4618)

### Historic 1860-O Dime, AU Details

- 366** 1860-O—Cleaned—ANACS. AU Details, Net XF40 The New Orleans Mint produced a memorably low output of Seated Liberty dimes on the eve of the Civil War, only 40,000 coins. This is an issue that Brian Greer calls "one of the key dates to the series though it is not as scarce as the 1871-CC, 1873-CC Arrows or 1874-CC," adding that it is "rare in sharp XF or better." The surfaces of this piece are dulled somewhat from cleaning and toned in teal and salmon. The only singular abrasion is located on the lower portion of the E in DIME. The 1860-O has added appeal because of its status as one of the first and most historic issues in the Legend Obverse subtype. (#4632)

---

### Toned MS61 1861-S Dime

- 367 1861-S MS61 NGC. Medium lilac, olive, and apricot shades blanket this Uncirculated Civil War dime. The obverse field has wispy marks, and the customary portion of the cereal grains lack a full strike. There were few coin collectors in the Old West, and most survivors of this issue are in well circulated grades. Census: 5 in 61, 3 finer (9/09). (#4634)
- 368 1863—Improperly Cleaned—NCS. AU Details. A richly detailed representative of this challenging date. The tan and cream-gray surfaces are somewhat bright, and the upper obverse has occasional granularity. Just 14,000 pieces were issued. (#4637)
- 369 1866—Improperly Cleaned—NCS. AU Details. Light champagne-gray surfaces splashed with bluish-violet reveal fine hairlines when viewed under a loupe. Well defined with no significant marks. (#4643)
- 370 1867—Improperly Cleaned—NCS. VF Details. Cream-gray and sea-green toning envelops this rare date dime, which has a bold LIBERTY and subdued hairlines on the obverse field. A scant 6,000 pieces were struck, since fractional currency under Gresham's Law removed silver coinage from circulation. (#4645)

### Gorgeous MS67 Prooflike 1869 Dime

- 371 1869 MS67 Prooflike NGC. NGC has graded exactly four 1869 dimes as Superb Gems, including this piece, the only Prooflike example certified there (9/09). Both sides offer strong reflectivity in the fields, with contrasting frostiness on the devices. Light silver centers give way to hints of gold-orange near the rims. (#4649)

---

### VF Sharpness 1871-CC Seated Dime

- 372 1871-CC—Improperly Cleaned—NCS. VF Details. This piece has the details of a Very Fine coin with subdued luster over the grayish-pink surfaces, indicative of a past cleaning. There are a few other distractions and certainly no singular abrasions, although an off-color planchet lamination runs downward from before Liberty's head onto her shoulder and left (facing) arm. As one of the rare keys to the Seated dime series and an issue that is extremely rare in Mint State, this piece should see spirited bidding at the auction. (#4654)

- 373 1872-CC—Improperly Cleaned—NCS. VG Details. Caramel-gold and steel-gray alternate across this early low mintage Carson City dime. A bit bright from cleaning despite the subsequent toning. About five letters in LIBERTY are present. The N in ONE is absent, primarily due to a soft central strike. (#4657)

---

### VG Details 1873-CC Arrows Dime

- 374 1873-CC Arrows—Improperly Cleaned—NCS. VG Details. While the noted cleaning has subdued the overall appearance, this example should nonetheless quicken the hearts of series aficionados. The surfaces show occasional charcoal-gray, which is more noticeable on the reverse. One of the key dates in the Seated dime series along with the 1871-CC and 1874-CC. The 1873-CC Arrows is only slightly more available in Good-VF than the 1871-CC, according to Greer, while more elusive in higher grades. (#4666)

- 375 1873-S Arrows MS61 PCGS. Fortin-101. Small Thin S. Peach-gold and powder-blue with vivacious luster and an assertive strike. Faint obverse field marks correspond to the grade. The Arrows, Legend Obverse subtype was only coined for two years. (#4667)

---

### Important 1874 Arrows Dime, MS66

### Key 1874-CC Arrows Seated Dime, VF25

- 376 1874 Arrows MS66 PCGS. Frosted luster radiates from the (mostly) silver-white surfaces of this charming Premium Gem type coin. Some bold clashing, visible under Liberty's right (facing) breast from the bifurcated leaf tip below (DIM)E on the reverse, adds some extra panache to an already flashy coin. Well but not fully struck, and certified in a green-label holder. (#4668)

### Desirable 1874-CC Dime, VG Details

- 377 1874-CC Arrows—Improperly Cleaned—NCS. VG Details. This piece has been retoned with gray-gold surfaces. Both sides have minor abrasions and scratches in addition to being cleaned. However, the details grade is a strong VG, nearly Fine, with six letters of LIBERTY visible. The 1874-CC is a major rarity in the Seated dime series, desirable in all states of preservation. (#4669)

- 378 1874-CC Arrows VF25 PCGS. The 1874-CC Seated dime is a classic rarity in the collection, with a tiny production of only 10,817 coins, all from one die pair. Those two dies may be identified by diagnostic keys. On the obverse the arrows, which were entered onto the coining dies by hand, slant up noticeably on both sides of the date. On the reverse nearly all known examples show a die break from the ribbon through the middle of the last C in the mintmark and to the first C. The first S in STATES is broken.

Brian Greer's series reference says of the 1874-CC:

"The unquestioned key to the series (excluding the uncollectible 1873-CC No Arrows). Rare in any grade, and probably a full R6 in problem-free condition. Very few mint state pieces exist."

Rusty Goe, in *The Mint on Carson Street*, adds this: "Throughout the decades the annual rare coin auction circuit has historically offered one 1874-CC dime per year, and some years not even one." This VF25 coin should neatly fill the bill for some spirited bidder. The surfaces are medium gray overall with brighter accents over the high points. On the obverse a small scrape runs through the upper shield and Liberty's left (facing) thigh, with another in the right field. A couple of dark toning spots appear near the rims. The reverse is problem-free. (#4669)

- 379 1876-CC MS65 PCGS. This satiny and well struck Carson City type coin has medium autumn-gold and stone-gray toning. The Es in ONE DIME are die doubled, presumably due to the switcheroo in reverse hubs that took place in 1876. The minor design change left the E in ONE further from the wreath, relative to the Type One reverse. (#4680)

- 380 1877-S MS65 NGC. A richly lustrous Gem draped in colorful orange, blue, and green toning. Slight striking softness on the peripheral design elements scarcely affects the eye appeal. Census: 14 in 65, 7 finer (8/09). (#4684)

**381** 1883 MS66 PCGS. CAC. Fire-red, aquamarine, and lime-gold encompass this lustrous and attentively struck Premium Gem. An exquisite representative of the Seated dime design. Population: 47 in 66, 11 finer (9/09). (#4691)

**382** 1884 MS66 PCGS. Golden-brown and navy-blue toning drapes this thoroughly lustrous, crisply struck, and pristine Premium Gem. Exemplary quality from the later years of the long-lived Seated series. Population: 32 in 66, 21 finer (9/09). (#4692)

#### Charming MS67 1884 Dime

**383** 1884 MS67 NGC. Pink and peach patina graces much of the otherwise silver-white surfaces on this Superb Gem Seated dime. Definition is substantially above-average, particularly on Liberty's often-weak head. With just six numerically finer pieces in the combined certified population (9/09), a conditionally challenging coin. (#4692)

**384** 1885-S—Improperly Cleaned—NCS. VF Details. Slate-gray with peripheral tan toning. Somewhat dull from cleaning, but richly detailed. The 1885-S has an unusually low mintage of 43,690 pieces, and few were set aside by collectors. (#4695)

**385** 1887-S MS65 PCGS. Plum-red and golden-brown shades deepen near the borders. Dazzling luster and a precise strike confirm the quality. A desirable example of this later San Francisco emission. Population: 24 in 65, 3 finer (9/09). (#4699)

**386** 1888-S MS64 NGC. Potent luster and a wisp of honey toning confirm the originality of this impeccably preserved near-Gem. Sharply struck aside from the usual section of the wreath opposite the left corner of Liberty's rock. Census: 10 in 64, 8 finer (9/09). (#4701)

#### Attractive 1890 Dime, MS67

**387** 1890 MS67 NGC. Both sides of this Superb Gem possess attractive stone-white color and radiant luster, and well cared for surfaces exhibit sharply struck motifs. The 1890 is a common date with a mintage approaching 10 million circulation strikes. Specimens in this level of preservation, however, are quite scarce. Census: 9 in 67, 1 finer (9/09). (#4704)

**388** 1891 MS66 NGC. CAC. Sea-green and honey-gold bathe this lustrous and well preserved Premium Gem. A good strike with trivial incompleteness on the head and the upper left portion of the wreath. Census: 57 in 66, 19 finer (9/09). (#4706)

## PROOF SEATED DIMES

### Gorgeous PR66 1859 Dime

**389** 1859 PR66 PCGS. The 1859 is an important issue for the proof type collector, since it is the most accessible Seated dime with Stars on Obverse. This sharply struck Premium Gem is a most attractive representative, strongly mirrored beneath rich blue-green and violet patina. PCGS has graded only one coin finer for the contrast category (9/09). (#4748)

### Intriguing 1859 Dime, PR64 Cameo

**390** 1859 PR64 Cameo NGC. Fortin-101. Gerry Fortin records two obverse dies used to strike proof 1859 dimes. This is the more frequently seen variety, but the present coin has several interesting features that distinguish it from a typical specimen. Stars 3 through 13 each have at least one die chip near the points, with multiple chips seen around several stars. Additionally, a few small die "dots" are seen near the dentils. While other examples exhibit these tiny die defects, this specimen is unusual in both the number of chips seen and their prominence. The cause of these chips is open to speculation. It is also noteworthy that the obverse field has a number of prominent striations. After extensive research and examination, we believe that this piece is one of the first proofs struck in 1859.

This remarkable near-Gem boasts deeply mirrored fields that contrast sharply against the frosted devices. The strike is razor-sharp save for a touch of softness on star 7 and the top of Liberty's head. Just a trace of light purple-gray toning is seen in the periphery. A few minuscule contact marks do not distract. The Seated dime specialist should take note of this unusual specimen and bid accordingly. (#84748)

**Gem Cameo Proof Stars Obverse  
1859 Seated Dime**

- 391 1859 PR65 Cameo NGC. A brilliant and unabraded Gem with nicely mirrored fields and discernible frost throughout the motifs and legends. Proofs of the Stars Obverse type are very scarce, particularly in high grades. 1859 was the first year that proof mintages were recorded. 800 proof dimes were struck. Census: 8 in 65 Cameo, 8 finer (9/09). (#84748)
- 392 1862 PR64 PCGS. Pastel autumn-gold and blue-green tints endow this well struck and appealing near-Gem. Only 550 proofs were issued for this Civil War date. Population: 31 in 64, 5 finer (9/09). (#4755)

**Fantastic PR65 Cameo 1865 Dime**

- 393 1865 PR65 Cameo NGC. Astounding contrast defines the eye appeal of this crisp Gem. The beautifully frosted central devices act as a wonderful counterpoint to the silver-white mirrors. Only a handful of scarcely visible flaws are present in the obverse fields. Census: 4 in 65 Cameo, 4 finer (9/09). (#84758)
- 394 1866 PR64 Cameo NGC. Wafts of light blue, red, and golden toning grace the surfaces of this boldly struck specimen. The highly reflective fields show delightful cameo contrast against the frosty devices. A tiny lint mark below the second S in STATES is noted for future pedigree purposes. Census: 7 in 64 Cameo, 21 finer (8/09). (#84759)
- 395 1868 PR65 NGC. Breen-3345, Fortin-105. A remarkable blundered die with the base of a misplaced 1 appearing in Liberty's lower gown and the base of another misplaced 1 (!) appearing just before the first errant digit. Blundered dies, overdates, and similar anomalies exist on proof coins, but they are rare. This deeply toned Gem has rich gold patina on the obverse with darker violet and blue along the border. The reverse is similar although deeper in overall appearance. (#4761)

**White PR67 Cameo 1881 Dime**

- 396 1881 PR67 Cameo NGC. This stone-white Superb Gem has thick frost throughout the seated Liberty and wreath. Strong magnification uncovers only trivial field contact marks. The third low mintage date in a row, with only 975 proofs and 24,000 business strikes coined. Census: 6 in 67 Cameo, 1 finer (9/09). (#84778)
- 397 1882 PR65 Cameo PCGS. Gold-orange central toning with liquid blue-green elements close to the rims. This Gem proof is moderately contrasted and highly appealing. Population: 13 in 65 Cameo, 11 finer (9/09). (#84779)
- 398 1884 PR65 PCGS. A hint of golden toning near the rims distinguishes this boldly struck and flashy Gem. The devices display noticeable frost, although perhaps to a degree insufficient to merit a Cameo designation. A scant 875 proofs were struck. Population: 49 in 65, 47 finer (9/09). (#4781)
- 399 No lot.
- 400 1890 PR64 Cameo PCGS. Freckled peach-gold toning enriches this flashy near-Gem. Frosty legends and devices provide undeniable contrast with the dazzling fields. Nicely struck and attractive. Just 590 proofs were struck. Population: 9 in 64 Cameo, 16 finer (9/09). (#84787)
- 401 1891 PR66 Cameo NGC. A fully brilliant Premium Gem Cameo proof with no toning on either side. This sharply detailed example has excellent contrast and is seldom seen finer. Census: 12 in 66 Cameo, 6 finer (9/09). (#84788)

**Lovely, Toned PR67 Cameo 1891 Dime**

- 402 1891 PR67 Cameo PCGS. CAC. Always a popular issue as the final date in the long-lived Seated Liberty design. This is a marvelous type coin that has deeply reflective fields that serve to highlight the thalo-blue surfaces on each side. Just a hint of golden-rose color is seen at the margins. Nearly perfect surfaces. Population: 2 in 67 Cameo, 0 finer (9/09). (#84788)

## BARBER DIMES

- 403 1894 MS65 PCGS. Autumn-gold invigorates the obverse periphery, while the semi-prooflike reverse is turquoise-blue and cherry-red. Well struck and refreshingly unabraded. Among Philadelphia issues, only the 1895 has a lower mintage. Population: 20 in 65, 7 finer (9/09). (#4803)

### Exceptional Gem 1896-S Barber Dime

- 404 1896-S MS65 PCGS. The 1896-S Barber dime is a well-known and popular semikey issue in the series, one of several with mintages well below 1 million coins each. This lovely Gem boasts lilac and violet patina blending on both sides, with dollops of jade and aqua added to the obverse. This is an exceptionally well-struck and attractive piece. (#4811)

- 405 1897-O MS63 PCGS. Splashes of purple and russet toning intermingle with silver-gray on the satiny surfaces. Several wispy abrasions blend nicely with the attractive patina. A sharply struck and appealing representative. Population: 23 in 63, 35 finer (8/09). (#4813)

### Elusive Toned Gem 1897-O Barber Dime

- 406 1897-O MS65 PCGS. The 1894-O through 1897-O Barber dimes are a well-known quartet of rarities within the series. This Gem example displays deep orange-gold toning on both sides, with lighter lilac accents on the obverse high points. The strike is better-executed than normally seen, with good separation at the leaves and forehead and only minor reverse weakness on the venation of the large oak leaf at lower left. Population: 6 in 65, 12 finer (9/09). (#4813)

- 407 1898 MS66 PCGS. CAC. Highly lustrous and well struck with clean surfaces. Violet and gold patina covers the obverse, while gold-orange appears over much of the reverse. A small spot is noted below the chin. Population: 24 in 66, 4 finer (9/09). (#4815)

- 408 1898 MS66 PCGS. Navy-blue and rose-red enrich this thoroughly lustrous and intricately struck Premium Gem. An outstanding Barber dime. The first 8 in the date is lightly repunched within the loops. Population: 24 in 66, 4 finer (9/09). (#4815)

- 409 1898-O MS64 PCGS. CAC. Fire-red and jade-green alternate across this lustrous and razor-sharp New Orleans dime. Unusually void of abrasions for the MS64 level. The mintmark is uncentered left below the wreath, a minor mint error. Population: 14 in 64, 13 finer (9/09). (#4816)

## Remarkable MS65 1898-O Dime

- 410 1898-O MS65 PCGS. This issue is difficult to locate in Mint State despite the 2,130 million-piece mintage. Additionally, it is one of the more poorly struck issues in the Barber dime series. This Gem offering is exceptional for its above-average strike, including LIBERTY and upper right part of the wreath, areas typically weak. Only the lower left set of leaves reveal minor softness. Each side exudes pleasing luster and a delicate blend of apple-green, purple, and gray patina. Faint contacts are noted on the neck and light roller marks on the cheek. Population: 7 in 65, 6 finer (9/09). (#4816)

### Bold Toned Gem 1898-S Barber Dime

- 411 1898-S MS65 PCGS. CAC. The 1898-S is another rare series issue in Mint State. This piece is fully detailed, with speckled crimson, amber, and blue highlights on the obverse; the reverse is a mottled russet and jade-green. A single contact mark below the M of DIME rules out an even finer designation. This boldly struck piece is highly elusive in Gem or better grade. Population: 5 in 65, 6 finer (9/09). Ex: St. Louis Signature Auction (Heritage, 4/2005), lot 6625, which realized \$2,530. (#4817)

- 412 1901-S AU58 PCGS. The mint luster is close to complete, although diminished slightly across the open reverse field. Moderately toned golden-brown and forest-green. Like the 1896-S and 1903-S, the 1901-S is a challenging low mintage issue pursued by collectors regardless of grade. Population: 8 in 58, 44 finer (9/09). (#4826)

### Exemplary 1901-S Barber Dime, MS66

- 413 1901-S MS66 PCGS. With a mintage of only 593,022 pieces, the 1901-S dime boasts the fourth-lowest mintage in the series, behind only the 1895-O, 1896-S, 1913-S, and the unobtainable 1894-S. It is a scarce issue in all grades, particularly so in the top Mint State grades. This exemplary piece is free of any mentionable abrasions or distractions and displays lovely satiny luster enhanced by a trace of pale golden toning. Population: 6 in 66, 5 finer (9/09). (#4826)

---

### Underrated 1902-O Dime, MS66

- 414 1902-O MS66 NGC. The recently published *Collecting and Investing Strategies for Barber Dimes* by Jeff Ambio suggests that the 1902-O is not only among the rarest Barber dime issues in high grades (MS65 or finer)—specifically, fourth of 74—but that it is rarer than even the 1895-O and underrated (and undervalued) in MS65-MS67. This satiny Premium Gem shows just a suggestion of golden peripheral color over silver-white surfaces. Minor strike weakness appears on the upper right wreath tip on the reverse, but this piece appears to be a single tiny tick on Liberty's cheek away from possibly merititing an even finer grade. Census: 3 in 66, 1 finer (9/09). (#4828)

---

### Attractive 1902-S Dime, MS65

- 415 1902-S MS65 NGC. Although easily located in low grades, the 1902-S dime becomes scarce in Mint State. Gems are decidedly rare, and it would be difficult to locate anything finer. Variegated purple, lemon-yellow, rose-orange, and gray toning enhances the frosty surfaces. A well preserved and powerfully impressed piece. Census: 7 in 65, 5 finer (8/09). (#4829)

---

### Dazzling Superb Gem 1902-S Dime

- 416 1902-S MS67 NGC. As one might expect, in MS67 the 1902-S is a significant condition rarity. NGC and PCGS combined report just three Superb Gems, with none finer (9/09). The present coin boasts shimmering satiny luster beneath mottled reddish-tan and silver-gray toning. Close examination under magnification reveals only a few tiny marks on Liberty's face. Needle-sharp design elements add to the aesthetic appeal. (#4829)

- 417 1906 MS66 PCGS. Ex: Duckor. Dazzling luster sweeps the nearly immaculate fields and devices of this lightly toned and exquisite Premium Gem. Well struck at the centers, with trivial incompleteness noted along the borders. Population: 12 in 66, 5 finer (9/09). Ex: Dr. Steven L. Duckor Collection (Heritage, 1/2006), lot 1010, which realized \$1,725. (#4838)

---

### Satiny 1907-D Barber Dime, MS66

- 418 1907-D MS66 PCGS. The 1907-D Barber dime is only the second-year issue in the series from the newly opened Denver Mint, but the D-mints overall are well-produced and attractive. The 1907-D, however, is among the most elusive of the eight D-mint Barber dimes in high grade. This Premium Gem offers satin luster over silvery surfaces that are nearly devoid of color, save for a slight tinge of pinkish-gold. The strike is bold, just short of full. A couple of tiny abrasions on Liberty's cheek perhaps are all that preclude an even finer grade. Population: 5 in 66, 2 finer (9/09). (#4843)

- 419 1907-S MS64 PCGS. Lustrous surfaces display soft multicolored patina that becomes slightly deeper at the margins. Well struck and revealing a few grade-limiting obverse marks. Population: 21 in 64, 9 finer (9/09). (#4845)

---

### Lovely 1908-D Barber Dime, MS66, Ex: Duckor

- 420 1908-D MS66 PCGS. CAC. Ex: Duckor. The 1908-D is usually a well-produced Barber dime issue, but certified survivors generally top out at the Gem level. This Premium Gem is well struck and essentially perfect, with lovely mint-green and pastel-rose coloration near the peripheries. A conditionally scarce item in this condition. Population: 6 in 66, 7 finer (9/09). Ex: Palm Beach Auction (Heritage, 3/2005), lot 5483. (#4847)

- 421 1908-S MS65 PCGS. Ex: Pittman. Wisps of delicate gold toning visit this lustrous and fully struck Gem. The fields are impressively bereft of contact. Housed in a green label holder. Population: 23 in 65, 14 finer (9/09). Ex: John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 715. (#4849)

- 422 1909-S MS63 NGC. Electric-blue and magenta concentrate at the margins, yielding to reddish-brown and violet in the reverse center and brilliance in the obverse center. Luminous surfaces exhibit well impressed devices and are lightly marked. Census: 9 in 63, 30 finer (9/09). (#4853)

- 423 1909-S MS64 NGC. A lightly toned and frosty near-Gem. This precisely struck piece has only a couple of nearly microscopic handling marks. The 1909-S is a scarcer issue with a mintage of 1 million pieces, and examples are seldom seen in high Mint State grades. Census: 18 in 64, 12 finer (8/09). (#4853)

### Memorably Toned 1911 Barber Dime, MS68

424 1911 MS68 ★ NGC. This Barber dime is in the ultimate condition not only for the issue but for the entire type. NGC has certified nine coins of all dates in MS68, while PCGS adds four more. For the 1911 Barber issue, this piece is one of four MS68s graded, two each at NGC and PCGS. This coin is thus of prime importance to Registry Set collectors of various type sets or the complete Barber dime series. The “wow” factor is immense because of the impeccable surfaces and the wonderful patina on both sides. The obverse displays cobalt-blue, violet, and gold shades, with the reverse toned in a palette of sage and pinkish-gray. A memorable coin. Census: 2 in 68, 0 finer (9/09). (#4857)

425 1911-D MS66 PCGS. Dappled fire-red, silver-gray, and olive-gold toning ensures the eye appeal of this lustrous and exceptionally preserved Premium Gem. A bold strike aside from the left obverse margin. Population: 36 in 66, 7 finer (9/09). (#4858)

### Impressive MS67 1911-D Dime

426 1911-D MS67 NGC. A blush of gold-orange at the lower obverse is echoed in tiny dots near the rims on that side. This Superb Gem is strongly struck and exquisitely lustrous with a faint veil of silver-gray patina overall. Neither NGC nor PCGS has certified a numerically finer representative (9/09). (#4858)

### Brilliant, Semiprooflike MS67 1912-S Dime

427 1912-S MS67 NGC. Ex: Duckor. While the 1912-S is not an issue that immediately springs to mind at the forefront of Barber dime rarities, at the Superb Gem level examples are seldom seen. The marvelous John C. Hugon Collection (Heritage, 1/2005, lot 4066) contained “only” an MS66 example of the issue. The present piece is brilliant silver-white, remarkably bright throughout with semiprooflike fields. Both sides show a few scattered dark speckles of color, but magnification is required to discern them. A near-flawless coin, perfect for a type, date, or complete Registry Set. Census: 1 in 67, 0 finer (9/09). (One MS67 Prooflike is certified at NGC.) (#4862)

### PROOF BARBER DIMES

428 1893 PR66 Cameo NGC. Lightly toned centers cede to speckled peripheral orange-gold, aqua, and rose-violet toning. An intricately struck Premium Gem Census: 14 in 66 Cameo, 18 finer (9/09). (#84877)

### Captivating 1894 Dime, PR67

429 1894 PR67 PCGS. CAC. The 1894 has the second highest mintage in the proof Barber dime series (972 pieces) after 1892. PCGS/NGC population figures indicate that it is available without too much difficulty through the Gem level of preservation. Better-condition examples are more challenging. The exquisitely struck design elements of this Superb Gem specimen stand out against the mirrored fields, and attractive toning bathes both sides. An array of lavender, green, and gold on the obverse cedes to bluish-purple covering the reverse. Close inspection reveals impeccably preserved surfaces. Population: 28 in 67, 0 finer (9/09). (#4878)

### Gorgeous PR67 1896 Dime

430 1896 PR67 NGC. Gold, pink, and orange elements dominate the centers, while the margins of this Superb Gem proof have cool blue and green-gold patina. Strongly mirrored beneath the toning and boldly struck. A carefully preserved beauty from this issue of only 762 specimens. Census: 12 in 67, 1 finer (9/09). (#4880)

### Exemplary PR66 Cameo 1898 Dime

431 1898 PR66 Cameo PCGS. From a low mintage of 735 pieces, this proof Premium Gem provides icy motifs and deeply mirrored fields. Careful rotation beneath a light and loupe reveals no post-strike hairlines or spots, and only a single small planchet imperfection on the field near the chin. Population: 18 in 66 Cameo, 7 finer (9/09). (#84882)

432 1901 PR66 NGC. Frosted devices are sharply struck and project a degree of variance with the mirrored fields. Wisps of barely discernible tan-gold are visible around some of the margins. A nicely preserved Premium Gem proof. Census: 44 in 66, 16 finer (9/09). (#4885)

Magnificent PR68 ★ 1903 Barber Dime  
The Finest Proof Certified at Both Services

433 1903 PR68 ★ NGC. The finest certified. This exceptional coin is the finest 1903 dime certified by both of the major services. There are no PR68 coins graded by PCGS. NGC has only certified this single coin in PR68, and it received the Star designation (9/09). As expected, the surfaces are immaculate. The surfaces are bright in both the fields as well as over the devices, a result of the Mint's intentional polishing of the entire surface of the die prior to striking. This practice began in 1901 or 1902 and continued until the discontinuation of proof coinage in 1916. The surfaces of this magnificent piece have brilliant centers and are surrounded by concentric bands of golden-rose and cobalt-blue at the margins. (#4887)

Desirable PR67 1905 Dime

434 1905 PR67 PCGS. The coloration is unusual but attractive on this Superb Gem specimen, with deep cinnamon, russet, and cerulean on the obverse and similar colors prevailing on the reverse. Exquisitely struck, and with absolutely impeccable surfaces that show zero evidence of contact. Population: 14 in 67, 0 finer (9/09). (#4889)

Upper-End PR67 1910 Barber Dime

435 1910 PR67 PCGS. CAC. The 1910 proof dime has a relatively low mintage of 551 pieces, though Walter Breen (1977) wrote that: "... several hoards exist." Most have since been dispersed and now appear in the certified population data. This Superb Gem yields a coat of light tan-gold color on the obverse, and iridescent cobalt-blue on the reverse. Immaculately preserved surfaces exhibit exquisitely struck design elements. Housed in a green-label holder. Population: 8 in 67, 2 finer (9/09). (#4894)

## MERCURY DIMES

436 1916-D VG8 PCGS. CAC. Ice-blue and cream-gray with deeper toning on the olive branch characteristic of the grade. The mintmark is lightly repunched north. All legends are bold, and no marks are of any importance. A majority of survivors of this key date are well worn. (#4906)

### Radiant 1916-D Dime, MS65 Full Bands

437 1916-D MS65 Full Bands NGC. The 1916-D key date Mercury dime saw a mintage of only 264,000 coins, which was in stark contrast to the large number of ten cent pieces made at the Philadelphia and San Francisco Mints in 1916 (22.1 million and 10.4 million pieces respectively). The entire 1916-D dime issue, according to David Lange (2005), was released in November 1916. He writes that the coinage of dimes was then halted at Denver so that the presses could be redirected to produce a large order for quarters placed by the Treasury Department.

The radiantly lustrous surface of this Gem are lightly toned with splashes of champagne-gold, sky-blue, and gray-violet patina. An impressive strike leaves sharp detail on the design features, culminating in full central bands. A few minuscule reverse marks do not subtract from the coin's great overall appeal. Census: 24 in 65 Full Bands, 7 finer (9/09). (#4907)

438 1916-S MS66 Full Bands PCGS. Iridescent jade-green, caramel-gold, and mauve-red patina visits the margins of this first-year Premium Gem. Shimmering and unabraded with an excellent strike. Population: 59 in 66 Full Bands, 17 finer (9/09). (#4909)

439 1917-S MS66 Full Bands PCGS. A fully struck Premium Gem that possesses dynamic luster and remarkably unabraded fields and devices. Light caramel-gold toning precludes absolute brilliance. Population: 62 in 66 Full Bands, 10 finer (9/09). (#4915)

### Delightful 1920 Dime, MS68 Full Bands

440 1920 MS68 Full Bands NGC. Due to a post-World War I economic boom in 1920 the emphasis was on quantity, not quality at the Philadelphia Mint, churning out an enormous number of Mercury dimes approaching the 60 million mark. Simple circulation wear as well as the "fadeaway" common on the 0 of the date—a weak strike due to its placement too close to the rim—has eliminated most of the issue from the highest Mint State grades. Fortunately, a number of wonderfully well-struck Mint State coins do exist—but even then, they mostly no finer than MS67 Full Bands. This piece is one of only two that NGC has graded MS68 Full Bands, with none finer and none at PCGS (9/09). This satiny piece boasts delightful purple-pink obverse color with a crescent of steel-blue near the rim. The reverse has an essentially untoned central area with similar hues predominating elsewhere. The piece is fully struck throughout, including the final digit and all bands on the faces. (#4929)

### Impressive MS66 Full Bands 1921 Dime

441 1921 MS66 Full Bands NGC. This semi-key issue has long been prized as conditionally elusive, especially with Full Bands. The present Premium Gem earns its designation handily with a boldly executed strike. The luster is strong and silver-white with only the slightest suggestion of iridescence. Census: 20 in 66 Full Bands, 4 finer (9/09). (#4935)

### Highly Lustrous 1924 Dime, MS67 Full Bands

442 1924 MS67 Full Bands PCGS. CAC. Ex: Comics-N-Stuff San Diego. The 1924-P is scarce in Gem and finer grades, especially with Full Band details, unlike many later dimes from the Philadelphia Mint. The luster on this piece is bright and softly frosted and each side shows mottled peripheral shadings of deep russet and gold toning. As one can infer from the grade, there are no distracting abrasions on either side. Population: 14 in 67 Full Bands, 0 finer (9/09). Ex: Dallas Auction (Heritage, 12/2004), lot 5805. (#4943)

---

### Marvelous MS68 Full Bands 1924 Dime

- 443 1924 MS68 Full Bands NGC. Though Heritage has offered an assortment of MS65 to MS67 Full Bands examples of this popular Philadelphia issue, this MS68 Full Bands coin, is one of just two graded by NGC with none certified by PCGS (9/09). Exquisite detail and frosty silver-gray surfaces combine with virtually flawless preservation for maximum eye appeal. (#4943)
- 444 1924-D MS66 Full Bands NGC. Brilliant and boldly struck with exemplary luster and exceptional preservation. Aside from the 1929-D and 1929-S, branch mint dimes from the 1920s are difficult to locate in such quality. Census: 30 in 66 Full Bands, 6 finer (9/09). (#4945)
- 445 1924-S MS64 Full Bands PCGS. Dappled russet-brown and forest-green embraces the obverse, while the reverse is essentially untoned. Lustrous and impressively preserved with minor inexactness of strike along the obverse margin. Population: 91 in 64 Full Bands, 16 finer (9/09). (#4947)
- 

### Exceptional 1925-S Gem Full Bands Ten Cent

- 446 1925-S MS65 Full Bands PCGS. The 1925-S is arguably the worst-produced of all issues in the Mercury dime series. However, the habitual softness of strike that plagues the issue in general is not reflected on the fully split central reverse bands of this pleasing example, or for that matter on any other of the design elements save for the top of the B in LIBERTY. Vibrant mint luster is only slightly affected by the original mottled toning that covers each side. A solid Gem with no mentionable abrasions. A thin, vertical depression of mint origin extends vertically through the center of Liberty's neck, without influencing the technical grade of the piece. Population: 58 in 65 Full Bands, 19 finer (9/09). (#4953)
- 

---

### Toned 1926-D Dime, MS66 Full Bands

- 447 1926-D MS66 Full Bands PCGS. David Lange's series reference points out that the 1926-D Mercury dime was produced with better production values than most denominations of this date and mint, a fortunate occurrence for bidders on the present lot. The dappled obverse toning ranges from jade to gold, violet, and lilac, with some silver-white areas remaining. The reverse is mostly untoned, with cinnamon and gold marginal accents. The surfaces are satiny underneath the toning, and the strike is impeccable. Population: 18 in 66 Full Bands, 2 finer (9/09). (#4957)
- 

### Exquisitely Struck 1931-S Dime, MS66 Full Bands

- 448 1931-S MS66 Full Bands PCGS. Lange DDO-1. The 1931-S dime can be located in most grades with a little patience due to widespread hoarding during the 1940s and 1950s. The issue is infrequently seen with Full Bands, however, especially in the higher levels of Mint State. A solid strike transcends fullness on the central bands of this Premium Gem to include completeness on all of the design elements. Soft apple-green and reddish patina gravitates to the margins, and lustrous surfaces are minimally abraded. Slight doubling is noted on the date digits. Population: 36 in 66 Full Bands, 6 finer (9/09). (#4987)
- 

### Satin 1939-S Dime, MS67 Full Bands

- 449 1939-S MS67 Full Bands PCGS. This is near the top end of the certified population, as NGC and PCGS have each graded only a single Full Bands coin finer (9/09). For a mintage exceeding 10.5 million coins, PCGS has graded only 29 MS67 Full Bands pieces. This example boasts splendidly lustrous satin-silver surfaces that show just a hint of color. The strike and unperturbed condition are all one could wish for. (#5021)
- 

- 450 1942/1 AU50 NGC. FS-101, formerly FS-010.8. A generally lustrous key date dime that has a mere hint of golden patina. One thin vertical mark near the mouth, otherwise pleasing. (#5036)

- 451** 1942/1 AU55 PCGS. FS-101, formerly FS-010.8. Faint wear on the fasces lines precludes a higher grade, but luster still emerges from the olive branch and legends. A smooth Choice AU key date dime with pastel gold and ice-blue toning. (#5036)

**Uncirculated 1942/1 Mercury Dime**

- 452** 1942/1 MS60 PCGS. FS-101, formerly FS-010.8. Russet-brown freckles congregate throughout the margins of this satiny key date dime. No highpoint wear is apparent, and abrasions are surprisingly insignificant. As always, the overdate is unmistakable. Perhaps the best Philadelphia Mint employees went off to war, and left an inexperienced team behind to produce this famous mint error. (#5036)

**Important Near-Gem 1942/1 Dime**

- 453** 1942/1 MS64 NGC. FS-101, formerly FS-010.8. A gorgeous Choice Uncirculated example of one of the boldest 20th century U.S. coin overdates. Bright silver-white color dominates, but blushes of peach at the right obverse and reverse also add interest. Strongly struck, including distinctly above-average definition on the bands. Census: 12 in 64, 12 finer (9/09). (#5036)

**Gleaming MS66 1942/1 Dime**

- 454** 1942/1 MS66 PCGS. CAC. FS-101, formerly FS-010.8. It seems when one attends coin shows that the already considerable affection for the classic coin designs of the early 20th century is in an upswing. Walking Liberty halves, Buffalo nickels, and Mercury dimes all appear to be drawing increased collector attention. The 1942/1 and 1942/1-D overdate dimes are, of course, two of the much-wanted keys to that series—ones that, even though technically error coins, are collected alongside the regular issues. The present coin is among the numerically finest certified at PCGS, a total of eight coins including Full Bands coins. Gleaming satiny silver luster radiates from both sides, and the eye appeal is immense. The strike is impeccable, and even though this piece lacks the Full Bands designation, it appears to be not far from it with just the slightest joining evident on the central bands. Population: 2 in 66, 0 finer (9/09). (#5036)

- 455** 1942/1-D AU50 PCGS. FS-101, formerly FS-010.8. The centers display light wear, but this briefly circulated key date dime has partial luster and an unblemished appearance. Straw-gold and lime tints confirm the originality. (#5040)

- 456** 1942/1-D AU58 NGC. FS-101, formerly FS-010.8. Light champagne and medium gold toning partially subdues the lustrous surfaces of this pleasing near-Mint overdate. The 1942/1 and 1942/1-D Mercury dimes are both highly popular Guide Book-listed varieties. (#5040)

## Singular MS67 Full Bands 1942/1-D Dime

- 457 1942/1-D MS67 Full Bands NGC.** FS-101, formerly FS-010.8. As the *only* MS67 Full Bands example in the combined certified population (9/09), the desirability of this Denver overdate dime is without question. Under magnification, the overdate feature is as plain as can be; certainly, this is aided by the remarkably bold strike, which lends impressive detail to both the portrait and the fasces. Minimally toned fields are immensely lustrous with a slightly satiny texture, and just a hint of green-gold patina visits the rims. Magnificent in every respect. The only flaw deserving any mention is a single tiny scrape on the cheek. (#5041)

- 458 1944 MS67 Full Bands PCGS.** Ex: Scheppman Collection. Delicate tawny-gold toning visits this highly lustrous and crisply struck late date Superb Gem. Gorgeously devoid of marks, and surprisingly scarce in high grade with full bands. (#5051)

## PROOF MERCURY DIMES

- 459 1936 PR66 PCGS. CAC.** This stone-white and needle-sharp Premium Gem appears as pristine as if it were just removed from the dies with a gloved hand. The low mintage key to the brief seven-year proof run. (#5071)

- 460 1936 PR66 NGC.** A virtually brilliant Premium Gem whose meticulous strike and exemplary preservation ensure the eye appeal. The reverse displays moderate white on black contrast, but on the obverse, only Liberty's wing exhibits frost. (#5071)

### Deeply Reflective PR68 ★ 1938 Dime

- 461 1938 PR68 ★ NGC.** A decisively struck specimen with fantastic mirrors and eye appeal in spades. Both sides are minimally toned, though a suggestion of silver-gray or golden-tan appears occasionally at the rims. Exquisite preservation completes the eye appeal. NGC has graded only one numerically finer example (9/09). (#5073)

### Stunning PR67 Cameo 1939 Dime

- 462 1939 PR67 Cameo NGC.** While this late Depression-era proof dime issue is available for a price at the PR67 level, it is far less accessible so fine with a strong cameo effect. This beautifully contrasted piece sports gleaming mirrors and distinctly frosty devices. Just a hint of golden color keeps the fields from brilliance. Census: 12 in 67 Cameo, 1 finer (9/09). (#85074)

- 463 1942 PR68 NGC.** Cherry-red, apple-green, canary-gold, and cream-gray endow the obverse. The reverse is essentially brilliant. As of (9/09), PCGS and NGC combined have certified only one piece above the PR68 level. (#5077)

- 464 1942 PR68 NGC.** The brilliant surfaces are immaculately preserved, and the design elements are fully defined. This final year proof is essentially unimprovable, yet remains within the price range of advanced collectors. (#5077)

## TWENTY CENT PIECES

- 465 1875 MS61 PCGS. A touch of orange toning visits the lower reverse of this mostly silver-gray specimen. Several light abrasions and faint hairlines limit the grade, but the strike is bold. Housed in a green-label PCGS holder. (#5296)
- 466 1875-CC XF40 PCGS. A luminous silver-gray example of this initial Carson City twenty cent issue. Lightly abraded with the center of the word LIBERTY weak but visible. (#5297)
- 467 1875-CC XF40 PCGS. A silver-gray example of the only collectible Carson City issue of the denomination. LIBERTY is readable although the individual letters are faint. Smooth aside from minor marks on the legs. (#5297)
- 468 1875-S MS64 PCGS. Considered the single common twenty cent piece, this lovely Choice Mint State example is ideal for the type collector. It has delightful gold, steel, and iridescent toning over frosty silver luster. (#5298)
- 469 1876 MS62 PCGS. Pleasing medium-gray and tan accents grace the lustrous surfaces of this minimally marked specimen. The strike is bold. The 1876 twenty cent piece had a low mintage of just 14,640 coins. (#5299)

### Boldly Toned Gem 1876 Twenty Cent Piece

- 470 1876 MS65 PCGS. Only 14,640 business strikes were produced of this Centennial issue, from two pairs of dies. This one appears to be the one Breen describes as "hollows in wings, defect joining wingtip to (T)S, and minor doubling on STAT." This splendid type coin has reddish-gold central color blending with sea-green at the rims on each side. The bold strike and absence of mentionable marks further increase the desirability. (#5299)

## PROOF TWENTY CENT PIECES

### Pleasing PR64 Cameo 1878 Twenty Cent

- 471 1878 PR64 Cameo PCGS. A charming Cameo near-Gem specimen from an issue of just 600 coins, the twenty cent denomination's finale. Exquisitely mirrored fields have a thin veil of gold-gray toning, while the moderately frosted devices remain largely silver-white. Great eye appeal. Population: 18 in 64 Cameo, 7 finer (9/09). (#85306)

### Enchanting PR66 Cameo 1878 Twenty Cent

- 472 1878 PR66 Cameo NGC. This proof-only issue of just 600 pieces brought an early end to the denomination, but thanks to gorgeous survivors like the present specimen, the twenty cent piece lives on. Gleaming fields with astounding reflectivity combine with richly frosted devices to create the cameo effect core to this coin's eye appeal. Census: 5 in 66 Cameo, 2 finer (9/09). (#85306)

## EARLY QUARTERS

### Elusive 1804 B-1 Quarter

- 473 1804 PCGS Genuine. B-1, R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Although extensively worn, this piece has natural light and medium gray surfaces. It appears to be bent, with light surface roughness and minor scratches. Still an attractive example and a rare date. (#5312)

- 474 1804 Fair 2 PCGS. B-1, R.3. "Collar" clashmarks on Liberty help confirm the Browning variety. Deeply toned cream-gray and olive-green. Large initials PFD are faintly pinscratched on the obverse. Most of the date is bold, and careful study beneath a loupe locates the stars and many other design details. (#5312)

---

Attractive Very Fine 1804 Quarter, B-1

Census Level 1805 B-3 Quarter, MS64

475 1804 VF20 PCGS. CAC. B-1, R.3. The die scratch between stars 8 and 9 immediately attributes the B-1, one of only two die pairings for this low-mintage year. While the B-1 is considered very scarce, the B-2 is rare. This is an extremely attractive Very Fine example with slightly lighter high points and generous dollops of mint-green and ocean-blue over most of each side. The reverse has a similar palette, a bit more evenly distributed. Most of the deep detail remains on this coin, with full rims and a well-centered planchet, void of singular abrasions on either side. A wonderful acquisition of this low-mintage issue for first-year type collectors. Population: 13 in 20, 45 finer (9/09). (#5312)

476 1805 MS64 PCGS. B-3, R.1. Die State V. This common Browning variety is actually quite rare in such an advanced die state, and the present example is equal to the top of the Condition Census enumerated in Steve Tompkins' 2008 reference *Early United States Quarters 1796-1838*.

The late die state of this coin is characterized by several die markers. There are three obverse die cracks, one through star 4 passing below the hair ribbon to the hair curl; a second that runs through stars 1 and 2 and through the lower date digits; and a third that extends upward from the 5 in the date to the bust. The E in LIBERTY is quite weak, noticeably more so than the flanking letters. On the reverse, there are heavy clash marks from the bust above the clouds and STATES OF; a crack through the tops of STA; and another from the rim to the upright of the first T in STATES.

The current example has muted silver-gray surfaces with a golden overlay, complemented on the reverse by peripheral aqua and amber. Bright mint luster radiates beneath the light toning. A small dark alloy spot in the 0 of the date will serve as a pedigree identifier. There are no mentionable planchet flaws or other distractions on this incredibly rare and appealing coin. This example is sure to generate some spirited bidding. Population: 6 in 64, 1 finer (9/09).  
Ex: Heritage (4/2006), lot 1462. (#5313)

477 1807 VF25 ANACS. B-2, R.3. Deep dove-gray toning cedes to tan shades on the highpoints. Unmarked aside from a minor obverse rim nick at 8 o'clock. A later die state with heavy cracks near the date. (#5316)

## BUST QUARTERS

### Appealing 1819 Large 9 Quarter, B-2, XF45

**478** 1819 Large 9 XF45 NGC. CAC. B-2, R.3. The left side of the 9 is even with the edge of the curl and the large 25 in the denomination has a square base 2 and fancy top 5. The reddish-gold and gray centers yield to medium intensity multicolored toning at the margins, and the design elements are uniformly strong. A few minute marks are undisturbing. Great overall eye appeal. (#5326)

**479** 1819 Large 9 AU53 NGC. B-2, R.3. A low D in UNITED aids attribution. A deeply toned golden-brown and gunmetal-blue example with few marks and only moderate highpoint wear. The obverse has slender peripheral die cracks.  
Ex: Long Beach Signature (Heritage, 9/2008), lot 1829, which realized \$3,737.50. (#5326)

### Well Defined 1819 Large 9 Quarter, B-2, AU55

**480** 1819 Large 9 AU55 NGC. B-2, R.3. In addition to the large 9 and the defective lower left serifs of both 1's, the second S in STATES and S in PLURIBUS are aligned and all T's are defective at bottom right. Bright silvery surfaces display whispers of sky-blue and purple at the margins. This well defined piece reveals some fine hairlines under magnification. (#5326)

**481** 1821 XF45 ANACS. B-3, R.2. Deep cobalt-blue and walnut brown encompass this moderately circulated quarter. Luster glimmers from design recesses. There are no remotely reportable marks. (#5331)

**482** 1822 XF45 NGC. B-1, R.2. Only two die pairings for this date, which is low mintage relative to its half dollar counterpart. This slightly bright representative is pearl-gray except for peripheral autumn-brown and aqua toning. (#5332)

### Near Gem 1825 Overdate Quarter, B-2

**483** 1825/43 MS64 PCGS. B-2, R.2. PCGS misattributed this coin as an 1825/2 B-1, where actually the top of a 3 shows under the 5. There is also noticeable repunching on the 8. All three 1825-dated varieties are overdates, although the particular underdigit (or underdigits) beneath the 5 can be debated. Browning-2 is readily identified by obverse star 8 being placed low, and 25C entered high. This near-Gem displays satiny silver surfaces, and sharply defined design features. This early die state piece is struck from perfect dies. Both sides are well preserved, and free of any distracting marks. Population: 19 in 64, 9 finer (9/09), for all 1825 varieties. (#5336)

**484** 1833 AU53 NGC. B-1, R.2. A period after 25 C distinguishes this variety from the only other 1833 die marriage, the equally available B-2. This example has light to medium golden-gray toning and a few minor marks on the upper reverse field. The borders percolate with luster. (#5352)

**485** 1833 AU55 PCGS. B-1, R.2. A hint of cameo contrast results from the combination of slightly reflective fields and lustrous devices on this pleasing silver-gray quarter. Despite a few faint hairlines, this coin has excellent eye appeal. (#5352)

### Splendid 1834 B-4 Quarter, MS63

- 486 1834 MS63 PCGS. B-4, R.1. The obverse die is perfect and the reverse is cracked. A common variety with several high grade pieces known. This example is ideal for a general date or type collection, and will provide a nice example of the variety for the specialist. Both sides have pleasing and lustrous silver surfaces with lovely iridescent toning. The strike is bold with excellent definition on both sides. (#5353)

### Remarkable B-4 1834 Quarter, MS64

- 487 1834 MS64 NGC. B-4, R.1. A sharply struck and utterly charming beauty with top-flight eye appeal. The fields have distinctly reflective luster beneath elegant peach-rose and blue-green patina. Only a few tiny marks preclude Gem status. For coins not specifically attributed, Census: 33 in 64, 15 finer (9/09). (#5353)

### Sharply Impressed 1834 Quarter, B-1, MS64

- 488 1834 MS64 NGC. B-1, R.1. The first star is distant from the forward tip of the bustline, and star 7 is repunched. On the reverse there is no period after 25 C and repunching remnants connect tops of OF. Reddish-purple patina is deeper on the reverse margins than on the obverse of this sharply struck near-Gem. Some wispy hairlines intermingle with die polish lines. Census: 32 in 64 for the issue, 15 finer (8/09). (#5353)

- 489 1835 AU58 ANACS. B-1, R.1. Aquamarine, lilac, and chestnut-gray embrace this satiny Bust type coin. Well struck save for a few stars, and smooth save for a small rim ding at 8:30 on the reverse. (#5354)

## SEATED QUARTERS

- 490 1840-O Drapery MS62 PCGS. Small O. Medium intensity bluish-gray patination envelops both sides of this well struck O-mint quarter. A few light marks do not detract. Population: 6 in 62, 14 finer (9/09). (#5398)

### Near-Gem 1844 Quarter, MS64 Impressively Preserved

- 491 1844 MS64 NGC. The 1844 (421,200 pieces produced) is typically encountered in well worn condition. To date (9/09), both major grading services have seen only 52 Mint State examples, and the present near-Gem almost qualifies for Condition Census standing. The originally preserved surfaces are toned in rich blue-green color through which antique-golden undertones shine at certain angles. Both sides are crisply struck, and there are no mentionable distractions. Census: 5 in 64, 2 finer (9/09). (#5406)

### Deeply Toned, Semiprooflike 1845 Quarter, MS65

- 492 1845 MS65 NGC. Deep electric-blue, orange-gold, and magenta toning does not impede the luminosity of the semiprooflike fields, and their noticeable variance with the satiny devices. Sharply struck on the design features, and revealing just a few minor handling marks that probably prevent an even higher grade. Census: 5 in 65, 1 finer (9/08). (#5408)

- 493 1851-O XF40 NGC. The 1851-O quarter had a relatively low mintage of 88,000 pieces and most examples are well worn. Variegated red, violet, and gray toning covers both sides, with lighter patination over the central devices. The design elements are nicely defined, and there are no significant marks. Census: 2 in 40, 10 finer (8/09). (#5418)

### Elusive 1852 Quarter, MS64

- 494 1852 MS64 PCGS. An early 1850s Seated quarter that has survived from before the weight reduction of 1853. These low mintage issues, in this case 177,060 coins, are rarities in higher Mint State grades. This lovely Choice Mint State example has satiny luster beneath gray, gold, and iridescent toning. Population: 10 in 64, 6 finer (9/09). (#5419)

### Attractive 1852 Gem Quarter

- 495 1852 MS65 NGC. Many examples of this scarce-date issue were probably melted in 1853. Pleasing satiny luster exudes from the silver-white surfaces of this attractive Gem. Nicely struck throughout and generally well preserved. A U-shaped lintmark is visible left of Liberty's nose. Census: 4 in 65, 2 finer (8/09). (#5419)

- 496 1853-O Arrows and Rays AU50 NGC. Well struck for this New Orleans issue, popular for its status as a one-year type. Pale blue-green and gold-orange shadings mingle on each side. Census: 6 in 50, 33 finer (9/09). (#5428)

- 497 1853-O Arrows and Rays AU50 PCGS. Rich brick-red, gold, and rose-violet toning consumes each side of this lustrous coin, which shows small pockets of wear at the high points. Intriguing eye appeal. (#5428)

- 498 1853-O Arrows and Rays AU50 PCGS. Light silver and tan-gold toning on the obverse yields to deeper orange and blue shadings at parts of the reverse. Well struck overall with only light traces of wear. Population: 16 in 50, 30 finer (9/09). (#5428)

- 499 1853-O Arrows and Rays AU50 PCGS. Well struck with liquid luster beneath a melange of blue, gold, and orange colors. Mildly worn, with the evidence visible mostly on the high points. Population: 16 in 50, 30 finer (9/09). (#5428)

- 500 1853-O Arrows and Rays AU53 NGC. Light orange and gold peripheral elements grace this lustrous Arrows and Rays quarter. Well struck overall with only slight softness on the lightly worn head. Census: 8 in 53, 25 finer (9/09). (#5428)

- 501 1853-O Arrows and Rays AU53 PCGS. The upper right obverse and reverse show elements of peach toning, this being stronger on the former side. Attractively lustrous with few overt abrasions. Population: 9 in 53, 21 finer (9/09). (#5428)

- 502 1853-O Arrows and Rays AU53 PCGS. A bright silver-white example that shows wispy marks scattered in the fields but only a few points of actual wear. An elusive one-year type. Population: 9 in 53, 21 finer (9/09). (#5428)

- 503 1853-O Arrows and Rays AU55 NGC. Though lightly rubbed at the knee and the high points of the eagle, this Choice AU O-mint Arrows and Rays quarter has great eye appeal. Orange and magenta-violet toning drapes the still-lustrous surfaces. (#5428)

- 504 1853-O Arrows and Rays AU55 NGC. Pastel blue and gold elements meld with the light silver-gray color underneath. A lightly circulated example of this more elusive Arrows and Rays quarter issue. (#5428)

- 505 1853-O Arrows and Rays AU55 PCGS. A dotted streak of olive slants up and through Liberty's head on the obverse, while an unbroken line extends from the TE in UNITED through the uppermost arrowhead on the reverse. Wonderfully attractive with great luster. (#5428)

### Appealing 1854 Arrows Gem Quarter

- 506 1854 Arrows MS65 NGC. The 1854 Arrows quarter can be located in most grade levels, as might be expected from its generous 12,380 million mintage. The NGC/PCGS population declines significantly from MS64 to MS65, the condition of the present offering. A subtle blend of low to medium intensity blue, gray, lavender, gold, and crimson toning covers lustrous surfaces that exhibit well struck design features. Some unobtrusive marks concealed within the toning are not worthy of individual mention. Spindly peripheral cracks are visible on both sides. Census: 19 in 65, 6 finer (9/09). (#5432)

### Upper-End MS64 ★ 1855 Arrows Quarter

- 507 1855 Arrows MS64 ★ NGC. Final year of the Arrows type, the 1855 had an abundant mintage of 2.8 million pieces. While not scarce in the lower grades of Uncirculated, the 1855 is remarkably challenging in MS64 and finer condition. This is a mostly brilliant example that is surrounded by a ring of golden at the margins on each side, and the fields display a semiprooflike glimmer. The devices are sharp, except for a few of the stars on the left side of the obverse. A significant type coin and a good buy at this grade and price level. (#5435)

### Pleasing MS65 1856 Quarter

- 508 1856 MS65 PCGS. An excellent No Motto type coin, this 1856 quarter is brilliant throughout and every design feature is completely brought up overall. The luster is soft and frosted and there are no objectionable abrasions on either side. One of the more available No Motto quarters in Uncirculated grades. Population: 11 in 65, 9 finer (9/09). (#5438)

### Elegant Gem 1856 Quarter

- 509 1856 MS65 NGC. The 1856, sporting a mintage of 7.624 million pieces, is one of the most common dates in the Seated Liberty quarter series. Examples in the better Mint State grades, however, such as this Gem offering, are much more difficult to acquire. Lustrous ice-blue surfaces are occasionally splashed with reddish-gold, yellow-gold, and sky-blue. Slight striking softness but excellent preservation. Census: 12 in 65, 4 finer (9/09). (#5438)

- 510 1857 MS64 PCGS. CAC. Original aquamarine and rose-red shades embrace this gently shimmering Choice quarter. A few of the stars are incompletely brought up, and the reverse field has minor contact. (#5442)

### Lightly Toned 1857-O Quarter MS63

- 511 1857-O MS63 NGC. This semiprooflike and lightly toned New Orleans quarter lacks mentionable marks. The strike is good aside from softness at 6 o'clock on the obverse and opposite at 12 o'clock on the reverse, caused by a slightly uneven die alignment. The 1857-O is easily found in VG to VF grades, but is an unappreciated rarity in Mint State. Census: 4 in 63, 2 finer (9/09). (#5443)

### Delightful Gem 1858 Quarter

- 512 1858 MS65 PCGS. CAC. Strong, satiny luster is the unifying trait of this well-preserved Gem. The two sides do show some contrasts; most notably, the obverse has pale orange rim toning around faintly pink-toned fields, while the reverse has more dusky blue and rose patina. Striking softness at the left side of the eagle contributes to the grade. Population: 33 in 65, 13 finer (9/09). (#5445)

### Magnificent MS66 1858 Quarter

- 513 1858 MS66 NGC. While the fields and devices are mostly untoned, the borders display iridescent plum-red and jade-green patina. Lustrous and exceptionally preserved with a pinpoint-sharp strike. An outstanding Premium Gem struck during the administration of our only bachelor President, James Buchanan. Census: 16 in 66, 3 finer (9/09). (#5445)

### Elusive 1860-O Seated Quarter, MS64

- 514 1860-O MS64 PCGS. An extraordinary example of the No Motto design type, and the final issue coined in New Orleans at the start of the Civil War. This near-Gem is sharply detailed with excellent satin luster. Both sides have rich and beautiful gold and iridescent toning. Population: 7 in 64, 3 finer (9/09). (#5452)

---

**Lovely MS64 1871 Quarter**

- 515 **1871 MS64 NGC.** This post-Civil War issue is highly underrated, especially in better Mint State grades, but the series enthusiast knows that the 1871's condition rarity cannot be ignored, particularly at MS64. This fantastic near-Gem features hints of shell-pink and gold toning against softly lustrous silver-white surfaces that host crisply struck devices. Census: 5 in 64, 4 finer (9/09). (#5478)
- 516 **1874 Arrows MS63 PCGS.** Attractive lilac, caramel-gold, and apple-green toning envelops satiny and fully struck surfaces. The right obverse field has a few wispy marks, otherwise unabraded. A briefly coined design subtype. Population: 16 in 63, 35 finer (9/09). (#5494)

**Charming 1874-S Arrows Quarter, MS66**

- 517 **1874-S Arrows MS66 PCGS. CAC.** Though it does not have so high a mintage as either of the With Motto, Arrows Philadelphia quarter issues, the 1874-S is as accessible or nearly so in better Mint State grades. At the Premium Gem level, however, its condition rarity is undeniable. This immensely lustrous survivor has a strong strike and dappled peach, rose, and lavender patina. Gorgeous eye appeal. Population: 30 in 66, 1 finer (9/09). (#5495)

- 518 No lot.

---

**Spectacular Superb Gem 1874-S Quarter**

- 519 **1874-S Arrows MS67 NGC.** Neither NGC nor PCGS has graded a numerically finer example of this popular Arrows issue (9/09). This Superb Gem has pale gold and lavender accents above a pale silver-gray base. Strongly detailed overall with practically unmarked surfaces and undeniable eye appeal. Ideal for the high-end type or date collector. (#5495)

**Impressive MS66 1876-S Quarter, Ex: Pittman**

- 520 **1876-S MS66 NGC. Ex: Pittman.** Type Two Reverse. The warm rose-gold tints that drape the lustrous obverse show considerable blue intermixed on the reverse. Excellent design definition and preservation with eye appeal to match both. Tied for numerically finest in the combined certified population (9/09).  
Ex: John Jay Pittman Collection, Part Two (Akers, 5/1998), lot 1357. (#5503)

**Remarkable Prooflike MS66 1879 Quarter**

- 521 **1879 MS66 Prooflike NGC. CAC.** Type Two Reverse. As with many other low-mintage issues of the late 19th century, the 1879 quarter has a significant percentage of reflective survivors. Few of those coins, though, can boast the eye appeal of this Prooflike Premium Gem. Sharply struck devices accompany fields that are nearly immaculate save for a few reed marks between AMERICA and the wing. Faint golden overtones grace each side. (#5511)

### Amazing, Reflective MS68 ★ 1879 Quarter

522 1879 MS68 ★ NGC. Type Two Reverse. Here it is, the single finest NGC-graded business strike 1879 quarter. While five pieces have attained the lofty grade of MS68 from NGC, only the present Superb Gem also possesses a Star designation (6/09). Undoubtedly, the coveted Star was awarded for its lovely peripheral autumn-gold, navy-blue, and plum-red toning. Only 13,600 pieces were struck. (#5511)

### Excellent 1880 Seated Quarter, MS66

523 1880 MS66 PCGS. CAC. Liberty Seated quarters from 1879 to 1890 are, as a group, important rarities in any and all Mint State grades, and this Premium Gem ranks as one of the great pieces of those issues. It has satiny, shimmering luster beneath lovely gold and iridescent toning on the obverse. The reverse is lighter silver-gray with peripheral gold. The overall eye appeal of this specimen is excellent. Population: 34 in 66, 8 finer (9/09). (#5512)

524 1883 MS64 PCGS. Frosty luster endows this attractive near-Gem and a well executed strike leaves strong definition on the design elements save for the usual softness in Liberty's hair. A few wisps of tan-gold show up under magnification as do some light grade-defining marks. Housed in a green label holder. Population: 16 in 64, 29 finer (9/09). (#5515)

### PROOF SEATED QUARTERS

#### Astounding Superb Gem Proof 1859 Quarter

525 1859 PR67 NGC. Type One Obverse, Type Two Reverse. Exquisitely preserved, particularly for the relatively early proof date, and flat-out gorgeous. The obverse has gleaming champagne-gold and orange mirrors framed in violet, and the effigy of Liberty contrasts mildly with the fields. The reverse has zones of dusky peach and blue-green toning that let that side shine only at certain angles. Census: 3 in 67, 0 finer (9/09). (#5555)

526 1859 PR62 Cameo PCGS. Type One Obverse, Type Two Reverse. This needle-sharp specimen has original peach-gold toning with glimpses of rose-red along the obverse border. The devices display even frost, and the obverse field has a few delicate hairlines.  
Ex: Charles Jay Collection (Stack's, 10/1967), lot 401. (#85555)

#### Lovely 1861 Seated Quarter, PR64

527 1861 PR64 PCGS. This early Civil War proof is a lovely example with deep steel, gold, and iridescent toning over fully mirrored fields. The devices are lustrous and sharply detailed. The Civil War period proof silver coins provide an opportunity for collectors who find business strikes too much a challenge. Population: 32 in 64, 7 finer (9/09). (#5557)

#### Colorful Gem Proof 1864 Quarter

528 1864 PR65 NGC. Remarkable rose-gold and blue-green patina, the latter framing the former, dominates the eye appeal of this gleaming Gem proof. The strike is bold, and the eye appeal and preservation are a perfect match. A great example of this Civil War-era proof issue. For the contrast category, Census: 12 in 65, 13 finer (9/09). (#5560)

---

### Sumptuous PR65 Cameo 1864 Quarter

- 529 **1864 PR65 Cameo PCGS.** A richly toned specimen that retains substantial contrast, aided by the strong frosty luster on the sharply struck devices. The mirrors also offer penetrating reflectivity. On the obverse, the toning is light gold-gray with an arc of cobalt-blue at the right rim, while the reverse shows a more even blend between the two colors. Population: 3 in 65, 0 finer (9/09). (#85560)

### Gleaming Gem Proof 1865 Quarter

- 530 **1865 PR65 PCGS.** This gorgeous Gem is sharply struck, carefully preserved, and strongly mirrored. The prime attraction, however, is its rich patina. The obverse has subdued gold-orange and mauve shadings with a touch of peripheral violet, while the reverse shows pale blue-green over much of the fields. Population: 5 in 65, 13 finer (9/09). (#5561)

### Imposing PR67 Cameo 1867 Quarter

- 531 **1867 PR67 Cameo NGC.** Navy-blue and plum-red fills the margins, while the fields are light golden-brown and the device are only faintly toned. Exactly struck with flashy mirrors and obvious frost across the major devices. A stingy 625 proofs were struck. Census: 3 in 67 Cameo, 0 finer (9/09). (#85566)

---

### Wonderful 1868 Quarter, PR65 Deep Cameo Only Deep Cameo Certified by Either Service

- 532 **1868 PR65 Deep Cameo PCGS. CAC.** The 1868 quarter saw a mintage of 600 proofs, a fair number of which have survived to the present day. Indeed, PCGS and NGC have to date (9/09) certified close to 300 coins. Significantly, the present Gem offering is the only piece designated a Deep Cameo by either service. Its essentially untoned surfaces exhibit an exquisite strike and stunning field-motif contrast. Both sides are nicely preserved. (#95567)

### Stunning PR65 Cameo 1873 No Arrows Quarter

- 533 **1873 No Arrows PR65 Cameo NGC.** The deep cerulean and gold color that forms an elongated peripheral crescent on the obverse turns into full-on concentric toning on the reverse, which starts with a light golden center and fades into deep azure and lighter peridot. Strongly contrasted through the toning with gorgeous eye appeal. Census: 4 in 65 Cameo, 4 finer (9/09). (#85572)

### Popular 1873 With Arrows Quarter, PR64

- 534 **1873 Arrows PR64 PCGS.** This brilliant and sharply struck proof has entirely untoned surfaces. The fields are fully mirrored and the devices show a trace of mint frost that imparts light cameo contrast. The With Arrows coins were struck only in 1873 and 1874, and all offerings are popularly received by type collectors. (#5574)

- 535 **1874 Arrows PR62 Cameo PCGS. CAC.** Dappled light brown toning enriches sharply impressed proof surfaces. Limited only by an obscure pinscratch near star 13. A two-year design subtype. Ex: *Dallas Signature (Heritage, 11/2007)*, lot 581, which realized \$1,725. (#85575)

---

### Desirable PR66 Cameo 1879 Quarter

- 536 1879 PR66 Cameo NGC. Type Two Reverse. Whispers of peripheral gold offset the near-brilliance of the silver-white fields, which show a few tiny planchet flaws but no immediately apparent post-striking troubles. Light frost across the crisply struck devices grants this coin appreciable contrast. Census: 8 in 66 Cameo, 5 finer (9/09). (#85580)
- 537 1881 PR65 Cameo NGC. A stunning Gem Cameo proof, this 1881 quarter displays considerable silver brilliance with splashes of light champagne toning. Census: 9 in 65 Cameo, 19 finer (9/09). (#85582)
- 538 1883 PR65 Cameo NGC. Both sides have astoundingly flashy mirrors and considerable frost over the devices. The reverse is slightly more contrasted, since the obverse has a delicate layer of light cloud-white patina. Census: 17 in 65 Cameo, 15 finer (8/09). (#85584)
- 539 1887 PR66 NGC. Beautifully toned, albeit a trifle softly struck on the stars. Watery mirrors offer gorgeous reflectivity at the sea-green margins on each side. The central obverse cedes to aquamarine and violet, while gold-orange is prevalent on the reverse. Census: 35 in 66, 12 finer (9/09). (#5588)

## BARBER QUARTERS

- 540 1892 MS65 NGC. Type Two Reverse. Deep blue and lighter gold-gray toning dominates the eye appeal of this first-year Gem. Sharply struck with great luster filtering through the patina. Housed in an earlier-generation NGC holder. (#5601)
- 541 1893-O MS65 NGC. Highly lustrous, essentially untoned surfaces exhibit well struck devices except for localized softness on the reverse motif. Some minuscule obverse marks are undisturbing. Census: 18 in 65, 12 finer (9/09). (#5605)
- 542 1894-O MS65 PCGS. Golden-brown toning dominates the obverse, although sea-green tints visit the border. The reverse is close to brilliant but does display peripheral tan patina. A good strike except for the claws and fletchings. Smooth for the grade. Population: 11 in 65, 7 finer (9/09). (#5608)
- 543 1899-O MS64 PCGS. Luminous peach and blue-gray patina drapes each side of this satiny near-Gem. Well struck and attractive in a small-format holder. Population: 20 in 64, 14 finer (9/09). (#5623)

---

### Turn of the Century 1900-O Quarter, MS65

- 544 1900-O MS65 NGC. Type One Obverse, Type Two Reverse. This fully struck Gem has light tan toning, just faintly seen over each side, and bright satiny luster. Exceptionally free from marks, and an important example of this turn of the century New Orleans issue. Census: 8 in 65, 6 finer (9/09). (#5626)

---

### Collectible 1901-S Quarter, Fair 2

- 545 1901-S Fair 2 NGC. Both sides of this key-date representative display pleasing silver-gray color that is just a touch deeper in the fields and recessed areas. All obverse peripheral elements save for a couple of stars are entirely free of the rim. The lower portion of Liberty's ear is clear, as is part of the eye. With the exception of the wing tips, the eagle is completely outlined, as is the mintmark. A couple of motto letters show on the ribbon, and the inner parts of most of the legend and denomination are visible. A few light circulation marks on each side do not detract from the designated grade. All in all, a very collectible specimen for having seen heavy circulation. (#5630)

---

### Attractive AG3 1901-S Quarter

- 546 1901-S AG3 PCGS. Light gray surfaces darken slightly in the fields and recesses, thereby highlighting the central devices. Except for the wing tips, these are completely outlined, as are the date digits, obverse legend, reverse stars, mintmark, and wreath. Parts of Liberty's eye and ear are visible, as are a couple of letters of the reverse ribbon motto. The reverse rim is totally worn into the peripheral lettering while the obverse rim is about one-quarter complete. Both sides of this key-date specimen are remarkably clean for a coin having experienced heavy circulation, and as such will fit comfortably in a low- to mid-grade Barber quarter collection. (#5630)

- 547 1902-S MS64 PCGS. Delightful satiny luster highlights the boldly struck details. Deep purple toning resides in the margins, while the centers are brilliant. A few tiny marks on Liberty's cheek do not detract. Population: 20 in 64, 17 finer (8/09). (#5633)

## Landmark Rarity 1902-S Quarter, MS67 Tied for Finest Certified at PCGS

**548 1902-S MS67 PCGS. CAC.** The 1902-S quarter is an extremely elusive issue in the Barber series. For many years PCGS had certified but a single 1902-S in MS67, a coin we have had the privilege to handle numerous times since 1994. We at first thought that the present coin was an “old friend” coming back for a return visit—something we always enjoy at Heritage—but it is, in fact, a second example in MS67 that has recently joined the ranks of finest at PCGS. The splendid surfaces on this piece show a mixture of untoned silver-gray mixed with olive-gray and ice-blue in varying degrees on both sides. As demanded of the grade, there are essentially no distractions on this piece, although a hint of the normal strike softness appears at the upper right shield corner. The strike elsewhere is quite sharp. As further testament to the elusiveness of this issue, we note that the fabulous John C. Hugon Collection (Heritage, 1/2005), which contained many landmark rarities in the Barber series, managed “only” an MS65 NGC example of the 1902-S. Population: 2 in 67, 0 finer. (#5633)

**549 1905-S MS64 NGC.** Light powder-blue and almond-gold alternate across this shimmering and impressively preserved near-Gem. Boldly struck despite minor merging on the fletchings. Census: 17 in 64, 13 finer (8/09). (#5641)

## Colorful 1907 Quarter, MS66

**550 1907 MS66 PCGS.** The 1907 has a generous mintage of 7.132 million circulation strikes and can be located through the near-Gem level of preservation without too much difficulty. Gems are more challenging and higher-grade specimens are elusive. The toning pattern on this Premium Gem consists of aqua-blue and purple around the peripheries and golden-tan in the centers, with deeper hues of this palette on the obverse. A well executed strike sharpens the design features. Light grazes on Liberty’s chin and neck are completely inoffensive. Population: 18 in 66, 1 finer (9/09). (#5645)

**551 1909 MS65 NGC. CAC.** Golden-brown and apple-green toning graces shimmering and sharply struck surfaces. This splendid Gem appears devoid of marks to the unaided eye, and magnification reveals only trivial imperfections. Census: 33 in 65, 14 finer (9/09). (#5653)

**552 1909-D MS65 PCGS.** Freckles of light tan and gray run over the lustrous surfaces of this Gem D-mint representative. The design elements are well impressed, except for softness in a couple of the star centers. Both sides are devoid of significant marks. Population: 26 in 65, 18 finer (9/09). (#5654)

**553 1913 MS64 NGC.** Splendid satiny luster glistens throughout the well preserved surfaces. Just a trace of golden patina is seen in the margins, and the couple of tiny toning spots are noted on the reverse. The strike is bold. Census: 20 in 64, 11 finer (8/09). (#5664)

## Stunning Superb Gem 1914-S Quarter

- 554 **1914-S MS67 NGC.** The “Big Three” Barber quarter issues—the 1896-S, the 1901-S, and the 1913-S—are famous rarities, and if the “Big Three” were expanded to a “Big Five,” two more San Francisco dates, the 1897-S and the 1914-S, would join them. This is a Superb Gem example of the latter date, tied with just three others for numerically finest in the combined certified population (9/09). The strike is pleasing, with only slight softness visible on a few stars and the eagle’s claws, and the bright fields are essentially silver-white. Practically unmarked, as expected of the grade. (#5669)

- 555 **1916 MS66 PCGS.** Wisps of honey-gold adorn this thoroughly lustrous and decisively struck Premium Gem. Inspection beneath a lens can only locate minor marks, largely confined to the shield. Population: 23 in 66, 3 finer (9/09). (#5673)

## PROOF BARBER QUARTERS

- 556 **1894 PR64 Cameo NGC.** Distinctly contrasted with exquisite diamond-frost over the portrait. Strongly mirrored fields have a delicate silver-gray veil over the faint hairlines that account for the grade. Census: 15 in 64 Cameo, 36 finer (9/09). (#85680)

- 557 **1894 PR65 Cameo NGC.** Light almond-gold toning adorns this fully struck and minimally abraded Gem. Radiant devices compare favorably with flashy fields. A stingy 972 proofs were issued. Census: 11 in 65 Cameo, 25 finer (9/09). (#85680)

## Intensely Contrasted 1894 Quarter, PR67 Cameo

- 558 **1894 PR67 Cameo NGC.** Silver-white surfaces appear devoid of even a suggestion of other color, and the intense contrast makes this piece appear awfully close to an Ultra Cameo designation. The strike is marvelously sharp, as expected. This PR67 coin is one of a dozen certified numerically finest at NGC (including two Star coins), and there are none finer (9/09). (#85680)

- 559 **1897 PR64 Cameo PCGS.** The fields are primarily blue-toned, though the pastel gold covering the devices does spill over slightly. Appreciably contrasted with only a few minor hairlines present in the fields. Population: 11 in 64 Cameo, 22 finer (9/09). (#85683)

## Beautifully Toned, Near-Perfect 1898 Quarter, PR68

- 560 **1898 PR68 NGC. CAC.** An exquisitely preserved, dramatically toned Superb Gem with both sides showing hints of contrast through the patina. The obverse is sharply divided between the green-gold color of the upper right half and the blue, violet, and orange shadings present at lower left, while the reverse is concentrically toned with light blue-green at the rims with a fade through cerulean and violet to a pale peach center. Census: 20 in 68, 1 finer (9/09). (#5684)

### Exceptional Deep Cameo PR67 1898 Quarter

- 561 1898 PR67 Deep Cameo PCGS. The Philadelphia Mint had perfected the manufacturing techniques of proof coinage by the late 1890s. Proof coins from this era can hold their own with the best examples produced today, as evidenced by the magnificent coin offered here. The frosty devices of this Superb Gem proof appear to float over the deep watery fields, and whispers of light gold and violet appear at the borders under magnification. Fully struck over all the design elements. The surfaces of both sides are impeccably preserved. The original proof mintage of just 735 pieces has been drastically reduced over the years by improper cleaning, and many examples were spent by noncollecting heirs during the hard days of the Depression. Population: 12 in 67 Deep Cameo, 6 finer (9/09). (#5968)
- 562 1900 PR65 Cameo NGC. An exactingly struck and virtually brilliant Gem that exhibits pleasing frost throughout the devices. The reflective fields are undisturbed by contact. A scant 912 proofs were issued. (#85686)

### Magnificent PR68 1907 Quarter

- 563 1907 PR68 PCGS. CAC. Much cameo contrast is apparent on both sides of this lovely proof, although it is undesignated as Cameo on the first generation PCGS holder. Golden-russet toning graces close to half of the obverse, while the reverse is evenly patinated in honey-gold, plum-red, and sea-green. Type coins such as this piece have enduring popularity in the numismatic marketplace, and justly so. A scant 575 proofs were produced.  
Ex: Long Beach Signature (Heritage, 5/2008), lot 435, which realized \$13,800. (#5693)

- 564 1907 PR64 Cameo PCGS. Faint golden toning overall with deeper sage elements close to the rims. Pleasingly detailed with strong contrast for the issue, though a few scattered hairlines preclude a finer designation. Population: 8 in 64 Cameo, 30 finer (9/09). (#5693)
- 565 1910 PR65 NGC. This Gem proof approaches a Cameo designation as it has white devices and mirrored fields, although delicate stone-gray and caramel-gold toning likely prevents the deserved designation. Merely 551 proofs were struck. (#5696)
- 566 1910 PR64 Cameo PCGS. Hints of russet and golden toning accent the glassy fields, which show impeccable cameo contrast against the frosty devices. A loupe locates only a couple of tiny contact marks. The strike is nearly full. Population: 16 in 64 Cameo, 24 finer (8/09). (#85696)
- 567 1912 PR65 Cameo NGC. An essentially brilliant Gem that possesses icy motifs and darkly reflective fields. The strike is exacting save for unimportant incompleteness near the right (facing) claw. Census: 12 in 65 Cameo, 15 finer (9/09). (#85698)

- 568 1915 PR64 PCGS. Powerfully reflective fields enhance the aesthetic appeal of this razor-sharp near-Gem. Delicate red and lilac patina visits the perimeter. There are no marks worthy of specific mention. A mere 450 proofs were struck. (#5701)

### Colorful PR66 1915 Quarter

- 569 1915 PR66 NGC. CAC. Excellent eye appeal for this final proof Barber quarter issue. The obverse is mildly contrasted between the minimally toned portrait and the dappled gold-orange and blue patina of the fields, while the reverse is more extensively toned in the same vein. Census: 20 in 66, 20 finer (9/09). (#5701)

## STANDING LIBERTY QUARTERS

### Appealing 1916 Key Date Quarter, Good 6

- 570 1916 Good 6 PCGS. Though heavy wear has worn into the digits of the date, the lower part of the 6 is visible. The remaining design elements, especially those on the reverse, are nicely defined for the grade designation. This light to medium-gray example shows hints of green-gold in a crescent at the upper obverse and lower reverse. Both sides are surprisingly minimally abraded for a coin that saw heavy circulation. An appealing and accessible example of this popular 20th century key. (#5704)

### Choice Fine 1916 Standing Liberty Quarter

- 571 1916 Fine 15 PCGS. CAC. The Philadelphia Mint just managed to strike the new Standing Liberty design in 1916, months after Mercury dimes and Walking Liberty halves (introduced the same year) were already in circulation. 52,000 pieces were struck in December and released in early 1917. Many remained in circulation even as common 1917 examples were set aside. This cream-gray example has problem-free surfaces. The lower three-quarters of the date is bold. (#5704)

### Choice VF 1916 Standing Liberty Quarter

572 1916 VF35 NGC. Now here is a truly rare coin, a 1916 Standing Liberty quarter that managed to circulate for 25 points of wear before being plucked from circulation. The inner beaded border is completely full around the coin, and a considerable amount of detail is still present on Liberty's head, on what likely started out as a Full Head coin. The pretty golden-gray surfaces show slight accents of orange and lilac. (#5704)

573 1917 Type One MS65 Full Head PCGS. CAC. Luscious rose and lavender accents grace the silver-gray centers, while the borders show elements of orange. A striking Gem example of this popular type issue, boldly impressed and delightfully appealing. (#5707)

574 1917 Type One MS65 Full Head PCGS. Streaky tan and steel-blue toning is deepest on the lower left reverse. Highly lustrous and nearly unabraded. The strike is intricate, as is usual for the briefly issued Type One design. In a green label holder. (#5707)

575 1917 Type One MS66 Full Head NGC. This powerfully impressed Premium Gem is mostly silver-gray with just a touch of gold and violet at the lower reverse. Captivating luster shimmers throughout the virtually flawless surfaces. (#5707)

### Stunning 1917 Type One Quarter, MS66 ★ Full Head

576 1917 Type One MS66 ★ Full Head NGC. CAC. This stunning Premium Gem has magnificent multi-colored rainbow toning over frosty silver luster on both sides. The strike is second to none with every detail boldly and completely defined. Although NGC has certified 317 of these in MS66 and another 58 in MS67, only eight of those coins have been assigned the ★ designation, including five MS66 and two MS67 (9/09). (#5707)

577 1917-D Type One MS66 NGC. An appealing example with outstanding satiny luster across the untoned and nearly perfect surfaces. This sharply struck and virtually unimprovable piece would make an excellent type coin. Census: 18 in 66, 2 finer (8/09). (#5708)

### Full Head MS66 1917-D Type One Quarter

578 1917-D Type One MS66 Full Head PCGS. Chestnut-tan, gunmetal, and lavender tints enrich this relatively lightly toned Premium Gem. Cartwheel luster dominates the mark-free fields and devices. Well struck, as is often the case for the Type One subtype, coined only between late 1916 and mid-1917. (#5709)

579 1917-S Type One MS65 PCGS. CAC. Attractive purple, red, and golden toning encircles the silver-gray centers, with significantly more color visible in the reverse periphery. The strike is mostly sharp, and there are only a couple of pin-sized handling marks. Population: 38 in 65, 16 finer (8/09). (#5710)

### Striking MS67 Full Head 1917-S Type One Quarter

580 1917-S Type One MS67 Full Head NGC. Unlike its Philadelphia counterpart, the 1917-S Type One quarter is challenging in higher grades, particularly with Full Head-level definition. This Superb Gem is fantastically lustrous with areas of golden toning and small dots of lavender and heather. Carefully preserved and gorgeous. Census: 18 in 67 Full Head, 0 finer (9/09). (#5711)

### Strong MS67 Full Head 1917-S Type One Quarter

581 1917-S Type One MS67 Full Head NGC. Medium olive-green and golden-brown toning graces this outstanding Type One Superb Gem. The strike is unimprovable, and the lustrous surfaces are detraction-free. The scarcest of the 1917 PDS Type One issues, due to a lower mintage and a smaller number of West Coast collectors. Census: 18 in 67 Full Head, 0 finer (9/09). (#5711)

- 582** 1917 Type Two MS66 Full Head PCGS. Medium olive-green and rose-gray toning encompasses shimmering surfaces. Only the two shield rivets near the waist lack a needle-sharp strike. One hidden mark on the drapery above IN GOD. Population: 62 in 66 Full Head, 7 finer (9/09). (#5715)

**Impressive 1917 Type Two Quarter  
MS67 Full Head**

- 583** 1917 Type Two MS67 Full Head NGC. A highly lustrous and essentially brilliant Superb Gem. The reverse is virtually free of even the slightest contact, while the obverse is also gorgeously preserved. The shield rivets have unusual definition for a Type Two, and the waist and inner shield are sharp. The head is exquisitely detailed, with the hairline and ear hole strongly detailed. A magnificent coin that is worthy of the finest type set or specialized holding. Census: 10 in 67 Full Head, 0 finer (9/09). (#5715)

**Lustrous 1919 Quarter, MS66 Full Head**

- 584** 1919 MS66 Full Head PCGS. CAC. The lustrous surfaces of this Premium Gem exhibit the usual sharp strike, including not just a Full Head but crispness in most of the shield lines and rivets. The untoned obverse cedes to soft violet patina speckled with brownish-gold on the reverse. Both sides have been well cared for. Population: 61 in 66 Full Head, 12 finer (8/09). (#5729)

**Bright 1919-D MS64 Full Head Quarter**

- 585** 1919-D MS64 Full Head PCGS. The 1919-D is among the most elusive of the Standing Liberty quarter series in Full Head. J.H. Cline (2007) estimates that 1% of the 1.944 million-piece mintage was struck with Full Head details. The above-average strike delivered on this near-Gem example resulted not only in fullness on the head but crispness on the chain mail and stripes of the inner shield. The rivets near Liberty's hip are weak, but the remaining ones are strong, as are the date digits. Bright luster embraces both sides, each of which is color free and minimally marked. Overall, a very appealing example of this key date in the series and one that will be greatly prized by the new owner. Population: 21 in 64 Full Head, 14 finer (9/09). (#5731)

- 586** 1920 MS66 PCGS. A melange of medium intensity electric-blue, gold, purple, forest-green, and silver-gray coloration visits the lustrous surfaces of this attractive Premium Gem, leaving the reverse center brilliant. Well struck and carefully preserved. Population: 48 in 66, 3 finer (9/09). (#5734)

### Stunning 1920 Standing Liberty Quarter, MS67

- 587 1920 MS67 PCGS. Wonderful rainbow toning on this piece begins with silver-white centers, working outward in concentric rings of gold, pink, jade, and lilac. The head details appear to be a "just-miss" Full Head, nonetheless well-impressed if a trifle short. All but two of the shield rivets are bold. The reverse offers a similar palette, with a dollop more each of cinnamon and burgundy. Another stunner for the color collectors, and one of only three so certified at PCGS with none finer (9/09). (#5734)

### 'Must-See' 1920 Standing Liberty Quarter MS66 Full Head

- 588 1920 MS66 Full Head PCGS. The 1920 Standing Liberty quarter's prodigious production of 27.8 million pieces nearly doubles that of the next-largest issue, the 1918 with 14.2 million coins. This splendid Premium Gem Full Head 1920 features vivid target toning, with silver-white centers radiating outward into amber-gold, lilac, smoke, ice-blue, and magenta. The full articulation on the head and shield round out the appeal. A true "must-see" coin. Expect runaway bidding from the toning enthusiasts. Population: 17 in 66 Full Head, 3 finer (9/09). (#5735)

- 589 1920-S MS64 ANACS. Peripheral golden patina surrounds the mostly untoned surfaces. The strike is a trifle soft on the highest points, as often seen. There are just a couple of tiny handling marks. Both sides boast eye-catching satiny luster. (#5738)

- 590 1920-S MS65 PCGS. A fully original Gem, this remarkable 1920-S quarter has frosty luster beneath silver-gray patina with splashes of iridescent toning. Population: 40 in 65, 17 finer (9/09). (#5738)

- 591 1923-S—Improperly Cleaned—NGC. XF Details. Stone-gray and almond-gold with substantial luster despite moderate wear on the knees and other highpoints. A semi-key issue, apparently little saved by West Coast collectors. (#5744)

- 592 1924 MS65 Full Head PCGS. Deep reddish-brown toning clings to the margins of this radiantly lustrous Gem, transitioning to yellow- and orange-gold and then to mostly brilliant centers. Sharply struck, and revealing no marks of major consequence. Population: 56 in 65 Full Head, 39 finer (9/09). (#5747)

- 593 1924-D MS64 Full Head PCGS. Subtle blue, violet, and gold tints give this strongly lustrous Choice coin delightful eye appeal. The details are well-defined, and there are only a few light ticks on Liberty that preclude Gem status. (#5749)

- 594 1924-S MS64 NGC. Ex: Richmond Collection. A trace of violet toning near the rims, particularly on the reverse, enhances this mostly untoned Choice Mint State specimen. Liberty's head and a couple of rivets are softly defined, as typically seen. Careful inspections reveals only a couple of inconsequential marks on the reverse. (#5750)

- 595 1926 MS65 Full Head PCGS. This sharply struck Gem displays strong chain mail and rivets as well as a Full Head. Lustrous surfaces are nearly untoned save for whispers of rose at the lower reverse rim. A few grade-consistent marks are insignificant. Population: 85 in 65 Full Head, 24 finer (9/09). (#5755)

### Sharp MS64 Full Head 1926-D Quarter

- 596 1926-D MS64 Full Head NGC. CAC. With a subdued mintage of under 2 million pieces and a decided lack of bold strikes, the 1926-D quarter is elusive with Full Head detail. This near-Gem readily qualifies for the designation, though striking softness is visible on Liberty's shield. Light peach and gold central toning visits pebbly fields that are otherwise pale pearl-gray. Census: 17 in 64 Full Head, 8 finer (9/09). (#5757)

### Exceptional 1926-S Gem Full Head Quarter

597 1926-S MS65 Full Head PCGS. CAC. The 1926-S quarter is typical of San Francisco Mint coins in the 1920s in that this facility had problems striking up coins. According to J.H. Cline (2007), the 1926-S and 1927-S are the most weakly struck of all S-mint pieces in the twenties. In line with this, one percent or less of '26-S quarters are struck with Full Heads.

The present Gem is exceptional for the fullness of Liberty's head and chain mail. Even the rivets, except for the two nearest Liberty's abdomen, are sharp. Highly lustrous surfaces are color free save for a wisp of barely discernible light tan on the lower left obverse. Both sides are remarkably clean except for a few unobtrusive grade-consistent grazes. Population: 15 in 65 Full Head, 10 finer (9/09). (#5759)

598 1928 MS65 Full Head PCGS. Unabraded and nicely struck with original eye appeal. The lustrous surfaces are lightly toned save for deep forest-green and dove-gray crescents found at the left obverse and right reverse. Population: 70 in 65 Full Head, 34 finer (9/09). (#5767)

### Lustrous Superb Gem 1929 Quarter

599 1929 MS67 NGC. A well-defined Superb Gem from late in the series that comes close to Full Head details but just misses the mark. Light golden overtones grace the immensely lustrous, carefully preserved surfaces. Among coins not awarded the Full Head designation by NGC, Census: 3 in 67, 0 finer (9/09). (#5772)

600 1929-S MS66 Full Head NGC. Soft champagne-gold patina visits the lustrous, well struck surfaces of this Premium Gem. A few trivial marks do not detract. Census: 91 in 66 Full Head, 26 finer (9/09). (#5777)

### Full Head Superb Gem 1930-S Quarter

601 1930-S MS67 Full Head PCGS. A magnificent Full Head example of this lower mintage final year issue. The essentially pristine surfaces are heavily frosted beneath delicate peach patina. A few flecks of russet color are noticed on the reverse. Population: 17 in 67 Full Head, 0 finer (9/09).  
Ex: Western Hills Collection (Heritage, 6/2005), lot 6144, which realized \$4,887.50. (#5781)

### Bold MS67 Full Head 1930-S Quarter

602 1930-S MS67 Full Head NGC. Both Liberty's head and her shield show substantially above-average definition on this wonderful Superb Gem. Only the tiniest of flaws appear in the immensely lustrous fields, even under close scrutiny. Pale peach patina visits parts of the otherwise light silver-gray surfaces. Census: 23 in 67 Full Head, 2 finer (9/09). (#5781)

## WASHINGTON QUARTERS

- 603** 1932-D MS62 NGC. Whispers of reddish-gold cling to the lower reverse margin of this key-date specimen. Well struck with ample luster. A few small marks are noted on Washington's face. (#5791)
- 604** 1932-D MS63 PCGS. Soft golden-gray patina with minuscule gray freckles resides on the lustrous surfaces of this Select key-date quarter. Nicely struck and only lightly abraded. (#5791)

### Sharp 1932-D Gem Quarter

- 605** 1932-D MS65 PCGS. CAC. Russet and jade-green toning crosses the upper borders. Light sky-blue, lime, and salmon-pink coloration further augments the eye appeal. The design elements are sharply struck although the lower half of the date does not possess absolute definition. Luster dazzles when the piece is rotated beneath a light. Examination under a loupe finds only inconsequential blemishes. The 1932-D has long been regarded as the key to the series, since it is clearly more elusive in better Mint State grades than its closest competitor, the 1932-S. Population: 63 in 65, 1 finer (8/09). (#5791)

### Coveted Gem 1932-S Quarter

- 606** 1932-S MS65 NGC. An attractive Gem example of this popular first-year key, well-defined with essentially untoned, frosty centers. At the margins on each side, subtle gold-orange and peach shadings add color to the coin. Exceedingly rare any finer, with just five such coins known to NGC (9/09). (#5792)
- 607** 1934 Doubled Die Obverse MS62 PCGS. FS-101, formerly FS-009. The Medium Motto is obviously die doubled, and the date and LIBERTY have thick letters. The most prominent doubled die of the entire Washington quarter series, photographed on page 170 of the 2010 Guide Book. Lustrous and faintly toned with attractive preservation. (#5795)

### Famed Doubled Die Obverse 1937 Quarter, MS63

- 608** 1937 Doubled Die Obverse MS63 PCGS. FS-101, formerly FS-012. This doubled die appears in the *Guide Book*, confirming its status as a numismatic classic. Light golden-tan peripheral elements show slight streakiness toward the right obverse, while the centers are pale silver-gray and lustrous. A few tiny abrasions clustered to the left of Washington's forehead contribute to the grade. For the variety, Population: 3 in 63, 7 finer (9/09). (#95803)

### Prized MS67 1940-D Quarter

- 609** 1940-D MS67 PCGS. CAC. This Superb Gem, as one of only 20 MS67 pieces certified by PCGS with none finer (9/09), is of immense importance to the Registry collector. Bright silver-white surfaces show only occasional traces of peach color, and the central devices are subtly frosted. Magnificent eye appeal. (#5812)

### Popular Doubled Die Obverse 1942-D Quarter, MS62

- 610** 1942-D Doubled Die Obverse MS62 NGC. FS-101, formerly FS-015. This bold and popular doubled die is listed in the *Guide Book*. The broad spread is most obvious on LIBERTY, where the L and E show notching and the two vertical strokes of the B are plain. Well struck and brightly lustrous with dappled gold and sage peripheral toning on each side. (#95818)

## PROOF WASHINGTON QUARTERS

- 611 1936 PR65 PCGS. CAC. Gold freckles show up under magnification. Well preserved, bright surfaces exhibit well struck devices. (#5975)
- 612 1936 PR65 NGC. Faint gold and rose toning confirms the originality of this key date Gem proof. Beautifully preserved and precisely struck. The lowest mintage proof Washington quarter, and also the lowest mintage of the 1936 proof denominations, which were available separately as well as in sets. (#5975)

### Bright 1936 Quarter, PR66

- 613 1936 PR66 NGC. This is the first year of proof mintage for Washington quarters, and the key date of the proof series. We offer here a bright Premium Gem the exhibits sharply struck design elements. Both sides are untoned and devoid of mentionable marks or spots. Difficult to obtain any finer. (#5975)
- 614 1937 PR67 NGC. This stone-white Superb Gem appears pristine, and the strike is full throughout. Those without this date need look no further to procure an outstanding specimen. Only the proof 1936 has a lower mintage. (#5976)
- 615 1937 PR67 NGC. Yellow-green and rose-red enrich this flashy and well struck Superb Gem. The central reverse remains untoned. This low mintage proof quarter is encased in a prior generation holder. (#5976)

## EARLY HALF DOLLARS

### O-101 1794 Flowing Hair Half

- 616 1794 PCGS Genuine. O-101, High R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine 12 specimen that has been repaired, whizzed, and retoned. Largely smoothed-out fields show the microporosity often associated with whizzing, and the gold-gray and gunmetal-blue toning on each side seems to float across the surfaces. Still, a collectible representative of the Flowing Hair half dollar type. (#6051)

### Scarce 1794 O-106 Half, VG Details

- 617 1794—Repaired—NGC. VG Details. O-106, R.6. A pleasing example despite microscopic surface roughness and numerous tooling marks. The surfaces are medium to dark gray with a hint of gold. An important variety, as are all 1794 half dollar die marriages. Only the O-101 combination is plentiful, and even that variety is a R.3. It is thought that less than 30 examples of O-106 exist. (#6051)
- 618 1795 2 Leaves—Improperly Cleaned—NGC. Fine Details. O-110, R.3. This Flowing Hair type coin has bold stars and legends, and ample plumage and hair detail. The slate-gray surfaces are hairlined, but there are no scratches or rim dings. (#6052)

### Elusive O-117a 1795 2 Leaves Half Dollar

- 619 1795 2 Leaves VF25 PCGS. O-117a, R.4. The prominent die crack between the 5 in the date and the closest star is diagnostic. Deep charcoal-gray and lighter silver shadings are present on each side of this midrange Flowing Hair half, with the lighter color found mostly on the worn high points. Minimally abraded despite the passage of more than two centuries. (#6052)

### Sought-After 1802 Half, VF30, O-101

- 620 1802 VF30 NGC. O-101, R.3. The only variety of the year. A scarce date, with only 29,890 pieces minted. Light gold toning covers both sides. Nice detail shows for the grade, except the stars are flat as is usually the case. The few light, scattered marks are not serious. Most survivors are in lower grades. Examples of this issue in VF or higher grades are elusive. (#6065)

- 621 1803 Large 3 VF30 PCGS. O-103, R.3. Straw-gold and stone-gray alternate across this attractively detailed Draped Bust half. All letters in E PLURIBUS UNUM are clear, and the surfaces are unblemished save for a thin mark on Liberty's shoulder. (#6066)

---

**Large 3 1803 Half Dollar, AU53**

- 622 1803 Large 3 AU53 PCGS.** CAC. O-103, R.3. The 3 in the date is large and has a vertical serif. On the reverse, a leaf nearly touches the base of the I in AMERICA. Rich russet toning accents the periphery, while the centers are silver-gray. Powerful luster shines throughout and complements the well-struck features. Prominent clash marks from the shield are visible around Liberty's ear. Numerous light abrasions are consistent with the grade. A pleasing example. Population: 6 in 53, 22 finer (9/09). (#6066)

---

**Scarce 1803 O-104 Small 3 Half, XF45**

- 623 1803 Small 3 XF45 PCGS.** CAC. O-104, R.3. The Small 3 is missing its upper left serif, diagnostic for the variety. Four die combinations are known for 1803 half dollars, and the Small 3 variety is the scarcest of the four. It is also important as a major Guide Book listed variety. A nice strike and pleasing light to medium gray toning accompany the pleasing surfaces of this Choice XF. Traces of luster are still visible. (#6067)

- 624 1805 VF35 PCGS.** O-111, R.2. A Choice VF example of this modestly elusive variant, pale gold-gray in the centers with deeper orange elements close to the rims. The usual bold clash mark is noted at Liberty's throat. (#6069)

- 625 1805 XF40 ANACS.** O-113a, High R.4. Light golden-brown toning graces this sharply defined Bust half, which retains noticeable luster in protected regions. Minor field marks near the profile and ribbon correspond to the grade. Struck from prominently clashed dies. (#6069)

- 626 1806/5 VF35 NGC.** O-102, High R.3. An overdated Knob 6 obverse paired with a reverse that shows a die feature through the N of UNITED. Moderately worn with rose and blue patina over minimally abraded surfaces. (#6077)

- 627 1806/5 XF40 ANACS.** O-103, R.2. Deep powder-blue, olive-gray, and orange-gold embrace this well defined Draped Bust half. Luster shines from the border elements. The obverse has scattered moderate marks. (#6077)

---

**Charming Choice VF 1806 Half Dollar  
Knobbed 6, Small Stars, O-106**

- 628 1806 Knobbed 6, Small Stars VF35 PCGS.** O-106, R.4. The Knobbed 6, Small Stars obverse paired with a reverse that has a leaftip between the I and C of AMERICA. This still-lustrous Choice VF coin is largely silver-gray and peach with dots of deeper color present at parts of the rims. For all Knobbed 6, Small Stars varieties, Population: 5 in 35, 19 finer (9/09). (#6075)

---

**Popular 1806 Over Inverted 6 Half  
O-112, XF40**

- 629 1806 6 Over Inverted 6 XF40 NGC.** CAC. O-112, R.4. This variety is much scarcer than the O-111 that was struck from an early state of the obverse. A bisecting vertical die crack begins below the date, extending through the 8 and bust, to the E in LIBERTY, and the upper border. Another obverse crack is visible from the border through star 11, nearly reaching the neck. This medium gray example has faint lilac, gold, and iridescent toning with smooth, problem free surfaces. It is probably one of the five or six finest known. (#6078)

- 630 1806 Pointed 6, Stem XF40 NGC.** CAC. O-116, R.3. Chestnut-gold and cream-gray with occasional hints of lime-green. The strike is good aside from the ribbon and opposite on the left (facing) wing. Relatively unabraded, and remaining luster is plentiful. (#6071)

- 631 1806 Pointed 6, Stem XF40 NGC.** O-115, R.1. Walnut-brown dominates this moderately circulated example, although the borders offer ocean-blue. Luster emerges from protected regions, and no marks are consequential. The right obverse field displays a fingerprint. (#6071)

---

Richly Toned 1806 Half, AU50, O-118a

- 632 1806 Pointed 6, Stem AU50 NGC. O-118a, R.3. Colorfully toned in olive-green, powder-blue, lilac, and peach shades. Luster shimmers from the design recesses. The strike is uncharacteristically sharp on the clouds and reverse stars, although some softness is found on the hair ribbon and lower left (facing) wing. Free from consequential contact, and encased in a former generation holder. (#6071)
- 

## BUST HALF DOLLARS

---

Large Stars 50/20 1807 Half, VF25  
O-111b, The So-Called 'Bearded Goddess'

- 633 1807 Large Stars, 50 Over 20 VF25 PCGS. O-111b, R.5. The so-called "Bearded Goddess" which shows a long, curving die crack below the chin of Liberty to the top of the bust. Another interesting numismatic element on this coin is the dual denomination on the reverse, with 50 punched over a prior 20. Deep gray patina covers both sides, with amber highlights. (#6086)
- 

---

Condition Census 1808 O-109a Bust Half, MS66  
Likely the Second Finest Known

- 634 1808 MS66 NGC. O-109a, R.3. Stars 1 and 7 each point to the center of a dentil. In this late obverse die state a crack runs from the rim between stars 1 and 2, arcing to touch a star tip of each one, and onward into the upper bust. Another crack parallels the rim below the bust tip, with another straight from the rim to the bottom of 18 in the date. Another bold crack connects the rim with star 6 and thence to Liberty's forehead. The diagnostic crack for O-109a is the bold crack from the lower rim through the left side of the 0 in the date. Bold clashing from the scroll appears just above the date, with the reversed E in the motto clearly readable. The reverse is shared with the O-108 variety. Although unmentioned in Overton, the Peterson reference mention a small raised line from the eagle's left (facing) wing that pierces the shield corner and runs up into the neck. Numerous other die cracks on the reverse are evidence of die fatigue, as is the loss of fine detail evident on the reverse of this coin. Virtually all of the dentilation on the reverse is also missing, another characteristic of the late die stages. This piece is silver-white, with no discernible toning. This piece is tied for second finest known in the Condition Census for the O-109a variety, as listed on Stephen Herrman's Spring 2009 Revision. The finest, an amazing MS67 PCGS coin in our FUN Signature Auction (1/2009, lot 3842), brought \$46,000. (#6090)

- 635 1810 AU58 NGC. O-103, R.2. Star 12 is recut and small rust pits are visible between the 50 and C on this frequently encountered variety. Pleasing medium gray with lustrous light ivory on both sides, over satiny surfaces. (#6095)

### Wonderful 1812 O-107 Half, MS64

- 636 1812 MS64 NGC. CAC. O-107, R.1 A delightful example of this popular issue, with sharp design definition on both sides. The surfaces are satiny and lustrous beneath intermingled gold, russet, steel, and sea-green toning over a golden-brown base. This common variety is usually found in lower grades than the present near-Gem. (#6100)

### Gorgeous 1812 O-108 Half, MS65

- 637 1812 MS65 NGC. O-108, R.2. The obverse has the first 1 high and out of place, while the reverse has most of the azure lines extending beyond the right shield border. A wonderful Gem with bold design definition and satiny luster. Both sides exhibit ivory surfaces with considerable blue, lilac, and gold toning that deepens near the borders. (#6100)

- 638 1817 181.7 AU50 PCGS. O-103, R.3. The well-known Punctuated Date variety with a small die chip between the second 1 and the 7. This is a major Guide Book variety in considerable demand. The current specimen has light gray surfaces with considerable luster for the grade. Both sides have pleasing gold and iridescent toning along the borders. (#6110)

- 639 1818/7 Large 8 AU53 PCGS. CAC. O-103, R.3. Powder-blue, forest-green, and golden-brown endow this lovely overdated half dollar. Liberty's curls, cap, and clasp display slight wear, but marks are few, and ample luster percolates within the design. Population: 13 in 53, 47 finer (9/09). (#6115)

### Appealing 1818 Fifty Cent, O-107, MS64

- 640 1818 MS64 NGC. O-107, R.1. The T and Y in LIBERTY show a die line that slants sharply upward, and two tines emerge from the top of the eagle's beak. The highly lustrous surfaces of this near-Gem display electric-blue and lavender toning clinging to the margins and a well executed strike imparts uniform detail to the design features. Some light handling marks visible under a loupe do not distract. Clash marks occur under Liberty's ear. Census: 21 in 64 for the issue, 6 finer (9/09). (#6113)

- 641 1821 AU58 PCGS. O-104, R.3. Light die lines at the throat identify this variety. Both sides have considerable luster with mostly silver-white surfaces and splashes of peripheral champagne toning. (#6128)

- 642 1823 MS62 NGC. O-106, R.3. The obverse is golden-brown with an ocean-blue and ruby-red border. The reverse has only a hint of peripheral tan toning. Lustrous and attractive. One of several varieties of 1823 halves with a misshapen 3 in the date. However, Overton failed to grant O-106 a memorable moniker, unlike the "Ugly 3" O-110a or the "Patched 3" O-102. (#6131)

- 643 1823 Broken 3 AU53 NGC. O-101, R.3. This distinctive variety, named for the final digit in the date, has its own *Guide Book* entry. Surprisingly bright silver-white surfaces remain radiant despite modest wear. (#6132)

- 644 1825 MS62 NGC. O-107, R.2. Incorrectly attributed as the very scarce O-109 by NGC. Rich golden-brown, jade-green, and cream-gray embrace this lustrous and evenly struck example. The fields are surprisingly free from scuffs. (#6142)

- 645 1825 MS63 NGC. O-114, R.1. Forest-green, dove-gray, and autumn-brown consume this unblemished Bust half. The luster is particularly dazzling throughout the borders. A few of the stars are incompletely brought up. (#6142)

- 646 1826 MS61 NGC. O-118a, R.1. The die line through the UN of UNUM is diagnostic. Light pink, peach, and silver-gray patina drapes strongly lustrous surfaces. (#6143)

- 647 1826 MS61 NGC. O-111, R.2. The obverse is distinctively cracked. Light gold and orange tints grace the lustrous surfaces of this Bust half. Well struck with slight dulling on the high points. (#6143)

### Choice 1826 Bust Half, O-106a

- 648 1826 MS64 PCGS. O-106a, R.3. Slender reverse die cracks and a recut R in AMERICA identify this somewhat scarce Overton variety. Shimmering luster sweeps uncommonly smooth fields and devices. A good strike with minor incompleteness on the curls and stars. An opportunity for the dedicated Bust specialist. (#6143)

### Splendid 1826 O-110 Half, MS65

- 649 1826 MS65 NGC. O-110, R.2. An extraordinary Gem with full brilliant satin luster on both sides. The obverse has distinct gold toning with blue and lilac toning at the border, and the reverse is brilliant with only a faint trace of gold toning. The surfaces are smooth and pristine. (#6143)

---

Well Struck 1826 Half Dollar, O-120a, MS65

- 650 1826 MS65 NGC. O-120a, Low R.4. Exceedingly well struck down to the finest detail and boasting shimmering luster that is relatively unaffected by toning, the only color being subtle golden-gray accents. Nicely preserved throughout. Two extensive die cracks on the left periphery of the reverse point to a later die state. (#6143)

Overdated 1827/6 Half Dollar, O-102, MS64

- 651 1827/6 MS64 NGC. O-102, R.1. The underdigit 6 is bold. The stars are drawn to the edge, and the AM of AMERICA are joined, with the base of M higher than A. Light to medium gray surfaces display considerable luster and exhibit sharply struck design elements. Both sides have been well cared for. Census: 6 in 64 for the issue, 6 finer (9/09). (#6147)

- 652 1827 Square Base 2 MS61 PCGS. O-130, R.3. The "leaning 0" in the denomination is a key diagnostic. This lustrous example is well struck with gold-gray and violet-blue toning, the latter mostly at the margins, and a faint "X" of tan-olive patina with the lines intersecting just to the right of Liberty's ear. (#6144)

Desirable 1827 O-128 Half, MS64

- 653 1827 Square Base 2 MS64 PCGS. O-128, R.3. A slightly scarce variety. The reverse has a distinct horizontal line through the center of the I in PLURIBUS, and it is called the Joined I reverse. That die is known with two different obverse dies, for O-128 and O-139. Lustrous surfaces exhibit silver-gray, lilac, gold, and iridescent toning on both sides, creating excellent aesthetic appeal. (#6144)

---

Brilliant 1827 O-120a Half, MS64

- 654 1827 Square Base 2 MS64 PCGS. O-120a, R.3. The late state with a crack through the tops of UNITED STATES is more plentiful than the early state without the crack. This fully brilliant and lustrous piece has no evidence of toning on either side. It is a desirable half dollar for the type collector or variety specialist. (#6144)

- 655 1829 Small Letters MS63 PCGS. CAC. O-115, R.1. This lustrous Select piece has light gold-gray color overall with dots of deeper toning at the reverse margins. Well struck and modestly abraded for the grade. (#6154)

- 656 1829 Small Letters MS63 NGC. O-112, R.1. Diagonal die lines near star 13 indicate the variety. Mottled golden-brown, aquamarine, and rose-red toning embraces this satiny and unmarked representative. The left-side stars show some softness, but the strike is otherwise pleasing. (#6154)

- 657 1830 Small 0 MS63 NGC. O-101, R.1. Brilliant save for a glimpse of ocean-blue on the upper reverse. Lustrous with surprisingly mark-free fields and devices. The stars and claws are well struck, as is the remainder of the design. (#6156)

- 658 1830 Large 0 MS63 PCGS. O-121, R.3. This is the rarest Large 0 variety. Liberty's mouth is noticeably open. The left stars are flatly struck, as usually seen, but the central details are bold. Lovely reddish-gold and lavender accents add to the aesthetic appeal of this lustrous specimen. (#6157)

Attractively Toned 1830 Bust Half  
Choice Mint State, Large 0, O-122

- 659 1830 Large 0 MS64 ICG. O-122, R.1. A wonderful Choice Mint State representative with satiny silver surfaces beneath delicate champagne, gold, lilac, and blue toning on each side. The design elements are bold, although the stars along the right obverse are softly brought up, as always for the die pairing. (#6157)

---

**Splendid 1831 O-109 Half, MS64**

**Wonderful 1834 Half Dollar, MS65  
Large Date, Small Letters, O-108**

**660** 1831 MS64 PCGS. O-109, R.1. A splendid Choice Mint State piece with frosty luster and excellent eye appeal, this plentiful half dollar variety is usually available in nearly any desired grade, making it an excellent type coin for the advanced collector. Both sides have lemon-yellow and sea-green toning that enhance the overall presentation. (#6159)

**661** 1832 Small Letters MS62 PCGS. O-110, R.1. A brilliant and lustrous Mint State piece with excellent design details. There is only a trace of weakness on the drapery near the bust tip. Both sides have frosty surfaces with pale champagne toning. (#6160)

---

**Pleasing 1833 Gem Half Dollar, O-102**

**662** 1833 MS65 PCGS. O-102, R.1. Star 1 is widely recut near its northeast point, and the 5 in the denomination has a broad stubby top. Sky-blue and purple gravitate to the obverse margin, leaving the center mostly golden-gray, while splashes of deep olive-green occupy the reverse border. Nicely struck save for some weakness in the horizontal shield lines. Both sides display pleasing luster and are minimally marked. Population: 16 in 65 for the issue, 3 finer (9/09). (#6163)

---

**Remarkable 1833 O-108 Half, MS66**

**663** 1833 MS66 NGC. O-108, R.1. A remarkable Capped Bust half that boasts ebullient luster and unabraded surfaces. Both sides are lightly toned on the fields and devices, while the margins offer medium fire-red and chestnut-brown patina. The striking details are strong throughout. Census: 5 in 66, 4 finer (9/09). (#6163)

---

**Bright MS65 Lettered Edge 1836 Half, O-114**

**666** 1836 Lettered Edge MS65 NGC. O-114, R.2. A honey-gold Gem that has glimpses of russet throughout the margins. The cheekbone has moderate contact, but the overall preservation is impeccable. The cartwheel luster is booming, and the strike is crisp throughout except through RIB in PLURIBUS. Census: 21 in 65, 5 finer (9/09). (#6169)

---

**REEDED EDGE HALF DOLLARS**

**Well Defined 1836 Fifty Cent, AU Details**

**667** 1836 Reeded Edge—Improperly Cleaned—NGC. AU Details. Silver-gray surfaces reveal fine hairlines when viewed under a loupe, but traces of luster are still visible in the recessed areas of the well defined design features. A few small contact marks are scattered over each side. The 1836 is the lower mintage, scarcer date of the two-year 50 CENTS design type. (#6175)

---

Crisply Struck 1837 MS64 Half Dollar

668 1837 MS64 NGC. An exacting strike leaves crisp delineation on the design elements of this near-Gem Reeded Edge 50 CENTS design type representative. The depth of the gray and greenish-gray toning subdues the luster on both sides, each of which reveals just an occasional minute mark. Census: 89 in 64, 53 finer (9/09). (#6176)

669 1839-O XF40 NGC. The obverse mintmark is repunched south, as often seen on this scarce New Orleans type coin. Caramel-gold and steel-gray with substantial glimmers of luster from design recesses. (#6181)

670 1839-O XF45 PCGS. The familiar '39-O die pairing with heavy reverse die cracks and a lightly repunched mintmark. Noticeable luster fills the legends and eagle. The borders display classic sea-green and golden-brown peripheral "album" toning. (#6181)

671 1839-O—Improperly Cleaned—NGC. AU Details. Although mildly glossy, this stone-gray and almond-gold O-mint type coin will satisfy many collectors. The dies have numerous prominent die cracks across the borders, characteristic of the issue. (#6181)

## SEATED HALF DOLLARS

Popular No Drapery 1839 Half, AU50

672 1839 No Drapery AU50 NGC. Light but distinct wear is present on the obverse high points, though the reverse is surprisingly free of evidence of circulation. Both sides retain considerable luster with toning that ranges from silver-gray through lavender and rich violet. Census: 10 in 50, 71 finer (9/09). (#6230)

---

Original Gem 1839 Drapery Half Dollar

673 1839 Drapery MS65 PCGS. The 1839 With Drapery half dollar and subsequent issues are in actuality a different design subtype from the 1839 No Drapery halves. Designer Christian Gobrecht, besides adding three drapery folds from Liberty's elbow, carved away some material from the rock, increasing the distance between it and star 1. The plentiful mintage of nearly 2 million coins comprises both subtypes. Mint State coins exist at all levels, but all are fairly elusive. PCGS has certified only 16 examples in MS64, and this piece is one of only three coins graded MS65 (9/09). The surfaces of this piece are delightfully original, tinged silver-gray with glints of pink and gold on both sides. The strike is notably sharp, and there are no mentionable distractions. A wonderful example for a Registry Set or 19th century type set. (#6232)

674 1844 MS63 NGC. Medium caramel-gold and powder-blue enriches this satiny and conditionally scarce No Motto Seated half. Incompleteness of strike is relegated to the left (facing) ankle. Census: 11 in 63, 14 finer (9/09). (#6245)

---

Dramatic 1844-O Doubled Date Half, XF45

- 675 1844-O Doubled Date XF45 PCGS. WB-103. FS-301, formerly FS-001. A well-known and dramatic variety in the series, the FS-301 shows a widely doubled date with the first 184 well up into the base of the rock. According to Wiley-Bugert, this reverse die, also used in 1845, marks the only use of a Medium O mintmark size in 1844. This piece, certified in a green-label holder, has primarily charcoal-gray surfaces with lighter silver-gray high-point wear. There are no singular abrasions. Population: 8 in 45, 10 finer (9/09). (#6247)

Richly Toned 1846 Half Dollar, WB-101

- 676 1846 Medium Date MS64 NGC. CAC. WB-101. A Medium Date variety, distinguished by the base and crossbar of the 4 touching. This near-Gem is well struck with lovely luster beneath dappled peach, sky-blue, rose, and silver toning. This Seated half has amazing eye appeal in all respects. Census: 11 in 64, 7 finer (9/09). (#6251)

---

Select 1846 Tall Date Seated Half  
WB-107 Repunched Date

- 677 1846 Tall Date MS63 PCGS. WB-107. The 1 and 4 are lightly repunched at the bases. The standard Wiley-Bugert reference lists the variety as High R.7 in Mint State. This is a cream-gray and gunmetal-blue representative with uncommonly smooth surfaces. A sharp strike save for the star left of the cap. Population: 12 in 63, 2 finer (9/09). (#6252)

- 678 1846-O Tall Date XF40 PCGS. A much more difficult coin to locate in any grade than its Medium Date counterpart, this example features light gray toning over minimally abraded surfaces. The design elements reveal considerable detail. The reverse exhibits several peripheral die cracks. Population: 5 in 40, 8 finer (9/09). Ex: FUN Signature (Heritage, 1/2005), lot 7253; Long Beach Signature (Heritage, 9/2008), lot 2174, which realized \$1,610. (#6256)

---

Rare 1847-O MS63 Doubled Die Obverse Half Dollar

- 679 1847-O MS63 PCGS. WB-104. Doubled Die Obverse (not indicated on insert). The doubling is most easily seen on the left side of the rock, the ribbon lower left of the shield, Liberty's left (facing) hand, and on the leftmost shield lines. While relatively easy to locate in lower grades, this variety is very challenging in Mint State, rated a high R.7 by Wiley and Bugert (1993). The partially prooflike fields highlight the relatively well impressed devices, and variegated cobalt-blue, lavender, and reddish-gold patina bathes both sides. A few unobtrusive handling marks limit the grade. Population: 8 in 63 for the issue, 4 finer (9/09). (#6259)

- 680 1848 MS63 PCGS. Light autumn-gold toning adorns the borders of this lustrous and crisply struck No Motto Seated half. Smooth aside from an abrasion across the lowered arm. Population: 9 in 63, 10 finer (9/09). (#6260)

---

### Appealing MS63 1849 Half

- 681 1849 MS63 NGC. Well struck for the issue with particularly bold definition in the centers. Blue-green and golden-tan toning drapes strongly lustrous fields. The Seated half dollars struck prior to the weight adjustment of 1853 are elusive today in all grades and conditionally rare at the Select level. Census: 20 in 63, 10 finer (9/09). (#6262)
- 682 1850 AU55 ANACS. WB-102. The 0 is lightly recut southeast. Glimmers of luster illuminate the margins of this pearl-gray and walnut-brown Seated half. Well struck and problem-free. Undoubtedly, a portion of the mintage soon met the smelter, because its bullion value exceeded face even back in 1850.  
Ex: Reginald Byron Mason Collection (Heritage, 3/2007), lot 800, which realized \$1,265. (#6264)
- 683 1852 XF40 ANACS. The 1852 has a frugal emission of 77,130 pieces, since half dollars failed to circulate at the time, driven from commerce by Gresham's Law and a massive influx of West Coast gold. A moderately circulated and problem-free example with dusky autumn-gold and silver-blue toning. (#6268)
- 

### Well Struck Select 1853 Arrows and Rays Half

- 684 1853 Arrows and Rays MS63 PCGS. Soft golden-gray patination resides on the lustrous surfaces of this Select half, and a well executed strike imparts strong detail to the design elements. A few minute marks define the grade. One of the easiest dates to locate in almost any grade. Housed in a green label holder. (#6275)
- 

---

### Richly Toned, Lustrous MS64 1853 Arrows and Rays Half

- 685 1853 Arrows and Rays MS64 NGC. The design elements are well-detailed on each side, and swirling mint luster is abundantly evident beneath the deep olive-gray and steel-violet toning. Always a popular type coin, although not a rare one in the strictest sense, but Arrows and Rays halves are seldom seen in MS64 or finer grades. (#6275)
- 686 1853-O Arrows and Rays AU53 PCGS. Dots of pale blue toning are visible at the margins, while the centers have splashes of gold. Slight peripheral striking softness has little impact on the considerable eye appeal. Population: 9 in 53, 51 finer (9/09). (#6276)
- 687 1853-O Arrows and Rays AU55 ANACS. Bright silver-white luster remains over much of each side, though glimpses of peach-orange are present at the rims. Modestly worn but highly attractive. Housed in a small-format holder. (#6276)
- 688 1853-O Arrows and Rays AU55 ANACS. Blue and violet peripheral accents with glimpses of gold across the lustrous centers. Only faintly worn with a few modest abrasions. Housed in a small-format ANACS holder. (#6276)
- 689 1853-O Arrows and Rays AU55 NGC. Dusky gold-orange color, varied occasionally by luminous magenta, with delicate luster beneath. Scarcely worn with an unusually strong strike on Liberty's head. Census: 25 in 55, 43 finer (9/09). (#6276)
- 

### MS62 1853-O Arrows and Rays Half Dollar

- 690 1853-O Arrows and Rays MS62 PCGS. This issue can be located in circulated condition without too much trouble, but Mint State pieces are considerably more challenging. Indeed, Randy Wiley and Bill Bugert (1993) assign an R.5 rarity rating to Uncirculated coins. Pale reddish-purple resides on both sides of this well struck MS62 specimen. Light wispy handling marks in the fields do not detract. Clash marks are visible on the reverse. Housed in a green label holder. Population: 13 in 62, 14 finer (9/09). (#6276)
-

---

### Lovely 1854-O Arrows Half Dollar, MS67

**691 1854-O Arrows MS67 NGC.** While the 1854-O Arrows Seated half dollar had an enormous mintage of more than 5 million pieces, its status as a mintmarked high-mintage With Arrows half puts it in the “sweet spot” for type collectors. The present piece is one of only two Superb Gems certified at NGC and PCGS combined, and there are only two finer (9/09). While the surfaces of this lovely coin are still largely silver-gray, glints of translucent pink, gold, and jade appear, enhancing the already considerable eye appeal. Census: 1 in 67, 2 finer (9/09). (#6280)

---

### Desirable MS64 1855 Arrows Half

**692 1855 Arrows MS64 NGC.** A lovely near-Gem example of the Arrows subtype for the Liberty Seated half. The centers are strongly defined, and while considerable peripheral weakness is noted on the date and stars, the coin has plenty of redeeming features. The luster is warm, and the dusky orange and blue-green toning across each side is most attractive. Census: 18 in 64, 7 finer (9/09). (#6281)

---

### Lustrous Gem 1855-O Arrows Half Dollar

**693 1855-O Arrows MS65 NGC.** The 1855-O Arrows Seated half dollar is often compared to the 1854-O, but the mintage is only two-thirds as large. This lustrous Gem example offers mostly untoned centers on both sides, deepening to amber at the obverse rim. The strike is quite sharp, and only scattered, infrequent marks preclude an even finer grade. Census: 19 in 65, 5 finer (9/09). (#6283)

**694 1866-S No Motto XF40 ANACS.** This low mintage half dollar is toned deep golden-gray, with the possible remnants of a fingerprint in the left obverse field. LIBERTY is bold, and the drapery and plumage detail is considerable. A few light circulation marks on the reverse fail to distract.

*Ex: Professor Wayne Newman Palmer Collection, Part One (Heritage, 7/2004), lot 6507. (#6315)*

**695 1868-S MS62 NGC.** A splendid chestnut-gray representative with unbroken cartwheel shimmer and an absence of consequential marks. The strike is incomplete on Liberty's hair, the nearby stars, and on her left (facing) thigh. Census: 3 in 62, 6 finer (9/09). (#6324)

**696 1869 MS62 PCGS.** Light gray freckles make occasional visits to each side. This sharply struck piece reveals breaks in the luster flow associated with the lightly marked surfaces. Population: 15 in 62, 26 finer (9/09). (#6325)

---

Attractive MS65 1869-S Half

- 697 1869-S MS65 NGC. CAC. The tan-orange peripheral accents on the otherwise pearl-gray obverse deepen and join patches of sage on the lustrous reverse. Strongly struck in the centers with a degree of softness noted only at the obverse stars. Great eye appeal for this underrated issue. Census: 6 in 65, 6 finer (9/09). (#6326)

Important Fine 1870-CC Half

- 698 1870-CC Fine 12 PCGS. A significantly worn yet readily collectible representative of this important first-year Carson City minor silver issue. A number of abrasions are present on the brown-gray obverse, and the center of the word LIBERTY is worn away. Still, the reverse is well-defined in comparison, which must have influenced the grade. Population: 6 in 12, 56 finer (9/09). (#6328)

Scarce 1870-CC Half Dollar, VF30

- 699 1870-CC VF30 PCGS. Struck during the first year of coinage at Carson City, the 1870-CC is much scarcer than suggested by its mintage of 54,617 pieces. The well defined present piece shows the letters LIRTY and the top of the B in LIBERTY. Dove-gray surfaces are smooth aside from minor faded field marks near the left (facing) elbow. (#6328)

---

Condition Rarity 1871-CC Fifty Cent, XF45

- 700 1871-CC XF45 PCGS. The 1871-CC half dollar is scarce overall and rare in XF and finer condition. Randy Wiley and Bill Bugert (1993) assign an R-5 rarity rating to XF and AU coins. Mint State pieces are virtually unobtainable; indeed, PCGS and NGC have certified just five Uncirculated examples (9/09). Low intensity golden-gray patina with bluish-gray accents resides on both sides of this Choice XF specimen, each of which is well defined and minimally marked. This coin is sure to elicit spirited bidding. (#6331)

- 701 1873-CC Arrows VF35 ANACS. Ex: Berlinghof. Large CC. This deep cream-gray Carson City Arrows half has six bold letters in LIBERTY. The seventh letter, E, is faint but readable. Unmarked aside from a few concealed abrasions near Liberty's foot. (#6344)

- 702 1873-S Arrows AU55 NGC. A partly lustrous and problem-free silver-gray Choice AU example. One of only two S-mint Arrows, Motto issues, both of which have a much lower mintage than the subsequent 1875 to 1877 branch mint productions. Census: 4 in 55, 14 finer (9/09). (#6345)

---

Sharp 1876-CC Half, MS64

- 703 1876-CC MS64 PCGS. WB-102. Medium CC. With 1.4 million pieces struck, the 1876-CC is one of the more available halves from the Carson City mint. This is a sharply struck example that has pearl-gray patina over each side. The fields are bright, which is unsurprising as many 1876-CC halves are fully prooflike. Population: 13 in 64, 12 finer (9/09). (#6353)

- 704 1879 MS63 PCGS. Type Two Reverse. Remarkable prooflike reflectivity in the fields enhances this well preserved piece. Splashes of violet and red toning in the margins surround the silver-gray centers. A few faint hairlines preclude a higher grade. The strike is nearly full. (#6361)

---

The Only Certified Deep Mirror Prooflike  
1881 Seated Half, MS64

- 705 1881 MS64 Deep Mirror Prooflike NGC. Type Two Reverse. From business strike dies, confirmed by the closed bud on the olive branch. (Proof 1881 half dollars have an open or doubled bud above the H in HALF). NGC has certified several 1881 halves as Prooflike, but only the present piece has merited a Deep Mirror Prooflike designation. Presumably, it was among the first of the only 10,000 pieces struck from the commercial dies. This is an untoned example with reflective fields and frosty devices. Undoubtedly, it would have been catalogued as a proof in decades past. (#6363)

Astounding MS68 1882 Half

- 706 1882 MS68 NGC. A richly toned beauty of utterly outstanding quality, deserving of a place in the finest Seated half cabinet. Effulgent, distinctly reflective luster shines through elegant goldenrod and olive-green patina. Exquisitely preserved and expertly struck. The only MS68 example graded by NGC and tied with one other at PCGS for finest known (9/09). (#6364)

Wonderful 1887 Half Dollar, MS66

- 707 1887 MS66 NGC. This wonderful Premium Gem half displays electric-blue, lavender, and orange-gold patina around the borders, much more extensive and deeper on the obverse. This is a crisply struck, lustrous piece that is devoid of mentionable marks. From a mintage of only 5,000 circulation strikes. Census: 12 in 66, 3 finer (9/09). (#6369)

---

Pleasing 1890 MS66 Fifty Cent

- 708 1890 MS66 NGC. Both sides of this Premium Gem are awash with pleasing luster, and each displays whispers of soft violet and orange patina, somewhat more so on the obverse. A well directed strike imparts strong delineation to the motifs. A few grade-consistent marks are undisturbing. Census: 7 in 66, 7 finer (9/09). (#6372)

---

PROOF SEATED HALF DOLLARS

Colorful 1862 Half Dollar, PR64

- 709 1862 PR64 NGC. The 1862 half in proof can be obtained with minimal difficulty through the near-Gem level of preservation. Gems are scarce and higher-grade pieces are elusive. Rich bluish-violet, golden-orange, and yellow-green patination bathes both sides, each of which is sharply struck and nicely preserved. Census: 58 in 64, 34 finer (9/09). (#6416)

- 710 1864 PR62 PCGS. Variegated violet, gold, red, and silver-gray toning covers both sides of this resplendent specimen. The strike is razor-sharp, and there are minimal contact marks. An excellent piece for the grade. Only 470 proofs were struck. (#6418)

- 711 1869 PR64 PCGS. A lightly toned and fully struck specimen that provides noticeable obverse cameo contrast, although the reverse field reflectivity is slightly muted. Only 600 proofs were issued. Population: 47 in 64, 16 finer (9/09). (#6427)

- 712 1871 PR63 PCGS. Tobacco-brown and electric-blue colors invigorate the margins of this nicely struck and carefully preserved proof Seated half dollar. A scant 960 proofs were struck. Population: 35 in 63, 43 finer (9/09).  
Ex: Harold Anderson Collection (Heritage, 6/2004), lot 484. (#6429)

### Charming Gem Proof 1874 Arrows Half

- 713 1874 Arrows PR65 NGC. WB-101, Small Arrows. This is the usual proof die, with small arrows much closer to the rim than to the rock. From a mintage of only 700 proof coins, this charming Gem offers pinkish-gray centers deepening to amber-gold and blue at the rims on each side. This piece appears high-end for the assigned grade. An admirable type coin. Census: 13 in 65, 7 finer (9/09). (#6435)
- 714 1875 PR63 PCGS. This Select proof is sharply struck throughout and minimally abraded. The silver-gray surfaces are slightly cloudy, and a fingerprint remnant is visible in the left obverse field. Housed in a green label holder. (#6436)

### Bold Gem Proof 1875 Seated Half

- 715 1875 PR65 PCGS. The year 1875 saw the resumption of the No Arrows, Motto half dollar type of 1866-1873. Only 700 proofs were made of this Reconstruction-era issue. Gems such as the present piece are elusive but occasionally seen, while Premium Gems are usually "as good as it gets." This piece displays the expected bold strike over golden-tinted surfaces. A splendidly preserved proof Seated half. Population: 21 in 65, 5 finer (9/09). (#6436)
- 716 1876 PR64 PCGS. Type One Reverse. The speckled light gray reverse cedes to deep electric-blue, purple, and golden-tan patina clinging to the obverse margin, and a well executed strike imparts sharp detail to the design elements. Some faint pinscratches are concealed in the drapery. Encapsulated in a green label holder. Population: 31 in 64, 18 finer (9/09). (#6437)
- 717 1879 PR64 NGC. Type One Reverse. Nearly untoned save for the slightest gold tint at the peripheries. Exquisitely struck and minimally marked. Census: 62 in 64, 59 finer (9/09). (#6440)

### Tantalizing PR65 1879 Half

- 718 1879 PR65 NGC. Type One Reverse. The obverse of this tantalizing Gem proof has dusky blue-green and peach toning framing a pale gray-gold center. The reverse adds deep lavender hues and enriches the color across the whole of the coin. Decisively struck and carefully preserved. Census: 30 in 65, 29 finer (9/09). (#6440)

### Condition Rarity PR67 1881 Half Dollar

- 719 1881 PR67 NGC. Type Two Reverse. The year 1881 saw a mintage of 975 proof half dollars. Judging from NGC/PCGS population data a relatively large number of these have survived to the present day. Gems and Premium Gems are scarce, and finer coins such as this Superb Gem are quite rare. Bluish-purple patina covers the reverse, while cobalt-blue and lavender are confined to the margins of the obverse. Exquisitely struck with impeccably preserved surfaces. Census: 4 in 67, 1 finer (9/09). (#6442)

### Amazing 1882 Half, PR66 Cameo

- 720 1882 PR66 Cameo NGC. This fully brilliant and attractive Cameo proof is an amazing Premium Gem. Both sides are untoned and boldly defined, with pristine surfaces. The combination of deeply mirrored fields and highly lustrous devices pushes this piece extremely close to the Deep or Ultra Cameo designation. Census: 15 in 66 Cameo, 6 finer (9/09). (#86443)

### Sharply Contrasted PR64 Cameo 1884 Half

- 721 1884 PR64 Cameo PCGS. The 1884 half is memorable as the year with the lowest total production in the Seated Liberty series. Only 4,400 circulation strikes were produced plus another 875 proofs. For such a limited number of proof strikings, it is surprising that more Cameo proofs are not known. This piece has deeply reflective fields with strongly contrasting, frosted devices. Each side is mostly brilliant with just a hint of light golden present on the obverse. Population: 12 in 64 Cameo, 6 finer (9/09). (#86445)
- 722 1886 PR63 PCGS. Freckles of grayish-tan color run over both sides of this Select proof. The design elements are exquisitely brought up and offer a degree of contrast with the fields at certain angles. Inoffensive wispy handling marks in the fields limit the grade. (#6447)

### Pleasing 1887 Half Dollar, PR65 Cameo

- 723 1887 PR65 Cameo NGC. The top of the obverse and the bottom of the reverse suffer a little design weakness, but all remain details are sharp. The light peripheral gold and iridescent toning adds to the eye appeal of this otherwise brilliant silver proof. The date is infrequently seen with such pleasing contrast. Census: 25 in 65 Cameo, 23 finer (9/09). (#86448)

## BARBER HALF DOLLARS

### Lustrous Near-Gem 1892-S Half

- 724 1892-S MS64 PCGS. Minimally abraded with needle-sharp definition on the high points. Only a slight muting of luster on the obverse seems to preclude Gem status on this desirable example, which hails from the less-saved first-year Barber half issue struck on the West Coast. Population: 34 in 64, 18 finer (9/09). (#6464)

- 725 1893-O MS64 PCGS. The lustrous surfaces offer original shades of golden-orange and purple, with flashes of turquoise at the margins. Softly struck, but the minute abrasions on Liberty's cheek are all that preclude an even finer designation. Population: 43 in 64, 7 finer (9/09). (#6466)

### Lovely Gem 1895 Half Dollar

- 726 1895 MS65 PCGS. A minimally toned Gem with strong and swirling luster. The strike is bold, and only a single tiny mark at the lower shield and the nearby leg precludes and even finer designation. An excellent coin for the high-end Barber half collector. Population: 19 in 65, 6 finer (9/09). (#6471)

### Splendid MS65 1897 Half Dollar Ex: Duckor/Friend

- 727 1897 MS65 PCGS. Ex: Duckor/Friend. This amazing Gem from the Dr. Duckor and Dale Friend Collections is a delightful representative of a date that is often considered common, yet is much scarcer than many of the later P-Mint issues, especially in Gem condition. Many years ago, the *Coin Dealer Newsletter* listed the key-date Barber coins with individual prices, and then grouped all the remaining coins into a single "common date" listing, typically starting with 1897 as the first of the so-called common dates. For that reason, dealers and collectors became used to calling such coins common, even though in many cases they were not so common. In July 1991, that publication's "Monthly Summary" was renamed "Monthly Supplement" and listings were expanded to include every issue. While current population data helps dispel the common date myth of certain issues, old habits remain, especially among the more experienced collectors.

An amazing strike and frosty mint luster are the attributes that first garner attention to this gorgeous coin. Both sides have an impeccable strike with virtually full detail in every aspect of the design motifs. Faint die cracks and minor clash marks add to its overall desirability. Population: 14 in 65, 21 finer (9/09).

Ex: Dr. Steven Duckor; Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars (Heritage, 1/2009), lot 2934. (#6477)

- 728 1903-O MS63 PCGS. Deep gold, orange, rose, violet, and gray toning embraces this Select Barber half. Lovely luster for this New Orleans issue. Population: 24 in 63, 59 finer (9/09). (#6496)

- 729 1904-S VF35 PCGS. A lovely Choice VF example of this challenging and popular issue, one more elusive than its mintage of over half a million pieces might imply. Gold-gray toning on the obverse yields to deeper blue shadings over much of the reverse. Population: 7 in 35, 72 finer (9/09). (#6500)

---

**Impressive MS67 1905 Barber Half  
Ex: Duckor/Price**

**730** 1905 MS67 PCGS. CAC. Ex: Duckor/Price. The 1905 Barber half is one of those several little-noticed P-mint issues that have mintages under 1 million coins. The 1905 was produced to the extent of 662,000 coins, an amount only slightly more than the semiknobby 1897-O issue.

In the Dr. Thaine B. Price Collection catalog, Akers wrote of this piece, "The coin is boldly struck with a sharp square edge, full mint frost and great luster. It has beautiful medium speckled reddish-gold and blue-green toning. The surfaces are extremely clean, nearly pristine, in fact, with only a couple of tiny marks that are hidden under the toning. In terms of eye appeal and overall appearance, this splendid coin is absolutely first-rate. Most of the attention in the Barber Half Dollar series is focused on the rare mintmarked issues, but the Philadelphia Mint issues from 1901-1905 are actually just as rare as most of the rare branch mint issues." A nearly unsurpassable example. Superb Gem 1905 half dollars have appeared in our auctions a mere eight times over the past 16 years, and we have never offered a finer example. Population: 2 in 67, 1 finer (9/09). Ex: Dr. Thaine B. Price (David Akers, 5/1998), lot 163. (#6501)

---

**Conditionally Scarce 1906-S Half, MS64**

**731** 1906-S MS64 PCGS. Lovely milky-white toning covers the resplendent surfaces, with the occasional hint of tan color. Impressive luster shimmers throughout the fields and enhances the eye appeal. The strike is needle-sharp, and there are only a couple of insignificant handling marks. Like most San Francisco Barber halves, the 1906-S is challenging in high grades. Population: 32 in 64, 17 finer (8/09). (#6507)

---

**Admirable Near-Gem 1906-S Barber Half**

**732** 1906-S MS64 PCGS. An elusive S-mint Barber half like so many in the series, the 1906-S is seldom seen in Gem condition. This admirable near-Gem boasts even pinkish-gray coloration throughout, with only a few minuscule abrasions that keep it from the Gem category. The obverse has a sharp strike, although minor roller marks appear over the horizontal shield lines on the reverse. Population: 32 in 64, 17 finer (9/09). (#6507)

---

**Rainbow 1907-O Half, MS65**

**733** 1907-O MS65 ICG. Well-defined with vibrant luster and carefully preserved surfaces. Rich orange-gold and iridescent peripheral toning surrounds soft ivory centers. An excellent New Orleans Mint Barber half dollar. Despite a high mintage, Gem examples of the 1907-O half dollar are elusive. (#6510)

**734** 1908-O MS64 NGC. A stunning New Orleans half dollar, this bright silver piece has satiny, prooflike fields with frosty devices. Both sides have slight cameo contrast. Although a plentiful date, it is rare in higher grades. Census: 38 in 64, 54 finer (9/09). (#6514)

---

### Near-Gem 1910-S Barber Half

- 735 1910-S MS64 PCGS. Original, pale pearl-gray toning adorns both sides, with a hint of russet on the reverse. The striking details are very good for a business strike Barber half, if not completely full on the eagle's talons and arrow feathers. Quite a challenging issue in Choice and better grades, despite a mintage of nearly 2 million pieces. Population: 19 in 64, 25 finer (9/09). (#6520)

---

### Lightly Toned MS65 1911 Half

- 736 1911 MS65 PCGS. The softly frosted mint luster retains most of the original brilliance, but there are numerous speckles of light russet-gray over each side and the margins show light toning. Each side is well-balanced in appearance, and the striking details are strong throughout. An attractive example of this late-date Barber half. (#6521)

---

### Lovely 1911 Half Dollar, MS65

- 737 1911 MS65 NGC. A brilliant and sharply struck Gem, this 1911 Barber half dollar has satiny silver luster with faint champagne toning on each side. Well over 1 million 1911 half dollars were minted in Philadelphia, yet few survive in high grades. Census: 21 in 65, 11 finer (9/09). (#6521)

---

### Charming Gem 1911 Half

- 738 1911 MS65 NGC. Bright silver-white luster with a touch of tan clinging to the rims and visiting the obverse fields. This well struck Gem is minimally marked and decidedly attractive. Despite a mintage of over 1.4 million pieces, the 1911 half is elusive at the Gem level and a condition rarity any finer (#6521)

---

### Impeccable 1915-S Barber Half, MS67 ★

- 739 1915-S MS67 ★ NGC. The 1915-D and 1915-S Barber halves are among the most common issues of the series in Mint State grades, perhaps because more were saved as the last of the line. But survivors tend to top out at the Gem level, and the few Superb Gems known are in a class of their own. This piece is one of only three numerically graded MS67 at NGC, and PCGS contributes only two more (9/09)—but this is the only coin with the coveted NGC Star designation. There are none finer at either service. Appearing as though it just fell from the presses, this enthralling coin is silver-white throughout and the fields show pronounced reflectivity. The satiny surfaces boast an impeccable strike (save for the right shield corner) and exemplary preservation. A piece that Registry Set collectors should give serious consideration to. (#6534)

---

## PROOF BARBER HALF DOLLARS

---

### Splendid 1892 Half Dollar, PR67 Cameo

- 740 1892 PR67 Cameo NGC. The coinage of 1,245 proofs in 1892 was the highest for the Barber half dollar series. Many were saved as the first year of issue, evidenced by the several hundred examples encapsulated by NGC and PCGS. Excellent field motif contrast is apparent from various angles on this Superb Gem. Immaculately preserved surfaces exhibit sharply struck design features. Census: 24 in 67 Cameo, 2 finer (9/09). (#86539)

**741** 1895 PR64 NGC. A brilliant and highly lustrous near-Gem specimen. Moderate cameo contrast is observed on the reverse. The strike is razor-sharp, as one would expect from a proof, and there are only a couple of pin-sized contact marks. One of just 880 proofs struck. (#6542)

**742** 1899 PR64 PCGS. The obverse has faint gold-gray overtones, while the reverse shows similar color only at the rims. Well-defined and strongly mirrored with only a few wispy hairlines on each side. Population: 55 in 64, 29 finer (9/09). (#6546)

**743** 1902 PR64 PCGS. CAC. Light green-gold peripheral elements modify the chromelike reflectivity of this 20th century Barber proof from the dawn of the brilliant era. Modest hairlines contribute to the grade. (#6549)

#### Lush Gem Proof 1905 Half

**744** 1905 PR65 NGC. Richly toned in electric-blue, magenta, and beige-gold, all of which predominate around the borders, leaving the centers nearly color free. An exquisite strike emboldens the design elements, which show some contrast with the reflective fields. A hair-thin mark is visible on Liberty's lower right cheek. Census: 31 in 65, 41 finer (9/09). (#6552)

**745** 1909 PR63 PCGS. Iridescent lilac, sea-green, and golden-brown toning over both sides have prevented a cameo designation for this lovely proof. A few hair-thin slide marks on the cheek account for the grade. A scant 650 proofs were coined. (#6556)

#### Magnificent 1910 Half Dollar, PR67 Cameo

**746** 1910 PR67 Cameo PCGS. Ex: Bruce Scher. Among business strike Barber half dollars of the Philadelphia Mint, the 1913 through 1915 issues are recognized as important rarities. What most collectors other than advanced specialists fail to recognize, however, are the rarity and importance of the 1910 half dollar issue. Four of the five lowest-mintage Barber half dollars were Philadelphia Mint productions. Those five issues include 1914, 1915, 1913, 1892-O, and 1910, from lowest- to highest-mintage.

How this applies to proof coins depends on your perspective. Many collectors working on high quality Barber half sets may elect to add a Gem proof example to fill the Philadelphia Mint holes, given the elusive nature of business strikes. This creates added demand for proofs, above the demand from collectors of just the proof issues. This remarkable example has exceptional contrast between its lustrous devices and deeply mirrored fields. The coloration is mostly pale gold, with deeper russet and blue near the borders. The surfaces are exceptional, with no blemishes of any kind. This Superb Gem Cameo proof is tied for finest certified by PCGS. Population: 3 in 67 Cameo, 0 finer (8/09). (#86557)

**747** 1913 PR64 PCGS. Decisively struck with a chromelike gleam beneath a veil of pale cream-gray toning. A handful of tiny hairlines and pinpoint contact marks contribute to the grade. Population: 59 in 64, 42 finer (9/09). (#6560)

## WALKING LIBERTY HALF DOLLARS

**748** 1917-D Obverse MS64 PCGS. Pleasingly detailed for this lower-mintage 1917-D variant. Strongly lustrous surfaces are primarily silver-gray with elements of tan, rose, and violet on the obverse and deep aqua-blue and lavender on the reverse. (#6570)

#### Remarkable 1917-D Obverse Mintmark Half MS66, Tied for Finest Graded

**749** 1917-D Obverse MS66 PCGS. In addition to its status of one of two D-mint Obverse Mintmark issues in the Walking Liberty set, the 1917-D Obverse Mintmark is also a low-mintage production, made to the extent of only 765,400 coins. The present piece is tied with a small handful of other Premium Gems for the honor of finest certified at PCGS and NGC combined. Even Gem coins are highly elusive and seldom offered. This piece shows mostly untoned silver-white areas remaining on both sides, but there are crescents of intermingled amber and gold hugging the peripheries on both sides. Copious luster bursts forth, complementing a bold strike that encompasses a split thumb on Liberty and good articulation throughout. In particular, the eagle's trailing leg and Liberty's head are much bolder than normally seen, important bonuses for this remarkable coin. Population: 5 in 66, 0 finer (9/09). (#6570)

---

Condition Scarcity 1917-D Reverse, MS64

- 750 1917-D Reverse MS64 PCGS. The mintmark on Walking Liberty Half Dollars moved from the obverse to the reverse during 1917, creating obvious varieties for those pieces minted in Denver and San Francisco. Although the 1917-D with obverse mintmark is marginally tougher to find in low grades, the variety with the reverse mintmark is markedly scarcer in Mint State. This piece features soft golden-brown toning over satin luster, with a relatively strong strike. A few marks on the obverse appear to determine the grade. (#6571)

Marvelous 1917-S Obverse Mintmark Half, MS64

- 751 1917-S Obverse MS64 PCGS. CAC. The CAC seal of approval joins with our own approbation of this marvelous silvery near-Gem. The strike is sharp on Liberty's split thumb, as well as on the head. Note the small leaves and their detailing on the wreath Liberty totes. This issue in so high a grade is quite elusive, and Gems are even more difficult. PCGS has certified only 39 coins finer than this high-end piece (9/09). (#6572)

---

Gem 1917-S Half Dollar, Obverse Mintmark

- 752 1917-S Obverse MS65 NGC. According to Jeff Ambio's recent reference on the series, the 1917-S Obverse and Reverse types are about equal in high-grade rarity, but the Obverse Mintmark style is about twice as rare in overall Mint State, due to the smaller number of lower-Mint State examples known. Ambio points out that no more than 60 examples exist in Gem and finer grades.

This Gem piece shows pinkish surfaces on both sides, with a peppering of toning flecks ranging from purple-gray to black. The reverse features a more complicated palette, predominantly pinkish with glints of mint, gold, and amber along with glimpses of luster. Despite the rather deep toning, the surfaces are remarkably clean for an issue that seldom comes so nice. The bold strike has produced a split thumb on Liberty, and only minor weakness appears on the eagle's right (facing) leg. Census: 23 in 65, 2 finer (9/09). (#6572)

- 753 1917-S Reverse MS62 PCGS. According to Jeff Ambio (2008), the 1917-S Mintmark on Reverse is a "scarce-to-rare issue in all Mint State grades." This untoned piece boasts enticing satiny luster. The surfaces have scattered abrasions typical for the grade, but none merit individual mention. Well-struck save for the usual softness on Liberty's head and dress. (#6573)

### Desirable Near-Gem 1918-D Walking Liberty

- 754 1918-D MS64 PCGS. Lightly variegated straw-gold patina endows this highly lustrous and carefully preserved near-Gem. As always, the branch hand lacks absolute detail, but the strike is undeniably above average. Although less conditionally rare than the 1919-D, the 1918-D is also difficult to acquire in Mint State. (#6575)
- 755 1918-S MS63 PCGS. Golden toning splashes over each side of this Select beauty, though on the reverse, the patina appears largely at the rims. Lustrous and well struck with slight, scattered abrasions. (#6576)

### Sharply Struck 1918-S Half, MS64

- 756 1918-S MS64 NGC. Even though more than 10 million examples were struck of the 1918-S half, this is an issue that is rarely available in high grades. In fact, a relatively sharp MS64, such as this piece, is generally the finest a collector will have the opportunity to purchase. This is a strongly struck coin that has lovely, frosted mint luster. Each side is brilliant for the most part, except for a slight accent of golden at the margins. (#6576)

### 1919-D Half Dollar, AU53

- 757 1919-D AU53 PCGS. Golden-gray patina is evident around the margins of this D-mint half that retains luster in the recessed areas. The design elements are generally well defined except for the usually seen weakly struck branch hand, head, and eagle's trailing leg. A handful of minute marks do not detract. (#6578)
- 758 1920 MS64 PCGS. CAC. A charming near-Gem bathed in cartwheel sheen. The chestnut-gray toning is original and moderate. Sharply struck and impressively devoid of marks. (#6580)
- 759 1920 MS64 NGC. Faint almond-gold patina adorns this crisply struck and thoroughly lustrous Choice Walking Liberty half. A few minor obverse field grazes are of little account. (#6580)

### Notable MS64 1920-D Half

- 760 1920-D MS64 NGC. A desirable near-Gem example of this challenging Walker issue, softly struck as usual in the centers but with pleasing detail on the eagle's head. Both sides are largely silver-white with faint gold overtones. Beautifully lustrous with whispers of frostiness that complete the eye appeal. Census: 60 in 64, 12 finer (9/09). (#6581)
- 761 1929-D MS65 NGC. Light chestnut toning graces this lustrous and minimally abraded Gem. The skirt lines are well struck, while the cheek and branch hand show moderate blending of detail. A low mintage issue. (#6589)

### Exceptional 1929-S Gem Half Dollar

- 762 1929-S MS65 PCGS. CAC. The 1929-S half dollar is one of the more plentiful mintmarked issues in the early Walking Liberty series. That said, this exceptional Gem displays dazzling luster exuding from untoned, minimally abraded surfaces. Moreover, better-than-average detail occurs on the branch hand. Difficult to acquire above MS65. (#6590)

### Brilliant 1933-S Walker, MS65

- 763 1933-S MS65 PCGS. Some collectors consider the 1933-S the last issue of the early series of Walkers while others consider it the first issue of the late series. Regardless, it is scarce in Gem or finer grades. The present example has full brilliance with sharp details and faint traces of pale gold toning. PCGS has only certified 80 finer examples (9/09). This piece is housed in a first generation holder. (#6591)

---

### Fully Struck Gem 1933-S Half Dollar

- 764 1933-S MS65 PCGS. The 1933-S Walking Liberty half dollar is a popular issue, distinguished by its status as the last before the (long) "short set" begins. Low-grade circulated coins are common, Gems much less so. This is a lovely silver-gray piece with copious satin luster and a full strike; a clear split thumb is visible without magnification. The details on Liberty's head and the eagle's trailing leg on the reverse are also remarkably vivid. (#6591)
- 765 1934 MS67 PCGS. CAC. Magnificent canary-gold and jade-green patina consumes this lustrous and minimally abraded Superb Gem. Precisely struck and desirable. PCGS has graded just seven coins finer (9/09). (#6592)
- 766 1934 MS67 PCGS. CAC. Peach and jade-green dominate the left obverse. The remainder of this Superb Gem has similar toning, but is lighter in shade. Luster sweeps the unabraded and nicely struck surfaces. (#6592)
- 767 1934 MS67 NGC. Fantastic flashy luster with eye appeal that can't be ignored. This sharply struck and dynamic Superb Gem has minimally toned centers framed by peach and green-gold patina. NGC has graded just eight numerically finer pieces (9/09). (#6592)
- 768 1934 MS67 NGC. Faint olive-gold toning is prevalent and deepens slightly near the reverse periphery. Well struck and impressively smooth with an essentially immaculate obverse. Census: 92 in 67, 8 finer (9/09). (#6592)
- 769 1935-S MS65 PCGS. A hint of golden patina visits this nicely struck Gem. Booming luster sweeps across fields that appear pristine save for faint grazes above the motto and a couple of minute ticks on the skirt. (#6597)
- 770 1936 MS67 NGC. For the Walking Liberty half dollar enthusiast, this Superb Gem 1936 is a coin of great beauty and importance. Few finer pieces exist, and certainly none could have better eye appeal. It is frosty and lustrous with light champagne toning on each side. Census: 86 in 67, 4 finer (9/09). (#6598)
- 

### Wonderful Superb Gem 1936-D Half

- 771 1936-D MS67 PCGS. CAC. Both sides are immensely lustrous beneath light patina, lavender and blue over most of each side with dappled green-gold and orange-tan at parts of the rims. Exquisitely preserved with notable eye appeal. Aside from slight striking softness, this D-mint Walker is practically a study in perfection. Population: 22 in 67, 0 finer (9/09). (#6599)
- 

772 1936-S MS66 NGC. CAC. Brilliant and beautiful with vibrant luster and only inconsequential contact. The branch hand and upper skirt lines show blending of detail unavoidable for the issue. NGC has certified a mere 13 pieces finer (9/09). (#6600)

773 1937-S MS66 PCGS. Strongly defined on the branch hand with bright silver-white luster. This carefully preserved Premium Gem has commanding eye appeal. PCGS has graded just 18 finer pieces (9/09). (#6603)

774 1938-D MS66 PCGS. Light silver-gray and milky toning occupies the obverse and reverse. The design features are adequately struck. Several small abrasions occur on Liberty's gown. (#6605)

775 1938-D MS66 PCGS. Typically struck in that the branch hand shows a good amount of detail and the eagle's leg is somewhat weak. Lustrous surfaces show a few wisps of barely discernible light gold. Well preserved throughout. (#6605)

776 1941-S MS66 PCGS. Lustrous and beautiful with barely a whisper of golden toning. The strike is consistent with its San Francisco origins, but the preservation is outstanding. Regarded as the key to the 1941 to 1947 short set, as it scarcer in Mint State than the lower mintage issues that close out the series. (#6613)

777 1941-S MS66 PCGS. This fully brilliant and highly lustrous Premium Gem has a well struck head and a remarkably unabraded appearance. The skirt lines and branch hand are incomplete, as always for this better date S-mint issue. (#6613)

778 1941-S MS66 NGC. Bright luster envelops this Premium Gem S-mint Walker and a comparatively good strike leaves strong definition on the design elements, including partial detail on the branch hand. A hint of gold color occurs on the eagle, and a couple of light unobtrusive pinscratches are noted on the eagle's breast. (#6613)

779 1941-S MS66 PCGS. CAC. Traces of golden toning deny absolute brilliance, but this lustrous and beautifully preserved Premium Gem has an above average strike given its San Francisco origins. The key to the popular 1941 to 1947 short set. (#6613)

780 1944-S MS66 NGC. CAC. Large S. Frosty luster abounds with hints of peach and blue against otherwise silver-gray surfaces. Soft striking definition overall but outstanding eye appeal otherwise. (#6623)

---

### Noteworthy MS67 1944-S Half

781 1944-S MS67 NGC. Large S. The 1944-S is common in typical Mint State, but Superb Gems are extremely rare. The present lustrous piece commands such a lofty grade because it is virtually bereft of contact, and because the strike is decidedly above average for this usually mushy issue. In particular, the skirt lines are well defined. Lightly toned overall with autumn-gold and olive-green peripheral iridescence. Census: 5 in 67, 0 finer (9/09). (#6623)

---

## PROOF WALKING LIBERTY HALF DOLLARS

### Sharp 1936 Walking Liberty Half, PR65

- 782 1936 PR65 PCGS. CAC. The tiny mintage of the 1936 Walking Liberty half dollar was only 3,901 coins, and Gem examples are eagerly sought. This piece displays quicksilver surfaces, completely untoned. There is a surprising bit of field-device contrast, quite atypical of proofs of this era. A high-end coin for the assigned grade, with an excellent strike and lots of eye appeal. (#6636)

### Pleasing 1936 Fifty Cent, PR66

- 783 1936 PR66 NGC. The 1936 was the first proof issue in the Walking Liberty half dollar series. A total of 3,901 pieces were struck, the lowest of the Walker proofs. The soft champagne-gold surfaces tinted with whispers of lavender and sky-blue yield a modicum of field-motif variance and are well preserved. Sharp detail is apparent on the design elements. (#6636)

### Intriguing Premium Gem 1936 Half

- 784 1936 PR66 NGC. Small silver-white cores that are brightly mirrored give way to generous swaths of champagne, green-gold, and blue peripheral toning. Crisply impressed and carefully preserved, a delightful specimen of this ever-popular first-year proof Walking Liberty issue. NGC has graded 77 finer examples (9/09). (#6636)

## Coveted Superb Gem Proof 1936 Half

- 785 1936 PR67 NGC. A carefully preserved Superb Gem specimen of this popular first-year issue, tied for numerically finest known to NGC (9/09). Both sides are profoundly mirrored beneath golden-tan toning that extends inward from the rims. The centers are untoned, with that area much broader and more obvious on the reverse. (#6636)

### Exquisite 1938 Half Dollar, PR68 ★

- 786 1938 PR68 ★ NGC. The designer's initials are barely visible on this piece. Proof half dollars of 1938 are rare in this lofty level of preservation, even more so with the Star designation. Both sides display mild field-to-device contrast, though not enough to warrant a Cameo finish. Untoned, exquisitely struck, and impeccably preserved. Census: 7 in 68 ★, 0 finer (9/09). (#6638)

- 787 1939 PR67 ★ NGC. A stone-white Superb Gem of this scarce proof issue. Prominently mirrored, and the obverse motif displays a hint of cameo frost. The designer's monogram was engraved by hand on the reverse die, similar to the 1944-D Cherrypickers' variety. (#6639)

### Immaculate 1939 Walking Half, PR68

- 788 1939 PR68 NGC. Yellow-gold patination is slightly more extensive and deeper on the reverse, and both sides are accented with freckles of light brown and sky-blue. An exacting strike fully delineates the design features, and both faces are immaculately preserved. Census: 87 in 68, 1 finer (9/09). (#6639)

### Striking PR68 1939 Half

### Delicately Toned 1941 Half Dollar, PR68

789 1939 PR68 NGC. Midway through the Walking Liberty half dollar's abbreviated proof run came the issue of 1939, just 8,808 pieces strong and the last half dollar issue to sport a four-figure mintage. This incredible PR68 specimen has watery fields beneath gold-gray patina that tends to the former color close to the rims. (#6639)

790 1940 PR67 NGC. The 1940 is the first proof Walker with a mintage above 10,000 coins. This untoned, crisply struck and impeccably preserved piece is truly "superb." (#6640)

### Impressive PR68 1940 Half Dollar

791 1940 PR68 NGC. A wondrous type coin with a mintage of only 11,279 pieces. The fields of this piece are numismatically interesting as they display a combination of deep mirrors and a touch of slight mint frost. The mint frost actually seems to be from the heavy metal flow seen in the fields on each side. The surfaces are almost brilliant with just a bit of slight color around the margins. Exceptional quality. (#6640)

### Splendid 1941 PR68 Fifty Cent

792 1941 PR68 NGC. The initials have been polished off of this PR68 Walker, which is indicated by No "AW" on the insert. This exquisitely struck piece displays soft gold coloration imbued with tints of ice-blue, violet, and light orange. Both sides are near pristine. Census: 65 in 68, 0 finer (9/09). (#6641)

793 1941 PR68 NGC. No AW initials, and so indicated on the insert. A medley of soft orange, rose, sky-blue, apple-green, and violet patina resides on the luminous, well cared for surfaces of this Superb Gem. A well executed strike leaves virtually complete definition on the design elements. Census: 65 in 68, 0 finer (9/09). (#6641)

### Charming PR68 1942 Half

794 1942 PR68 NGC. Wonderfully detailed with impressive mirrors beneath rich and distinctive patina. The coin has an overall aura of gold and cream, with more opaque toning near the centers and greater translucency at the rims. There is also greater variety in the color at the margins, as evidenced by the green-gold elements above the eagle on the reverse. (#6642)

### Spectacular PR68 1942 Walking Liberty Half Dollar

795 1942 PR68 NGC. The Mint still sold individual proof coins during the 1936-42 era, so the mintage of the Walking Liberty half dollar is 21,120, while the mintage of the Washington quarter from the same year is 21,123. This example of the last proof half dollar shows glints of gold and jade on both sides. As demanded of the grade, there are no visible distractions of any sort. NGC has certified only four coins finer (9/09). (#6642)

Brilliant PR68 1942 Half

- 796 1942 PR68 NGC. The 1942 proof half is a logical choice for the type collector. It has the largest mintage in the seven-date series, but it is still small with only 21,120 pieces minted. This example is completely brilliant, and the fields are well mirrored on each side. An essentially flawless proof striking of this always-popular proof type coin. (#6642)

## FRANKLIN HALF DOLLAR

- 797 1953-S MS67 NGC. A remarkable Superb Gem, well struck with lovely satin luster and pastel yellow-green color. Conditionally rare at this grade level, with none higher at either major service. Population: 5 in 67, 0 finer (9/09).  
Ex: V.A. Everest Collection (Heritage, 7/2003), lot 8015; Mike Jacobson Collection (Heritage, 2/2005), lot 8264. (#6666)

## PROOF FRANKLIN HALF DOLLARS

- 798 1950 PR66 Cameo NGC. Moderately frosted devices stand out against the mirrored fields of this nicely preserved Franklin. Sharply defined as expected for a proof striking. (#86691)
- 799 1950 PR66 Cameo NGC. The low mintage first year proof Franklin half is elusive with obvious cameo contrast, such as that seen on the present coin. This is a brilliant Premium Gem with darkly mirrored fields and impressively frosted motifs. (#86691)
- 800 1951 PR67 Cameo NGC. A pleasing Superb Gem with moderate contrast on each side. The mirrors are potent, as is the eye appeal. Neither NGC nor PCGS has graded a numerically finer Cameo example (6/09). (#86692)
- 801 1956 Type Two PR69 Ultra Cameo NGC. Fantastically mirrored and virtually flawless. The rich frost across the boldly impressed devices lends this coin a stunning black-and-white appearance. (#96697)

## EARLY DOLLARS

Prized 1795 Flowing Hair, Three Leaves Dollar  
B-5, BB-27, Fine 12

- 802 1795 Flowing Hair, Three Leaves Fine 12 PCGS. B-5, BB-27, R.1. Bowers-Borckardt Die State II or possibly III; it is difficult to tell whether the die crack from the left stem actually reaches the rim. Deep russet-tan and silver-gray toning drapes each side of this attractive Fine coin, minimally abraded overall despite what must have been considerable time spent in circulation. (#6852)

Luminous Fine 15 1795 Flowing Hair Dollar  
Three Leaves, B-5, BB-27

- 803 1795 Flowing Hair, Three Leaves Fine 15 PCGS. CAC. B-5, BB-27, R.1. Bowers-Borckardt Die State III, with the die crack from the left stem in the wreath extending to the rim. Dusky blue and gray-gold toning embraces each side of this attractive Three Leaves dollar, well-worn but with strong outlines of the major devices. Minimally abraded, hence the Fine 15 grade. (#6852)

High Grade 1795 B-5, BB-27 Three Leaves  
Flowing Hair Dollar, AU50

- 804 1795 Flowing Hair, Three Leaves AU50 NGC. B-5, BB-27, R.1. Die State II or III. A splendid example in a rather early die state. Bowers notes that about one in 20 examples of the variety exist without the reverse die crack, but our experience suggests that nearly every known specimen has a crack at that location. Sometimes, however, it is very light and nearly invisible after a slight amount of wear.

This splendid early dollar has lustrous ivory surfaces with splashes of steel-blue and iridescent toning, especially on the devices. A few faint lines and tiny abrasions are evident with careful examination, but they are of little significance. (#6852)

- 805** 1795 Flowing Hair, Two Leaves—Improperly Cleaned—NCS. VG Details. B-2, BB-20, R.3. Bowers-Borckardt Die State II. The “bar” normally seen in the left obverse field has been lapped away, and the hair curls and stars are thinner. This piece has an unnatural orange and medium-gray complexion, with occasional patches of purple color. All of the details are clearly defined. (#6853)

**Double Struck 1795 Flowing Hair Dollar  
Two Leaves, B-1, BB-21, VF30 Details**

- 806** 1795 Flowing Hair, Two Leaves—Double Struck, Rotated Between Strikes, Graffiti—ANACS. VF30 Details. B-1, BB-21, R.2. This Flowing Hair dollar was struck twice by the dies. The coin rotated slightly between blows. The double strike effect is strongest on the right side stars and legends, and is also prominent on Liberty's profile and bust truncation. Toned deep walnut-brown and blue-green, which nearly conceals the pinscratch graffiti on the obverse. The left field appears to read “A Jones”, the right field “SLAOPV”. A small obverse rim ding at 5 o'clock barely merits mention. (#6853)

**Blundered Date 1795 B-1, BB-21 Dollar, XF Details**

- 807** 1795 Flowing Hair, Two Leaves—Improperly Cleaned—NCS. XF Details. B-1, BB-21, R.2. Although cleaned and retoned, this steel-gray dollar is an attractive representative of the blundered date variety, with the 7 punched over a 1. Both sides of this piece have a few faint scratches and other minor abrasions that are masked by the toning. (#6853)

**Distinctive 1795 B-7, BB-18 Silver Plug Dollar**

- 808** 1795 Flowing Hair, Silver Plug—Holed and Plugged—PCGS Genuine. B-7, BB-18, R.3. This unusual piece has a mint inserted silver plug at the center, a desirable representative of early minting techniques, and it has a hole that has been plugged at a much later date, an undesirable post mint defect. The surfaces have light abrasions, and medium to dark gray color. The existing details are approximately at the VF level. (#6854)

**Pleasing 1795 B-15, BB-52 Dollar, VF25**

- 809** 1795 Draped Bust, Centered VF25 PCGS. B-15, BB-52, R.2. The Centered Bust variety of the 1795 Draped Bust dollar, housed in a green label holder, with rich brown toning over lighter silver surfaces. Typical surface abrasions can be seen on each side of this piece, but none are of any particular consequence. A pleasing piece for the type or date collector. (#6858)

**Remarkably Clean 1795 Draped Bust, Off Center Dollar  
B-14, BB-51, VF20**

- 810** 1795 Draped Bust, Off Center VF20 NGC. B-14, BB-51, R.2. The highest wave of hair is under the B of LIBERTY. Light to medium intensity grayish-rose, gold, and bluish-violet patination bathes both sides and the design elements are well defined for the numeric grade. Perhaps the most outstanding feature of this specimen is the remarkably clean surfaces for a coin having seen moderate circulation. (#96858)

**Scarce 1796 Large Letters Dollar, VF25  
B-4, BB-61, Small Date**

- 811** 1796 Small Date, Large Letters VF25 PCGS. CAC. B-4, BB-61, R.3. Bowers-Borckardt Die State I. Incorrectly certified by PCGS as a Small Letters variety. Golden-brown and cream-gray embrace this completely problem-free early silver type coin. The central devices display wear consistent with the grade, yet traces of luster cling to the letters and stars. The reverse border exhibits a few faint adjustment marks, as coined. (#6860)

Choice VF Large Letters 1796 Dollar  
Small Date, B-4, BB-61

- 812 1796 Small Date, Large Letters VF35 PCGS. CAC. B-4, BB-61, R.3. Bowers-Borckardt Die State II. A charming olive-gray Choice VF Small Eagle dollar that lacks the distracting marks often associated with this highly popular early silver type. The eagle's wings and Liberty's hair have ample detail, and the strike is consistent throughout. (#6860)

Desirable 1797 B-3, BB-71 Dollar, XF40

- 813 1797 10x6 Stars, Large Letters XF40 NGC. B-3, BB-71, R.2. Ten stars to the left and six to the right is a diagnostic characteristic that identifies the variety. All 1797 silver dollars are elusive, especially in higher circulated grades. Remnants of luster linger on the light silver surfaces, especially on the reverse, with ivory toning on the high points. Central design weakness results from the prominent adjustment marks at the center of the reverse. (#6865)

Popular 10x6 Stars 1797 B-3, BB-71 Dollar, XF40

- 814 1797 10x6 Stars, Large Letters XF40 PCGS. B-3, BB-71, R.2. As one of three die varieties known for the date that are each a separate Guide Book entry, this dollar will prove popular with a wide range of collectors. Attractive gray-gold and lilac surfaces are void of any significant imperfections. (#6865)

- 815 1798 Large Eagle, Pointed 9 VG8 NGC. B-12, BB-120, R.4. Though extensively worn, this is nonetheless a pleasing example of a very scarce die pair. Deep gunmetal-blue, violet, and gold-gray shadings mingle on each side. Save for the eagle's head and the hollow of the portrait, the major details are clear. (#6873)

Attractive 1798 B-8, BB-125 Dollar, VF35

- 816 1798 Large Eagle, Pointed 9 VF35 PCGS. B-8, BB-125, R.2. This variety only has four berries in the branch, missing the upper inside berry, and that feature alone is diagnostic. An attractive piece, it has light silver-gray on the high points, with deeper gray in the fields, and peripheral iridescent toning. (#6873)

- 817 1798 Large Eagle, 10 Arrows—Improperly Cleaned—NCS. VF Details. B-6, BB-96, R.3. Bowers-Borckardt Die State II, without the die crack that indicates State III. A scarce variety with a Knob 9 obverse and a 5 Stripes in Shield, 10 Arrows reverse. Moderately worn with luminous and hairlined surfaces from a past cleaning. (#6876)

- 818 1799 7x6 Stars Fine 15 PCGS. B-11, BB-161, R.3. Incorrectly designated as an Irregular Date variety by PCGS. A gunmetal-gray Bust dollar with smooth and slightly glossy surfaces. The reverse has tiny rim dings at 4 and 7 o'clock. The last stand of the hardy reverse die, which previously coined three Bolender varieties (B-16, B-23, B-12) but now displays a prominent horizontal break from the rim to the beak. (#6878)

- 819 1799 7x6 Stars—Improperly Cleaned—NGC. VF Details. B-10, BB-163, R.2. Bowers-Borckardt Die State I with no reverse die cracks. The fields and devices are stone-white and a bit bright from cleaning, but the borders have retoned in tan and gunmetal-blue shades. Light pinscratches through STATES, and moderately granular near the date. (#6878)

Handsome XF 1799 Silver Dollar  
7x6 Stars, B-17, BB-164

- 820 1799 7x6 Stars XF40 PCGS. B-17, BB-164, R.2. Bowers-Borckardt Die State II. This impressive Draped Bust dollar has considerable shimmering luster. The cheek and drapery exhibit moderate wear, as does the eagle's head and banner, but the only remotely reportable mark is a minor obverse rim ding at 12 o'clock. (#6878)

Pursued XF 1799 Silver Dollar  
7x6 Stars, B-5, BB-157

- 821 1799 7x6 Stars XF40 ANACS. B-5, BB-157, R.2. Bowers-Borckardt Die State III. Dusky stone-gray, ocean-blue, and golden-brown bathes this lightly abraded Heraldic Eagle dollar. Luster glints from the borders and wings, and the surfaces appear only mildly granular when inspected beneath a loupe. (#6878)

Attractive 1799 7x6 Stars XF45 Dollar, B-17, BB-164

- 822 1799 7x6 Stars XF45 NGC. B-17, BB-164, R.2. There are five extremely large berries on the olive branch, the point of a star enters eagle's mouth, and a crack extends from the middle of U through the bottoms of NITE. Golden-gray surfaces are blushed with traces of sky-blue. This is a well defined minimally marked piece. (#6878)

Splendid Choice AU 1799 Dollar  
B-9, BB-166, 7x6 Stars

- 823 1799 7x6 Stars AU55 NGC. B-9, BB-166, R.1. Bowers-Borckardt Die State IV. The well-known "Apostrophe" variety, named for the vertical die break after the second S in STATES. This example is deep golden-brown and gunmetal-gray with the lightest toning at the obverse center. Impressively bereft of abrasions, and luster fills the peripheries and devices. Liberty's cheek and shoulder displays light wear corresponding to the Choice AU level. A wonderful example of this widely collected early crown-sized silver type. (#6878)

1799/8 Dollar, 15 Stars Reverse  
B-3, BB-141, AU Details

- 824 1799/8 15 Stars Reverse—Reverse Scratched—NCS. B-3, BB-141, R.2. A trace of the 8 is visible beneath the second 9 in the date, identifying the obverse. The reverse is easily distinguished by the two extra stars that are partially hidden by clouds 1 and 8. Pale dust-gray patina envelops both sides, with a light brown hue on the high points. A small "X" has been scratched into the reverse to the right of the eagle's head, and there are several other, more shallow scratches nearby. Still, a well-defined example of this interesting variety. (#6883)

Late State 1799/8 B-1, BB-142 Dollar, VF35

- 825 1799/8 13 Stars Reverse VF35 PCGS. B-1, BB-142, R.4. A scarce overdate variety that will garner considerable bidder attention for its pleasing medium to dark gray toning with lighter gray high points. Minor surface marks are expected and of no concern. The reverse of this specimen has a number of die cracks, the usual die state. (#6884)

---

**Second Finest 1799 B-15, BB-152 Dollar, MS63  
Irregular Date, 13 Reverse Stars**

**826 1799 Irregular Date, 13 Stars Reverse MS63 PCGS.** B-15, BB-152, R.3. Bowers Die State IV. The Irregular Date variety with 13 Stars on the reverse is an important major Guide Book variety, and this die combination, struck from a reverse that was previously used in 1798, is the only one of its kind for 1799. The latest die states with extensive cracks on both sides is the most commonly encountered die state of the variety. The present example is extraordinary for its quality, and ranks among the finest known. Dave Bowers wrote in 1993: "Most examples of 1799 BB-152 are in lower grades. Any coin grading AU or better is especially notable. Only a few Mint State coins are known."

In the Bowers -Borckardt reference, one notable specimen was called MS60, another was called AU55, and three others were called AU50. The Cardinal Collection contained an MS64 PCGS example, and that coin was called "the finest known example by a considerable margin." That coin is the MS60 piece from the Notable Specimens list, and now resides in the Hesselgesser Collection. It seems that the present example is the second finest known, and nearly equal to the other Mint State piece.

This piece has shimmering, satiny luster beneath deep steel toning with traces of lilac and gold. Slight weakness is noted on the high points, but the remaining design elements are boldly defined. It is a thoroughly pleasing and attractive example, and ranks among the major early dollar offerings of the past several years. (#6880)

---

Late State 1800 B-18, BB-193 Dollar, XF40

- 827 1800 XF40 PCGS. B-13, 18, BB-193, R.2. This is the late die state that was formerly known as B-18, and considered to be quite plentiful. Heavy clash marks are present, and the obverse has a die bulge at about 2 o'clock, causing weakness at RI of AMERICA. The surfaces have natural deep golden-gray toning with hints of lilac and blue in the fields. (#6887)

Important 1800 B-10, BB-190 Dollar, AU53

- 828 1800 Wide Date, Low 8 AU53 PCGS. B-10, BB-190, R.3. This distinct Guide Book variety has an extremely wide date, with the 8 much lower than other digits. The obverse exists with a normal reverse as on this example, and also with the AMERICAI reverse of B-11, BB-191. This pleasing and sharply defined medium gray-gold example is close to the Condition Census for the variety. (#6888)

Choice AU 1800 Dotted Date Dollar  
B-14, BB-194

- 829 1800 Dotted Date AU55 PCGS. B-14, BB-194, R.3. A splendidly detailed representative of this popular Guide Book variety. Golden-brown and stone-gray enrich partly lustrous borders and devices. The reverse is unabraded, and the obverse has a smattering of minor marks, a thin line above the ribbon, and two subtle ocean-blue spots on the bust tip and left neck curls. Population: 3 in 55, 3 finer (9/09). (#6889)

---

Unabraded 1800 B-17, BB-196 Dollar, XF45

- 830 1800 12 Arrows XF45 NGC. B-17, BB-196, R.1. Die State II. Pleasingly original, both sides are evenly toned in medium tan-gray shades. We are unable to find any singularly distracting abrasions. In fact, there are few blemishes of any kind, and the well centered strike retains overall bold definition despite a little light rub. A plentiful die marriage, this coin would make a lovely Choice XF representative of either the date or the type. (#6890)

Desirable 1802/1 Narrow Date Dollar  
B-4, BB-232, Choice VF

- 831 1802/1 Narrow Date VF35 PCGS. B-4, BB-232, R.3. Bowers-Borckardt Die State II, with die crack on the bust close to star 13. This Choice VF survivor has much to recommend it; glimpses of luster remain in the fields, and the intense gunmetal-blue and silver-gray peripheral toning lightens considerably at the centers. Great eye appeal for the grade. (#6898)

- 832 1802/1 Wide Date Fine 12 NGC. B-3, BB-234, R.3. A lightly toned pearl-gray and sun-gold example that has minor granularity near the E in STATES and only a couple of moderate marks, neither worthy of individual description. All letters in E PLURIBUS UNUM are at least partly readable, and most are bold. (#6899)

Attractive 1802 B-6, BB-241 Dollar, VF30

- 833 1802 Narrow Date VF30 NGC. B-6, BB-241, R.1. The 1802 Normal Date variety with a broken T in LIBERTY ranks among the most plentiful of all early dollar varieties, making it one of the best candidates for a type collector. An attractive light gray example, this dollar has traces of champagne toning along the borders. (#6895)

### XF 1803 Large 3 Dollar, B-6, BB-255

- 834 1803 Large 3 XF40 PCGS. B-6, BB-255, R.2. Bowers-Borckardt Die State II. A rich blanket of cream-gray toning fails to conceal the glimpses of bright luster that emerge from the letters, stars, and other design elements. Surprisingly unabraded despite a small rim nick above the second S in STATES. B-6, the sole Large 3 die variety, presumably constituted the early 1804 delivery that decades later led the U.S. Mint to strike novodel 1804 dollars. (#6901)

### GOBRECHT DOLLAR

#### 1836 Die Alignment IV Gobrecht Dollar XF Details

- 835 1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5—Plugged, Improperly Cleaned—NCS. XF Details. Silver. Die Alignment IV (center of Liberty's head opposite the right side of F in OF). These pieces are believed to be later restrikes, as they show no scribe line in the denticles and increased spacing between the denticles from die lapping. The plug was expertly filled and there is barely a trace left on the obverse of the repair. On the reverse the O in OF appears different from the O in ONE, a bit more pronounced than the other letters. There also is a slightly dished area to the left of the date that may have been worked on as well. The surfaces were cleaned, which helps conceal the repair that was done. The surfaces are mostly brilliant with a slight gray patina, and there is even wear over the high points. (#11227)

### SEATED DOLLARS

- 836 1842 AU55 NGC. Minor wear on the high points has left the mildly reflective luster of the pale gray fields largely intact. Strong visual appeal for this earlier Seated dollar issue. (#6928)
- 837 1843 AU58 NGC. Deep orange and rose shadings consume each side of this scarcely worn early Seated dollar. Well-defined with just a hint of rub and an abrasion to the left of star 12 on the obverse. (#6929)

#### Important MS61 1845 Seated Dollar

- 838 1845 MS61 NGC. An attractively lustrous example of this pre-Civil War Seated dollar date, pleasing thanks to above-average definition (excepting the softest of the stars on the obverse). Though numerous tiny marks and a few more obvious abrasions preclude a finer designation, the eye appeal is strong for an MS61 coin. Census: 7 in 61, 8 finer (9/09). (#6931)
- 839 1846-O XF45 PCGS. A dusky stone-gray Choice XF example of this introductory New Orleans silver dollar issue. Well defined with glimmers of luster in the designs. The right obverse has an occasional unimportant mark. (#6933)

#### Splendid 1846-O Seated Dollar, AU58

- 840 1846-O AU58 NGC. The first New Orleans Mint silver dollar, the 1846-O had a mintage of 59,000 coins, sufficient that enough have survived to meet the demands of collectors. However, the mintage was also small enough that there is clearly no surplus of pieces on the market. This piece has considerable silver luster with light gray toning over satiny surfaces. Census: 29 in 58, 21 finer (9/09). (#6933)
- 841 1847 AU58 ICG. Blended golden-brown and sea-green toning embraces this deeply toned and slightly glossy near-Mint No Motto Seated dollar. Sharply struck and uncommonly free from marks. (#6934)
- 842 1848 AU50 PCGS. Just 15,000 1848 silver dollars were coined, and survivors are predictably scarce. This lightly circulated piece appears stone-gray at direct angles, but reveals gold, rose, and aqua tints once rotated beneath a light. (#6935)

### Pleasing MS63 1849 Seated Dollar

- 843 1849 MS63 NGC. Impressive eye appeal for this mid-19th century issue. The luster is strong, and whispers of golden toning grace the margins. Central detail is crisp, though the peripheral elements show trifling softness, and though a handful of wispy abrasions are present in the fields, the surfaces are devoid of overt flaws. Census: 15 in 63, 10 finer (9/09). (#6936)

### Important 1850 Seated Dollar, AU58

- 844 1850 AU58 NGC. Although exhibiting the usual minor abrasions that are typical on these early Seated dollars, this delightful piece has reflective fields. The obverse has intermingled gold and blue toning while the reverse is brilliant. The hair detail and the top of the left facing wing are each a trifle weak, but all other design elements are sharp. The specialist will recognize the importance of this opportunity. Census: 30 in 58, 30 finer (9/09). (#6937)

### Prized 1850-O Seated Dollar

- 845 1850-O AU55 NGC. Deep gold and lavender-gray toning shows small spots of charcoal on the reverse of this scarcely worn O-mint Seated dollar. The strike is decidedly above-average, and the fields remain attractively luminous beneath the patina. One of just 40,000 pieces coined. Census: 19 in 55, 32 finer (9/09). (#6938)

### Scarce 1850-O Seated Dollar, AU58

- 846 1850-O AU58 NGC. Only 40,000 silver dollars were coined at the New Orleans Mint in 1850, with a small percentage surviving today. This scarce date is usually only found in circulated grades, XF or lower. A near-Mint piece is a true surprise. This satiny example has silver-gray surfaces with splashes of gold toning. Census: 18 in 58, 14 finer (9/09). (#6938)

### Challenging MS63 1853 Seated Dollar

- 847 1853 MS63 PCGS. The production total for the 1853 Seated dollar was smallish even by the modest standards of the series, and most of the certified examples are in the AU-Choice AU grade range, although Mint State pieces can occasionally be found up to MS64. Gems are rare. This piece has silver-gray surfaces predominating, with streaky pinkish-gray and gold toning. Minor strike weakness appears on each side, but there are few singular abrasions. Population: 26 in 63, 17 finer (9/09). (#6941)

### Elusive 1855 Seated Dollar, AU Details

- 848 1855—Improperly Cleaned—NGC. AU Details. The 1855 is a rare issue in all grades. The luster is a muted by deep pinkish-gray coloration that obscures the hairlines. A few stray abrasions and light wear are present as expected from a brief period in circulation. The strike is boldly impressed, with good detailing on all star centrals and Liberty's head. (#6943)

### Uncirculated 1856 Seated Dollar

- 849 **1856 MS60 NGC.** A rarity in the series of circulation strike Seated dollars, despite a seemingly high mintage of 63,500 coins. NGC, for example, has only certified 14 examples in all Mint State grades. This lustrous dollar has bright silvery-gray surfaces with a few scattered marks that are consistent with the grade. Census: 3 in 60, 11 finer (9/09). (#6944)

### Seldom-Seen MS62 1856 Seated Dollar

- 850 **1856 MS62 PCGS.** Mint State Seated Liberty dollars from the 1850s, through 1857, are all elusive regardless of the date or grade. This issue is no exception, and in Mint State grades it is an important rarity. Mint records indicate that 63,500 examples were produced, although most entered circulation or were exported. Very few survive in the higher grades. In fact, PCGS and NGC have combined to certify just 32 examples in MS60 or finer grades, a total that includes resubmissions. This is an extremely important opportunity for the advanced collector to obtain this issue. The surfaces have satiny luster beneath pale gold toning. Only a few small blemishes are visible. The design elements are somewhat weakly developed, which may be the reason that the grade of this example is not higher. In particular, the upper obverse and lower reverse are quite softly defined. Of course, it is not possible to be too choosy when looking for an example of this date. (#6944)

### Conditionally Challenging 1859 Seated Dollar, MS63

- 851 **1859 MS63 PCGS.** The 1859 Seated dollar had a relatively plentiful mintage of more than a quarter-million pieces, but it is scarcer than that figure might imply and grows conditionally rarer in the higher Mint State grades. This piece shows a pinkish-gold-toned reverse, with a color-free obverse wedge complementing a larger area of deeper lilac and mauve. A few minor high-point abrasions are in keeping with the Select grade. Population: 15 in 63, 7 finer (9/09). (#6946)

- 852 **1859-O AU58 NGC.** Steel-blue, rose-gray, and silver elements combine on each side of this still-lustrous near-Mint representative. Well struck with rub largely restricted to the highest design elements. (#6947)

### Lustrous Mint State 1860-O Silver Dollar

- 853 **1860-O MS61 PCGS.** A lightly toned Uncirculated Seated dollar from the dwindling days of the antebellum South. Lustrous and boldly struck with fewer field marks than is normally associated with the grade. One thin mark is concealed within the reverse shield. A hoard has made the '60-O available by No Motto standards. (#6950)

### Popular 1870 Seated Dollar, MS62

- 854 **1870 MS62 PCGS.** This fully brilliant 1870 Seated Liberty silver dollar has satiny obverse luster and frosty reverse luster with excellent design definition on both sides. There is no evidence of toning on either side. The date is reasonably available, although Mint State examples are elusive. Population: 21 in 62, 44 finer (9/09). (#6963)

- 855 **1870-CC—Scratched, Cleaned—ANACS. XF45 Details.** Breen-5485, "rare." Variety 1-A. The mintmark is closely spaced. A mildly worn example of this initial Carson City silver dollar issue. Though a horizontal scratch crosses the left obverse and the orange-toned gray surfaces are bright from a past cleaning, the eye appeal remains strong. (#6964)

### Choice AU 1870-CC Seated Dollar Historic First Carson City Issue

- 856 **1870-CC AU55 NGC.** Variety 2-E. With likely more than a dash of poetic license, Rusty Goe describes the mintage of the first CC-mint Seated dollars: "A month later, on February 10, 1870, it was time for the sound of the coin press to finally roar and from morning until night that big 12-ton Morgan and Orr clanged out 2,303 new 1870-CC Seated Liberty silver dollars. [Mint Superintendent Abraham] Curry had already planned out who the first coin was going to be reserved for: the number one citizen in the United States, President Ulysses S. Grant."

This Choice AU survivor could be from that first day's mintage, as only 12,462 pieces were coined in all. This piece shows only light wear on the high points of the deep gray-green surfaces, with no singular abrasions and good eye appeal. (#6964)

---

### Desirable 1870-CC Dollar, MS61

857 1870-CC MS61 PCGS. Variety 1-A. Closely spaced CC. In 1870 the new branch mint at Carson City, Nevada, began producing coins, striking quarters, half dollars, silver dollars, half eagles, eagles, and double eagles. All are rarities, although the mintage of Seated dollars reached 11,758 coins, and that total was sufficient to permit today's collectors a chance at one of the surviving examples. This specimen, a splendid Mint State coin, has fully reflective fields on both sides, with sharp design details. The surfaces are lightly abraded, consistent with the grade, and the toning is somewhat irregular although still attractive. Population: 1 in 61, 14 finer (9/09). (#6964)

858 1871 AU55 PCGS. Deep green-gold and sage shadings mingle on each side of this Choice AU Seated dollar. Two dots of deeper toning appear on the obverse, one just below the liberty cap and the other above the visible corner of the shield. Lustrous and minimally abraded for the grade. (#6966)

859 1871 AU58 PCGS. Light tan-brown toning visits the borders of this well struck and typically abraded near-Mint Seated dollar. The devices are frosty, and luster also fills the legends. (#6966)

---

### Well Struck 1871 Dollar, MS62

860 1871 MS62 PCGS. The fields of this With Motto dollar display some prooflike tendencies, resulting in mild field-motif contrast. Whispers of light golden-tan patina are slightly more evident on the obverse. While some 1871s reveal weakness, this example is generally well struck. Light marks define the grade. From The Volunteer Collection. (#6966)

---

### Appealing 1871 Seated Dollar, MS62

861 1871 MS62 PCGS. CAC. Softly lustrous overall with generally silver-gray surfaces that show a touch of golden-tan. The strike is crisp, and though a few wispy abrasions affect the fields, the general visual appeal remains attractive. A worthy example of this later Seated dollar issue. (#6966)

---

### Attractive 1872-S Dollar, XF45

862 1872-S XF45 PCGS. Light tan patination resides on the semiluminous surfaces of this Choice XF dollar, and the design features retain a good amount of detail, save for the usual strike softness on Liberty's head and on some of the stars. A few minor rim dings are barely noticeable. Attractive overall. Population: 23 in 45, 51 finer (9/09). (#6970)

---

**Well Defined 1872-S Dollar, AU58**

**863 1872-S AU58 PCGS.** The fields of this near-Mint State specimen are semiprooflike, as often seen on the issue. Soft champagne-tan patina overs each side, and the design features are well defined, better so than often seen; only the hair atop Liberty's head is soft. None of the light circulation marks are worthy of individual mention. Population: 3 in 58, 8 finer (9/09). (#6970)

---

**PROOF SEATED DOLLARS**

---

**Prized 1863 Seated Dollar, PR64**

**864 1863 PR64 PCGS.** Business strike 1863 Seated dollars are seldom offered in today's market, particularly in Mint State. As such, high quality proofs are prized among silver dollar date collectors. This is a gorgeous near-Gem with dominant cobalt-blue and steel-gray toning that coats each side. A few minor surface imperfections are noted, but only visible under close examination. Crisply detailed, as befits a specimen striking, with uniform reflectivity throughout. Population: 36 in 64, 12 finer (9/09). (#7006)

---

**Striking PR63 Cameo 1866 Motto Seated Dollar**

**865 1866 Motto PR63 Cameo PCGS.** Both sides of this Select proof show considerable contrast, but it is on the reverse where the cameo effect is at its best. Gold-gray and violet shadings in various strengths suffuse each side, partly camouflaging the wispy hairlines and occasional contact marks that determine the grade. Population: 11 in 63 Cameo, 24 finer (9/09). (#87014)

---

---

**Stunning 1866 Seated Dollar, PR64 Cameo**

**866 1866 Motto PR64 Cameo NGC.** An absolutely stunning Cameo proof with deeply mirrored silver fields and lustrous white devices. There is no evidence of toning on either side. Every design element throughout is fully and sharply delineated. Census: 20 in 64 Cameo, 17 finer (9/09). (#87014)

---

**Pleasing PR62 1869 Seated Dollar**

**867 1869 PR62 ANACS.** One of just 600 proofs struck, crisply detailed with strong mirrors beneath beautiful and intriguing toning. A gold-gray base gives way to patches of orange and blue-green. Assorted hairlines partly hidden by the toning account for the grade assigned. Housed in a pre-Amos Press ANACS holder. (#7017)

---

## TRADE DOLLARS

- 868** 1873-CC XF45 PCGS. Deep cream-gray toning embraces this challenging date Carson City Trade dollar. Considerable design detail remains despite moderate wear on the drapery and other highpoints. Neither side displays consequential contact. (#7032)
- 869** 1873-CC XF45 PCGS. This pearl-gray representative has nearly unblemished surfaces. Wear is concentrated on the drapery and knees. A difficult Carson City issue, second in importance to only the 1878-CC aside from the proof-only dates. (#7032)

### Richly Toned 1874 Trade Dollar, MS64

- 870** 1874 MS64 PCGS. Period after FINE. Most of the 987,100 Philadelphia Mint Trade dollars coined in 1874 were shipped to China to fulfill their intended purpose. This issue is seen with counterstamps more often than any other date. The present coin is sharply struck, with fine detail on the hair and eagle's claw. Deep gray toning covers the surfaces on both sides. Fewer than average handling marks are evident for the grade. Population: 24 in 64, 7 finer (9/09). (#7034)
- 871** 1875-CC AU55 PCGS. Type One Reverse. A scarcely worn example of this Carson City Trade dollar issue. Faint golden patina graces still-lustrous surfaces that show light abrasions. Housed in a green label holder. (#7038)
- 872** 1875-S MS62 PCGS. CAC. Type One Reverse, Large S. Caramel-gold, steel-blue, and cream-gray adorn the lustrous fields of this silver type coin. Inexactness of strike is limited to Liberty's hair and the eagle's right (facing) claw. Wispy marks on the obverse field determine the grade. (#7039)

### Highly Lustrous 1875-S Trade Dollar, MS65

- 873** 1875-S MS65 NGC. Type Two Reverse. Large S. Soft champagne-gold, reddish-gold, and ice-blue patina runs over the highly lustrous surfaces of this Gem S-mint Trade dollar. The design elements are well struck save for the usual weakness in Liberty's hair and the eagle's right (facing) claw. A few light grade-consistent marks are not disturbing. Census: 34 in 65, 6 finer (8/09). (#7039)

**874** 1876-S Chop Mark MS62 PCGS. Type One Obverse and Reverse. Large S. This lustrous representative has delicate gold toning and appears free from marks aside from five chop marks, which cause a slight bend near 900 FINE. (#87043)

**875** 1876-S MS62 PCGS. Type One Obverse and Reverse. Large S. An uncommonly well struck example with good luster and brilliant surfaces. The major devices are pleasingly free of abrasions, but the fields are lightly scuffed as is appropriate for the grade. (#7043)

**876** 1876-S MS62 NGC. Type One Obverse and Reverse. Large S. This lustrous and nicely struck example is richly toned in golden-brown and apple-green. The reverse field displays a lengthy cursive pinscratch that does not affect how the coin displays. (#7043)

**877** 1877-S MS61 NGC. Large S. Peripheral olive-gray elements, present on each side but strongest as a crescent at the upper right reverse rim, counterbalance the faint patina present elsewhere. Pleasingly lustrous and solidly struck for the issue. (#7046)

### Attractive 1877-S Trade Dollar, MS63

**878** 1877-S MS63 PCGS. Large S. The 1877-S mintage of more than 9.5 million coins was the heyday of the Trade dollar, struck in the year before the new Morgan silver dollars made them irrelevant and spelled their eventual demise. This appealing Select piece would make a superior choice for a type set, with deep golden-gray surfaces that offer plenty of radiant luster and a bold strike. Light contact marks account for the grade. (#7046)

### Prized MS64 1877-S Trade Dollar

**879** 1877-S MS64 PCGS. Large S. The Trade dollar saw its greatest mintages in 1877, including more than 9.5 million pieces struck at San Francisco, but business strikes of the denomination would end the next year. This MS64 piece is ideal for the type collector. It is pleasingly detailed with dramatically flashy fields and just a touch of gold-gray toning over each side. (#7046)

---

**Key 1878-CC Trade Dollar, XF40**

- 880 1878-CC XF40 PCGS. The Trade dollar issue was made irrelevant when the Morgan dollar was introduced. The mintage of the 1878-CC Trade issue is reported as 97,000 coins, but most of them are thought to have been melted, making this the most elusive business strike overall. Examples are in demand in all circulated and Mint State grades. This XF piece offers silver-white surfaces with just a hint of color, and there are no mentionable distractions. Population: 21 in 40, 68 finer (9/09). (#7047)

---

**PROOF TRADE DOLLARS**

**Appealing PR64 1874 Trade Dollar**

- 881 1874 PR64 PCGS. Light silver-gray patina of varying opacity drapes the strongly mirrored fields of this Choice proof. The strike is bold, and the ample frost on the devices hints at what must have been considerable contrast. A few faint hairlines account for the grade. Population: 40 in 64, 8 finer (9/09). (#7054)

**Stunning PR65 Cameo 1879 Trade Dollar**

- 882 1879 PR65 Cameo NGC. Lavish reflectivity turns the fields into dark, watery pools. The central devices are richly frosted. All of the design elements are struck with razor-sharp precision, which gives this Gem proof a much finer overall appearance than the average business strike Trade dollar (from earlier years), even at the same grade level. The surfaces are impressively preserved on both sides. (#87059)

- 883 1880 PR50 PCGS. This untoned proof-only Trade dollar briefly found its way into circulation, but luster nonetheless fills the drapery, plumage, and legends. Close to untoned with a hint of golden-gray near the rims. Small field marks are present but none distract. (#7060)

- 884 1880 PR60 PCGS. Strongly struck with peripheral olive elements against the uniform silver-gray luster present elsewhere. Numerous hairlines and a few contact marks run through the fields. From a proof-only issue. (#7060)

---

**Impressive, Upper-End 1880 Trade Dollar, PR63**

- 885 1880 PR63 PCGS. CAC. At first it seems counterintuitive to have a PR63 with a CAC sticker. But when one examines this coin it is easy to understand. There are slight hairlines, but they are light and wispy not heavy and noticeable. The fields show deep reflectivity and the devices are nicely frosted, but not quite enough to warrant a Cameo designation. A pale overlay of rose patina is seen over each side. (#7060)

---

**PR64 Cameo 1880 Trade Dollar**

- 886 1880 PR64 Cameo PCGS. The years 1879 through 1883 marked the "regular-issue" proof-only Trade dollars, as the fabulously rare 1884 and 1885 dates appear to be later clandestine "inside jobs." The 1880 had a proof mintage of 1,987 pieces. This near-Gem shows a generous amount of the desirable "silver-on-black" appearance, if a touch short of that required for a Deep Cameo label. A few light field hairlines account for the grade. Population: 44 in 64 Cameo, 28 finer (9/09). (#87060)

---

**Exceptional PR64 1881 Trade Dollar**

- 887 1881 PR64 PCGS. CAC. Housed in a green-label PCGS holder, this proof-only 1881 Trade dollar is an exceptional example for the grade. The obverse is mostly brilliant silver, with a frame of deep blue, violet, and gold. The reverse has a lighter frame of pale gold. The fields are deeply mirrored with lustrous devices. This piece is a full cameo example, although certified prior to the PCGS addition of such designations. (#7061)

### Impressive PR64 Cameo 1881 Trade Dollar

- 888 1881 PR64 Cameo PCGS. The few hairlines that are present in the obverse fields seem less prominent by the presence of milky patina that also serves to dilute the boldness of the obverse contrast, but the reverse is completely untoned and displays impressive contrast. The strike is bold and just a bit of pastel-golden color is seen on the reverse. Flashy and reflective. (#87061)

### Appealing 1882 Trade Dollar, PR63 Cameo

- 889 1882 PR63 Cameo PCGS. A stunning Cameo proof, this 1882 Trade dollar has light champagne toning over fully and deeply mirrored fields, with frosty and lustrous devices that exhibit every individual design element. Although finer numerical pieces exist, few can match the overall eye appeal of this dollar. Population: 26 in 63 Cameo, 37 finer (9/09). (#87062)

### Stunning Deep Cameo Gem Proof 1882 Trade Dollar

- 890 1882 PR65 Deep Cameo PCGS. A wonderful exemplar with fantastic field-to-device contrast that is unaffected by the pale cream toning that surrounds the peripheral devices and extends inward on the reverse. The central designs are wonderfully frosted, and only a few tiny faults are visible in the fields. Population: 10 in 65 Deep Cameo, 4 finer (9/09). (#97062)

PATERSON, N. J., MARCH, 1881.

No. 1.

### THE REDEMPTION OF THE TRADE DOLLARS.

Since Congress passed the bill authorizing the redemption of the trade dollars, the professional examiners and counters in the Sub-Treasuries at New York and San Francisco have been kept busy receiving the large sums forwarded from all parts of the country. As the dollars can only be redeemed in these two cities, and as each piece has to be carefully scrutinized to see that it is neither defaced, mutilated, nor stamped, it will probably be five or six months before the work is completed.

It is the common belief that at the time the value of trade dollars fell to eighty-eight cents, large quantities were bought by bullion brokers speculating on a possible rally. If anyone had bought the coins in 1882, at their lowest price, and held them until the passage of the redemption act, he would really have lost money, as the profit on the four years investment would only be twelve cents. A larger profit than this could have been obtained by investing in Government bonds.

The Treasury Department has issued the following statement to holders of trade dollars:

TREASURY OF THE UNITED STATES, |  
WASHINGTON, MARCH 2, 1882. |

Owing to the present inadequate provision for the reception and storage of trade dollars, the redemption of which is provided for under the act of Congress passed Feb. 29, 1882, the following regulations will be observed, in order, so far as practicable, to comply with the terms of the law:

Trade dollars, if not defaced, mutilated, or stamped, will be redeemed or exchanged at the offices of the Treasurer of the United States. Requests for the redemption of these

coins stating the amount held should be forwarded to the above-named offices, who will file applications and notify holders in their turn when presentation may be made and payment obtained. The notification by the holders of trade dollars to the Treasurer or Sub-Treasurers of the United States of the amounts held by them respectively will be held to be a sufficient presentation of the coins within the meaning of the law, and will entitle the holders in the order of reception of such notifications to deposit such coins in the respective Sub-Treasuries when notified that such deposits can be received at those offices. Notifications must be filed with the Sub-Treasurers on or before Aug. 1, 1882. After notifying these offices, and upon receipt of notification from them, such coins may be forwarded by express or otherwise, transportation charges being prepaid, when receipts will be issued for the amounts purporting to be contained in the deposits on their reception. Upon the count and ascertainment of the amount of each deposit payment will be made therefor in standard silver dollars or in fractional silver coins at the option of the holder. Defaced, mutilated, or stamped trade dollars found in deposits will not be redeemed or exchanged by any of the Sub-Treasury offices, but they will be returned to the depositor or purchased as bullion in sums of \$3 or upward by the United States mints at the option of the depositor. C. S. JOHNSON,

TREASURER UNITED STATES,  
Approved: C. S. FAIRCHILD, Acting Secretary of the Treasury.

Most of the dollars presented for redemption are held by banks for large business houses, and, as they were but a short time in circulation, are in very good condition. There is probably not more than one fourth of the original coinage of trade dollars still in this country; the remainder has been exported, principally to China.

## EARLY PROOF SETS

### 1860 Seven-Piece Proof Set NGC, All CAC

This is a remarkable seven-piece minor proof set from 1860. This was the third year that Mint Director James Ross Snowden greatly increased the production and promotion to the general public of proof coinage; thereby also greatly increasing the number of coin collectors in the United States. As in 1859, many 1860 proofs were melted as unsold at year's end. This is a remarkable opportunity to acquire one or several proofs from this impressive set.

#### Bright 1860 Cent, PR65

- 891 1860 Indian Cent PR65 NGC. CAC (Gold Label). A magnificent example of this first year for the Indian cent design in regular production (after innumerable patterns). The fields are remarkably reflective, especially on the reverse where the color is a couple of shades lighter. The surfaces have a rich red patina that deepens around the margins and also shows occasional hints of lime green. The strike is full in all areas and there are no mentionable or observable flaws. The gold sticker speaks volumes about the quality of this copper-nickel cent. Out of a total of 19 CAC-certified 1860 proof cents, only seven have been given a CAC sticker with four in a higher grade (9/09). (#2253)

#### Deeply Toned PR65 1860 Three Cent Silver

- 892 1860 Three Cent Silver PR65 NGC. CAC (Green Label). Breen lists the three cent silver proofs of this date as having a mintage of 1,000 pieces, but after melting only 538+ are believed known. The date is heavily punched into the die, as on all proofs of this date. The surfaces are essentially free from post-striking defects, but do show a couple of shallow planchet flakes on the obverse and slight weakness on the laurel leaves on the reverse. The fields are deeply mirrored and each side has deep sea-green toning with slight accents of rose. (#3709)

#### Outstanding, Toned PR65 1860 Gold Label Half Dime

- 893 1860 Seated Half Dime PR65 NGC. CAC (Gold Label). Similar to the three cent silver, 1,000 proofs were struck but only 535+ are believed to have survived after melting at year's end. This year marked the beginning of a new design for the half dime and dime, and proofs are a significant acquisition for type collectors. Close examination of this piece reveals why it merits a gold CAC sticker. The surfaces are essentially perfect, and frankly the coin appears undergraded. Even beneath the golden-rose and cobalt-blue toning on each side, there is a noticeable cameo contrast—while probably not strong enough to merit designation as such, it certainly adds an element of eye appeal. (#4443)

#### Spectacular, Richly Toned PR66 1860 Dime

- 894 1860 Seated Dime PR66 NGC. CAC (Green Label). Breen-3318, the "Five Lines" shield. The Legend Obverse and "Cereal Wreath" reverse was first introduced on dimes and half dimes in 1860. Again, Mint Director Snowden overestimated public enthusiasm for proofs from this year and it is believed that 527+ were sold with the remainder melted. This is a lovely coin that has taken on several layers of deep blue and rose toning, and yet the mirrored fields flash forcefully through the coloration. The grade effectively communicates the quality of the coin with no obvious post-striking problems on either side. (#4753)

### Upper-End PR64 1860 Quarter

- 895 1860 Seated Quarter PR64 NGC. CAC (Green Label). High grade No Motto quarters are always in demand by knowledgeable collectors, and the 1860 is one of the few dates that is occasionally available in collectible grades. This is certainly an upper-end example for a PR64, as indicated by the CAC label. The fields are deeply reflective and set up a modest amount of contrast against the lightly frosted devices. Well-balanced from side to side, the coin displays bright pinkish-rose color overall with the occasional patch of blue. A bit softly struck on stars 3 through 8. (#5556)

### Exceptional PR65 1860 Half Dollar

- 896 1860 Seated Half PR65 NGC. CAC (Green Label). Like the quarter, half dollars were also struck from a modified hub in 1860. The differences are subtle to all but the most die-hard numismatist. Not surprisingly, like the other denominations, 1,000 proof halves were struck, but Breen estimated that only 525+ pieces survived after melting at year's end. The striking details are complete on each side of this piece, a not-so-obvious statement with proof production from this early date. The surfaces can definitely "face up to a close up." Each side has swirls of blue and nearly crimson patina with tiny speckles of brilliance interspersed. The fields are deeply reflective and serve to enliven the color on each side. We see no defects worthy of individual mention. Exceptional quality. (#6414)

### Impressive PR65 1860 Seated Dollar

- 897 1860 Seated Dollar PR65 NGC. CAC (Green Label). The always-hopeful Mint Director Snowden believed that the 1,000 proofs struck for the other denominations would not be sufficient for the number of anticipated collectors who would want a crown-sized souvenir from this year. So he ordered an extra 330 dollars struck in proof format. As Breen stated, "This did not materialize." This is another exceptional proof from this well-matched proof set. As with the other pieces in the set, this coin does not necessarily represent the absolute finest quality, but it does represent the finest value in a coin graded PR65 (as underscored by the CAC endorsement). The centers have mellow reddish toning that deepens and turns cobalt-blue at the margins. The fields are nicely reflective and serve to backlight the attractive toning on each side. (#7003)

Mint Director James Ross Snowden

**Ten-Piece 1867 Proof Set, PR62 to PR64  
Cent Through Silver Dollar**

---

**898 Ten-Piece 1867 Proof Set PR62 to PR64 PCGS.** The PCGS serial numbers are consecutive. The set, housed in a custom wood holder, includes:

**Cent PR64 Red and Brown.** Well struck and exquisite with intermingled orange and lilac patina.

**Two Cent PR64 Red and Brown.** A needle-sharp near-Gem, honey-brown and lavender, with essentially undisturbed surfaces.

**Three Cent Nickel PR63.** Nickel-gray with a curly mint-made lintmark on Liberty's jaw. Crisply struck overall.

**Three Cent Silver PR63.** Golden-brown, ruby-red, and ocean-blue colors dominate the patina. Strongly struck. Only 4,000 business strikes and 625 proofs were issued.

**No Rays Nickel PR62.** Fletcher's IIa Reverse, also used on business strikes. A meticulously struck dove-gray piece with a few wispy hairlines on the reverse.

**Half Dime PR62.** Mauve and electric-blue colors embrace this well-defined, lightly hairlined piece. Just 8,000 commercial strikes were coined, which contributes demand for the 625 proofs.

**Dime PR63.** Fortin-103. Navy-blue and golden-brown patina cedes to a lightly toned reverse center. The 18 in the date is lightly repunched, visible primarily above the base of the 1. The associated business strike production was low, limited to 6,000 pieces.

**Quarter PR63.** Orange, mauve, and sky-blue colors bathe this faintly hairlined piece. Solid eye appeal. Due to Gresham's Law and fractional currency, silver coins did not circulate except in the Old West in 1867. Only 20,000 business strikes and 625 proofs were released.

**Half Dollar PR63.** An exquisitely struck example that has deep honey, aqua, and navy-blue toning. The similar coloration on the silver coins in this set suggests an original set, or at least a set that was stored together for many years. A few hairlines and handling marks appear in the fields.

**Silver Dollar PR63.** This boldly struck Seated dollar has carefully preserved surfaces and deep apple-green, mauve, tan, and pearl-gray patina. As is the case with the other silver coins in the present set, only 625 proofs were struck. (Total: 10 coins)

## MORGAN DOLLARS

- 899 **1878 8TF MS65 PCGS.** VAM-17. A boldly impressed Gem representative of the early 8 Tailfeathers variant of the 1878 Morgan dollar. Both sides show minimal toning on the lustrous surfaces. (#7072)
- 900 **1878 8TF MS65 PCGS.** VAM-17. The obverse of this brilliant and untoned Gem is fully prooflike, with excellent cameo contrast, while the reverse is entirely frosty and lustrous. Such is the look of many 1878 8 Tailfeather dollars. (#7072)
- 901 **1878 7TF Reverse of 1878 MS65 PCGS.** Dusky gold-orange toning drapes each side of this Reverse of 1878 dollar, while the rims show rich peach and blue patina as a counterpoint. Decisively struck and attractively preserved. (#7074)
- 902 **1878 7TF Reverse of 1878 MS65 NGC.** Well-defined overall with only a trace of softness visible on the hair over Liberty's ear. Bright, slightly frosty luster with areas of peripheral pink, orange-tan, and blue. (#7074)

### Coveted 1878 Reverse of 1878 Morgan MS65 Deep Mirror Prooflike

- 903 **1878 7TF Reverse of 1878 MS65 Deep Mirror Prooflike NGC.** The eagle's breast is flat and the arrow feathers are parallel. This is a more available issue than the Reverse of 1879 coins, but the Reverse of 1878 is a truly scarce coin with Deep Mirror Prooflike surfaces, as here. The highly reflective fields set up profound contrast with the thickly frosted devices, producing the coveted silver-on-black effect. There is just a hint of rim color, and the surfaces are free of mentionable contact. Census: 10 in 65 Deep Mirror Prooflike, 0 finer (9/09). (#97075)

- 904 **1878 7TF Reverse of 1879 MS65 NGC.** A boldly impressed Gem example of this final major design variety of the first-year Morgan dollar. Great luster with pink-toned golden toning covering much of each side. (#7076)
- 905 **1878-CC MS65 NGC. CAC.** Dazzling luster sweeps this essentially brilliant Carson City Gem. Boldly impressed and bereft of distracting marks, although the left obverse has a few unimportant grazes. (#7080)

906 **1878-CC MS65 Prooflike NGC.** Boldly frosted central devices accentuate the reflectivity of the faintly gray-toned fields. A marvelous Gem that shows a line of shallow reed marks in the left obverse field. (#7081)

907 **1878-S MS66 PCGS.** This high grade first-year Morgan dollar has a deep mirror prooflike obverse and a semiprooflike reverse. Brilliant and well struck with flashy fields and no mentionable marks. (#7082)

908 **1879-CC XF45 NGC.** This scarce date Carson City dollar displays noticeable luster across the borders, hair, and wings. Lightly toned, and only inconsequential marks are present aside from a tiny reverse rim nick at 2 o'clock. (#7086)

### Popular Key 1879-CC Dollar, MS63

- 909 **1879-CC MS63 PCGS.** This is a popular collectible in a popular grade, one that satisfies in quality terms without undue financial compromise. The present Select Mint State coin offers bright, semireflective silver surfaces accented with a touch of golden patina near the rims on each side. A few minor marks are grade-consistent but fail to dampen the appeal. The first of the "three CC keys." (#7086)

### Splendid Brilliant MS64 1879-CC Dollar

- 910 **1879-CC MS64 PCGS. CAC.** Toned or brilliant? Morgan dollar collectors seem to cluster at one end of the spectrum or the other. This piece is a superlative acquisition for the "brilliant" camp, with silver-white surfaces that show considerable prooflikeness, as often seen on the issue. While PCGS has not acknowledged the prooflikeness on the holder, CAC has certainly given the nod to the piece overall. Generous luster and relatively few abrasions further increase the appeal. (#7086)

---

Exceptional 1879-CC Morgan, MS64

Marvelous 1879-CC Morgan Dollar  
MS64 Deep Mirror Prooflike

- 911 1879-CC MS64 PCGS. A splendid Choice Mint State example, this fully brilliant 1879-CC Morgan dollar is from a perfect mintmark die, and is highly desirable as such. The fields have satiny, reflective luster around frosty devices, creating a pleasing cameo appearance. This is an exceptional example of a condition rarity. PCGS has only certified 92 finer pieces (9/09). (#7086)

Admirable 1879-CC Morgan Dollar  
MS62 Deep Mirror Prooflike

- 912 1879-CC MS62 Deep Mirror Prooflike PCGS. CAC. This piece should prove to be overwhelmingly appealing, not only for the legions of Morgan dollar collectors, but even more so for those whose primary collecting goal is Deep Mirror Prooflike pieces. Many 1879-CC Morgans show partial prooflikeness, but few indeed offer sufficiently deep field-device contrast to qualify for this much more elusive appellation. Frosty snow-white surfaces yield rich contrast with profoundly reflective mirrors, providing the coveted black-on-silver appearance so admired in these coins. Population: 18 in 62 Deep Mirror Prooflike, 42 finer (9/09). (#97087)

- 913 1879-CC MS64 Deep Mirror Prooflike NGC. This is simply a marvelous presentation of this coveted CC-mint rarity. The 1879-CC is in demand in any circulated or Mint State grade, and with the Deep Prooflike certification from NGC, this piece stands far and away finer than most examples of the issue. The stark contrast noted between frosty devices and deeply mirrored fields occurs as a silver-on-black appearance, appearing at arm's length as a highly contrasting proof. Such an appearance puts this example in the distinct minority for the issue, as most Mint State survivors show somewhat shallow prooflikeness, if present at all. A few minor high-point ticks are in character with the near-Gem grade, but the overall quality and eye appeal are splendid. Census: 11 in 64 Deep Mirror Prooflike, 1 finer (9/09). (#97087)

- 914 1879-CC Capped Die AU58 PCGS. VAM-3. A Top 100 Variety. This near-Mint State Morgan displays somewhat subdued luster on its silver-gray surfaces that are mottled on the lower obverse. Typically struck and showing partial definition over the ear. Marks on Liberty's cheek and neck are concealed by the toning. (#7088)

---

Lustrous 1879-CC Capped Die Select Dollar

- 915 1879-CC Capped Die MS63 PCGS. VAM-3. A Top 100 Variety. This variety was caused by a medium-sized mintmark punched over the remnants of a smaller one. Peripheral golden-tan patina is deeper in hue on the obverse and the design elements are generally well struck on this lustrous specimen. Small marks on Liberty's cheek and neck limit the grade. (#7088)

1879-CC Capped Die Dollar, VAM-3, MS64

- 916 1879-CC Capped Die MS64 NGC. VAM-3. A Top 100 Variety. Die chipping is prominent around the repunched mintmark, which shows a medium-sized CC punched over a smaller version. Whispers of soft grayish-tan visit the lustrous surfaces of this near-Gem. The strike is typical, in that the obverse center is weak. Minute obverse handling marks preclude Gem status. NGC has seen only six coins finer and PCGS nine better (8/09). (#7088)

Gleaming 1879-O Morgan Dollar, MS65

- 917 1879-O MS65 NGC. An incredible Gem with bright gold toning on the obverse and full white-silver brilliance on the reverse. Both sides have wonderfully preserved surfaces with frosty luster. This is an extremely important opportunity to acquire a condition rarity that is seldom seen finer. NGC has only certified seven finer pieces (9/09). (#7090)

---

Highly Contrasted 1879-O Dollar  
MS64 Deep Mirror Prooflike

- 918 1879-O MS64 Deep Mirror Prooflike NGC. This near-Gem O-mint issue is available in lower grades but scarce in MS64 and higher grades, and far scarcer yet with Deep Mirror Prooflike surfaces. The present example is well struck for the issue, with beautiful surfaces that are brilliant throughout. Stark contrast appears between the frosty devices and profoundly mirrored fields. Census: 23 in 64 Deep Mirror Prooflike, 4 finer (9/09). (#97091)

- 919 1879-S MS67 ★ NGC. On the obverse, intense blue, magenta, and chartreuse shadings fade into muted sea-green as the eye sweeps from left to right. The reverse, by contrast, is nearly brilliant. Both sides have incredible luster and eye appeal to match. (#7092)

- 920 1879-S Reverse of 1878 MS64 Prooflike PCGS. A Top 100 Variety. The fields are decidedly reflective, and contrast with the frosty motifs. Those sufficiently ambitious to attribute the VAM should note that a die line pierces the right (facing) wing. Housed in a green label holder. Population: 8 in 64 Prooflike, 0 finer (9/09). (#7095)

- 921 1879-S Reverse of 1878 MS61 Deep Mirror Prooflike NGC. A Top 100 Variety. The boldly impressed devices on both sides offer rich frost that starkly contrasts with the essentially untoned, intensely reflective fields. Distributed minor abrasions on the obverse account for the grade. Census: 2 in 61 Deep Mirror Prooflike, 10 finer (9/09). (#97095)

- 922 1880 MS65 Prooflike NGC. A glimpse of champagne toning invigorates each side of this attractive Prooflike Gem. Decisively struck with lightly frosted devices. A small planchet flaw is noted to the left of the eagle's left (facing) wing. (#7097)

- 923 1880-CC MS65 PCGS. This Carson City Gem exhibits dynamic luster and impressively clean surfaces. The centers show minor blending of detail, but the strike is otherwise bold. Like most if not all '80-CC dollars, the present piece displays a dash beneath the second 8 in the date. (#7100)

- 924 1880-CC MS65 PCGS. Wafts of tan and medium-brown patina grace both sides of this lightly toned Gem. A few small abrasions do not affect the splendid cartwheel luster. Housed in an old green-label holder. (#7100)

- 925 1880-CC MS66 NGC. Brightly lustrous and minimally toned with frostiness over the devices. Excellent overall detail and eye appeal to match. NGC has graded just 13 numerically finer pieces (8/09). (#7100)

- 926 1880-CC MS66 PCGS. Sharply struck with fantastically frosty devices and gorgeous luster in the fields. Generally silver-white with a blush of rose toning above the portrait. PCGS has graded 24 finer examples (9/09). (#7100)

- 927 1880-CC 8 Over Low 7 MS66 NGC. VAM-6. A Top 100 Variety. The variety and overdate are undesignated on the NGC holder. Light chestnut-gold patina visits this lustrous and nicely struck Carson City dollar. Minor facial grazes are of little import. (#7104)

- 928 1880/79-CC Reverse of 1878 MS64 NGC. VAM-4. A Top 100 Variety. Bands of orange-red make occasional visits to the peripheries of this otherwise untoned near-Gem. The reverse is gorgeously free from contact, and the cheek has only the expected wispy facial marks. An obvious overdate for this popular Carson City variety. (#7108)
- 929 1880/79-CC Reverse of 1878 MS64 PCGS. CAC. VAM-4. A Top 100 Variety. This CC-mint silver dollar offers dazzling luster and faint chestnut toning. Crisply struck and attractive with a particularly smooth reverse. (#7108)
- 930 1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4. A Top 100 Variety. A sensational Gem with strong overdate features and a reverse from the old hub introduced in 1878 with a flat-breasted eagle and parallel arrow feathers. Although rather plentiful, PCGS has only certified 50 finer examples (9/09). (#7108)

#### Lovely 1880/79-CC Reverse of 1878 Dollar, MS65

- 931 1880/79-CC Reverse of 1878 MS65 NGC. VAM-4. A Top 100 Variety. While not specifically described as an overdate on the holder, the remains of the 9 within the 0 in the date are clear. This Gem sports effulgent luster with frosty centers and a gold-orange halo at the margins. Minimally abraded save for single marks at Liberty's cheek and below the eagle's right (facing) wing. (#7108)
- 932 1880-O MS64 NGC. Medium O. A fully toned New Orleans silver dollar with rich jade-green, golden-brown, and rose-pink patina. The fields are well preserved, and the cheek has only inconspicuous abrasions. Certified in a former generation holder. (#7114)
- 933 1880-O MS64 PCGS. Micro O. Sky-blue, yellow-gold, and purple toning is more prevalent and deeper at the obverse border of this attractive and well struck near-Gem. Minute marks deny Gem status. Difficult to acquire any finer. (#7114)
- 934 1880-O MS64 PCGS. Medium O. Boldly struck with light canary-yellow peripheral color in narrow bands on both sides. Pleasing silver-white luster dominates the centers. PCGS has graded just 22 coins finer (9/09). (#7114)
- 935 1880-O MS64 NGC. Micro O. The highly reflective fields appear prooflike and show significant contrast against the frosty devices, although NGC did not give piece a Prooflike designation. A well preserved and brilliant specimen. NGC has certified only 21 pieces finer (8/09). (#7114)
- 936 1880-O MS64 PCGS. Micro O. Strongly struck with bright silver-white luster overall and occasional hints of hazy gray toning. Minimally abraded for the grade and attractive. (#7114)

#### Borderline Deep Mirror 1880-O Morgan Dollar, MS65 Prooflike

- 937 1880-O MS65 Prooflike NGC. Micro O. This is the finest certified by NGC, and PCGS has certified one at this grade level and one finer MS65 DMPL. Unlike so many other Morgans, most of the 1880-O dollars coined were actually released into circulation. A few were represented in the Treasury hoard released in the early 1960s, and a few other small quantities were released in earlier years, but those that have come into the marketplace have quickly been absorbed. Today, Choice or Gem 1880-O Morgan dollars are virtually nonexistent. This example is a brilliant silver-white dollar with fully mirrored fields and frosty devices. Although there is a noticeable difference between Prooflike and Deep Mirror Prooflike examples, this one seems to be on the border. Census: 1 in 65 Prooflike, 0 finer (9/09). (#7115)
- 938 1880-S MS63 ★ NGC. Medium S. The eye-catching patina on the obverse of this Select coin is key to its outstanding eye appeal. Magenta, mint, and green-gold shadings meld into one another. (#7118)
- 939 1880-S MS67 PCGS. CAC. Large S. Beautiful arcs of yellow-gold, ruby-red, sky-blue, and apple-green congregate across the left obverse border of this lustrous Superb Gem. The reverse is untoned save for a generous peripheral band of golden-brown. Splendidly preserved and well struck. (#7118)
- 940 1880-S MS67 Prooflike PCGS. Large S. Faint silver-gray toning graces much of the reflective mirrors on this Superb Gem. Exquisitely frosted devices complete its eye appeal. PCGS has graded only 19 finer Prooflike pieces (9/09). (#7119)

- 941** 1881 MS66 PCGS. Although the 1881-S is common in MS66, its Philadelphia counterpart is far scarcer at that level. The 1881 is regularly encountered in Mint State, but usually as MS63 or MS64. The present lightly toned and impressive Premium Gem is nicely struck and exhibits only a few delicate luster grazes. Population: 63 in 66, 2 finer (9/09). (#7124)
- 942** 1881-CC MS65 NGC. Golden-tan, plum, and blue toning covers most of this Gem, with the last two colors found primarily at the margins. Attractively lustrous with frost on the devices that persists through the patina. (#7126)
- 943** 1881-CC MS66 NGC. This flashy Premium Gem has exemplary fields and dynamic cartwheel luster. The centers display only inconsequential incompleteness, and the cheek shows merely unobtrusive grazes. (#7126)
- 944** 1881-CC MS66 PCGS. CAC. VAM-2 with prominent recutting within the 8s in the date. Delicate tan toning graces this lustrous, assertively struck, and nearly immaculate Premium Gem. This low mintage Carson City issue is affordable in Mint State due to the GSA auctions of the 1970s. (#7126)
- 945** 1881-CC MS66 PCGS. Crisply defined with light frost twinkling across the devices. This shining Premium Gem has effortless eye appeal. Housed in a green label holder. (#7126)

#### Highly Attractive 1881-CC Dollar, MS67

- 946** 1881-CC MS67 PCGS. The 1881-CC, despite its low mintage of 296,000 pieces, is easy to find in Mint State due to the dispersal of former Treasury holdings. Highly attractive satiny luster invigorates the minimally abraded silver-gray surfaces of this Superb Gem. Boldly struck design features enhance the overall eye appeal. (#7126)
- 947** 1881-CC MS65 Prooflike PCGS. Moderately reflective in the fields but with heightened contrast, thanks to the incredible frost on the devices. A minimally toned and gorgeous Prooflike Gem. (#7127)
- 948** 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC. This near-Gem displays stunning field-motif contrast and is essentially untoned. A decisive strike imparts sharp detail to the design features, and just a few minor grazes preclude Gem status. (#9127)
- 949** 1881-O MS65 PCGS. Whispers of peripheral gold show on both sides, slightly more extensive and deeper on the obverse. Lustrous surfaces exhibit sharply struck motifs and are minimally abraded. PCGS has graded just 12 finer pieces (9/09). (#7128)
- 950** 1881-O MS65 NGC. Glimpses of gold and rose visit the centers of this O-mint Gem. Pleasingly detailed for the issue with only trifling softness at the high points. NGC has graded nine numerically finer pieces (9/09). (#7128)
- 951** 1881-O MS65 PCGS. Gorgeous frost consumes the solidly struck devices, while the faintly toned fields shine with mildly reflective luster. A carefully preserved Gem with immense eye appeal. PCGS has graded just 12 finer pieces (9/09). (#7128)
- 952** 1881-S MS67 ★ NGC. CAC. This gorgeously toned Superb Gem's obverse has zones of blue, magenta, yellow, peach, and green-gold around a sliver of brilliance found right-of-center. The reverse has an echo of yellow-green color at parts of the margins. (#7130)
- 953** 1881-S MS67 NGC. The obverse has overt dappled orange and blue-green patina, while the reverse has a more subtle version of the former color against surfaces that are otherwise silver-white. A bold Superb Gem. (#7130)
- 954** 1881-S MS68 NGC. The borders exhibit sun-gold, navy-blue, and plum-red tints, while the fields and devices are nearly untoned. Lustrous and sharply defined with exemplary preservation. The 1881-S is notoriously available in typical Mint State, but MS68 examples are undeniably scarce. (#7130)
- 955** 1882-CC MS66 PCGS. Profound cartwheel luster with an added reflective element on the minimally toned reverse. Subtly frosted on the central devices and carefully preserved. Certified in a green label holder. PCGS has graded 50 finer examples (9/09). (#7134)
- 956** 1882-CC MS66 Prooflike PCGS. Flashy fields and a pleasing strike only begin to proclaim the charms of this brilliant Carson City silver dollar. The sweet spot of the cheek is immaculate, and only a solitary obverse graze near 3:30 is remotely worthy of comment. (#7135)
- 957** 1882-O MS65 PCGS. Both sides of this well-defined Gem are remarkably lustrous. While the reverse is brilliant, the obverse sports a gorgeous blend of gold, peach, violet-rose, blue, and sea-green shadings. PCGS has certified just 19 finer examples (9/09). (#7136)

#### Rare 1882-O/S VAM-4 Dollar, MS64, Late Die State

- 958** 1882-O/S MS64 Strong PCGS. VAM-4. Later die state of VAM-4, what Fey and Oxman in the Top 100 reference call "1882-O/S Recessed." The diagonal crossbar of the S completely traverses the interior of the O, but it is lower than on the VAM-3 or "O/S Flush." In this later die state, the top and bottom edges of the S are clear, as well as the middle area of the S. This piece has beautiful silvery surfaces accented by golden rim toning, with a few light abrasions that account for the grade. A definite find for the VAM collectors. (#7138)

### Important 1882-O/S Dollar, MS65

959 1882-O/S MS65 NGC. VAM-4. A Top 100 Variety. A frosty white coin which boasts strong luster, a good strike and excellent eye appeal. Note the quality of Liberty's cheek and neck, for rarely are these large open areas so free of contact marks or nicks. A loupe will note a scattering of tiny raised dots or "pimples" on Liberty's portrait (forehead, eye, cheek, and neck) and on the eagle, caused by the dies rusting slightly. The overmintmark feature is clear with a strong recessed diagonal crossbar of the S quite plain within the O. This coin is identifiable by a small scrape hidden in the wreath above the NE of ONE and a minor reeding mark just above the back of the eagle's head. One of the finest to survive and very difficult to find in full Gem condition. In fact, the combined NGC and PCGS population reports tally a total of 13 coins this high, with no pieces seen finer by either service (9/09). For the Morgan silver dollar specialist, this is a very important coin to obtain. (#7138)

### Superlative 1882-S Morgan, MS68

960 1882-S MS68 NGC. A shimmering Superb Gem, this amazing 1882-S Morgan dollar has a bold strike and brilliant, untoned silver surfaces. There are a number of different adjectives that fail to do justice to this coin. It is virtually flawless in every aspect. Census: 73 in 68, 0 finer (9/09). (#7140)

### Splendid 1882-S Dollar, MS66 Deep Mirror Prooflike

961 1882-S MS66 Deep Mirror Prooflike NGC. The 1882-S is one of the more plentiful early Morgan dollars in Mint State. Even Prooflike examples are not that difficult to locate, but Deep Mirror Prooflikes in the lofty grade of MS66 are elusive. The deep mirrors of this Premium Gem yield strong variance with the satiny well struck devices. Both sides are nearly color-free except for barely discernible light gold at the margins. A few light grazes may well preclude an even finer grade. Census: 9 in 66 Deep Mirror Prooflike, 0 finer (9/09). (#7141)

### Spectacularly Toned 1883-CC Dollar, MS67

962 1883-CC MS67 PCGS. CAC. With a modest mintage of 1.2 million pieces, the 1883-CC was well represented in the GSA sales and is available in most Mint State grades today. The issue is scarce at the Superb Gem level, and only three coins have been certified in higher grades by NGC and PCGS combined (9/09). The present example is sharply struck and features spectacular tones of reddish-gold and blue-green on both sides, with excellent visual appeal overall. (#7144)

- 963** 1883-CC MS65 Deep Mirror Prooflike PCGS. Lightly frosted, well struck central devices supply contrast with the profoundly reflective fields. Occasional hints of gold and white add color to otherwise essentially untoned surfaces. This Gem is housed in a second-generation holder. (#97145)
- 964** 1883-CC MS65 Deep Mirror Prooflike PCGS. Flashy and fantastic mirrors dominate the eye appeal of this lovely Gem. Hints of golden patina grace the fields, and the silver-white devices have a whisper of elegant frost. (#97145)
- 965** 1883-O MS66 PCGS. CAC. Bands of powder-blue, rose-red, olive-gold, and golden-brown endow the obverse. The reverse is close to brilliant but has a blush of sun-gold near 7 o'clock. The centers are incompletely brought up, as usual for the '83-O, but the eye appeal is exceptional. (#7146)
- 966** 1883-S MS63 PCGS. Wisps of gold and slate adorn this lustrous and sharply struck silver dollar. The fields are surprisingly unabraded. A conditionally scarce issue, particularly when compared with its 1878-S to 1882-S predecessors. (#7148)

#### Scarce 1883-S Morgan, MS64

- 967** 1883-S MS64 PCGS. The first scarce San Francisco Mint Morgan dollar, the 1883-S follows the plentiful 1878-S through 1882-S dollars. This piece has a strong mintage of 6.25 million coins; however, nearly all entered circulation and few have been preserved in Mint State grades. Both sides have satiny silver luster, sharp details, and untoned surfaces. PCGS has only certified 18 finer examples (9/09). (#7148)
- 968** 1884-CC MS66 NGC. CAC. Fantastically lustrous with only occasional hints of peach-gold toning on each side. Boldly struck with whispers of frost on the highest design elements. Great eye appeal for this Carson City issue. (#7152)
- 969** 1884-CC MS66 PCGS. A broadly appealing Carson City dollar, delicately gold-toned at the margins and exquisitely preserved. Impressively defined with faint silver-gray toning over the centers. Housed in a green label holder. (#7152)

#### Lustrous 1884-CC Dollar, MS67

- 970** 1884-CC MS67 NGC. Several Treasury releases have resulted in a plethora of Mint State 1884-CC Morgan dollars, as evident from the thousands of NGC/PCGS certified coins. Only at the Superb Gem level does this issue offer a challenge to collectors. Just a trace or two of nearly imperceptible gold-tan color is evident on the lustrous surfaces of this MS67 example. Sharply struck and minimally marked. Census: 91 in 67, 0 finer (9/09). (#7152)

- 971** 1884-CC MS65 Deep Mirror Prooflike NGC. A stunning Gem with deeply mirrored fields around lustrous devices. The obverse has a large area of steel and iridescent toning at the upper left, while the balance of the obverse and all of the reverse are brilliant white with faint peripheral gold. (#97153)

- 972** 1884-CC MS65 Deep Mirror Prooflike PCGS. An incredible Deep Mirror Prooflike dollar, this Carson City issue is entirely brilliant and untoned. The design definition is bold, and the fields are intensely mirrored. Strong cameo contrast is evident on each side. (#97153)

- 973** 1884-CC MS66 Deep Mirror Prooflike PCGS. Maroon, golden-tan, and blue patina gravitates to the margins and is somewhat more extensive and deeper on the obverse. Impressively struck devices stand out against the mirrored fields on this well cared for Morgan. Light roller marks are visible on the obverse. (#97153)

- 974** 1884-S AU58 NGC. The hair above the ear and the eagle's breast have a mere whisper of friction, but the cartwheel luster is nonetheless dazzling. This well struck and nearly brilliant slider displays a few moderate obverse marks. (#7156)

- 975** 1884-S AU58 NGC. CAC. A highly lustrous and nearly Mint State example of this conditionally rare date. Most survivors are well circulated as the vast majority of those struck actually served their purpose in commerce. (#7156)

#### Remarkable Mint State 1884-S Dollar

- 976** 1884-S MS60 NGC. Though it is not a condition rarity in Mint State to the same extent as, say, the 1901, the 1884-S Morgan dollar is nonetheless elusive with no trace of wear. Though numerous light marks and wispy abrasions affect each side of the present coin, the faintly gray-toned silver-white surfaces retain full luster. (#7156)

## Brilliant MS62 1884-S Silver Dollar

**977 1884-S MS62 PCGS. CAC.** The 1884-S Morgan dollar is the first S-mint issue in the series that is elusive in any Mint State grade. The 1878-S through 1882-S dollars are plentiful in all grades, and many tens of thousands exist in Mint State. The 1883-S is somewhat elusive in Mint State, but even for that issue Bowers estimates that a few thousand exist in Mint State from MS63 and upward.

But the 1884-S is an "abnormal" issue, in that most of the 3.2 million coins produced apparently entered circulation. Bowers estimates that only a few hundred Mint State 1884-S dollars exist in MS63 and finer, including certified and raw coins. Only three PCGS-certified pieces are in the "Gem or finer" category.

The present coin, graded MS62, is one of 86 so certified at PCGS, with 53 finer (9/09). The surfaces on both sides are brilliant silver-white, with copious cartwheel luster despite the numerous ticks on the devices and in the fields that prevent a higher grade. Minor strike weakness appears on the high points of both sides, but plenty of appeal remains for the many series aficionados who prefer their coins brilliant. (#7156)

**978 1885 MS65 Deep Mirror Prooflike PCGS. CAC.** An absolutely stunning visual presentation combines peripheral gold and iridescent toning with brilliant centers. The fields are deeply reflective around satiny devices. PCGS has only certified 71 finer Deep Mirror Prooflike pieces (9/09). (#97159)

**979 1885-CC MS65 PCGS.** Splashes of orange and powder-blue ensure the appeal of this lustrous and low mintage Carson City Gem. The reverse is exceptionally preserved. (#7160)

- 980 1885-CC MS65 PCGS.** Outstanding cartwheel luster radiates from the virtually untoned surfaces of this carefully preserved Gem. The strike is nearly full, and the eye appeal is excellent. Housed in a first-generation PCGS holder. (#7160)
- 981 1885-CC MS66 PCGS.** Elegant golden overtones give this immensely lustrous Premium Gem an inviting aura. Crisply struck with subtly frosted devices and stunning eye appeal. (#7160)
- 982 1885-CC MS66 NGC.** Excellent definition with frostiness on the devices and considerable cartwheel luster. Color is pale silver-gray with a hint of cream. NGC has graded just 63 numerically finer pieces (8/09). (#7160)
- 983 1885-CC MS66 PCGS.** Excellent eye appeal for this popular and low-mintage Carson City dollar. Light champagne and silver-gray elements converge on each side of this Premium Gem. (#7160)
- 984 1885-CC MS64 Deep Mirror Prooflike PCGS.** This flashy near-Gem is both profoundly reflective and stunningly contrasted; the silver-white of the fields is mirrored, with the silver-white of the devices is frosty. Incredibly appealing. (#7161)
- 985 1885-CC MS64 Deep Mirror Prooflike NGC.** Sharply struck with flashy fields that show gold-orange and blue peripheral toning, more prominent on the reverse. Central devices are sharp and frosted. (#7161)
- 986 1885-CC MS65 Deep Mirror Prooflike NGC.** Noteworthy white-on-black contrast is evident on both sides, although it may be a bit stronger on the obverse. Well struck and carefully preserved, this deeply mirrored Gem originated from a surprisingly low mintage of just 228,000 pieces. Thankfully for collectors, a large percentage of the original production was stored in mint bags before being dispersed between 1930 and 1980. Census: 75 in 65 Deep Prooflike, 19 finer (9/09). (#97161)
- 987 1885-S MS65 PCGS.** Splashes of pale cloud-gray toning visit otherwise bright silver-white fields. This Gem has lovely frost on the devices, though the strike shows minor incompleteness. (#7164)
- 988 1886-O MS62 PCGS.** Eye-catching cartwheel luster radiates from the brilliant surfaces. A number of light abrasions are seen on the obverse, but the reverse is remarkably clean for the grade. A crisply struck and appealing example of this conditionally scarce issue. (#7168)
- Splendid MS63 1886-O Morgan Dollar**
- 
- 989 1886-O MS63 PCGS.** The 1886-O Morgan dollar is a well-known conditional rarity in the series, with certified populations that fall off steeply in the higher Mint State grades. This piece boasts splendid silver-white surfaces with a number of light abrasions that characterize the MS63 grade, and a fairly typical O-mint strike showing weakness on the hair over Liberty's ear. There is much eye appeal present, and this coin presents a pleasing alternative for a midgrade Mint State set. PCGS has certified only three Gems of this issue (9/09). (#7168)

### Frosty 1886-O MS64 Dollar

- 990 1886-O MS64 PCGS. Both sides of this near-Gem are thickly frosted with a silver-gray sheen that is virtually devoid of toning, and a well executed strike delivers above-average definition to the design features. NGC and PCGS combined report a mere four coins above the MS64 grade level (9/09), a fact that further enhances the importance of the present offering. (#7168)
- 991 1886-S/S MS65 PCGS. VAM-2. A Top 100 Variety. The mintmark shows repunching near the serifs, easily seen on this attractive Mint State example. The surfaces are brilliant and highly lustrous with excellent preservation and only minor incompleteness of strike above the ear. (#7170)

### Untoned 1886-S/S Morgan, MS65

- 992 1886-S/S MS65 NGC. VAM-2. A Top 100 Variety. The mintmark is sharply doubled on this 1886-S Morgan dollar. Both sides have brilliant and untoned silver surfaces with frosty mint luster. There are few marks or abrasions on either side. The strike is well above average, and the overall aesthetic appeal is exceptional. (#7170)
- 993 1887 MS67 PCGS. CAC. A gorgeous and minimally toned Superb Gem, housed in a green label holder. Pleasingly struck with excellent preservation, as demanded of the grade. Population: 61 in 67, 1 finer (9/09). (#7172)
- 994 1887 MS67 NGC. A brightly lustrous Superb Gem, faintly toned-over in pale silver-gray with occasional gold and pink elements. Well struck and beautifully preserved, as demanded of the grade. NGC has graded only two numerically finer examples (9/09). (#7172)
- 995 1887 MS65 Deep Mirror Prooflike PCGS. Housed in a green label PCGS holder, this magnificent Gem has deeply mirrored fields around satiny and sharply detailed devices. PCGS has only certified 30 finer Deep Mirror Prooflike examples (9/09). (#97173)
- 996 1887/6 MS64 PCGS. CAC. VAM-2. A Top 100 Variety. The obverse is brilliant, but the reverse has butter-gold and steel-gray hues throughout the lower periphery. Lustrous and crisply struck with a clean cheek and a few small marks above the eagle's head. Housed in an old green label holder. (#7174)

### Condition Scarcity 1887/6 Gem Prooflike Dollar

- 997 1887/6 MS65 Prooflike NGC. VAM-2. A Top 100 Variety (indicated on insert). The curve of the base of the underdigit 6 is evident on each side of the base of the 7. This variety was generally unknown to collectors until 1971 (David Bowers, 2006). The untoned obverse cedes to light gold on the reverse. Light grazes are visible on the obverse, and Liberty's neck reveals some light planchet flaking. Census: 22 in 65 Prooflike, 1 finer (9/09). (#7175)
- 998 1887-S MS65 PCGS. CAC. Wafts of golden and steel-blue toning accent the mostly silver-gray surfaces of this impeccably preserved specimen. A few pin-sized abrasions do not affect the stunning cartwheel luster. It would be difficult to locate a nicer example of this issue. NGC and PCGS combined have certified just 27 examples finer (8/09). Encapsulated in a green-label PCGS holder. (#7180)
- 999 1887-S MS65 PCGS. Eye-catching cartwheel luster enhances the lightly abraded surfaces of this appealing Gem. Moderate cameo contrast is seen on the reverse, which exhibits the occasional touch of deeper gray patination. PCGS has certified only 19 examples finer (8/09). (#7180)

### Deep Mirror Prooflike Superb Gem 1888 Morgan Dollar, Ex: Binion

- 1000 1888 MS67 Deep Mirror Prooflike NGC. Ex: Binion Collection. This razor-sharp Superb Gem has flashy fields and only a hint of golden patina. Exceptionally devoid of marks, especially on the all-important cheek. The Binion pedigree is interesting. Gangster Benny Binion opened the Horseshoe Casino in Las Vegas in 1951, and it was inherited by his son, Ted Binion, who was murdered by the man he hired to build an underground vault for his silver dollar hoard. The 1888 is plentiful in Uncirculated condition, but is extremely rare at the MS67 level with deeply mirrored fields. In fact, NGC and PCGS combined have graded only three such pieces with none finer (9/09). (#97183)
- 1001 1888-O Doubled Die Obverse AU53 PCGS. VAM-4. A Top 100 Variety. The highly regarded "Hot Lips" variety, identified by obvious die doubling on Liberty's profile. A cream-gray example with substantial luster and moderate wear at the centers. (#7308)
- 1002 1888-S MS64 Prooflike PCGS. CAC. Well-defined for the issue with distinct reflectivity and strong cartwheel luster sharing the fields. Two thin "bars" of light gray toning extend from Liberty's chin into the field. (#7187)

**1003** 1889-CC VF20 PCGS. Dove-gray overall with glimpses of golden-brown, olive, and ice-blue. The reverse has slightly deeper toning. The wings retain substantial feather definition. The obverse field has faint hairlines, usual for circulated examples of this key Carson City issue. (#7190)

**1004** 1889-CC VF25 PCGS. CAC. Peripheral aqua-blue and purple toning frames the light gray centers of this key-date Morgan. The design elements exhibit relatively sharp detail, and both sides are devoid of significant contacts. A great piece for a midgrade collection. (#7190)

**1005** 1889-CC VF30 ANACS. Deep golden-brown and violet shadings drape each side of this midrange 1889-CC dollar. It has minimally abraded fields and a portrait that shows only a few small digs. Housed in a small-format ANACS holder. (#7190)

**1006** 1889-CC XF40 NGC. The surfaces are light silver-gray with hints of peripheral mauve and steel toning along the obverse border. Considerable luster is still visible on each side of this lightly worn piece. A splendid example of the key 1889-CC Morgan dollar. (#7190)

#### Appealing AU 1889-CC Dollar

**1007** 1889-CC AU50 ICG. Green-gold and pearl-gray shadings mingle on each side of this piece, an attractive, lightly circulated representative of a challenging Carson City date. Wear is mostly at the high points, leaving the faintly abraded fields surprisingly lustrous. Strong eye appeal for this little-saved issue of just 350,000 pieces. (#7190)

#### Well Defined 1889-CC Dollar, AU50

**1008** 1889-CC AU50 PCGS. This key-date Morgan retains traces of luster in its recessed areas and displays occasional whispers of reddish-purple and gold. The design elements are well defined, including a fair amount of detail in the hair over Liberty's ear. Some scattered obverse marks do not detract. (#7190)

#### Notable 1889-CC Morgan Dollar, MS62

**1009** 1889-CC MS62 PCGS. An outstanding example of the ultimate Carson City Morgan dollar issue. This lovely piece exhibits subtle gold and lilac toning on the obverse, with fully brilliant silver luster on the reverse. Mint State examples, including two in the present sale, appear on the market from time to time, but they are among the most elusive issues of the series. Dave Bowers estimates that between 6,000 and 8,000 survive, although we believe that is optimistic. Perhaps 2,000 to 3,000 actually exist, mostly hovering around the MS60 grade level. (#7190)

---

**Brilliant 1889-CC Morgan, MS63**

**1010 1889-CC MS63 PCGS. CAC.** The current sale provides collectors with a choice of several 1889-CC Morgan dollars ranging from VF20 to MS63. In addition to its rank as the highest grade piece in this sale, the present specimen is an exceptional example for the grade. Both sides have satiny silver luster with traces of a prooflike appearance. There is no evidence of toning on either side, and the design elements exhibit bold definition. For the collector seeking a high quality piece for the grade, we recommend this MS63 specimen. Population: 71 in 63, 31 finer (9/09). (#7190)

**Splendid Gem 1889-O Silver Dollar**

**1011 1889-O MS65 PCGS.** Although the 1889-O Morgans were struck in enormous quantities—11.9 million coins—most of them were apparently released into 19th century circulation. Gems are elusive, and anything finer is seldom seen. This piece offers splendidly lustrous silver-white surfaces with tremendous flash and eye appeal. The central strike softness on both sides is nearly universal for the issue. PCGS has certified only nine coins finer (9/09). (#7192)

---

**Striking 1889-O Morgan Dollar  
MS65 Deep Mirror Prooflike**

**1012 1889-O MS65 Deep Mirror Prooflike NGC.** The 1889-O enormous issue of nearly 12 million coins produced a generous supply of Prooflike coins, but Deep Mirror Prooflikes are another story altogether. This splendid piece displays deep black-on-white contrast between the fields and devices, over surfaces that are largely untoned in the centers while the rims show glints of amber-gold and aqua. This example is one of only three Gem Deep Mirror Prooflikes at NGC, and there are none finer (9/09). PCGS has certified a single MS66 Deep Mirror Prooflike coin. (#97193)

**1013 1889-S MS65 PCGS.** This delightful Gem 1889-S Morgan exhibits fully brilliant and untoned silver surfaces with bold design definition. Both sides are satiny and highly lustrous. Only a few finer examples have been certified, including 61 at PCGS (9/09). (#7194)

**1014 1889-S MS65 PCGS.** A bold strike and frosty luster characterize this Gem 1889-S Morgan dollar, an important issue in the series. Both sides are untoned with brilliant surfaces. PCGS has certified a mere 61 finer pieces (9/09). (#7194)

**1015 1890 MS64 Deep Mirror Prooflike ANACS.** Lovely reddish-gold patina encircles the brilliant centers of this well preserved near-Gem. There are just a few minuscule abrasions on Liberty's cheek. Impressive cameo contrast is established between the deeply mirrored fields and frosty devices. Scarce any finer. (#97197)

---

**Select 1890-CC Tail Bar Dollar, VAM-4**

**1016 1890-CC Tail Bar MS63 NGC. VAM-4.** A Top 100 Variety. A wide die gouge, or "bar," extends from the wreath to the juncture of the eagle's tailfeathers and the fletchings on the arrows. This attractively lustrous Select representative is minimally toned with only a hint of gold near the rims. Light abrasions on the portrait contribute to the grade. (#87198)

---

Rare 1890-CC Tail Bar Dollar  
MS63 Deep Mirror Prooflike

- 1017 1890-CC Tail Bar MS63 Deep Mirror Prooflike NGC. VAM-4. A Top 100 Variety. Highly desirable with its deeply mirrored fields and light cameo contrast. The devices show a trace of frosty luster, and both sides have entirely untoned or brilliant silver surfaces. NGC and PCGS combined have only certified 19 of these as Deep Mirror Prooflike at all grade levels. Census: 2 in 63 Deep Mirror Prooflike, 2 finer (9/09). (#987199)
- 1018 1890-CC MS64 PCGS. Shimmering cartwheel luster enhances the surfaces of this brilliant specimen. A few light abrasions preclude a Gem grade. The 1890-CC is one of the more elusive Carson City Morgan dollars in high grades. (#7198)
- 1019 1890-CC MS64 ANACS. Magnificent cartwheel luster complements the powerfully impressed design elements. A few wispy grazes do not distract. Traces of violet, teal, and russet toning in the periphery enhance the eye appeal. (#7198)
- 1020 1890-O MS65 PCGS. CAC. VAM-10. A Hot 50 Variety. The "Comet" variety, with the die breaks to the right of the date ill-defined but visible. Lustrous with minimal patina and excellent preservation for the variety. (#7200)
- 

Dazzling Gem 1891 Morgan Dollar

- 1021 1891 MS65 PCGS. A lustrous Gem that has merely a hint of golden toning on each side. A good strike with only minor softness on the claws and centers. A few minor grazes determine the grade. Despite a prodigious mintage, the 1891 is surprisingly elusive in full Gem. Population: 95 in 65, 3 finer (9/09). (#7204)
- 

---

Satinly Gem 1891 Silver Dollar

- 1022 1891 MS65 NGC. Many thousands of 1891 Morgan dollars exist in the lower realms of Mint State, whether due to bagmarks, flat luster, or a poor strike—but Gems are another matter entirely. This specimen boasts memorable silver-white surfaces with thick satin luster. The surfaces are barely abraded, and the strike and overall surface quality are far and away finer than usual for the issue. Census: 69 in 65, 2 finer (9/09). (#7204)
- 1023 1891-CC MS64 PCGS. A vibrant near-Gem with fresh silver-white luster and ample frostiness across the eagle on the reverse. Crisply detailed and gorgeous. (#7206)
- 1024 1891-CC MS64 PCGS. CAC. Brilliant and lustrous with a good strike, smooth fields, and unimportant facial grazes. The 1891-CC is the most available of the CC-mint silver dollars struck after the 1889 re-opening of the facility, but it is considerably scarcer than the 1882-CC, 1883-CC, and 1884-CC issues. (#7206)
- 1025 1891-CC MS64 PCGS. CAC. Most collectors would consider this lustrous Carson City Morgan to be fully brilliant, but accuracy compels us to mention a hint of tan toning on each side. Clean-cheeked and nicely struck with excellent eye appeal. (#7206)
- 1026 1891-CC MS64 NGC. A hint of golden toning accents the rims of this nearly brilliant piece. Dazzling cartwheel luster is not affected by a few light abrasions. A boldly struck and attractive representative. (#7206)
- 1027 1891-CC MS64 NGC. Deep blue and tan peripheral tints add color to the otherwise pale silver-gray luster of this near-Gem. Carefully preserved save for a few tiny reed marks on the cheek. (#7206)
- 

Stunning 1891-O Dollar, MS64 Prooflike

- 1028 1891-O MS64 Prooflike NGC. This is a challenging date in all Mint State grades, but it is rare with prooflike surfaces. Neither NGC nor PCGS has certified a Prooflike example finer than the present coin (8/09). This brilliant and sharply struck specimen is certain to please even the most discerning eye. (#7209)
-

- 1029** 1891-S MS64 Deep Mirror Prooflike PCGS. Ex: DCT Collection. This sharply struck S-mint reveals a cameo-like effect. The devices are well struck, and the virtually untoned surfaces reveal a few minor ticks that account for the grade. Population: 28 in 64 Deep Mirror Prooflike, 4 finer (9/09). (#7211)

#### Exceptional 1892 Morgan Dollar, MS65

- 1030** 1892 MS65 NGC. Shimmering satiny luster enhances the untoned surfaces of this carefully preserved Gem. A loupe locates only a couple of minuscule handling marks. The first few stars on the obverse are weakly struck, but other design elements are boldly impressed. It would be virtually impossible to locate a nicer example. NGC and PCGS combined report just three pieces finer (8/09). (#7212)

#### High-End 1892 Morgan Dollar MS64 Deep Mirror Prooflike

- 1031** 1892 MS64 Deep Mirror Prooflike PCGS. This is not only a near-Gem of this elusive issue, but with Deep Mirror Prooflike surfaces the present coin is immeasurably rarer. Bowers wrote of the 1892, "Really choice MS-64 and gem MS-65 or finer coins are very hard to find. ... Semi-prooflike coins are seen on occasion, but gems are very elusive and sharply struck DMPLs are rarer yet." This piece is devoid of color, which should please the many legions of Morgan aficionados who prefer untoned coins, especially for Deep Mirror Prooflike status. The strike and field-device contrast are equally sharp, and this coin appears remarkably high-end for the grade. Population: 25 in 64 Deep Mirror Prooflike, 5 finer (9/09). (#7213)

- 1032** 1892-CC MS63 PCGS. An arc of vibrant red-orange and violet patina accents the lower border of the obverse, and a small toning spot is seen below Liberty's ear. The rest of the surfaces are essentially untoned. Pleasing cartwheel luster is unaffected by a few wispy abrasions. (#7214)

- 1033** 1892-CC MS63 PCGS. Both sides of this lovely dollar display brilliant and frosty silver luster with no trace of toning. The surfaces are lightly abraded as expected for the grade, but the mint flash increases its aesthetic desirability. (#7214)

- 1034** 1892-CC MS63 PCGS. CAC. Housed in a green label holder, this 1892-CC Morgan has outstanding mint bloom with exceptional surfaces for the grade. In fact many of today's MS64 dollars are no finer, in our opinion. The surfaces exhibit satiny luster in the fields, nearly prooflike in appearance, with frosty devices that create a hint of cameo contrast. A set of MS63 Morgan dollars that match this coin would be a nearly impossible task. (#7214)

- 1035** 1892-CC MS64 PCGS. CAC. Frosty devices and reflective fields dominate the obverse, near-brilliant with just a touch of peripheral green-gold toning. The reverse shows that color as well as sea-green and violet, among others. Two lines of ocean-blue form an 'X' centered on the eagle's left (facing) wing. (#7214)

- 1036** 1892-CC MS64 PCGS. This highly lustrous and untoned CC-mint representative exhibits a well executed strike. Color-free surfaces reveal a few grade-defining marks. (#7214)

- 1037** 1892-CC MS64 PCGS. A blazing near-Gem, with fully brilliant white-silver surfaces and frosty luster. The strike is exceptional and the surfaces exhibit trivial marks that are of no consequence. (#7214)

- 1038** 1892-CC MS64 PCGS. A delightful near-Gem, this 1892-CC Morgan dollar is fully brilliant with bright silver surfaces and frosty luster. It has a strong strike and the eye appeal of a full Gem. (#7214)

- 1039** 1892-CC MS64 PCGS. A well-defined near-Gem with amply frosted central devices and bold cartwheel luster. Minimally toned with just a few too many scattered marks to qualify for a finer designation. (#7214)

#### White Gem 1892-CC Dollar

- 1040** 1892-CC MS65 NGC. VAM-8A, R.5 with very faint n clashmark from the left edge of Liberty's neck. This well impressed Gem is stone-white with sweeping luster and a smooth cheek. The reverse is also beautifully unabraded. Unavailable in GSA holders, the 1892-CC is among the scarcer CC-mint issues. (#7214)

- 1041** 1892-CC MS62 Prooflike NGC. Although both sides of this brilliant, untoned dollar show light abrasions, especially in the fields, this dollar is remarkable for its grade and designation. Both sides have full mirrors with lustrous devices. (#7215)

### Radiant Gem 1892-O Morgan Dollar

**1042** 1892-O MS65 PCGS. The 1892-O is a Morgan dollar issue that is relatively commonplace in MS62 through MS64, but Gems are seldom available—a level at which the combined NGC and PCGS certified populations decreases by an order of magnitude. This is a radiant silver-white example with copious luster and a paucity of relevant marks that puts it into the Gem category. The excellent strike is another plus. PCGS has graded only five coins finer in its more than two decades of existence (9/09). (#7216)

**1043** 1892-S AU50 PCGS. The 1892-S is among the rarest issues in the series in Mint State, and AU examples are also desirable. This essentially untoned Morgan dollar lacks distracting marks and has luminous luster within the legends and wings. (#7218)

### Flashy Choice AU 1892-S Morgan Dollar

**1044** 1892-S AU55 NGC. The price disparity between this issue in AU and Mint State is so wide by many times over that many collectors choose a nice AU to fill that vacant spot in an otherwise Mint State assemblage. This Choice AU example sports a thin sliver of gold at the rims over surfaces that are otherwise untoned, with a flashy overall look and lots of eye appeal. (#7218)

**1045** 1893 MS63 PCGS. CAC. This low mintage Philly dollar is awash in luster and has only a whisper of gold toning. The fields are well preserved. The reverse is lightly die doubled, visible on the bases of UNITED and the edges of nearby leaves. (#7220)

**1046** 1893 MS63 PCGS. A boldly struck example, this Select Mint State piece has brilliant and frosty luster with excellent eye appeal. The cheek has a few marks, typical of the grade. Overall, a wonderful piece at this grade level. (#7220)

**1047** 1893 MS64 PCGS. A fully brilliant and sharply struck near-Gem, this 1893 Morgan has above average design definition, and excellent eye appeal. The surfaces exhibit light grade-consistent marks. (#7220)

### Challenging Gem 1893 Silver Dollar

**1048** 1893 MS65 PCGS. A whisper of gold toning adorns this highly lustrous Gem. Impressively mark-free despite a minor tick on the cheekbone. Boldly struck overall with a hint of incompleteness at the centers. Among the lowest mintage Philadelphia issues of the series, and essentially unobtainable any finer. (#7220)

### Lustrous MS62 1893-CC Dollar

**1049** 1893-CC MS62 NGC. An unworn and attractive example of this challenging final Carson City Morgan dollar. Pale silver-gray toning with glimpses of peripheral gold graces lustrous surfaces. Minimally abraded for a coin not awarded Select status, though its central striking softness contributes to the grade assigned. (#7222)

### Dazzling 1893-CC Dollar, MS63

**1050** 1893-CC MS63 NGC. Wondrous prooflike fields show great contrast against the frosty design elements, particularly on the reverse, although NGC has not given this piece a Prooflike designation. The area around Liberty's ear is a bit soft, as usual. Only a few wispy luster grazes are seen on each side. A spectacular example of the final Carson City Mint issue. (#7222)

---

### Bright MS63 1893-CC Dollar

**1051** 1893-CC MS63 PCGS. Third-rarest of the Carson City Morgan dollars in all but the highest Mint State grades is the 1893-CC, after the 1889-CC and 1879-CC. This example is sharply struck, bright, and brilliant, with a somewhat frosty appearance. It is moderately marked on the obverse, but the reverse only shows a few faint blemishes. A faint grease streak (as made) connects the stem of the eagle's branch to the upper edge of the wreath. (#7222)

**1052** 1893-O AU55 NGC. CAC. At 300,000 pieces the 1893-O has the smallest mintage of any O-mint Morgan dollar. Mint State pieces are rare, leading collectors often to choose a nice Choice AU example such as the present specimen. There is only light high-point wear visible, but most of the luster is still present, and the silvery surfaces are frosty and appealing. (#7224)

---

### Elusive 1893-O Morgan Dollar, MS61

**1053** 1893-O MS61 PCGS. Typical central weakness is evident on both sides of this highly important dollar. The 1893-S garners all the press for Morgan dollars of this date; however, the 1893-O is an important rarity in its own right. This piece is fully brilliant with satiny silver luster. (#7224)

---

### Outstanding 1893-O Dollar, MS63

**1054** 1893-O MS63 PCGS. Stunning prooflike reflectivity enhances the eye appeal of this brilliant specimen. The reverse boasts moderate cameo contrast between the frosted devices and lustrous fields. Several wispy grazes do not detract. A loupe reveals faint roller marks on both sides. The strike is sharp save for the often-seen softness on the hair above Liberty's ear. The 1893-O becomes rare in higher grades. (#7224)

---

### Noteworthy 1893-O Dollar, MS64

**1055** 1893-O MS64 PCGS. CAC. The 1893-O Morgan dollar may be overshadowed by the immensely popular and elusive 1893-S, but it is nonetheless a coveted and difficult issue in its own right. Only 300,000 business strike 1893-O dollars were produced during this year. The Panic of 1893 saw a sharp stock market drop, a depression that brought about the failure of more than 500 banks, the bankruptcy of 74 railroads, and the shuttering of more than 15,000 American businesses.

The 1893-O is rare in all Mint State grades, and it is especially elusive in MS64 and finer condition. PCGS has certified 90 near-Gem 1893-O dollars, but only six in Gem grade and but a single Premium Gem (9/09). Radiant luster bursts forth from both sides of this splendid near-Gem example, which offers brilliant silver-white coloration and excellent eye appeal. The few contact marks on Liberty's cheek and in the reverse fields appear to preclude an even higher grade, but much appeal is present. The normal strike weakness on the hair over Liberty's ear and on a few of the obverse peripheral stars is not overly distracting. This coin is high-end for the assigned grade. The 1893-O in Gem condition takes a breathtaking jump in price, so this piece, with the CAC endorsement, should be accorded every consideration. (#7224)

---

#### Key 1893-S Morgan, Good 4

**1056** 1893-S Good 4 PCGS. Cream-gray predominates, although faint caramel-gold toning is also present. A collectible example of this famous key date silver dollar. The date is bold, the mintmark is unmistakable, and some wing plumage remains. Completely problem-free for the grade except for an unimportant reverse rim ding at 11 o'clock. (#7226)

---

#### Famous 1893-S Dollar, Good 4

**1057** 1893-S Good 4 NGC. Though well worn, this 1893-S Morgan has lovely light to medium gray surfaces that are entirely natural. All peripheral elements on each side are fully outlined with no rim merging. All things considered, a fundamentally pleasing example of this famous key Morgan dollar issue. (#7226)

**1058** 1893-S—Damaged—NCS. VG Details. This slate-gray key date silver dollar is slightly bright and has a pebbled appearance in places due to minute marks. Each side has several thin scratches, none of which require individual description. (#7226)

---

#### Desirable 1893-S Morgan, VG8

**1059** 1893-S VG8 PCGS. The most recognizable issue among business strike Morgan dollars is the 1893-S, a rarity in all grades, and highly desired by collectors everywhere. This piece has natural light gray surfaces with subtle champagne toning in the fields, and lighter gray devices. (#7226)

---

#### Pleasing 1893-S Morgan, VG10

**1060** 1893-S VG10 NGC. A lovely example for the grade, with pleasing gray-gold patina that is evenly distributed across both sides. The surfaces are excellent for the grade, with few abrasions, handling marks, or other imperfections. The diagnostics for this date are clearly visible. (#7226)

---

#### Popular 1893-S Morgan, VF35

**1061** 1893-S VF35 PCGS. Peripheral gold and iridescent toning accompanies the natural light gray surfaces of this moderately worn 1893-S Morgan dollar, a high demand key date that is often on collector want lists. The surfaces have a satiny appearance with traces of luster still visible. (#7226)

## Well Struck, Still-Lustrous 1893-S Dollar, AU58

**1062** 1893-S AU58 NGC. The 1893-S is a prominent rarity among Morgan dollars, with an interesting twist: A plurality of known survivors are in Very Fine condition. Such a grade is indicative of a specific, moderate-to-light amount of wear that is inconsistent with the experiences of other issues. Many have concentrations at Fine or lower, while a handful of Treasury and GSA release issues have higher modes. What could have caused the distinctive wear pattern?

Q. David Bowers, in several of his written references, relates the anecdotal evidence supplied by E.S. Thresher, who wrote in the July 1925 *The Numismatist* that the 1893-S was one of only a handful of Morgan dollar issues he had not encountered in circulation. This led Bowers to speculate that perhaps the late 1920s saw the release of most of the 1893-S dollars to Rocky Mountain states, where coin collectors were scarce, and there they circulated until silver dollars fell out of fashion for general commerce.

The exact reason seems unknowable, yet the Bowers thought-experiment leads to some interesting possibilities. A hard fact, on the other hand, is that the 1893-S dollar is elusive in AU grades and a condition rarity in Mint State. This near-Mint survivor, still impressively lustrous beneath layers of gold-orange and silver-gray patina, is well-defined with only a touch of friction over the high points. A few small abrasions on the cheek and wispy marks in the fields have little impact on the eye appeal. Census: 13 in 58, 28 finer (9/09). (#7226)

**1063** 1894 XF45 NGC. The key Philadelphia Mint dollar, the 1894 has a mintage of only 110,000 circulation strikes, and nearly all survivors from that limited issue show some degree of wear. This Choice XF piece has light silver surfaces with considerable luster still present. There is no indication of toning on either side. (#7228)

**1064** 1894 AU53 PCGS. A key-date in the Morgan series, the 1894 had a mintage of just 110,000 business strikes, and relatively few survive in Mint State grades. The balance of survivors are found worn, usually far beyond the light wear on the high points of this pleasing piece. Brilliant silver surfaces and a good strike round out its desirability. (#7228)

**1065** 1894 AU53 PCGS. Scarcely toned and scarcely worn, a moderately abraded coin in light silver-gray that is nonetheless attractive for the AU53 designation. One of just 110,000 pieces struck. (#7228)

## Low Mintage Select 1894 Morgan

**1066** 1894 MS63 NGC. A pleasing piece with dynamic mint luster and delicate chestnut toning. Marks are refreshingly few and far between, although a thin horizontal line on the eagle's belly merits mention. The hair above the ear shows some blending of detail, as made. The lowest mintage Philadelphia issue, save for the proof-only 1895. (#7228)

## Desirable Near-Gem 1894 Morgan Dollar

**1067** 1894 MS64 NGC. The 1894 had the second-lowest mintage of any regular issue Morgan dollar with just 110,000 pieces struck. Examples are scarce in all grades, while Mint State specimens are quite challenging. Gems are very rare, and NGC reports just four pieces finer than the present coin (8/09). Attractive rose and golden toning visits the perimeter of this mostly silver-gray specimen. Dazzling cartwheel luster complements the boldly struck design elements. A carefully preserved piece with great eye appeal. (#7228)

**1068** 1894-S MS64 NGC. A brilliant piece with eye-catching prooflike reflectivity. The strike is needle-sharp, and there are only a few insignificant abrasions. Numerous striations are noted in the fields on both sides. (#7232)

**1069** 1894-S MS64 PCGS. In Select and finer grades, the 1894-S is the most available of the three silver dollar issues for that year, though attractive examples can be elusive. This near-Gem has strong luster and notable detail overall. Lightly gold-toned in the fields with a few spots of opaque chalk-white color on the obverse. (#7232)

**1070** 1894-S MS64 NGC. CAC. Delightful gold peripheral gold toning accompanies the natural and shimmering light silver-gray surfaces of this brilliant near-Gem dollar. Both sides are frosty and lustrous with exceptional eye appeal. (#7232)

**1071** 1895-O AU50 PCGS. Strong gold-orange peripheral toning shows elements of sage intermixed. Still-lustrous silver-gray centers show light abrasions and the coin's wear, which is mostly on the high points. (#7236)

**1072** 1895-O AU53 PCGS. Light high point wear on each side of this piece explains the grade. The surfaces are light silver-gray with only a hint of toning. An important issue in all grades. (#7236)

**1073** 1895-O AU53 PCGS. CAC. Lightly worn, mostly on the high points, which lets the faintly orange-tinged silver-gray fields shine. Modestly abraded but highly desirable. Housed in a green label holder. (#7236)

**1074** 1895-O AU55 NGC. Light orange toning in the margins surrounds the silver-gray centers of this lustrous piece. The high points are a bit soft, but there are no marks of any significance. This low mintage issue is seldom seen in mint condition. (#7236)

**1075** 1895-O AU55 PCGS. Cartwheel luster is extensive although the centers betray a hint of wear. One thin mark on the cheek, but generally unblemished. The '95-O is the key date of the New Orleans subset of the series. (#7236)

#### Toned Near-Mint 1895-O Morgan Dollar

**1076** 1895-O AU58 PCGS. CAC. Ex: The Sunnywood Collection. This beautiful Morgan dollar has intermingled gold, sea-green, and sky blue toning on the obverse, with splashes of gold over ivory surfaces on the reverse. Both sides are satiny with nearly complete luster. Slight wear is visible on the high points of this important piece. (#7236)

**1077** 1895-S XF40 PCGS. This low mintage Morgan dollar has light tan-gold shadings and an absence of obtrusive marks. The eagle's breast and the hair above the ear show wear appropriate for the grade. (#7238)

#### Pleasing 1895-S Dollar, AU58

**1078** 1895-S AU58 NGC. Traces of purple and pale red patina visit the periphery of this near-Mint State specimen. Coruscating luster adds to the aesthetic appeal. Liberty's hair is a little soft, as typically seen, but there are no marks worthy of specific mention. The 1895-S had a relatively low mintage of just 400,000 pieces. (#7238)

#### Attractive 1895-S Dollar, MS63

**1079** 1895-S MS63 PCGS. Impressive cameo contrast is established between the prooflike fields and frosty devices. The reverse is particularly noteworthy. A touch of softness around Liberty's ear is typical, and the rest of the design elements are razor-sharp. Several light grazes keep this piece from an even higher grade. (#7238)

#### Choice Mint State 1895-S Silver Dollar

**1080** 1895-S MS64 PCGS. A brilliant and mildly prooflike representative whose lustrous surfaces display fewer abrasions than is generally associated with the grade. A good strike with some hair delineation direction above the ear. Given the cost of a full Gem, many advanced collectors settle for an attractive near-Gem. (#7238)

---

Gorgeous MS64 1895-S Dollar

1081 1895-S MS64 PCGS. Large areas of each side have only pale silver-gray toning, but colorful orange, rose, and blue elements are present elsewhere, these being strongest on the obverse. Excellent luster and a distinctly above-average strike. While the 1895-S Morgan dollar is available for a price at the MS64 level, finding a coin this attractive takes some searching, and anything numerically finer is a condition rarity. (#7238)

1082 1896-O MS60 PCGS. Lustrous and nicely struck with moderate silver-gray toning and no offensive marks. The 1896-O is a notable conditional rarity, common in XF but rare in Mint State and essentially uncollectible above MS63. Presumably, most of the mintage was released into circulation instead of residing in vaults like its common Philadelphia Mint counterpart. (#7242)

1083 1896-O MS61 NGC. Delicate gold toning graces the perimeter, while the rest of the lustrous surfaces are silver-gray. Scattered abrasions limit the grade, but none are particularly significant. Liberty's ear is a touch soft, as often seen. (#7242)

1084 1896-O MS62 ANACS. Faint golden overtones grace otherwise silver-gray surfaces. Well struck for the issue with distinctly above-average luster and high eye appeal for a coin not awarded Select status. (#7242)

1085 1896-O MS62 PCGS. Pale champagne toning subdues the frosty luster of this lovely Mint State specimen. The New Orleans and San Francisco dollars of 1896 are condition rarities that are plentiful in circulated grades but elusive in Mint State. (#7242)

1086 1897-O MS62 NGC. A key rarity in Mint State grades, although plentiful in circulated grades, few 1897-O Morgan dollars were found in the Treasury Hoard. This brilliant and lustrous representative has sharp details and untoned surfaces. (#7248)

---

Conditionally Rare 1898 Morgan Dollar, MS67

1087 1898 MS67 NGC. A fully brilliant Superb Gem, the surfaces are entirely brilliant with little evidence of toning on either side. The surfaces are nearly flawless with soft, frosty silver luster. Here is an opportunity to acquire one of many important Morgan dollar condition rarities. Census: 17 in 67, 0 finer (9/09). (#7252)

---

Impressive 1898 Dollar  
MS66 Deep Mirror Prooflike

1088 1898 MS66 Deep Mirror Prooflike NGC. Deeply mirrored fields yield pronounced contrast against the design motifs of this Premium Gem. A solid strike imparts strong definition on the design features, including the hair over the ear and the eagle's breast feathers. Untoned save for a couple of light gold-tan splashes on the obverse, and well-preserved throughout. Census: 4 in 66 Deep Mirror Prooflike, 0 finer (9/09). (#7253)

1089 1898-O MS67 PCGS. An exceptional Superb Gem, this brilliant piece exhibits entirely lustrous and frosty silver surfaces with no evidence of toning on either side. It is tied for the finest that PCGS has certified (9/09). (#7254)

1090 1898-O MS66 Prooflike PCGS. Distinctly reflective and minimally toned. This crisply struck Premium Gem shows an abrasion on the reverse, just above the bases of the tailfeathers. PCGS has graded only one finer Prooflike example (8/09). (#7255)

1091 1899-S MS65 PCGS. A gorgeous Gem, this Morgan has brilliant and satiny silver luster with peripheral gold and iridescent toning around white-silver centers. (#7262)

---

Exemplary 1899-S Morgan Dollar, MS66

1092 1899-S MS66 PCGS. The Premium Gem level is nearly the finest quality obtainable for this issue despite its mintage exceeding 2.5 million coins. NGC and PCGS combined have certified only nine in finer grade, counting duplicates. This specimen offers exuberant luster flowing from each side, with largely silver-white surfaces accented with a touch of color near the rims. Except for minor strike weakness on the hair above the ear, the surfaces are exemplary and exceptionally clean overall. Population: 97 in 66, 8 finer (9/09). (#7262)

### Stunning 1899-S Morgan, MS64 Deep Mirror Prooflike

**1093 1899-S MS64 Deep Mirror Prooflike PCGS.** A stunning brilliant near-Gem with deeply mirrored fields and exceptional cameo contrast. Few 1899-S Morgan dollars can match the quality of this Choice example, and rarely is a finer piece certified with such amazing eye appeal. A few scattered surface marks that are reflected in the fields limit the grade of this appealing piece. Population: 23 in 64 Deep Mirror Prooflike, 6 finer (9/09). (#97263)

### Lovely MS67 1900 Dollar

**1094 1900 MS67 NGC.** Fantastically lustrous with a smooth cheek and excellent preservation away from the high points as well. Silver-white luster dominates, but hints of golden peripheral toning also inform the coin, as does a faint violet fingerprint at the lower reverse. Only a hint of striking softness affects the hair over the ear. Census: 35 in 67, 0 finer (9/09). (#7264)

### Top-Drawer 1900-O Morgan, MS65 Deep Mirror Prooflike

**1095 1900-O MS65 Deep Mirror Prooflike PCGS.** This Gem Deep Mirror Prooflike dollar is housed in a green label PCGS holder. The surfaces are outstanding with fully brilliant and deeply mirrored fields around lustrous devices. There is no toning present on either side to hide its impressive aesthetic appeal. PCGS has only certified one finer example. Population: 14 in 65 Deep Mirror Prooflike, 1 finer (9/09). (#97267)

**1096 1900-O/CC MS65 PCGS. VAM-11.** A Top 100 Variety. From a late state with die crack across the reverse ribbon. Softly struck but immensely lustrous with minimal patina. Housed in a green label holder. (#7268)

**1097 1900-S MS65 NGC.** Light pink and peach overtones grace the otherwise pale silver-gray surfaces of this San Francisco dollar. Well-defined overall with just a hint of softness at the hair over the ear. (#7270)

### Memorable 1901 Morgan, MS63

**1098 1901 MS63 NGC.** The 1901 Morgan dollar is on a short list of issues that are available in circulated grades but almost impossible to find in the higher Mint State grades, a list that includes other memorable issues such as 1886-O, 1884-S, and 1896-O. While the 1901 Morgan dollar can occasionally be found in Select Mint State as here, at the next grade level, only one-fifth as many coins are certified at NGC and PCGS combined, and the price is apt to be three to five times as much. This is a memorable example for the grade, with appealing silver-white surfaces with just a hint of color and no singular distractions. NGC has certified only 20 pieces finer (9/09). (#7272)

**1099 1901-S MS64 PCGS. CAC.** Dazzling cartwheel luster enhances the eye appeal of this untoned near-Gem. A few minuscule bagmarks do not distract. This exquisitely detailed piece has great eye appeal. (#7276)

### Remarkable 1902-O Silver Dollar MS65 Deep Mirror Prooflike

**1100 1902-O MS65 Deep Mirror Prooflike PCGS.** This issue flowed forth by the thousands from the great Treasury releases of 1962-64, but most examples are lackluster and/or poorly struck, and few show more than mentionable prooflikeness. This splendid Gem shows remarkable field-device contrast, and as such it is one of only four MS65 Deep Mirror Prooflike coins certified at PCGS, with none finer (9/09). The near-pristine surfaces are virtually devoid of color, and the eye appeal is enormous. Expect strong bidding to win the day on this lot. (#97281)

**1101** 1902-S MS65 PCGS. CAC. A faint trace of champagne toning graces the obverse of this otherwise fully brilliant Gem with its frosty silver-white surfaces. PCGS has only certified 33 finer examples (9/09). (#7282)

**1102** 1902-S MS65 PCGS. Faint splashes of champagne toning are visible over the fully brilliant and highly lustrous silver surfaces of this Gem. Vertical rolling lines on the cheek remain from planchet preparation before the coin was struck, and in no way affect the grade. PCGS has only certified 33 finer pieces (9/09). (#7282)

#### Shining 1903 Dollar, MS67

**1103** 1903 MS67 PCGS. CAC. This highly lustrous Superb Gem displays just the slightest occasional hints of gold color under a loupe. The hair strands over Liberty's ear are slightly merged, but the remaining details are bold. Both sides are free of significant blemishes. Population: 64 in 67, 0 finer (9/09). (#7284)

#### Gorgeous 1903-O Morgan Dollar MS66 ★ Deep Prooflike

**1104** 1903-O MS66 ★ Deep Mirror Prooflike NGC. CAC. An astounding piece that stands alone as the finest Deep Prooflike example of the issue certified by NGC, regardless of Star designation (9/09). The strike is generally crisp, and the fields are profoundly mirrored beneath intermittent veils of champagne toning. Extraordinary quality and eye appeal. (#97287)

#### Lustrous 1903-S Dollar, MS64

**1105** 1903-S MS64 PCGS. Large S. Pleasing luster issues from both sides of this near-Gem and a well executed strike leaves strong definition on the design features. Silver-white surfaces reveal a few minute marks that deny Gem classification. David Bowers (2006) opines that hundreds of thousands of the 1.241 million coinage were probably melted under the 1918 Pittman Act and various later melts. Housed in a green label holder. (#7288)

#### Elusive 1904 Dollar, MS64 Prooflike

**1106** 1904 MS64 Prooflike PCGS. The 1904 is seldom located with prooflike fields, and when encountered such coins tend to be dull and lack contrast. This piece is hardly dull. In fact, it is bright and sparkles with prooflike reflectivity and there is even an ever-so-slight contrast on each side. Fully struck, the coin is brilliant throughout with no mentionable abrasions. Population: 15 in 64 Prooflike, 1 finer (9/09). (#7291)

**1107** 1904-S MS61 PCGS. A brilliant Mint State example of the scarce 1904-S Morgan dollar, with subtle splashes of gold and steel toning over frosty white surfaces. (#7294)

#### Extraordinary 1904-S Dollar, MS62

**1108** 1904-S MS62 PCGS. The 1904-S is one of many condition rarities in the Morgan dollar series. Most examples of this issue are found in circulated grades. This splendid Mint State piece has fully brilliant white-silver surfaces with frosty mint luster. An extraordinary coin for the modest grade. (#7294)

## PROOF MORGAN DOLLARS

### Sharp 1878 7TF Reverse of 1878 Dollar, PR64

**1109 1878 7TF Reverse of 1878 PR64 NGC.** The 7 Tailfeathers Reverse of 1878 has a parallel top arrow feather and flat breast on the eagle. David Bowers (2006) estimates that 250 to 300 proofs were minted, but that many unsold pieces were melted. Soft gold-tan patina clings to the margins of this crisply struck near-Gem. A few minuscule handling preclude Gem status, but Liberty's cheek and neck are remarkably smooth. Census: 20 in 64, 21 finer (9/09). (#7312)

**1110 1879 PR62 PCGS.** A pleasing proof in a lower numerical grade that will appeal to budget-minded collectors, this Morgan is boldly detailed with brilliant surfaces and only a trace of peripheral iridescence. (#7314)

### Pleasing Gem Proof 1881 Dollar

**1111 1881 PR65 NGC.** Both sides of this Gem proof Morgan yield a slight golden-tan cast, and each displays a degree of filed-device contrast. A solid strike leaves strong detail on the design features. A few grade-consistent marks are inconsequential. Liberty's cheek and neck are remarkably clean. (#7316)

## Challenging 1881 PR66 Dollar

**1112 1881 PR66 NGC.** The proof dollars of 1881 (984 mintage) are obtainable without too much difficulty through near-Gem. Gems and Premium Gems are more challenging and higher-grade coins are elusive. Hints of gold-tan color cling to the margins of this PR66 offering and a decisive strike sharpens the design features. The latter are nicely highlighted by the mirrored fields. Both sides are impeccably preserved. Census: 25 in 66, 18 finer (9/09). (#7316)

**1113 1891—Artificial Toning—NGC. Proof.** Dramatic concentric bands of cobalt-blue, plum-red, and autumn-gold provide a visual treat, even if the coloration has been helped by forces other than those of Mother Nature. Boldly struck with flashy mirrors and no obvious hairlines. (#7326)

### Frosty 1891 Silver Dollar, PR67 Cameo

**1114 1891 PR67 Cameo NGC.** The proof mintage of Morgan dollars in this year was a modest 650 coins, yet many such as the present piece show considerable cameo contrast, with moderately frosted devices and deeply mirrored fields. This example is silver-white save for a hint of gold at the rims on each side. The strike is a touch soft over the ear, a trait often seen on this issue. Census: 15 in 67 Cameo, 2 finer (9/09). (#87326)

---

## Amazing PR66 Cameo 1895 Morgan Dollar

**1115 1895 PR66 Cameo NGC.** Numismatists have often speculated about the possible existence of any non-proof 1895 Morgan dollars from Philadelphia. Bowers, in his *Silver Dollars and Trade Dollars of the United States, A Complete Encyclopedia* (1993), quoted the traditional mintage figure of 12,000 business strikes for this date, although he noted: "I have never seen an authentic specimen. It is presumed that the entire mintage, if indeed it ever existed, consisting of only 12 mint bags, went to the melting pot under the provisions of the Pittman Act of 1918." In 2004, Bowers was more definite in his opinion regarding this issue. In *The Official Red Book of Morgan Silver Dollars*, Bowers states "In 1895, at the Philadelphia Mint, there was no coinage of silver dollars for circulation."

Perhaps the alleged mintage of 12,000 business strikes in 1895 will never be definitively proven or disproven.

Among the finest specimens that we have ever seen, this Premium Gem proof displays essentially untoned surfaces that only exhibit hints of golden color on the high points of the design and along the rim. The deeply reflective fields and sharply struck devices are equally free of grade-limiting blemishes. Sharp contrast is evident on both sides and this factor easily warrants a Cameo designation. We anticipate significant bidder interest when this conditionally scarce example crosses the auction block. Census: 14 in 66 Cameo, 20 finer (8/09). (#87330)

---

### Superlative 1896 Morgan Dollar, PR68

**1116 1896 PR68 PCGS.** As a general rule, proof Morgan dollars survive in higher numerical grades than business strikes. That is because proofs were acquired by collectors who took the care necessary to preserve them in the best possible quality. However, even the proofs are extremely rare at grades above PR67. The present example, tied with 12 others certified by NGC and PCGS with none finer, illustrates that rarity. It also exhibits incredible multicolored rainbow toning that further enhances its aesthetic appeal and desirability. Clearly evident is its excellent cameo contrast, although the toning prevents a Cameo designation. This highly desirable dollar will please any connoisseur. Population: 7 in 68, 0 finer (9/09). (#7331)

---

---

### White on Black 1896 Silver Dollar PR66 Ultra Cameo

**1117 1896 PR66 Ultra Cameo NGC.** The 1896 proof Morgan dollars have been held up as examples of the finest silver proof coinage of the 19th century, and when one examines specimens such as this Premium Gem with Ultra Cameo contrast, it is difficult to disagree. Each side offers a strong black-and-white effect at most angles, though the broad, frosted expanse of Liberty's cheek shows a hint of gold when tilted just so. Its technical preservation is as laudable as its eye appeal, and the strike reveals complete breast feather definition. Census: 7 in 66 Ultra Cameo, 23 finer (9/09). (#97331)

---

### Imposing 1897 Dollar, PR67 Cameo

**1118 1897 PR67 Cameo NGC.** A goodly number of 1897 proof Morgan dollars have survived from the original mintage of 731 pieces, but relatively few of these are designated as Cameos. The present Superb Gem Cameo proof displays a soft golden cast, slightly deeper at the margins. Sharply struck, lightly frosted devices yield strong contrast with the deeply mirrored fields. Impeccably preserved throughout. Census: 13 in 67 Cameo, 8 finer (9/09). (#87332)

---

**Starkly Contrasted 1898 Morgan Dollar  
PR67 ★ Ultra Cameo**

**1119 1898 PR67 ★ Ultra Cameo NGC.** From a proof mintage of only 735 coins. Proof Morgan silver dollars minted in the years 1895-1898 are known for their high technical quality and beautiful appearance. The dollars of 1898 are particularly noteworthy in this respect. Most examples seen are boldly struck on high quality, polished planchets. It is evident that the engravers and diesinkers at the Mint had perfected the proof die production process to a high state of the art. Proofs of later years seldom show the deep cameo contrast that is characteristic of examples from this period. Michael Fuljenz states, "This date was probably the best made in the entire series."

The present coin is a masterpiece of the minter's art. The strike is perfect, with every detail of the design elements fully brought up. The thickly frosted devices contrast dramatically with the virtually flawless fields. The deeply mirrored surfaces produce a chromium effect, and the white-on-black contrast of the issue is a match for present-day proof coins. There is no detectable color on either side, and the overall eye appeal is outstanding. A great prize for the collector of pre-modern proofs as well as the Morgan dollar specialist. Census: 15 in 67 Ultra Cameo, 2 finer (9/09). (#97333)

**Impressive 1900 Dollar, PR66 Cameo**

**1120 1900 PR66 Cameo NGC.** An impressive strike leaves sharp definition on the design elements, including near-complete detail in the hair over Liberty's ear. Mirrored fields highlight the motifs, and a barely discernible dusting of champagne-gold color rests on both sides, each of which is devoid of mentionable marks. Census: 11 in 66 Cameo, 20 finer (9/09). (#87335)

**Splendid PR65 1902 Morgan Dollar**

**1121 1902 PR65 PCGS. CAC.** A lovely, upper-end example of this low-mintage proof issue. Of the 777 proofs struck, few are extant today in Gem or better condition and even fewer still with even the slightest amount of contrast between the fields and devices. The surfaces are brilliant throughout and there are no mentionable or noticeable contact marks on either side of this superlative proof. Population: 20 in 65, 22 finer (9/09). (#7337)

## PEACE DOLLARS

- 1122 1921 MS65 NGC.** This deeply toned Gem has frosty underlying surfaces with excellent design definition, save for the centers that are always weak on this issue. The surfaces are virtually pristine. (#7356)

Exceptional MS66 1923-D Dollar

- 1123 1923-D MS66 NGC.** Jade-green, lilac, and honey-gold enrich the obverse. The reverse has only a whisper of tan patina. A crisply struck Premium Gem with exemplary surfaces and several interesting spindly die cracks. The 1923-D is common through MS64, but is seldom seen in the present quality. Census: 22 in 66, 0 finer (9/09). (#7361)

Vibrant MS65 1923-S Peace Dollar

- 1124 1923-S MS65 NGC.** Vibrant luster and dramatic toning are hallmarks of this remarkable Gem example. In terms of sheer eye appeal, it would be difficult to find a much finer specimen, and this piece is certainly one of the most attractive that we have ever encountered. Boldly struck and intensely lustrous with delightful, speckled russet, purple, and cobalt-blue patina. A few trivial marks are all that keep this specimen from an even finer grade. Census: 75 in 65, 1 finer (9/09). (#7362)

Outstanding Superb Gem 1924 Dollar

- 1125 1924 MS67 NGC.** The 1924 is and will always be plentiful in typical Mint State grades, but the present Superb Gem is close to immaculate and possesses an intricate strike. The lustrous surfaces are bathed in exquisite lime-green, apricot, and cream-gray patina. Census: 71 in 67, 1 finer (9/09). (#7363)

- 1126 1924-S MS64 NGC. CAC.** Both sides show a broad diagonal stripe of peach and dots of peripheral tan-olive, with light silver-gray color present elsewhere. Pleasingly detailed for the issue with few overt abrasions. (#7364)

- 1127 1924-S MS64 PCGS.** Blushes of peach patina are more prominent on the reverse. The cartwheel luster is dazzling, the strike is above average, and the obverse is particularly well preserved. (#7364)

- 1128 1924-S MS64 PCGS. CAC.** Light golden-tan patina appears on both sides of this near-Gem dollar. Well struck, and revealing a few minor grade-defining marks. Difficult to obtain in higher grades; PCGS has only certified 74 finer examples (9/09). (#7364)

- 1129 1926-S MS65 NGC. CAC.** A condition rarity in finer grades, with just 38 finer NGC certified examples recorded in over 20 years. This brilliant and untoned Gem has extraordinary surfaces and incredible eye appeal. (#7369)

- 1130 1927-D MS64 PCGS.** Light honey patina prevents full brilliance, but the connoisseur will cherish the present low mintage near-Gem due to its bold strike, potent luster, and unusually mark-free obverse. (#7371)

Speckled 1927-D Peace Dollar, MS65

- 1131 1927-D MS65 PCGS.** Even though two and a half bags of this issue entered the market several years ago, it has had little significant impact on the availability of Gems. This piece has full definition on Liberty's hair, and the reverse is just a bit less well brought up. There are no obvious abrasions on either side, and both obverse and reverse are covered with a light speckling of golden-russet patina. PCGS has only certified nine finer examples (9/09). (#7371)

- 1132 1927-S MS64 PCGS.** Light to medium almond-gold toning visits this intricately struck and thoroughly lustrous near-Gem. Marks are nearly absent aside from faint grazes on the neck and bust truncation. (#7372)

- 1133 1928 MS64 PCGS.** Gentle green-gold toning visits this lustrous and sharply struck near-Gem. The 1928 has less than half the mintage of any other issue in the series. Encapsulated in a green label holder. (#7373)

### Fully Struck 1934 Peace Dollar, MS67

**1134 1934 MS67 NGC.** Superb Gem Peace dollars of any stripe are exceedingly rare. Out of nearly a half-million Peace dollars that NGC has certified in all grades, 263 of them have been graded MS67, along with two MS68s (9/09). This works out to any Peace dollar submitted to NGC having an average chance of being graded MS67 at about 0.058%, or one in every 1,721 submissions. For the 1934 issue, NGC has certified five MS67 pieces, with none finer. This piece offers strikingly attractive satiny surfaces, with silver centers ceding to amber-gold rim toning. The impeccable strike has fully brought up Liberty's curls in the central obverse—a phenomenon almost never seen on this issue—and the appeal elsewhere on both sides is equally high. An essential acquisition for the finest type or Peace dollar set. (#7375)

**1135 1934-D MS65 PCGS.** Frosty silver-white dominates the eye appeal of this Denver Gem, while an arc of deeper tan-sage is noted at the truncation of the bust. Carefully preserved and delightful. (#7376)

### Lovely 1934-S Peace Dollar, MS62

**1136 1934-S MS62 NGC.** A virtually stone-white example of this well known Mint State key date. The strike is exemplary, the luster is comprehensive, and both sides are relatively unabraded for the MS62 level, despite moderate contact on the IB in PLURIBUS. Careful study reveals faint tan toning, more discernible on the reverse. (#7377)

### Impressive Choice 1934-S Peace Dollar

**1137 1934-S MS64 NGC.** Light autumn-gold toning graces the margins of this lustrous near-Gem. The fields are unabraded, and careful inspection is required to locate the few inconspicuous marks. The 1934-S is the series key between AU50 and MS64, ceding to the low mintage 1928 in most circulated grades and to such condition rarities as the 1928-S in MS65. (#7377)

### Superior Near-Gem 1934-S Peace Dollar

**1138 1934-S MS64 PCGS.** This piece offers bounteous satiny luster on both sides, with silver-gray surfaces overall and just a touch of color near the rims. Despite a few wispy contact marks on the high points, the excellent strike and superior surfaces make this example appear oh-so-close to the coveted Gem grade. A wonderful specimen of this key Peace dollar issue. (#7377)

### Brilliant Gem 1934-S Peace Dollar

- 1139 1934-S MS65 PCGS. CAC. The hands-down key to the Peace dollar series, and in demand in all grades but even more so in Gem condition. The 1934-S dollars mostly entered circulation, according to Roger Burdette's recent *Guide Book* on the subject, and for a long period many collectors thought several other issues in the series were scarcer, leading to no hoards having been set aside. This silver-white beauty shows the usual weak strike on the hair just over the ear, but otherwise is enormously appealing. PCGS has certified only 23 coins finer (9/09). A good candidate to begin building a superlative Peace dollar collection with—first. (#7377)

### Exemplary Gem 1934-S Dollar

- 1140 1934-S MS65 NGC. CAC. Although a few issues have lower mintages, the 1934-S is the scarcest Peace dollar in Mint State. Most such examples grade between MS62 and MS64, but this is a full Gem with well preserved surfaces and only a whisper of sun-gold toning. The centers show minor striking incompleteness, but the remainder of the design is crisp. (#7377)

- 1141 1935-S MS65 PCGS. Four rays below ONE, a design subtype only used on the 1935-S. Straw-gold and milky shadings visit this lustrous and boldly impressed Gem. The obverse is beautifully preserved, and the reverse has only minor marks near PLURIBUS. In a first generation holder. (#7379)

- 1142 1935-S MS65 NGC. Four rays below ONE. Great eye appeal for this final S-mint Peace dollar issue. The strike and luster are appreciably above-average, and a long arc of golden-tan and violet patina graces the right obverse rim. A single abrasion at the truncation of the bust precludes an even finer designation. (#7379)

### COMMEMORATIVE SILVER

- 1143 1900 Lafayette Dollar MS64 NGC. DuVall 2-C. Moderate aqua-blue and russet shades enrich the obverse. The reverse features rich sea-green and cherry-red toning. The obverse is surprising bereft of marks, and the reverse has only a few faint grazes on the field beneath the flank. (#9222)

### Patinated Gem Lafayette Dollar

- 1144 1900 Lafayette Dollar MS65 NGC. DuVall 1-B. This nearly unabraded Gem has satin luster and a crisp strike. Deeply patinated in original golden-brown, apple-green, lilac, and powder-blue shades. The only silver dollar commemorative issue prior to 1983, and seldom available above the MS65 level. (#9222)

- 1145 1921 Alabama 2x2 MS66 NGC. Bright silver-white radiance overall with just a hint of pink-tan peripheral toning. A pleasing Premium Gem example of the more elusive 2x2 variant. (#9225)

- 1146 1935/34-D Boone MS67 ★ NGC. A stunningly toned Superb Gem survivor of this infamous lowest-mintage classic silver commemorative. Gold-gray and orange central toning gives way to a narrow band of plum at the rims. (#9263)

- 1147 1937 Boone MS67 PCGS. CAC. Russet-brown, forest-green, and stone-gray invigorate this shimmering Superb Gem. Well struck save for the hand clutching the scroll. Population: 68 in 67, 3 finer (9/09). (#9270)

- 1148 1937-D Boone MS67 NGC. CAC. An exceptional Superb Gem, this piece has ivory mint frost with peripheral iridescent toning that frames the sharp design motifs. Census: 28 in 67, 1 finer (9/09). (#9271)

- 1149 1936-D Cincinnati MS66 PCGS. CAC. Lovely lemon-gold drapes this lustrous Premium Gem. Hints of aqua-blue and cherry-red grace the margins. Essentially devoid of post-strike abrasions, though the highpoints of the harpist retain the texture of the planchet. (#9284)

- 1150 1936-D Cincinnati MS67 NGC. Delicate sun-gold and powder-blue shadings drape this coruscating and undisturbed Superb Gem. The Cincinnati ranks among the more coveted types of the classic commemorative series, as only 5,000 PDS sets were issued. Census: 32 in 67, 2 finer (8/09). (#9284)

- 1151 1936 Cleveland MS67 PCGS. CAC. Aqua-green, reddish-gold, and purple toning concentrates at the obverse margins ceding to splashes of golden-gray in the center. Dappled olive-green, red, and brown patina occupies the reverse. Sharply struck and minimally marked. Population: 39 in 67, 1 finer (9/09). (#9288)

**1152** 1922 Grant With Star AU58 PCGS. A hint of chestnut toning graces this sharply struck and satiny pearl-gray example. A trace of friction on the hair above the ear decides the grade of this low mintage slider. (#9307)

**1153** 1928 Hawaiian—Scratched, Cleaned—ANACS. AU55 Details. A more readily affordable example of this challenging issue. This pale silver-gray example likely was a pocket-piece, as suggested by the numerous abrasions in the fields and the rub on the highest design elements. Hairlines come from a past cleaning. (#9309)

#### Bright 1928 Hawaiian Fifty Cent Commemorative, MS61

**1154** 1928 Hawaiian MS61 ICG. The bright untoned surfaces of this Hawaii commemorative exhibit relatively well struck design features. Wispy marks show up under high magnification and a shallow graze is located in the lower left reverse field. David Bowers (2008) points out that the \$2 issue price was the highest for any commemorative half up to this time. (#9309)

#### Lustrous 1928 Hawaiian Half Dollar, MS66

**1155** 1928 Hawaiian MS66 NGC. The 1928 Hawaiian half commemorated the 150th anniversary of Captain James Cook's landing in Hawaii. Specimens are available through the near-Gem level, but the certified population declines noticeably in Gem and quite precipitously any finer. This Premium Gem displays soft champagne-gold and ice-blue patina on lustrous surfaces that are well defined. Several marks are visible in the upper left obverse field. Census: 71 in 66, 4 finer (9/09). (#9309)

**1156** 1935 Hudson MS64 PCGS. Soft glimpses of gold add interest to surfaces that are otherwise uniformly pearl-gray. Subtly lustrous and mildly abraded but with considerable eye appeal for a near-Gem. (#9312)

**1157** 1935 Hudson MS65 PCGS. CAC. A lustrous, softly struck Gem representative of this conditionally challenging classic commemorative. Patches of peripheral orange, gold, and umber frame pale silver-gray centers. (#9312)

**1158** 1935 Hudson MS65 NGC. Hints of tan-gold show up under magnification, especially around the peripheries and in the central obverse. This is a pleasing, minimally marked commemorative. (#9312)

#### Beautiful MS66 1935 Hudson Half

**1159** 1935 Hudson MS66 PCGS. Caramel-gold toning fills the borders and encroaches upon the ice-blue centers. This evenly struck Premium Gem has vivacious luster and only a few tiny marks, mostly confined to the reverse. The Hudson type is among the rarest, as only 10,000 pieces (plus an additional eight coins for assay) were struck. (#9312)

**1160** 1925 Lexington MS66 PCGS. Impressively lustrous and distinctively toned. This Premium Gem has rich orange, green-gold, burgundy, and silver-blue toning across the obverse. The reverse shows a subtler mix of similar colors prevailing, with deeper shadings at the right rim. (#9318)

#### Lovely Gem 1921 Missouri 2x4 Half

**1161** 1921 Missouri 2x4 MS65 PCGS. Gray-lilac centers deepen noticeably at the peripheries of this splendid Gem Missouri 2x4, one of the keys to the commemorative silver series, along with the Missouri "Plain," the Hawaiian, Lafayette dollar, Hudson, Grant With Star, and a few others well-known to series specialists. PCGS has certified only 23 pieces finer than this lovely Gem coin (9/09). (#9331)

**1162** 1938 New Rochelle MS66 Prooflike NGC. An absolutely stunning piece with captivating prooflike surfaces and needle-sharp details. Close inspection under magnification reveals only a couple of tiny marks. NGC has certified only 13 Prooflike examples finer (8/09). (#89335)

**1163** 1926-S Oregon MS67 PCGS. CAC. Rose, orange, and blue-green shadings let through thin veins of silver-gray on this gorgeous Superb Gem. Solidly struck save for the bow hand, which is weak on nearly all 1926-dated Oregon halves. Population: 94 in 67, 4 finer (9/09). (#9341)

**1164** 1926-S Oregon MS67 PCGS. CAC. One of the most attractive examples of this popular commemorative issue that we have ever examined, this impressive piece displays a complete layer of deep, variegated toning over both sides. The centers are mostly golden-brown, except for purple-rose accents on the Indian, while vibrant electric-blue and rose iridescence decorates the peripheries. Well struck, impeccably preserved, and lustrous, simply a great Superb Gem example. Population: 94 in 67, 4 finer (9/09). (#9341)

- 1165** 1926-S Oregon MS67 NGC. CAC. An impressive Superb Gem with golden-brown and iridescent toning on both sides. The strike is sharp and the surfaces are satiny and lustrous. Census: 147 in 67, 9 finer (9/09). (#9341)

#### Spectacular MS68 1938-D Oregon Half

- 1166** 1938-D Oregon MS68 NGC. An outstanding Superb Gem that has a pristine obverse and only microscopic contact on the reverse. A good strike with a mere hint of softness on the back of the covered wagon. Stone-gray overall although glimpses of apricot make infrequent appearances. Census: 57 in 68, 2 finer (9/09). (#9349)

- 1167** 1915-S Panama-Pacific MS64 NGC. Blue and peach peripheral shadings grace each side of this lustrous near-Gem. The obverse has a near-brilliant center, while the reverse shows rich orange color there. (#9357)

#### Exquisite 1915-S Panama-Pacific Half MS66

- 1168** 1915-S Panama-Pacific MS66 PCGS. This stone-white and lustrous Premium Gem has an impeccable strike, and the reverse appears pristine. The obverse is also devoid of abrasions save for a thin mark beneath the lower hand. The mintmark is lightly repunched north.  
Ex: Long Beach Signature (Heritage, 6/2005), lot 7161, which realized \$4,025. (#9357)

- 1169** 1935 Spanish Trail MS64 NGC. Satiny luster shows through the veneer of soft gold and ice-blue patina, and a well executed strike delivers sharp definition to the design elements. A few light reverse field marks deny Gem classification. (#9376)

- 1170** 1935 Spanish Trail MS65 PCGS. Dusky tan-gold and gunmetal-gray embrace this shimmering and unblemished Gem. One small area of deeper toning beneath the second T in TRUST. A well struck example of this scarce low mintage type. (#9376)

- 1171** 1935 Spanish Trail MS65 NGC. Faint golden tints visit otherwise pale silver-white surfaces that show a pebbly texture. This minimally marked Gem is well struck with solid eye appeal. (#9376)

#### Singular 1935 Spanish Trail Half, MS67

- 1172** 1935 Spanish Trail MS67 PCGS. One of the scarcer keys to the silver commemorative half dollar set, the Spanish Trail has an unusual design story, front and back. This Superb Gem is about as nice as they come, since NGC and PCGS combined have certified only eight coins finer. This superlative ice-white example is free of color (and the usual contact) on both sides, with singular eye appeal. (#9376)

#### Impressive MS68 1935-D Texas Half

- 1173** 1935-D Texas MS68 PCGS. CAC. As one of just four MS68 pieces known to PCGS with none finer (9/09), this is a Registry collector essential. The surfaces are absolutely smooth with the "halo" luster peculiar to the series. Light blue toning prevails, though the upper left obverse shows an arc of golden-tan at the rim, and a few dots of the same color are present elsewhere. (#9383)

- 1174** 1949-D Booker T. Washington MS67 NGC. This impressive Superb Gem has satiny silver luster with pearlescent toning. The design motifs are bold and the surfaces are nearly flawless. Census: 18 in 67, 0 finer (9/09). (#9417)

- 1175** 1949-D Booker T. Washington MS67 NGC. Faint pink and gold toning elements visit otherwise light silver-gray surfaces. Fantastically lustrous, an appealing Superb Gem. Census: 18 in 67, 0 finer (9/09). (#9417)

#### Dazzling 1951 Booker T. Washington Half Dollar, MS67

- 1176** 1951 Booker T. Washington MS67 NGC. Dazzling luster exudes from each side of this commemorative half and a well executed strike delivers sharp definition to the design elements. The essentially untoned obverse cedes to a blend of soft sky-blue and gold-orange at the reverse periphery. Aside from light "chatter" marks on the cheek the surfaces are very clean. Census: 7 in 67, 1 finer (9/09). (#9424)

## Splendidly Toned MS67 1951-S Washington-Carver Half

**1177 1951-S Washington-Carver MS67 NGC.** The splendid pinkish-gray center on the reverse deepens at the rims into gold, jade, and cinnamon. The reverse show an untoned central area with a wide band of varying colors, attractive but unusual. This piece is clearly atop the Condition Census, as it is one of 13 MS67s at NGC, and PCCGS has never graded one finer than MS66 (9/09). (#9432)

**1178 1954-D Washington-Carver MS66 NGC.** Both sides of this extraordinary Washington-Carver half dollar are brilliant and untoned, with pristine surfaces and frosty mint luster. This series is seldom found as nice as the present example. Even the common 1952 is a elusive so fine. Census: 17 in 66, 1 finer (9/09). (#9443)

**1179 1954-D Washington-Carver MS66 PCGS.** Light champagne toning graces each side of this Premium Gem with frosty underlying silver luster. A wonderful strike adds to the important of this elusive piece. Population: 22 in 66, 0 finer (9/09). (#9443)

## Remarkable MS68 1936 Wisconsin Half

**1180 1936 Wisconsin MS68 NGC.** Olive and mustard-gold peripheral tints give way to silver-gray close to the centers. Slight softness of strike on the leaves close to the badger, as usually seen, but an impressively preserved coin overall. Tied for numerically finest in the combined certified population (9/09). (#9447)

## COMMEMORATIVE GOLD

**1181 1903 Louisiana Purchase/McKinley MS66 NGC.** Scintillating luster radiates beneath the vibrant yellow-gold patina. A few wispy luster grazes do not detract. This sharply struck Premium Gem would make an excellent addition to a classic commemorative set. (#7444)

**1182 1904 Lewis and Clark MS63 PCGS.** Lustrous lemon-gold surfaces exhibit sharply struck design features. A few handling marks on each side are distributed, including an inconspicuous abrasion on Lewis' cheekbone. (#7447)

### Historical 1904 Lewis and Clark Dollar, MS64

**1183 1904 Lewis and Clark MS64 NGC.** A gorgeous lemon-yellow example of the first Lewis and Clark commemorative gold dollar, with brilliant satin luster and exceptional surfaces for the grade. This challenging gold issue is popular for its important historical connections to the Thomas Jefferson presidency and the Louisiana Purchase. (#7447)

### Lustrous 1904 Lewis and Clark Gem Gold Dollar

**1184 1904 Lewis and Clark MS65 PCGS.** The brassy-gold surfaces of this Gem take on slightly deeper shades at the margins. Both sides possess pleasing luster and exhibit well impressed design elements. A few minute marks are visible, including a light graze on the cheek of the reverse portrait. (#7447)

**1185 1905 Lewis and Clark MS62 NGC.** Strong yellow-gold luster with few abrasions for the grade. The well struck devices on this second-year Lewis and Clark dollar show slight dullness on the high points. (#7448)

**1186 1905 Lewis and Clark MS63 PCGS.** A satiny peach-gold Select commemorative that is well struck aside from selected portions of the denticles. There are no obvious abrasions. A good value relative to higher grades. (#7448)

**1187 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC.** Delicately frosted high points lend this butter-yellow Gem an aura of old-time elegance. Pleasingly preserved for a Panama-Pacific piece with an attractive strike. (#7449)

### Well Struck 1915-S Panama-Pacific Quarter Eagle, MS62

**1188** 1915-S Panama-Pacific Quarter Eagle MS62 PCGS. CAC. The number of 1915-S Panama-Pacific quarter eagles minted (including 17 assay coins) was 10,017. David Bowers (2008) indicates that 3,268 pieces, including the assay coins, were melted. Peach-gold patina resides on the lustrous surfaces of this MS62 survivor, and most of the design elements are well struck. A couple of shallow scratches are noted in the lower left reverse. (#7450)

### Frosty MS62 1915-S Pan-Pac Quarter Eagle

**1189** 1915-S Panama-Pacific Quarter Eagle MS62 PCGS. An early recycler, Mint Engraver Charles Barber reused his "defiant eagle" design from an earlier pattern for the reverse of this issue. The frosty golden-orange surfaces are lustrous, with lots of appeal for the assigned grade. A popular and in-demand commemorative gold issue. (#7450)

### Sharp 1915-S Panama-Pacific Quarter Eagle, MS65

**1190** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. The lustrous surfaces of this Pan-Pac Gem display attractive peach-gold color imbued with traces of mint-green. Sharp definition characterizes the design features, and neither side reveals marks inconsistent with the designated grade. Comes with an NGC Photo Proof. (#7450)

**1191** 1916 McKinley MS65 PCGS. Bold orange-gold luster dominates the eye appeal of this McKinley dollar. Above-average design definition and preservation complete its Gem status. Housed in a green label holder. (#7454)

### Blazing 1916 McKinley Dollar, MS67

**1192** 1916 McKinley MS67 PCGS. CAC. The 1916 McKinley Memorial gold dollars marked the second time the president had appeared on a commemorative gold piece, the first being the 1903 Louisiana Purchase-McKinley issue. This wonderful Superb Gem offers blazing surfaces that are essentially free of all distractions. Among the finest certified, save for one finer at NGC. Population: 59 in 67, 0 finer (9/09). (#7454)

### Splendid 1916 McKinley Gold Dollar, MS67

**1193** 1916 McKinley MS67 PCGS. The 1916 McKinley is a popular gold commemorative dollar that is considerably more available than the elusive 1917 McKinley, actually increasing demand for the 1916 from gold type collectors. This splendid Superb Gem offers a bold strike and beautiful orange-gold color, with no mentionable distractions save for a shallow mark at the front of the president's neck. Population: 59 in 67, 0 finer (9/09). (#7454)

---

**Finest Certified 1916 McKinley Gold Dollar, MS68**

**1194 1916 McKinley MS68 NGC.** This recently certified MS68 representative sets a new standard for McKinley dollar quality, since it is now the sole finest example in the combined certified population (9/09). The piece radiates quality from all perspectives. The frosted mint luster two characteristic vertical streaks of comparative brilliance running through the lettering on the upper reverse. Up close, the coin's impressive detail is readily apparent, as are pink and olive accents. Finally, even under magnification, flaws are virtually nil. For the collector who wants the best, there is now only one option, and this opportunity is not to be missed. (#7454)

**1195 1922 Grant No Star AU58 ANACS.** Bright yellow patina enhances the lustrous surfaces of this briefly circulated representative. Grant's hair is a trifle soft, but there are no significant marks. A desirable early gold commemorative. (#7458)

---

**Lustrous 1922 Grant With Star Dollar, MS65**

**1196 1922 Grant With Star MS65 PCGS.** Housed in a green-label PCGS holder, this Gem Grant With Star gold dollar has frosty light yellow luster, sharp design definition, and few surface marks of any consequence. The incuse Star on the obverse had no significance, and was created within the Mint for unknown reasons, to the delight of the Grant association, who had a second variety to sell for their fund raising efforts. (#7459)

---

**1922 Grant With Star Gold Dollar MS66**

**1197 1922 Grant With Star MS66 NGC.** A shimmering and essentially pristine Premium Gem that shows full design definition apart from the unavoidable slight incompleteness on the tree trunk left of the frame house window. The Star on the obverse field has no significance apart from creating an additional variety for collectors. (#7459)

---

**Attractive 1926 Sesquicentennial Quarter Eagle, MS66**

**1198 1926 Sesquicentennial MS66 PCGS.** Both sides of this Premium Gem commemorative quarter eagle display a subtle blend of peach-gold and mint-green patination and a deliberate strike imparts crisp definition to the design features. The few minuscule marks present are well within the parameters of the grade designation. (#7466)

## PROOF COMMEMORATIVE GOLD

### Important 1903 Louisiana Purchase/Jefferson Commemorative Gold Dollar, PR61

- 1199 1903 Louisiana Purchase/Jefferson PR61 NGC. David Bowers, discussing the Jefferson and McKinley gold dollars of 1903 in his *United States Commemorative Coins* reference, writes that the proofs (of which 100 were struck of each date) come on the market only infrequently, and usually only in major auctions or other important sale events. The present offering of this Jefferson example is thus an important opportunity for the commemorative gold specialist. Its yellow-gold surfaces display modest field-device contrast on the obverse, and a solid strike delivers sharp definition to both sides. The few marks scattered about are not all that bad for the numeric designation. (#7482)

## MODERN ISSUES

- 1200 1984-S Olympic Gold Ten Dollar PR70 Deep Cameo PCGS. Extraordinary contrast is presented on flawless yellow-gold surfaces with deeply mirrored fields and frosty devices. Population: 60 in 70 Deep Cameo, 0 finer (9/09).(#9616)
- 1201 1993-S Jefferson Silver Dollar PR70 Deep Cameo PCGS. The proof Jefferson silver dollar issue was struck at San Francisco, and it is one of the few instances in the modern commemorative series wherein the proof mintage does not double-up that of the uncirculated-finish issue. This PR70 Deep Cameo coin is one of only eight assigned that grade by PCGS (9/09).(#9689)
- 1202 1994-P P.O.W. Silver Dollar PR70 Deep Cameo PCGS. This flat-out flawless Prisoner of War silver dollar commemorative is one of just three PR70 Deep Cameo coins graded by PCGS (9/09), making it a strong trump for the Registry collector. A boldly appealing example of this increasingly popular issue. (#9691)
- 1203 1995-W Olympic/Torch Runner Gold Five Dollar PR70 Deep Cameo PCGS. Boldly contrasted and utterly flawless. The Torch Runner was the most popular and highest-selling five dollar gold piece struck to commemorate the Atlanta Olympics. (#9733)
- 1204 1996-P Smithsonian Silver Dollar PR70 Deep Cameo PCGS. The elegant Smithsonian silver dollar design has made it a favorite among collectors, even though "issue fatigue" at the time kept it from being a strong seller. This PR70 Deep Cameo coin, one of only six so graded by PCGS (9/09), defines black-and-white perfection. (#9743)
- 1205 1997-S Jackie Robinson Silver Dollar PR70 Deep Cameo PCGS. A boldly contrasted rendition of a dramatic scene with Jackie Robinson sliding into home plate. One of only 17 PR70 Deep Cameo examples known to PCGS (9/09).(#9758)

1206 1997-W Jackie Robinson Gold Five Dollar PR70 Deep Cameo PCGS. With just 85 coins in the ultimate grade known to PCGS (9/09), a PR70 Deep Cameo Jackie Robinson five is a Registry essential. This gorgeous specimen is sure to please. (#9760)

1207 1997-W Franklin D. Roosevelt Gold Five Dollar PR70 Deep Cameo PCGS. The president who halted American gold coinage appears on this commemorative half eagle. One of only 87 pieces assigned a perfect Deep Cameo grade by PCGS (9/09). (#9749)

1208 1998-S Black Patriots Silver Dollar PR70 Deep Cameo PCGS. PCGS has graded only 14 Black Patriots (or Crispus Attucks) silver dollars as PR70 Deep Cameo (9/09). This is one of them, profoundly mirrored with a faint suggestion of patina near the left obverse rim. (#9770)

1209 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A technically flawless example of this increasingly popular but low-mintage bimetallic commemorative issue. Comes with original box and slipcase. (#9784)

1210 2000-W Library of Congress PR70 Deep Cameo PCGS. A perfect proof example of the only bimetallic issue in the modern commemorative series. This piece has deeply mirrored fields and lustrous devices. (#99784)

## MODERN BULLION COINS

1211 1988-S Silver Eagle PR70 Deep Cameo PCGS. This perfect proof silver eagle shows the popular Walking Liberty design to its full advantage, with brilliant and untoned silver surfaces and stunning contrast. Population: 58 in 70 Deep Cameo, 0 finer (9/09). (#9817)

1212 1994-P Silver Eagle PR70 Deep Cameo PCGS. Profoundly reflective in the fields with beautiful diamond-frost across the devices. The eye appeal is that of sharp perfection. One of just 37 coins so graded by PCGS (9/09). (#9877)

1213 1995-P Silver Eagle PR70 Deep Cameo PCGS. This impeccable proof has intense contrast produced through a combination of snow-white devices and jet-black fields. Population: 66 in 70 Deep Cameo, 0 finer (9/09). (#9896)

### 1995-W American Eagle 10th Anniversary Proof Set

1214 Five-Piece Gold Eagle 10th Anniversary Proof Set Including 1995-W One-Ounce Silver. This lot includes the outer box, velvet case, inner booklet, and five uncertified coins in their plastic capsules. Each coin has been carefully preserved, exhibiting bold contrast and incredible aesthetic appeal. Patterned after the Saint-Gaudens double eagle and the Walking Liberty half dollar, the designs are perennial favorites. The proof 1995-W American Eagle proof silver dollar is the star of the set, accompanied by the one-ounce, half-ounce, quarter-ounce, and tenth-ounce proof gold eagles. (Total: 5 coins) (#9887)

1215 1996-P Silver Eagle PR70 Deep Cameo PCGS. Simple perfection with flawless contrast. The mirrors are infinitely reflective on this 1996-P silver American Eagle. One of just 88 coins so graded by PCGS (9/09). (#9910)

**1216** 1997-P Silver Eagle PR70 Deep Cameo PCGS. Boldly appealing with nary a flaw visible on either side. The contrast is absolute. This specimen is one of 90 pieces so graded by PCGS (9/09). (#9913)

**1217** 1999-P Silver Eagle PR70 Deep Cameo PCGS. An incredible perfect proof example, the deeply mirrored fields and frosty devices create an unimprovable deep cameo appearance on both sides. Population: 84 in 70 Deep Cameo, 0 finer (9/09). (#9948)

**1218** 2000-P Silver Eagle PR70 Deep Cameo PCGS. Peerless preservation and fantastic mirrors. This is one of just 50 2000-P silver American Eagle proofs granted a PR70 Deep Cameo grade by PCGS (9/09). (#99949)

**1219** 2005 One-Ounce Gold Eagle MS70 NGC. Careful inspection with a strong lens cannot locate even a single planchet flake on the shimmering surfaces of this outstanding modern gold bullion coin. (#9979)

**1220** 2006 One-Ounce Gold Eagle MS70 PCGS. A spectacular honey-gold representative without the minute strike-throughs often seen on high grade examples of this widely pursued type. The surfaces appear perfect even upon inspection beneath a powerful loupe. (#89988)

**1221** 2006 One-Ounce Gold Eagle MS70 NGC. The popular design gold American Eagle is offered here in perfect MS70 grade, considered perfect quality, and indeed it is. (#89984)

**1222** 2006 One-Ounce Gold Buffalo MS70 NGC. NGC First Strike designation. A technically flawless example of this popular one-ounce gold Buffalo issue. The series is coined in pure gold, providing an alternative to the coin-alloy American Eagles that might be more attractive to international collectors. (#9999)

**1223** 2006-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC. Technically flawless with absolute contrast. The textured fields are remarkably reflective, the perfect counterpoint to the thick but fine frost on the devices. (#9990)

**1224** 2008 One-Ounce Gold Buffalo MS70 PCGS. PCGS designated First Strike. A magnificent sun-gold example that combines coruscating luster with immaculate preservation. Unlisted in the 2010 Guide Book, which only displays those issues that bear the West Point mintmark. (#393327)

**1225** 2007-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. An utterly flawless representative of the largest denomination struck by the United States. The contrast between the mirrors and the frosted devices is absolute. A one-year type, as are all post-1997 proof platinum eagles. (#149579)

**1226** 2007-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. The one-year Executive Branch reverse, with a close-up of an eagle behind a shield, wings spread. This gleaming proof has immaculate surfaces and unsurpassable eye appeal. (#149579)

**1227** 2008-W One-Ounce Platinum Eagle MS70 NGC. An immaculate representative of this low mintage single year type. Fully struck and undisturbed with a mere whisper of chestnut toning. (#393084)

**1228** 2009 Ultra High Relief MS70 PCGS. An outstanding example with satiny concave fields and needle-sharp high relief devices. Unimprovable in quality, and a highly popular single year gold type. (#407404)

**1229** 2009 One-Ounce Gold Eagle MS70 NGC. A flawless representative with satiny straw-gold surfaces. This bullion gold type is always popular when encountered in the ultimate numismatic grade. (#404442)

## COINS OF HAWAII

**Elusive 1847 Hawaii Cent, Medcalf 2-CC1  
MS64 Brown, Second Rarest Die Variety**

**1230** 1847 Hawaii Cent MS64 Brown PCGS. CAC. Medcalf 2CC-1, with crosslet 4 in the date and 18 berries on the reverse, considered the second rarest die variety. A berry is centered below the right side of the W. The Crosslet 4, 18 Berries is the second most difficult of six die marriages used on these interesting Hawaiian cents, trailing only the elusive Plain 4, 15 Berries 7x8. This is a pleasing, pristine near-Gem piece with considerable muted red on each side, in spite of the Brown designation. The surfaces are also remarkably free from carbon, which should make this coin especially interesting to the specialist. (#10965)

**1231** 1883 Hawaii Ten Cents MS63 PCGS. A whisper of gold toning denies full brilliance, but this boldly struck and lustrous representative lacks obvious marks and exudes impressive eye appeal. (#10979)

**1232** 1883 Hawaii Quarter MS66 PCGS. CAC. Gold and blue-violet peripheral toning gives way to near-brilliant centers on this astounding Premium Gem. Excellent definition and stunning eye appeal. PCGS has graded just 12 coins finer (9/09). (#10987)

**1233** 1883 Hawaii Half Dollar MS63 PCGS. A sizeable hoard of Hawaii quarters has made that denomination fairly plentiful, but the hapalua or half dollar is elusive, as are the umi keneta (dime) and dala (silver dollar). Original blended golden-brown and cream-gray toning adorns satiny and sharply impressed surfaces. PCGS has graded 64 finer examples (9/09). (#10991)

### Desirable 1883 Hawaii Dollar, MS63

**1234** 1883 Hawaii Dollar MS63 PCGS. A gorgeous Asahi Dalai as the Hawaiian dollar is known, with satiny luster beaming through deep gray-brown, blue-violet, and iridescent toning. No readily apparent abrasions or imperfections are evident on either side of this splendid piece. Population: 14 in 63, 33 finer (9/09). (#10995)

## ERRORS

### Impressive Double Struck 1904 Indian Cent, XF45

**1235 1904 Indian Cent—Double Struck, Second Striking 30% Off Center—XF45 NGC.** The second strike is widely off center toward 10:30, at 10 o'clock relative to the first strike. The dates from both strikes are clear and complete. The obverse is golden-brown, and the reverse has slightly deeper steel-gray toning.

**1236 1990 Lincoln Cent—Struck on a Struck Dime—MS64 PCGS.** A bold and intriguing 11 cents error. The cent obverse shows the dime's reverse as an undertype, and vice versa. The date of the dime is not given on the holder, yet more digits of that date are discernible than there are on the cent.

### 2001 Cent Struck on a 2001-P Dime MS67, Double Denomination

**1237 2001 Lincoln Cent—Struck on a 2001-P Dime—MS67 NGC.** A lustrous double denomination error with delicate tan toning and no indication of abrasions. The dime mintmark and the first three digits of its date are readily apparent. Roosevelt gazes south relative to the portrait of Lincoln. A wonderful 11-cent piece.

**1238 1920 Buffalo Nickel—Partial Collar Strike—MS66 PCGS.** To the untrained eye, this appears to be merely a high grade Buffalo nickel with vibrant luster and chestnut-gold and olive toning. However, the reverse is fully struck, unheard of for a business strike, the TY in LIBERTY show distortion from metal flow toward the rim, and the reverse rim is much wider at 3 o'clock than is the obverse rim at the same location.

**1239 1991-P Jefferson Nickel—Struck on a Struck Cent—MS62 Red and Brown NGC.** A previously struck cent entered a press striking nickels and received an overimpression. The columns of the Lincoln Memorial appear as "bars" on the portrait of Jefferson, and suggestions of the curves in Lincoln's portrait appear on and around Monticello. The date of the cent undertype has been obliterated.

## PROOF SETS

**1240 Five-Piece 1936 Proof Set PR64 to PR66 PCGS.** The cent is the Brilliant or Type Two variety, graded PR64 Red and Brown, and mostly red; the nickel is the Satin or Type One variety, graded PR66, with splashes of champagne over its light blue proof surfaces; the dime is PR65, fully brilliant with untoned surfaces; the quarter is PR65, similarly brilliant with untoned silver surfaces; and the half dollar grades PR65, also brilliant and untoned. (Total: 5 coins)

**1241 Five-Piece 1942 Proof Set PR64 to PR66 PCGS.** Includes the cent, PR64 Red Cameo, a surprising piece with bold contrast in copper-orange; the Type 1 nickel, PR65, faint golden patina and pleasing preservation; the dime, PR65, pale silver-gray toning overall and strong mirrors; the quarter, PR66, generally light silver-gray with peripheral golden-tan and sage elements; and the half, PR64, which has toning similar to the quarter's.

## MINT SETS

**1242 1947 PDS Mint Set.** This 28-piece Mint Set is packaged in the original green cardboard holders. There are two examples of each regular-issue coin from the three mints. The San Francisco holder lacks half dollars as they were not produced at this facility in 1947. The coins appear to grade between MS61 and MS64 and are lightly to moderately toned. (Total: 28 coins)

**1243 1947 PDS Mint Set.** The 28-piece mint sets distributed in 1947 marked the beginning of the modern mint set era, and as such, they are highly prized today when found intact. The present set is remarkable, with lightly toned pieces that appear to be of uniformly Gem quality or possibly even higher. Housed in the now-famous green cardboard holders and an outer kraft envelope. (Total: 28 coins)

**1244 1948 PDS Mint Set.** Aside from the 1948-S half, which was not struck, this double set contains representatives of all the denomination and mint combinations for 1948. Coin condition ranges from Select to pushing Superb Gem territory. Patina is variable; cents run the spectrum of Red and Brown possibilities, and the other coins have toning ranging from mild to heavy. Comes in the green cardboard holders with outer envelope. (Total: 28 coins)

**1245 1949 PDS Mint Set.** A double set of all 1949 circulation-strike coins, which includes all five denominations at all three mints excepting the 1949-S quarter. Condition ranges from Select to Gem or a little better; cents are Red and Brown and the nickel and silver pieces have moderate to heavy peripheral toning. Comes in green cardboard holders with manila mailing envelope. (Total: 28 coins)

## GSA DOLLAR

**1246 1881-CC GSA Hoard MS66 NGC.** Fantastically lustrous and largely silver-white with just a blush of peripheral peach toning. Both sides are sharply struck and carefully preserved. Band-certified in the original black holder, but without accompanying box or certificate. (#407126)

## PATTERNS

Popular 1850 Three Cent Pattern  
Judd-125 Original, PR62

1247 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR62 PCGS. The design for this three cent silver is similar to the famous Judd-67 gold dollar pattern from 1836, but the date has been moved to the obverse below the cap, and the denomination within the palm frond is expressed with a large Roman numeral III. Struck in silver with a plain edge. This popular design was executed by Franklin Peale from designs by James Longacre. The fields are bright and exude silvery flash while the devices are surrounded by deep gray-russet toning. (#11536)

1854 Original Flying Eagle Cent Pattern, Judd-164  
PR66 Brown

With Bronze Metallurgical Composition Specified

1248 1854 Flying Eagle Cent, Judd-164 Original, Pollock-189, R.5, PR66 Brown NGC. The hook-necked flying eagle design is surrounded by stars and the date below. The reverse closely resembles the regular dies issue for the large cent, although the wreath and letters are smaller, as is the diameter. Struck in a bronze composition and specified exactly on the insert as: 93% copper, 6% tin, and 1% zinc. The piece weighs 95.5 grains (also on the insert), which places it in the range for original strikings (90 to 100 grains), while restrikes are in the 113-grain range. Plain edge. The surfaces show even deep brown and blue patina with nicely reflective fields and sharply struck devices. There are no mentionable defects on either side. (#11678)

1855 Hooked-Neck Eagle Pattern Cent, PR64 Brown  
Judd-168 Original, With Exact Metallurgical Composition

1249 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR64 Brown PCGS. A flying eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar to a large cent. Struck in 94% copper, 5.1% tin, and 1% zinc (as indicated on the insert) with a plain edge. The piece also weighs 91.82 grains. Sharply struck with variegated medium and darker brown patina. The dies are prominently clashed, and a couple of small spots are noted. (#11720)

Copper-Nickel 1855 Flying Eagle Cent, PR64  
Judd-170a, 89% Copper, 11% Nickel

1250 1855 Flying Eagle Cent, Judd-170a, R.8, PR64 PCGS. Thirteen stars surround an eagle that is flying slightly upward, similar to the Christian Gobrecht/Titian Peale flying eagle design for the Gobrecht dollars but with a longer, curved neck to the eagle. The date 1855 is below with slanted 5s, and the reverse is similar to the large cent. The planchet is slightly smaller than the large cent, but larger than the famous 1856 Flying Eagle cent. Struck with a plain edge in an alloy of 89% copper and 11% nickel, per the PCGS insert. The piece weighs 98.76 grains. Significant amounts of red are seen on each side with light blue interspersed. Light die clashing is seen on both obverse and reverse. (#62428)

German Silver 1855 Flying Eagle Cent Pattern  
Judd-171A, PR53

1251 1855 Flying Eagle Cent, Judd-171A, Pollock-196, Low R.7, PR53 NGC. An eagle flying left dominates the obverse, 13 stars are arranged around the periphery, the date 1855 is below. On the reverse, the denomination ONE CENT is centered within a laurel wreath, UNITED STATES OF AMERICA is at the border. The NGC insert shows this piece to be struck in a mixture of 68% copper, 17% nickel, and 15% zinc (a variant of German silver). The weight is also given as 116.3 grains. Plain edge. The devices are softly struck on each side, and die clashing is also evident. Muted gray-golden color. (#11737)

Rare Snow-PT20 Judd-202 Variant  
1858 Flying Eagle Cent, PR62

1252 1858 Flying Eagle Cent, Judd-202, Pollock-246, R.7, PR62 NGC. CAC. Snow-PT20. The rare subvariety of Judd-202 (R.5 overall) with six-leaf clusters in the wreath. Most examples of this scarce pattern are Pollock-245 with five-leaf clusters. This is the Paquet rendition of the Flying Eagle cent, noted for its small eagle and tall, thin lettering. Struck in copper-nickel with a plain edge. Flashy and well struck with unmarked and minutely granular sun-gold fields. (#11867)

Choice Proof Judd-212 1858 Indian Cent

1253 1858 Indian Cent, Judd-212, Pollock-263, R.4, PR64 PCGS. Snow-PT25. Similar to the Indian Cent design as issued in 1860, but with a broad, ornamented shield at the top of the reverse. Struck in copper-nickel with a plain edge. The centered date, broad bust point Pollock/Snow variant of Judd-212. This well struck near-Gem has bright gold color along the margins and mellowed tan hues in the centers. A hint of obverse carbon prevents a finer grade. Housed in a green label holder. Population: 39 in 64, 9 finer (9/09). (#11895)

1859 'French Head' Design Half Dollar  
Judd-238, PR63 Brown

1254 1859 Half Dollar, Judd-238, Pollock-294, R.5, PR63 Brown NGC. The obverse shows Liberty facing right with laurel and vine in her hair. A ribbon below her bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date below. The reverse has an agricultural wreath around the denomination HALF DOLLAR. The wreath contains various products of the nation's farmers, including corn, wheat, cotton, tobacco, and sugar cane. Struck in copper with a reeded edge. This is the so-called "French Head" of Liberty. More than 30 pieces are believed to exist today in copper. Deep brown patina covers each side, and there are only a few contact marks visible. (#11968)

1255 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR60 ANACS. Longacre's "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse has 1/2 DOLLAR in the center and is surrounded by a wreath of cotton, tobacco, corn, sugar cane, wheat, and oak. Struck in silver with a reeded edge. Remnants of the original proof surface can still be seen beneath the deep gray toning of this piece. The surfaces are noticeably hairlined, accounting for the grade. (#11972)

Pleasing 1859 'French Head' Half  
Judd-240, PR62 Brown

1256 1859 Half Dollar, Judd-240, Pollock-296, R.5, PR62 Brown PCGS. The so-called "French Head" design, paired with a larger scale version of the dime "cereal wreath" reverse. Tall letters in UNITED STATES OF AMERICA are consistent with Paquet's style, although the portrait is attributed to Longacre. Struck in copper with a reeded edge. While deep mahogany and walnut tones prevail on this lightly hairlined specimen, a degree of faded reddish-orange is also present near the rims. (#11974)

Appealing 1863 Bronze Cent Pattern  
Judd-299, PR65 Red and Brown

- 1257 1863 One Cent, Judd-299, Pollock-359, R.3, PR65 Red and Brown PCGS. CAC. Snow-PT1. Medal alignment. From regular issue dies, but struck in bronze with a plain edge. A transitional pattern for the 1864 bronze No L regular issue. Excellent surface quality and eye appeal with unusually flashy fields for a bronze coin. While much of each side shows tan to brown color, considerable bright copper-orange remains as well. (#70454)

Desirable PR65 Cameo Judd-470  
Washington Head 1866 Five Cent

- 1258 1866 Five Cents, Judd-470, Pollock-562, Low R.6, PR65 Cameo NGC. On the obverse, a bust of George Washington faces right, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses the so-called Short 5 with the legend UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. The Judd-470 and related patterns are popular, not only with pattern enthusiasts but also Washingtonia collectors. This faintly peach-toned Gem has strong mirrors and attractive contrast. (#60666)

Rare 1866 Judd-491 Five Cent Pattern, PR64 Brown

- 1259 1866 Shield Five Cents, Judd-491, Pollock-578, Low R.7, PR64 Brown PCGS. Five-cent pattern with an obverse similar to the adopted Shield nickel design, but the reverse features a "Dutch" numeral 5 inside a laurel wreath. Struck in copper or bronze with a plain edge. An important pattern variety with less than a dozen known. This example has hints of lilac patina over medium to dark brown toning. (#60687)

Seldom-Seen 1866 Five Cent Pattern in Copper  
Judd-495, PR64 Brown, Ex: Farouk

- 1260 1866 Shield Five Cents, Judd-495, Pollock-582, High R.7, PR64 Brown NGC. The obverse design features the familiar heraldic shield with arrows, cross, and laurel branches. The shield is low in the field and divides the date 18-66. The motto IN GOD WE TRUST is engraved in small letters above the shield. The reverse shows a short numeral 5, centered in a thick laurel wreath, with the legend UNITED STATES OF AMERICA around. Struck in copper with a plain edge.

The Act of May 17, 1866 authorized a new five cent coin. Many patterns were devised in the search for a new coin design. The present example displays the Union Shield obverse, similar to the design used on the two cent coin of 1864. This design closely resembles the obverse adopted for business strikes, which began to appear in the summer of 1866.

This coin boasts an illustrious pedigree, appearing in some of the most important collections of the 20th century. The issue is extremely rare, and years often pass between auction appearances.

The present coin has a strong strike, with crisp detail in all devices. The reflective fields are accented by attractive shades of crimson and electric blue toning. The surfaces have relatively few handling marks for the grade, and eye appeal is excellent. A few small handling marks on the loop of the 5 provide a pedigree marker. Census: 3 in 64 Brown, 0 finer (9/09). PCGS has graded two pieces finer, both 65 Brown.

Ex: J. Brenner; F.C.C. Boyd; King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1800; Hirt (Pine Tree, 11/1975), lot 249; Auction '84 (Superior, 7/1984), lot 492; The Lemus Collection, Queller Family Collection Part Two (Heritage, 1/2009), lot 1660. (#60691)

Judd-606 1868 Cent, PR64 Brown

**1261** 1868 One Cent, Judd-606, Pollock-671, Low R.7, PR64 Brown PCGS. The obverse is similar to that of the issued three cent nickel. The reverse bears the wreath of the issued three dollar gold piece. The denomination is expressed on the reverse as a single plain Roman column. Struck in copper with a plain edge. Richly toned in rose-red and forest-green shades with well struck and unblemished surfaces. Ex: Long Beach Signature (Heritage, 9/2005), lot 4194. (#60818)

Exceptional 1868 Five Cent Pattern in Nickel  
Judd-633, PR66 Cameo

**1262** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR66 Cameo NGC. This pattern for a five cent nickel is similar to the regular design for the three cent nickel as introduced in 1865, with the obverse similar to the three cent nickel obverse but larger, with a prominent star on Liberty's coronet. On the reverse, a laurel wreath is topped with a small Maltese cross. A ribbon with IN GOD WE TRUST wraps beneath the cross, and the whole ensemble surrounds a large V in the center, again paralleling the regular three cent issue. Struck in nickel with a plain edge. This is the High Date subvariety of this pattern, with the date equidistant between the denticles and bust truncation. The devices are sharply struck for a nickel pattern, and the brilliant surfaces show strong contrast between the fields and devices. (#860851)

Brilliant 1869 Standard Silver Half  
Judd-742, PR62

**1263** 1869 Standard Silver Half Dollar, Judd-742, Pollock-823, R.5, PR62 PCGS. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" can be seen within the folds of the ribbon at the back of the cap, and pronounced doubling is seen on the motto IN GOD WE TRUST. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. The piece is brilliant throughout and shows noticeable hairlines, and there is also a significant amount of contrast between the fields and devices. (#60969)

Difficult PR64 Judd-831 1870 Dime

**1264** 1870 Ten Cents, Judd-831, Pollock-921, High R.6, PR64 NGC. William Barber's Seated Liberty motif. Liberty clutches an olive branch and supports a Federal shield with a Liberty pole behind her. The reverse is the regular-issue Seated dime design. Struck in silver with a reeded edge. Both sides of this near-Gem boast mirrored fields. A trace of champagne toning adds to the overall aesthetic appeal of this piece. Census: 3 in 64, 5 finer (9/09). (#61075)

Flashy 1870 Standard Silver Ten Cents  
Choice Proof Judd-837

**1265** 1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR64 NGC. The obverse features a bust of Liberty right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with three stars. On the reverse, the denomination 10 CENTS and the date 1870 are crowded inside a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a reeded edge. Dappled caramel-gold patina visits this flashy and sharply impressed near-Gem. A couple of minute strike-throughs near the 0 in 10 will identify the present specimen. (#61081)

Judd-957 1870 Standard Silver Half, PR62

1266 1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR62 PCGS. Incorrectly certified by PCGS as Judd-987. Liberty faces right, surrounded by UNITED STATES OF AMERICA. LIBERTY is inscribed on the headband, and a large star is on her forehead. A scroll below contains IN GOD WE TRUST. The reverse features 50/CENTS/1870 within a wreath of cotton and corn, tied with the usual bowknot. STANDARD is centered above the wreath. Struck in silver with a reeded edge. Golden-brown overall with a blush of ice-blue on Liberty's neck. Sharply struck and pleasing for the designated grade. (#61203)

Attractively Toned 1873 Trade Dollar Pattern  
Judd-1293, PR62

1267 1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR62 PCGS. The design is similar to the issued Trade dollar, but Liberty's left hand rests on a globe, right hand holds a staff, and plow handles are behind the globe. On the reverse, the banner bearing E PLURIBUS UNUM is clutched by the eagle's beak, which also clutches a Federal shield in place of the usual olive branch. Struck in silver with a reeded edge. Both sides have natural and lovely medium gray surfaces with considerable gold toning on the obverse and deeper blue on the reverse. The fields are bright and provide a light cameo contrast. The grade is limited by light hairlines on each side. (#61578)

Popular 1879 Metric Dollar, Judd-1617, PR62  
DEO EST GLORIA

1268 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR62 PCGS. This William Barber design features a bust left of Liberty on the obverse. She wears a coronet inscribed LIBERTY. The reverse displays an agricultural wreath and the uncommon motto DEO EST GLORIA within a scrollwork. The cumbersome goloid alloy is listed within a beaded circle. Struck in goloid with a reeded edge. Fully struck and flashy with faint gold obverse toning. The reverse displays medium steel-blue and golden-brown shades. Population: 28 in 62, 31 finer (9/09). (#61995)

Intriguing PR45 1879 Metric Dollar, Judd-1618

1269 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR45 NGC. William Barber's Metric Dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above, all surrounding the elemental composition of goloid. Presumably struck in silver, rather than goloid, with a reeded edge. Probably carried as a pocket piece for a couple of years, rather than actually circulating in the channels of commerce. Slight friction is seen over the high points, and the surfaces have golden-gray toning overall. (#61996)

## GOLD DOLLARS

1270 1849 Open Wreath MS64 NGC. CAC. Breen-6004. The R in DOLLAR is repunched, as is the E in UNITED. TAT is widely spaced. Such minor engraving mistakes may have sped the introduction of the Closed Wreath subtype. This is a sharply struck and lustrous first-year near-Gem with a well preserved reverse and only a few inconsequential obverse field grazes. (#7502)

1271 1849 Open Wreath MS64 NGC. Breen-6001. The lustrous surfaces of this near-Gem give off a greenish-gold cast. This well struck piece reveals just a few minor grade-defining marks. (#7502)

1272 1851 MS64 PCGS. This lovely yellow-gold near-Gem has exquisitely smooth fields and unabraded devices. Meticulously struck save for minor softness on the center of the date. Mintages of gold dollars were high during this era, to replace hoarded silver coinage. (#7513)

Amazing 1851 Gold Dollar, MS66

1273 1851 MS66 PCGS. CAC. An amazing Premium Gem with frosty luster and lovely green-gold surfaces, deeper at the borders. Faint orange toning adds to the eye appeal of this wonderful jewel. Type One gold dollars of any date are particularly rare in grades above the Gem level. Population: 22 in 66, 9 finer (9/09). (#7513)

---

Charming MS61 1851-C Dollar

1274 1851-C MS61 ICG. Variety 1. Brightly lustrous and attractive with radiant sun-gold surfaces that show glimpses of peach and orange. Strongly struck for the issue with only slight softness at the hair below the coronet. Though wispy abrasions are present on each side, overall eye appeal is better than the MS61 designation might suggest. (#7514)

1275 1851-D AU53 NGC. Variety 3-D. The rarer of the two die marriages known for this challenging Dahlonega issue. Unabraded aside from a thin mark above the portrait. The central reverse is boldly clashed. In a prior generation holder. Only 9,882 pieces were struck. (#7515)

1276 1853-O MS63 PCGS. Rich orange-gold patina displays splashes of grayish-green and a well executed strike imparts strong definition to the design features. Light handling marks, more so on the reverse, limit the grade. Population: 60 in 63, 40 finer (9/09). (#7524)

---

Attractive 1854 Type Two Gold Dollar, MS62

1277 1854 Type Two MS62 PCGS. CAC. The year 1854 saw a change from the Liberty Head to the Indian Princess Head gold dollar. Rich orange-gold and mint-green colors bathe both sides of this example, each of which possesses nearly full luster. The design elements are sharply struck, heightening the overall eye appeal. A few minute obverse contacts are noted, as are light clash marks. (#7531)

1278 1855-O XF45 NGC. Dusky orange-gold surfaces remain warmly lustrous. Wear is concentrated at the high points, most noticeably on Liberty's brow, but abrasions are few. Strong eye appeal for the grade.

From The Mulkin Collection. (#7535)

1279 1856-S Type Two AU50 PCGS. FS-501. The mintmark is widely repunched. A normal mintmark variety is also known. Of greater interest to San Francisco collectors is the Type Two design of Liberty, available from this mint only on the '56-S, which is considerably scarcer than its 1854 and 1855 Type Two predecessors. Well struck with smooth, luminous peach-gold surfaces. Housed in a green label holder. (#7536)

1280 1859-C—Improperly Cleaned—NCS. AU Details. Variety 1. Green-gold aside from rose-red tints throughout the obverse legend. Well struck aside from the central reverse, which has a few soft letters and a small pellet-shaped strike-through. Both sides are moderately hairlined. A mere 5,235 pieces were struck. (#7552)

---

Lovely Mint State 1859-D Gold Dollar

1281 1859-D MS61 NGC. Ex: Browning. Variety 11-N, with the 9 in the date under the left side of the A in DOLLARS. This issue is among the most frequently encountered D-mint Type Three gold dollars, along with the 1858-D. The average certified survivor, however, only grades AU or so; Mint State pieces are rare. This specimen offers far fewer obverse abrasions than might be expected for the grade, with lovely yellow-gold surfaces. The strike is superior, showing minor weakness only on the 5 in the date and OLL. Census: 9 in 61, 22 finer (9/09). (#7553)

1282 1862 MS64 PCGS. This yellow-orange near-Gem has a powerful strike, sweeping luster, and an unmarked appearance. The 1862 has a higher mintage than all other dates from its decade combined, undoubtedly due to Civil War fiscal turmoil. Housed in a green label holder. (#7560)

---

Wonderful 1862 Gold Dollar, MS67  
A Superb Civil War-Era Coin

1283 1862 MS67 PCGS. The U.S. Mint tried vainly to keep coins in circulation in 1862, as the hostilities between North and South made the outcome of the "great conflict" increasingly in doubt. Silver and gold coins disappeared first, and by July 15 even Indian Head cents had vanished from circulation. The Mint pumped out more than 1.3 million gold dollars, but most of them were hoarded, to reappear only decades later, if at all. The present coin is one of the finest dozen or so certified at NGC and PCGS combined, save for a single MS68 NGC coin. The lustrous obverse is remarkably free of even the smallest abrasions, although some apparent die-filling shows on the C of AMERICA. The reverse is equally pristine and boldly struck; the date is remarkably sharp despite its tiny size (1862-dated coins have some of the smallest dates in the U.S. series). A wonderful memento of the Civil War. Population: 4 in 67, 0 finer (9/09). (#7560)

---

### Delightful 1865 Gold Dollar, MS66

1284 1865 MS66 NGC. The 1865 has one of the lowest mintages of the Indian Princess Head type (3,725 circulation strikes). It is rare in all grades; in fact, NGC and PCGS have certified only about 80 coins, a number of which are resubmissions or crossovers. Frosty luster embraces both sides, each of which is impeccably preserved, and a decisive strike leaves bold imprints on the design features. Census: 4 in 66, 2 finer (9/09). (#7564)

1285 1869 MS63 NGC. A brightly lustrous Select piece with pale golden color. Strong eye appeal for the Select designation, much of it thanks to a solid strike. Census: 13 in 63, 18 finer (8/09). (#7568)

---

### Gleaming 1873 Closed 3 Gold Dollar, MS63

1286 1873 Closed 3 MS63 PCGS. With a commonly cited mintage of just 1,800 business strikes, this variety of the 1873 gold dollar is far more elusive than its Open 3 counterpart. This gleaming Select piece is generally yellow-gold with a patch of orange alloy between UNITED and STATES. Population: 11 in 63, 9 finer (9/09). (#7574)

---

### Beautiful 1874 Gold Dollar, MS67

1287 1874 MS67 PCGS. The 1874 issue is one of the most common dates for gold dollars, with several thousand pieces having been certified by PCGS and NGC. Superb Gems such as the current offering are another matter entirely, as the two services have seen fewer than 80 specimens in this grade. Beautiful frosty luster endows its impeccably preserved brass-gold surfaces. The design elements exhibit sharp definition except that only the L of LIBERTY shows, a standard characteristic of the issue. Jeff Garrett and Ron Guth (2006) attribute this to die deterioration. Population: 33 in 67, 0 finer (9/09). (#7575)

---

### Exquisite Superb Gem 1874 Gold Dollar

1288 1874 MS67 NGC. While 1874 is better known as a type year for the three dollar gold denomination, Philadelphia also produced a post-1862 high mintage of gold dollars. This Superb Gem is decisively struck with rose accents visible on otherwise yellow-gold surfaces. Lustrous and pristine with incompleteness of strike only on the U in UNITED. Census: 43 in 67, 10 finer (9/09). (#7575)

---

### Superlative 1874 Gold Dollar, MS67

1289 1874 MS67 NGC. A well preserved and thoroughly lustrous representative of this Longacre-designed gold type. Boldly struck overall despite minor incompleteness on the 8 in the date. The final date with a mintage of more than 30,000 pieces, since paper dollars were more convenient in commerce than the easily lost gold dollar. Census: 43 in 67, 10 finer (9/09). (#7575)

---

### Impressive MS66 1878 Gold Dollar

1290 1878 MS66 NGC. An issue that is seldom offered as a Premium Gem, the 1878 (3,000 business strikes produced) is the rarest post-1875 gold dollar after the 1876. The finish is semiprooflike, as expected for a low-mintage gold dollar from the late 1870s, and the devices display pinpoint striking definition in all areas. The reddish-gold surfaces reveal slight counterclockwise die rotation. A few faint lines on each side appear at first glance to be pinscratches, but we believe them to be as struck. Census: 6 in 66, 2 finer (9/09). (#7579)

---

Outstanding 1879 Gold Dollar, MS66

1291 1879 MS66 PCGS. The demand for a dollar coin in 1879 was more than satisfied by the huge mintage of Morgan silver dollars, resulting in the low coinage of gold dollars (3,000 business strikes). Yet they were saved in large quantities, accounting for the relatively high number surviving through the Gem level. Premium Gems are quite scarce, however, and finer specimens are extremely rare. Variegated apricot-gold and mint-green patina accented with tints of lilac jumps out at the observer of this stunning MS66 example. Dazzling luster exuding from mark-free surfaces further heightens the coin's eye appeal. Most of the letters in LIBERTY show; this is significant, as they are often entirely absent on surviving specimens. This piece, encapsulated in a green label holder, will draw serious attention from aficionados of gold coinage. Population: 37 in 66, 2 finer (9/09). (#7580)

---

Memorable MS68 1885 Gold Dollar

1292 1885 MS68 NGC. This is a marvelous Type Three gold dollar in virtually the highest numeric grade known for the issue (save for eight wonder coins that NGC has certified MS69). MS68 is the finest grade known for the 1885, and this piece is one of four so certified at NGC (9/09). The canary-yellow surfaces of this amazing piece are memorably smooth, and a few raised die polishing die lines are seen near RIC on the obverse. The fields are bright and semireflective on each side. The reverse shows light clash marks. (#7586)

1293 1889 MS65 NGC. A flashy and pinpoint-sharp yellow-gold Gem that has been well cared for since the day of its coinage. 1889 was the final year of the series but not the gold dollar denomination, since it was resumed for several commemorative issues. (#7590)

1294 1889 MS65 PCGS. This peach-gold beauty is fully struck and appears immaculate save for trivial field grazes near the denomination. The ribbon is die doubled south, diagnostic for business strikes of this much-saved series-ending date. (#7590)

---

PROOF GOLD DOLLAR

Immaculately Preserved 1883 Gold Dollar  
PR67 Cameo

1295 1883 PR67 Cameo NGC. The mintage for proof gold dollars from this year was 207 pieces, but examples are not significantly more available than those from the previous year, when only 125 proofs were coined. While no hard and fast die characteristics are known for proofs versus first-strike coins intended for circulation, this piece shows the orange-peel surface always seen on proofs. Each side is wonderfully preserved and there are no reportable contact marks, nor would one expect to see any on a Superb Gem. The devices are noticeably frosted and provide strong contrast against the deeply reflective fields. One of the finest examples known of this late-date gold dollar. Census: 5 in 67 Cameo, 0 finer (9/09). (#87633)

---

## CLASSIC QUARTER EAGLES

- 1296 1836 Script 8 AU55 PCGS. Head of 1835, Breen-6143, McCloskey-D, R.2. Luster fills the borders and devices of this honey-gold Classic type coin. Unmarked and slightly subdued with the usual moderate inexactness of strike at the centers. (#7694)
- 1297 1839-C AU50 NGC. Breen-6150, McCloskey-C, Variety 2, R.4. The 39 in the date is repunched. This is the scarcest variety for the year, and Winter (2008) estimates that only 4,860 pieces were struck. Pleasing olive-gold patina covers both sides. The stars and the top left corner of the shield are a trifle soft, as often seen. There are no marks of any significance. An outstanding example. From The Mulkin Collection. (#7699)
- 1298 1839-O—Improperly Cleaned—NCS. AU Details. Low Date, Close Fraction, Breen-6153, McCloskey-B, R.4. Struck in medal turn. Bold central detail with weakness of certain stars, the yellow-gold surfaces bright from a past cleaning. Still, a readily collectible example of the first gold issue struck at New Orleans. From The Mulkin Collection. (#7701)

### High Date AU 1839-O Quarter Eagle

- 1299 1839-O AU50 PCGS. High Date, Wide Fraction, Breen-6152, McCloskey-A, R.3. The sole New Orleans Classic quarter eagle issue, and thus essential to a gold type set from the Louisiana facility. Just 17,781 pieces were struck, and two die marriages are known. The present example is nicely struck and has a hint of wear on the eyebrow, bust truncation, and wingtips. The luminous, subdued fields are minimally abraded. (#7701)

## LIBERTY QUARTER EAGLES

### 1840-C Quarter Eagle, AU53 First Year of the Redesigned Obverse

- 1300 1840-C AU53 NGC. Variety 1. The redesigned Liberty Head quarter eagles replaced the short-lived Classic Head coins in 1840, making them first-year type coins. The Charlotte production was only 12,882 pieces. This piece shows some of the typical planchet roughness of the issue. A small scrape appears above Liberty's eye, along with a few moderate obverse marks elsewhere. The reverse of this orange-gold piece is free of major marks, although some strike weakness is noted on the peripheral letter tops. Census: 18 in 53, 68 finer (9/09). (#7718)

### Scarce 1844-C Quarter Eagle, AU50

- 1301 1844-C AU50 PCGS. Variety 1, the only known die pairing for the year. This is a somewhat unusual coin, as the obverse and reverse are mismatched. The obverse is much finer and much cleaner than usually seen on 1844-C quarter eagles. The reverse, though, is softly struck and shows several planchet flaws. The fields show some residual brightness, a common trait on C- and D-mint gold. The overall rarity of the 1844-C is 10th out of the 20-coin series, and the original mintage was limited to 11,622 pieces, of which 150-175 coins are believed to exist today in all grades. (#7735)

### Desirable Select 1845 Quarter Eagle

- 1302 1845 MS63 NGC. This earlier Liberty quarter eagle issue may have a high five-figure mintage, but it was little-saved at the time of release, and Mint State examples are elusive. Select coins such as the present example are condition rarities. With its strong yellow-gold luster and impressive detail, this faintly abraded coin has eye appeal to spare. Census: 18 in 63, 7 finer (9/09). (#7737)

---

Elusive 1845-O Quarter Eagle, XF

- 1303 1845-O XF40 NGC. The 1845-O quarter eagle had a diminutive mintage of just 4,000 pieces, and examples are scarce in all grades. Delightful yellow-gold patina coats the still-lustrous surfaces. The details are clearly defined, and there are no significant marks. Census: 7 in 40, 48 finer (8/09).

From The Mulkin Collection. (#7739)

- 1304 1846-C VF25 PCGS. Variety 1. This predominantly honey-gold Charlotte gold piece appears unblemished save for a couple of faded vertical marks on the left obverse field. Protected areas exhibit russet toning. A meager 4,808 pieces were struck. (#7741)

- 1305 1846-C—Damaged—NCS. XF Details. Variety 1. The 1846-C quarter eagle, with a scant mintage of 4,048 pieces, one of the lowest for the series, is rare in all grades. This XF Details example displays relatively well defined devices except for localized strike weakness on the eagle. The yellow-gold surfaces show scattered marks and a few dark spots, the latter more noticeable on the reverse. Two marks of unknown origin are visible on the upper left reverse rim.

From The Mulkin Collection. (#7741)

- 1306 1847 AU55 NGC. Light greenish-gold surfaces show faint hairlines and abrasions, yet this piece is attractive and desirable. (#7744)

- 1307 1847-D—Improperly Cleaned—NCS. AU Details. Variety 9-M, sole die pair for the issue. Well struck overall with abrasions noted on and around Liberty's portrait, including a pinscratch behind the hair bun. The coin's natural luster has been dimmed by cleaning.

From The Mulkin Collection. (#7746)

---

Condition Census 1852-C Quarter Eagle, MS61

- 1308 1852-C MS61 PCGS. Variety 1. In 1852 most of the gold coinage action was in Philadelphia and New Orleans, which were churning out large numbers of gold dollars through double eagles. Even the faraway branch mints in Charlotte and Dahlonega were more focused on half eagle production, managing a respectable 75,574 coins at the former and 91,584 at the latter, respectively. The quarter eagles were once again the red-headed stepchild, in the case of the C-mint issue produced only to the extent of 9,772 coins. In the following year, no C-mint quarter eagles were struck at all, so most of the 1852-C coins circulated. The 1852-C is rare in Mint State. PCGS has certified only three coins in MS61 and one in MS63, including some likely resubmissions (9/09). On this piece the usually seen mint-made surface roughness appears slightly on the hair under the coronet, and around the leaves and branches on the reverse. A few small field abrasions account for the grade, along with a couple of wispy scrapes on the reverse above the eagle. The planchet is one of the nicer ones we have seen for this issue, with consistent yellow-gold color, good luster, and lots of appeal. Population: 3 in 61, 1 finer (9/09). (#7764)

- 1309 1852-O AU58 NGC. Like many of its brethren, the 1852-O quarter eagle had a respectable mintage of 140,000 coins but is seldom seen in higher grades. In fact, NGC and PCGS have certified a mere 42 Mint State examples of this issue. This near-Mint piece has lovely reddish-orange toning in the fields, with bright lemon-yellow luster. (#7766)

### AU Details 1853-D Quarter Eagle

1310 1853-D—Repaired—NCS. AU Details. Variety 16-M. The obverse field and Liberty's cheek have been whizzed, perhaps most apparent near the coronet tip. The lower obverse rim displays file marks. The reverse has been cleaned but not whizzed. The eagle's legs are softly brought up, as usual for this rare Dahlonega issue. (#7768)

1311 1854 MS63 PCGS. CAC. Magnificent satiny luster glistens beneath the yellow-orange patina. This lightly abraded specimen exhibits razor-sharp design definition and is housed in a green-label PCGS holder. Population: 41 in 63, 24 finer (8/09). (#7769)

1312 1856 MS63 PCGS. Given its mintage of 384,240 coins, the 1856 is surprisingly elusive in Mint State grades. This piece is highly lustrous with sharp details and excellent eye appeal. Population: 38 in 63, 25 finer (9/09). (#7777)

### Extraordinary 1856 Quarter Eagle, MS65

1313 1856 MS65 PCGS. Despite slight central weakness, this Gem is an amazing example, one of the finest survivors from a substantial mintage of 384,240 coins. Both sides are pristine with frosty deep yellow luster and splashes of lighter yellowish-orange toning. It is truly an extraordinary coin. Population: 5 in 65, 4 finer (9/09). (#7777)

### Striking MS61 1856-S Quarter Eagle

1314 1856-S MS61 NGC. The San Francisco Mint produced 246 quarter eagles in 1854, none in 1855, and 72,120 in 1856, making that third-year date the first collectible example from that Mint. Both sides are fully lustrous with rich orange patina over medium yellow-gold surfaces. Census: 10 in 61, 10 finer (9/09). (#7781)

1315 1857-O AU55 PCGS. An elusive date from a mintage of only 34,000 coins, this example represents the final year of issue for quarter eagles at New Orleans. Both sides have bright green-gold surfaces and excellent design details. Population: 22 in 55, 47 finer (9/09). (#7784)

1316 1858 MS61 PCGS. A splendid example, and scarce in Mint State grades, with only 60 finer examples certified by NGC and PCGS combined (9/09). This piece has brilliant and frosty light yellow luster. The strike shows a little weakness, but most design elements are strong. (#7786)

### Lovely 1858 Liberty Quarter Eagle, MS64

1317 1858 MS64 PCGS. A stunning near-Gem from a mintage of only 47,377 coins, and a major quarter eagle rarity at this grade level. NGC and PCGS have only certified 11 MS64 examples and just three finer coins, including possible resubmissions. This lovely piece has deep orange toning around frosty yellow centers. The strike is above average, and the surfaces show only trivial marks expected for the grade. Population: 6 in 64, 1 finer (9/09). (#7786)

### Problem-Free XF45 1858-C Two and a Half

1318 1858-C XF45 PCGS. Variety 1, the only known. In spite of the low mintage of 9,056 pieces, the 1858-C is actually one of the more available C-mint quarter eagles. In all grades, there are an estimated 225-325+ pieces known today. This is an attractive coin. Even high point wear is seen on each side, and there is slight striking softness, more on the reverse than the obverse. A clean, problem-free coin for the grade. (#7787)

**Choice 1859 Type One Quarter Eagle  
Single Finest NGC-Certified as Old Reverse**

**1319 1859 Old Reverse, Type One MS64 NGC.** The Old Reverse hub of the Liberty quarter eagle, sometimes called the First Reverse, was introduced along with the type in 1840. This hub is identifiable by the nearness of the lowest arrowhead to the CA in AMERICA and the closed talons on the eagle. Although replaced by a new reverse hub in 1859, the Old Reverse hub continued in use, albeit in a limited fashion, through 1861. The first 1859 Old Reverse quarter eagle was discovered only in the 1960s. Today, this variety is well respected as a significant rarity in all grades. This is the single finest example known to NGC (9/09), and it is a lovely orange-gold representative. The finish is mostly frosty, and the strike is sharp exception for the often/seen lack of detail on the eagle's left (facing) leg feathers. There are only a few small abrasions here and there, with a pair of toning spots at the lower obverse rim that should serve as useful pedigree markers. A significant 19th century gold rarity at an unrivaled level of preservation.

Ex: FUN Signature (Heritage, 1/2001), lot 8095. (#97788)

**Historic XF40 1861-C Quarter Eagle**

**1320 1860-C XF40 PCGS.** Variety 1, the only die pairing known for this low-mintage pre-Civil War issue. The 1860-C represents the last quarter eagle issue of the Charlotte Mint, which would make only half eagles in 1861, including a few hundred thought to have been made under Confederate rule. The 1860-C quarter eagle was produced to the extent of only 7,400 pieces, with most certified survivors—a combined population of 216 coins at NGC and PCGS—averaging XF40 to XF45. This piece displays more remaining luster than expected over orange-gold surfaces that are free of mentionable distractions. The planchet is well-produced, and the generous eye appeal of this piece for the grade will delight the successful bidder. Population: 15 in 40, 59 finer (9/09). (#7792)

**1321 1861 Old Reverse, Type One AU55 NGC.** Strongly struck for this variety, created earlier in the year. Yellow-gold surfaces remain radiant despite the light rub on the devices which accounts for the grade. (#97794)

**Uncirculated Details 1862-S Two and a Half**

**1322 1862-S—Improperly Cleaned—NCS. Unc. Details.** This crisply struck yellow-gold low mintage quarter eagle has no indication of wear, but the luster has been diminished by a wipe which has left the piece slightly bright. One gray spot is noted near the large 2 in the fraction. Just 8,000 pieces were coined of this Civil War issue. Only five pieces have been certified as Mint State by NGC and PCGS combined (9/09). The 21 pieces listed as NGC AU58 undoubtedly include many resubmissions. (#7798)

**MS62 Prooflike 1868 Two and a Half  
Among Finest Certified by NGC**

**1323 1868 MS62 Prooflike NGC.** Since gold coins failed to circulate on the East Coast in 1868, only 3,600 quarter eagles were struck for commerce. Most were eventually melted, and survivors congregate in AU grades. This flashy and sharply struck piece has only minor marks. As of (9/09), NGC has certified no examples above MS62, with or without a Prooflike designation. Census: 2 in 62 Prooflike, 0 finer (9/09). (#77807)

**1324 1871-S MS61 PCGS.** Peach-gold surfaces are typically struck, that is, weakness occurs in the hair at Liberty's forehead and on the eagle's legs and claws. A couple of faint pinscratches are visible over each side. From a low mintage of just 22,000 pieces. (#7814)

---

**Eye-Catching 1872 Quarter Eagle, AU58**

- 1325 1872 AU58 NGC.** The impressively reflective fields are nearly prooflike and highlight the boldly struck design elements. Scattered abrasions on each side are entirely minor. The 1872 quarter eagle had a diminutive mintage of just 3,000 pieces and it is rare in mint condition. Census: 22 in 58, 12 finer (8/09).  
From The Mulkin Collection. (#7815)

---

**Challenging MS61 1872-S Quarter Eagle**

- 1326 1872-S MS61 NGC.** A beautiful butter-gold Uncirculated rare date quarter eagle. Bereft of the abrasions usually associated with the MS61 grade. The eagle's left (facing) leg is softly brought up, but other design elements are crisp. A mere 18,000 pieces were issued. Census: 5 in 61, 10 finer (9/09). (#7816)

- 1327 1879 MS63 PCGS.** Most of the late 19th century quarter eagles had rather small mintages. The 88,960-coin mintage of 1879 ranks among the higher-mintage issues during that time. This splendid representative has bold definition with frosty yellow luster. PCGS has only certified 64 finer examples (9/09). (#7830)

---

**Rare 1881 Quarter Eagle, MS62**

- 1328 1881 MS62 PCGS.** A rare and highly sought-after issue, the 1881 quarter eagle had a tiny mintage of just 640 business strikes. Fewer than 30 examples have been certified in Mint State by NGC and PCGS combined, and none have been graded any finer than MS62 by PCGS.

The deep copper-orange, lilac, and sea-green toning is this coin's most noteworthy physical attribute. It is also sharply struck, except for the typical softness on the eagle's left (facing) leg. The fields are partially prooflike and highlight the mildly frosted motifs, especially on the reverse. Light handling marks are visible under a loupe, but they do not significantly detract from the coin's overall pleasing appearance. Population: 4 in 62, 0 finer (9/09). (#7833)

- 1329 1884 AU58 Prooflike NGC.** Despite a touch of rub, this light yellow-gold piece remains distinctly reflective. Well-defined with a number of tiny marks that are perhaps magnified by the mirrors. Census: 1 in 58 Prooflike, 4 finer (8/09).  
From The Mulkin Collection. (#77836)

---

**Sharp 1886 Quarter Eagle, MS63  
Low-Mintage Rarity**

**1330 1886 MS63 PCGS.** The 1886 Liberty Head quarter eagle had a tiny mintage of only 4,000 circulation strikes. Most survivors are either lightly circulated, or in the lower reaches of Mint State, usually MS60 or MS61. This Select piece boasts excellent eye appeal through its orange-gold, attractive surfaces, crisp strike, and relative paucity of contact marks. (#7838)

**1331 1887 MS63 PCGS.** Wisps of mint-green visit the lustrous yellow-gold surfaces of this Select quarter eagle. The strike is uniform throughout and both sides reveal minute contacts. A strike-through is visible on Liberty's neck. A low-mintage date of 6,160 circulation strikes. Population: 18 in 63, 14 finer (9/09). (#7839)

**Ebullient 1888 Quarter Eagle, MS65**

**1332 1888 MS65 PCGS.** While the mintage of 1888 quarter eagles was considerably larger than for the 1880 through 1887 issues, the 16,001 business strikes still make it fairly elusive within the context of 19th century gold. The certified survivors at NGC and PCGS, numbering a few hundred in all, mostly fall in the lower Mint State levels, MS60 to MS62. Gems are rare, although the two services combined have graded 30 with four finer, counting duplications (9/09). Ebullient luster radiates from the orange-gold surfaces, with tremendous eye appeal and no mentionable post-strike impairments. Minor strike weakness shows in the center of the shield and on the eagle's legs. (#7840)

**Flashy Gem 1898 Two and a Half  
Finest Certified as Prooflike**

**1333 1898 MS65 Prooflike NGC.** An intricately struck Gem with notable field reflectivity and a minimum of field contact. Only 24,000 pieces were struck, and perhaps a thousand examples have survived. As of (9/09), NGC has certified seven 1898 quarter eagles as Prooflike, with the present piece as the single highest graded. (#77850)

---

**Marvelous, Conditionally Rare  
1902 Quarter Eagle, MS68**

**1334 1902 MS68 NGC.** The 1902 quarter eagle, from a mintage of 133,540 circulation strikes, can be located with little difficulty through the Gem grade level. Premium and Superb Gems are more difficult but can still be acquired with a bit of patience and searching. Specimens in the lofty grade of MS68, however, are extreme rarities.

Scintillating luster radiates from satiny surfaces bathed in lovely yellow-gold patina imbued with tinges of greenish-tan and apricot. The design elements are fully brought up, enhancing even more the marvelous eye appeal. Immaculate preservation characterizes both sides. The only pedigree marker we can locate is a tiny toning spot to the upper right of star 6. A faint die line extends from Liberty's ear to the lower neck. Census: 6 in 68, 0 finer (9/09). (#7854)

---

---

Exquisite Superb Gem 1904 Quarter Eagle

1335 1904 MS67 NGC. The 1904, like other early 20th century Liberty quarter eagle issues, is heavily collected for type purposes. This Superb Gem would fit readily in such a set with an emphasis on quality. Bold, slightly satiny butter-yellow luster shows echoes of lavender and green close to the rims. Carefully preserved and gorgeous. NGC has graded just four numerically finer examples (9/09). (#7856)

1336 1905 MS66 NGC. A lovely Premium Gem that demonstrates vibrant luster and exhibits original khaki-gold toning. The strike is razor-sharp save for the dentils, which show minor sloping toward the field. (#7857)

---

Prooflike Gem 1905 Two and a Half

1337 1905 MS65 Prooflike NGC. According to the (9/09) NGC Census Report, the present piece is the only example certified as either Prooflike or Deep Mirror Prooflike. With the exception of the 1900, NGC has designated at least one Prooflike piece for all dates between 1889 and 1906. The present piece would be the stopper to such an ambitious collection. Needle-sharp, flashy, and undisturbed. Ex: Dallas Signature (Heritage, 11/2006), lot 1986, which realized \$2,875. (#77857)

---

---

PROOF LIBERTY QUARTER EAGLES

Starkly Contrasted 1869 Quarter Eagle  
PR64 Ultra Cameo

1338 1869 PR64 Ultra Cameo NGC. CAC. The 1869 quarter eagle is a fascinating issue, whether in proof or business strike format. Only 4,320 pieces were struck for circulation, and if that is not low enough, a tiny mintage of 25 proofs was produced. Both are very scarce in their own right. Garrett and Guth point out the inherent danger of relying too heavily on population data as an indicator of rarity: "The 1869 ... proof is one of those interesting issues that have a reported population number that is higher than the reported mintage. It is probably the clearest example of the data being misleading as to the true rarity of an issue." Probably no more than 15 to 20 examples exist in all grades, and as Paul Taglione observed more than 25 years ago "a few of which are less-than-inspiring due to cleaning and hairlining."

This is one of the finest examples known. Only five pieces have been certified in higher grades by both of the major services. The two diagnostics for proofs that Breen mentions for this issue are both easily seen here: the low positioning of the date, and the die line at the top of the L in LIBERTY. The fields are deeply mirrored, with the usually seen orange-peel texture. The devices are heavily frosted and present stark cameo contrast on each side. The only mentionable surface imperfection is a planchet flaw above the eagle's right (facing) wing. (#97895)

---

### Wonderful PR64 Ultra Cameo 1881 Quarter Eagle

1339 1881 PR64 Ultra Cameo NGC, CAC. This astounding Ultra Cameo specimen is one of just four for the issue so certified by NGC (9/09). Pale yellow-gold color is the rule for the devices, but at most angles the glassy fields are “black” in contrast. Faint haziness is of little concern, though the wispy hairlines in the reverse fields contribute to the coin’s grade. (#79707)

### Intriguing PR58 1887 Quarter Eagle

1340 1887 PR58 NGC. The proof quarter eagles of 1887 are noteworthy as the second date in the series to sport a triple-digit mintage; only the 1860 issue had reached that level before it. This specimen is exquisitely detailed with amply reflective yellow-gold fields, though the rub on each side goes beyond garden-variety impairment and necessitates the PR58 designation. Still, a thoroughly desirable coin. (#7913)

### Low-Mintage 1890 Quarter Eagle, PR60

1341 1890 PR60 NGC. An unworn proof as the grade implies, but a small patch of contact marks in the right obverse field, behind Liberty’s neck, and a scrape above the 90 in the date circumvent a finer grade. Other small marks appear on the reverse. This piece may nonetheless be an attractive alternative for a budget-conscious collector interested in acquiring a proof 19th century gold coin. From a mintage of only 93 proofs. Census: 3 in 60, 1 finer (9/09). (#7916)

### Appealing 1902 Quarter Eagle, PR58

1342 1902 PR58 PCGS. The 1902 Liberty Head quarter eagle in proof format saw a mintage of 193 pieces, roughly in line with quarter eagle proof production during this era. This briefly circulated specimen displays attractive variegated yellow-gold and peach coloration. Some cameo tendency, very unusual for this issue, is noted, especially on the reverse. The design elements are boldly impressed, befitting a proof strike. The few scattered marks in no way detract from the coin’s overall appeal. (#7928)

## INDIAN QUARTER EAGLES

1343 1909 MS63 PCGS. Slightly dusky yellow-orange surfaces but with considerable luster. This Select coin is modestly abraded for the grade with above-average striking definition. (#7940)

### Charming MS64 1909 Quarter Eagle

1344 1909 MS64 PCGS. CAC. Glimpses of orange and rose grace the otherwise apricot-gold surfaces of this charming quarter eagle. Satiny luster is the rule, and the strike is pleasing aside from slight softness at the necklace. A flaw is noted to the right of the Y in LIBERTY, and small marks are scattered in the reverse fields. (#7940)

1345 1910 MS64 NGC. Soft luster emanates from honey-gold surfaces laced with greenish-gray, and a well executed strike imparts sharp detail to the devices. A few minor ticks are undisturbing. The 1910 is much more difficult to locate any finer. (#7941)

1346 1911 MS64 PCGS. CAC. Although the 1911-D quarter eagle gets most of the attention, the 1911 Philadelphia issue is a condition rarity in high grades. Exceptional quality for the grade, this example has frosty yellow luster with sharp design definition. PCGS has only certified 72 finer examples (9/09). (#7942)

---

### Marvelous 1911 Quarter Eagle, MS65

**1347 1911 MS65 PCGS.** The 1911 quarter eagle has one of the highest mintages of the Indian Head series, but Gems and finer pieces are nonetheless elusive, and nearly as difficult as better-known issues such as the 1914 and 1914-D. This piece offers marvelously smooth yellow-orange surfaces, particularly on the Indian's cheek and the field before it. The strike is also somewhat stronger than usually seen on this type and date. Population: 71 in 65, 1 finer (9/09). (#7942)

---

### Key 1911-D Quarter Eagle, AU Details

**1348 1911-D—Mount Removed, Improperly Cleaned—NCS. AU Details.** The yellow-gold surfaces are overbright from a past cleaning, and solder from a since-removed mount obscures parts of E PLURIBUS and WE TRUST. Still, this is a well-defined example of the famously low-mintage key date in the Indian quarter eagle series. Actual wear is minor. (#7943)

---

### AU Sharpness 1911-D Two and a Half

**1349 1911-D—Improperly Cleaned—NGC. AU Details.** A bold mintmark and sharp design details distinguish this key date Indian two and a half. Light wear on the checkbone and eagle's shoulder confirm brief circulation. A bit bright due to a wipe from a jeweler's cloth, but will satisfy many collectors who need only this scarce issue to complete their sets. (#7943)

---

### Desirable 1911-D Quarter Eagle, MS62

**1350 1911-D MS62 NGC.** The 1911-D, with a mintage of 55,680 pieces, is the key date to the Indian Head quarter eagle series. Yellow-gold surfaces tinted with hints of tan display soft luster and well struck design elements. A scattering of light marks, more so on the reverse, helps to limit the grade. (#7943)

**1351 1911-D Weak D—Improperly Cleaned—NCS. AU Details.** The ghostly "D" mintmark on the reverse identifies this key-date variant. While the yellow-gold and green-gold surfaces show hairlines from a past cleaning, this remains a desirable and little-worn item. (#7954)

**1352 1912 MS63 NGC.** Vibrant luster, a sharp strike, and refreshingly unblemished surfaces combine to make this Indian quarter eagle high end for its grade. (#7944)

---

### Lovely 1914 Select Quarter Eagle

**1353 1914 MS63 NGC.** The 1914 quarter eagle has the second lowest mintage for the series. The present specimen is alive with rich gold color interspersed with blushes of mint-green, sky-blue, and lavender. The design elements are sharp, and the luster quality is well above average for the series, being mostly frosty with minimal granularity. There are remarkably few abrasions for the MS63 grade level, and the eye appeal is strong. (#7946)

**1354** 1914-D MS63 NGC. Bright yellow-gold luster overall with crisp definition. A faint peach shadow appears to the right of the date when the coin is held at certain angles. (#7947)

#### Well Struck 1914-D Near-Gem Quarter Eagle

**1355** 1914-D MS64 PCGS. A medley pf peach-gold and greenish-gray coloration resides on the lustrous surfaces of this D-mint near-Gem. An above-average strike leaves strong detail on the design features, including the eagle's shoulder and legs, areas that are often weak. A few unobtrusive ticks deny Gem status. Obtaining Gems or better becomes challenging. (#7947)

#### Choice 1914-D Two and a Half

**1356** 1914-D MS64 PCGS. CAC. A peach-gold near-Gem Denver Mint representative of this widely collected series. Unmarked and lustrous with minor blending on the lower portion of the headdress. Although the 448,000 piece mintage of the 1914-D is unimpressive, most certified examples are in AU58 to MS63 grades, and the issue becomes scarce at the MS64 level. (#7947)

#### Remarkable Gem 1914-D Quarter Eagle

**1357** 1914-D MS65 PCGS. The 1914-D Indian quarter eagle had a total production of 448,000 coins, a nominal amount that is completely unremarkable within the series context. Nonetheless, the recently published Akers *Handbook on 20th century gold coins* says succinctly concerning the issue: "The 1914-D is the premier rarity in the Indian Quarter Eagle series in grades at or above MS-65. Low-grade Mint State examples are not all that difficult to find, but the population drops off markedly beginning in MS-64. A handful of MS-65s are listed at the major certification services, and NGC even reports a single Superb Gem . . ."

The present coin is one of 39 MS65 pieces certified at PCGS, with none finer (9/09). Even, khaki-gold coloration appears throughout, with remarkably smooth, softly frosted surfaces and tremendous eye appeal. The strike is somewhat weak at the lower headdress feathers, as often seen. Much more importantly, the Indian's cheek and the exposed fields are virtually free of even tiny contact marks. Some small areas of darker color appear on the upper reverse. A memorable presentation of this conditionally elusive rarity. (#7947)

**1358** 1915 MS64 PCGS. Luminous yellow-gold and tan surfaces show rose-violet peripheral accents. Slight striking weakness near the rims but few other concerns. (#7948)

**1359** 1925-D MS64 NGC. Lustrous yellow-gold surfaces exhibit well struck design features. Minor reverse field abrasions, including a hair-thin mark in the upper left field, limit the grade. (#7949)

**1360** 1927 MS64 NGC. A khaki-gold Indian type coin that has scintillating luster and an above average strike. A loupe reveals only a hair-thin mark beneath the cheekbone and within the headdress. (#7951)

**1361** 1929 MS64 NGC. The headdress lacks a full strike, but this lovely near-Gem type coin is refreshingly bereft of abrasions. Luster bathes all areas. A lower mintage than the rare 1929 half eagle. (#7953)

## THREE DOLLAR GOLD PIECES

**1362** 1854 AU55 NGC. The yellow-gold surfaces of this Choice AU three dollar show traces of luster in the recesses. Aside from a bit of high-point wear, the design elements exhibit strong detail. Light circulation marks are undistracting. (#7969)

### Bright MS64 1854 Three Dollar

**1363** 1854 MS64 PCGS. The eye appeal of this supremely lustrous near-Gem example seems nearly unmatchable for the issue. The coin is so luminous and brilliant that it appears to have been freshly minted within the past few days or weeks. Boldly struck with honey-gold surfaces that reveal only minimal marks on either side. An impressive, high-end example of this popular three dollar date. (#7969)

**1364** 1854-O—Improperly Cleaned—NCS. XF Details. This is the only year the New Orleans Mint produced three dollar gold coins. Fine hairlines are visible under high magnification on the lightly cleaned greenish-gold surfaces of this XF Details specimen. This is a well defined piece except for high-point wear and strike weakness in the hair. Distributed minute marks occur over both sides.  
*From The Mulkin Collection.* (#7971)

### Popular 1854-O Three, XF45

**1365** 1854-O XF45 NGC. Known to be the only New Orleans Mint three, the 1854-O is highly popular with collectors of Southern mint gold. This piece has light green-gold coloration with traces of luster in the protected areas. The peripheral design elements are typically weak, with sharper central details. (#7971)

### Attractive 1854-O Three Dollar, AU53

**1366** 1854-O AU53 NGC. The reverse die is cracked through the mintmark, with a slight bulge at that location, rendering the mintmark weak but still visible. Bright green-gold surfaces are lightly marked, as expected for the grade. Only a few small marks are obvious. An attractive example representing the single New Orleans three dollar gold piece. (#7971)

**1367** 1855 AU55 NGC. Flashy luster shimmers beneath the yellow-gold patina that covers both sides. The strike is bold save for the often-seen softness on Liberty's hair. Several tiny abrasions do not distract. Housed in an early NGC holder. (#7972)

**1368** 1855 AU58 NGC. A still-lustrous yellow-gold piece that shows only minor rub, mostly at the high points of the portrait and the bow on the wreath. Only a few small, scattered abrasions appear on each side.  
*From The Mulkin Collection.* (#7972)

---

## Marvelous 1855 Three Dollar Gold, MS66 One of the Two Finest Certified

1369 1855 MS66 NGC. By 1855, the second year of three dollar gold coin production, the high hopes for it being accepted in the channels of commerce diminished. Coinage dropped from 138,618 pieces at the Philadelphia Mint in 1854 to just 50,555 in 1855. Production at the Dahlonega and New Orleans mints was discontinued in 1855, but a small emission came out of San Francisco.

Despite the significantly lower mintage, the 1855 Philadelphia issue can be located without too much difficulty in the About Uncirculated to lower Mint State range. However, as David Bowers notes in his 2005 *\$3 Gold Pieces* treatise, "... coin for coin the 1855 is much more elusive than the 1854."

Most collectors are unlikely to encounter three dollar gold coins in grades MS64 or above. NGC and PCGS have certified about 40 near-Gems (a number of which are likely resubmissions), only four Gems, and a mere two Premium Gems. Our present 1855 offering is one of those two. Intense luster emanates from its richly toned orange-gold surfaces imbued with splashes of mint-green. Aside from minor weakness on the reverse bowknot and adjacent two leaves to its right, the design features exhibit sharp detail. A few unobtrusive ticks may well preclude the attainment of an even finer grade. A couple of grazes to the lower left of the 1 in the date are mentioned only because they may help in the coin's identification for future researchers and catalogers. Die striae are lacking on both sides, indicating that the coin is a later impression. (#7972)

**1370** 1856 AU58 NGC. An unusually crisp strike on the portrait, though the knot on the bow is characteristically flat. Strong yellow-gold luster is undimmed by the coin's minor friction. (#7974)

#### Pleasing MS63 1856 Three Dollar

**1371** 1856 MS63 NGC. Luster shimmers over smooth surfaces. A good strike with minor incompleteness on the hair curls and the O in DOLLARS. A few faint field grazes account for the Select grade. Very scarce in Mint State relative to lower mintage issues from late in the series. Census: 18 in 63, 26 finer (9/09). (#7974)

**1372** 1856-S XF40 NGC. Medium S. Any three dollar gold piece is scarce, but branch mint examples are especially elusive. Aside from the unique 1870-S, there are only four issues of S-mint threes. This straw-gold example has moderate highpoint wear and smooth, subdued fields. (#7975)

#### Excellent XF45 1856-S Three Dollar

**1373** 1856-S XF45 NGC. Medium S. Out of four (or five, if one counts the 1870-S) San Francisco three dollar gold issues, the 1856-S is the most accessible, though at 34,500 pieces struck, it poses its own challenges. This example retains considerable yellow-gold luster, since the wear is primarily at the high points. (#7975)

**1374** 1859 PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has AU58 details, but the reverse has four small curly pinscratches that some might interpret as graffiti. Three of these are located on the field between 3 and 4 o'clock, and the fourth pinscratch is above the AR in DOLLARS. Only 15,558 pieces were struck. (#7979)

#### Scarce Uncirculated 1859 Three Dollar

**1375** 1859 MS61 NGC. With a generous mintage for the three dollar series, the 1859 is surprisingly unavailable in mint condition. Only 70-90 pieces are believed known today in Uncirculated grades. This piece shows repunching on the right side of the 9 in the date, and the usual squat 5 with a wide right side and small ball to the left. The surfaces are colorful, with much reddish patina interspersed with lilac on each side. The strike is well but not fully brought up, with some softness (usually seen) on the bowknot. (#7979)

#### Borderline Uncirculated 1860 Three Dollar

**1376** 1860 AU58 NGC. Light wear on the wreath and hair confirm the grade, but luster dominates the reverse as well as the obverse periphery. No marks are of any import. Although the three dollar gold series began with reasonable mintages, by 1860 Philadelphia issued only 7,036 pieces, only a tiny fraction of its gold dollar production. (#7980)

#### Desirable 1860-S Three Dollar, AU58

**1377** 1860-S AU58 NGC. Few 1860-S three dollar coins were put aside by collectors, resulting in a dearth of Mint State examples today. This near-Mint State specimen thus becomes a special offering. Its brassy-gold surfaces display considerable luster and the design features are well impressed. A few light marks are undisturbing. Census: 18 in 58, 5 finer (9/09). (#7981)

**1378** 1861—Improperly Cleaned—NCS. XF Details. This scarce Civil War-era three dollar exhibits nice definition on its devices. The yellow-gold surfaces reveal faint hairlines, though traces of luster can still be seen in some of the protected areas. Distributed small marks do not detract.

*From The Mulkin Collection. (#7982)*

---

## Majestic 1861 Three Dollar Gold Piece, MS67 The Finest Certified Example

1379 1861 MS67 NGC. The 1861 three dollar comes from a low mintage of 5,959 circulation strikes. A couple hundred or so examples have survived to the present day, mostly in Extremely Fine to About Uncirculated condition. David Bowers, in his *The United States \$3 Gold Pieces* reference, gives an estimate of 35 to 50 Mint State specimens known. An inspection of NGC/PCGS population figures shows that the two services have certified a little more than 100 Uncirculated pieces. Many of these, however, are likely resubmissions or crossover coins. The issue is highly elusive in the near-Gem level of preservation and finer. The two services have graded fewer than 15 MS64s, a mere four Gems, two Premium Gems, and a solitary MS67—the specimen in the current offering.

Both sides exhibit two shades of peach-gold coloration tinted with whispers of mint-green, and a well executed strike delivers virtually complete definition to the design features. The motifs are lightly frosted and stand out against the somewhat prooflike fields. Both surfaces display die striations, as do nearly all high-grade 1861 three dollar gold examples. Close inspection with a loupe reveals impeccably preserved faces, devoid of the sometimes-seen planchet flaws or carbon inclusions. Alloy stains are also absent. It is no wonder that the foregoing attributes synergistically combine to render this majestic coin the finest certified 1861 three dollar gold specimen. (#7982)

**1380** 1862 XF40 PCGS. Struck during the early part of the Civil War, the 1862 three dollar piece is an important rarity in the series. Only 5,750 were struck and few of those survive today. This example shows modest wear as the grade suggests. Light yellow surfaces show a hint of green, and traces of luster remain in the protected areas. (#7983)

#### Attractive 1862 Three Dollar, AU55

**1381** 1862 AU55 PCGS. Apricot-gold dominates both sides of this Choice AU three dollar. The design elements are well impressed and luster resides in the recessed areas. Light circulation marks are more prevalent on the reverse. Remnants of die striations, common on this date, are visible in some of the protected areas. (#7983)

#### Lovely 1863 Three Dollar, AU58

**1382** 1863 AU58 NGC. Struck at the height of the Civil War, at a time when the public was hoarding gold and silver coinage, and during suspension of specie payments, this three dollar piece is one of just 5,000 coins minted. This pleasing piece is highly lustrous with frosty yellow and orange-gold surfaces and excellent eye appeal. (#7984)

#### Pleasing 1863 Three, MS62

**1383** 1863 MS62 NGC. Those 1863 three dollar pieces that survive today were almost certainly obtained directly from the Mint by collectors, or obtained from the Mint as birthday or Christmas presents. During the Civil War, gold coins were never released into circulation. Market appearances in Mint State grades are infrequent. This pleasing piece has soft, frosty orange-gold luster with a splash of green patina. Census: 11 in 62, 25 finer (9/09). (#7984)

#### Rare and Desirable 1865 Three Dollar, MS64

**1384** 1865 MS64 PCGS. CAC. The 1865 is one of the most challenging issues in the three dollar series with an emission of just 1,140 pieces. Bowers and Winter (2005) estimate that only 100 examples have survived in all grades, with just 12 to 15 pieces known in Uncirculated grades. That revises Akers (1979), who wrote that he had seen only "two full Mint State pieces." The high grade rarity of this issue is significant, and it is more elusive in mint condition than some of the later, lower mintage, issues such as the 1881 and 1885.

Outstanding semiprooflike fields show moderate contrast against the frosty devices. Lovely red patina fills the protected areas, while the rest of the surfaces are yellow-gold. Careful inspection with a loupe reveals only a few minor marks. An appealing near-Gem. Population: 5 in 64, 2 finer (8/09). (#7986)

---

### Pleasing AU 1867 Three Dollar

1385 1867 AU50 PCGS. In the years after the Civil War, the three dollar gold piece did not circulate extensively, and for years such as 1867 a low business strike mintage is the norm. This piece shows modest wear across the high points, and while a few minor digs are scattered on each side, serious flaws are absent. Population: 18 in 50, 55 finer (9/09). (#7988)

---

### Rare 1872 Three Dollar, MS61

1386 1872 MS61 PCGS. This low-mintage date (2,000 business strikes) is very rare. The few Mint State examples that have survived are in the lower Uncirculated levels. Somewhat prooflike fields of this MS61 coin establish modest variance with the devices. The usual weakness is apparent in portions of the Indian's hair and minor distributed ticks are undistracting. (#7994)

---

1387 1874—Improperly Cleaned—NGC. AU Details. Yellow-gold surfaces display partially prooflike fields that highlight the well impressed devices at various angles. Faint hairlines are visible under a loupe, but these should not dissuade bidders as the light cleaning is not that bad. (#7998)

---

### Shining MS62 1878 Three Dollar Gold

1388 1878 MS62 PCGS. A charming canary-gold type coin with coruscating luster and an absence of relevant abrasions. Well struck save for the knot of the wreath bow. The 8s are lightly repunched within the upper loops, and minor die doubling is noted on the right-side cotton leaves. (#8000)

---

---

### Vibrant MS62 1878 Three Dollar

1389 1878 MS62 NGC. A whopping 82,304 examples were struck of the 1878 three dollar gold, the largest output in the entire 35-year series. As a result, more high grade survivors are known of this year than any other. This piece shows the usual pleasing mint frost, and each side displays light reddish patina. Lightly abraded for the most part, except for a short mark to the right of the bottom of the 3 on the reverse. (#8000)

---

### Charming MS64 1879 Three Dollar

1390 1879 MS64 NGC. Following the mammoth mintage of 1878, the three dollar gold piece slipped back into its low-mintage ways in 1879. This near-Gem from the latter issue has characteristically reflective luster in parts of the pale yellow-gold fields. Excellent detail on Liberty's hair. NGC has graded only 21 finer pieces (9/09). (#8001)

---

### Attractive Choice Mint State 1879 Three Dollar

1391 1879 MS64 NGC. Flashy yellow-gold fields show a touch of patina, particularly near the rims, lending the coin an aura of originality. Boldly struck with warm eye appeal. Just 3,000 coins were produced for this business strike issue that began the three dollar gold denomination's last decade of obscurity. (#8001)

---

### Beautiful MS64 Prooflike 1879 Three Dollar

1392 1879 MS64 Prooflike NGC. Despite its low mintage of 3,000 circulation strikes, the 1879 three dollar gold piece is represented by a relatively large number of Mint State examples. Indeed, NGC and PCGS have certified well over 600 Uncirculated specimens. Coins with the Prooflike designation are an entirely different matter. NGC gives this classification to only 26 coins. The apricot-gold surfaces of this near-Gem exhibit well struck devices and appreciable field-motif contrast at various angles. Scattered light marks preclude Gem status, yet still highly attractive. Census: 12 in 64 Prooflike, 1 finer (9/09). (#78001)

### Low Mintage 1882 Three Dollar, AU58

1393 1882 AU58 NGC. The semiprooflike fields of this near-Mint State three dollar highlight its well defined motifs, and both sides display attractive variegated brass-gold and peach coloration. This issue has generated considerable proof/prooflike debate as the latter often closely resemble proofs. The repunched 2 in the date, with a crescent-shaped vestige of an earlier 2 above the final digit, confirms the circulation-strike status of the present offering. Proofs lack this feature (see David Bowers, *United States \$3 Gold Pieces*, p. 155). (#8004)

### Popular 1882 Three Dollar, MS61

1394 1882 MS61 PCGS. A prooflike example of this ultra-low mintage (1,500 pieces) three dollar date. Diagnostic for commercial strikes, the 2 in the date is widely repunched north. A precise strike aside from minor bluntness on Liberty's eyebrow. Both sides are only lightly abraded, and given the strong demand from collectors of this popular set, the present lot should witness spirited bidding. (#8004)

### Elusive MS62 1887 Three Dollar Gold

1395 1887 MS62 PCGS. Most of the gold coinage of 1887 was made at the San Francisco Mint, which churned out half eagles, eagles, and double eagles in large numbers. The modest mintage of 6,000 three dollar coins served only to prevent a major rarity—and even then, it appears that many examples were melted within a brief period after their manufacture. This example offers copious luster emanating from apricot-gold surfaces, with a few stray, undistracting abrasions that account for the grade. A trio of tiny planchet flaws between DOLLARS and 1887 requires singular mention, but this coin nonetheless displays much eye appeal and a generous quotient of historic interest. (#8009)

### Bright 1889 Near-Mint State Three Dollar

1396 1889 AU58 NGC. In this last year of the three dollar denomination, the mintage fell to 2,300 circulation strikes. A generous amount of luster remains on the brassy-gold surfaces of this near-Mint State specimen, and the design elements retain strong detail after discounting high-point wear. Minuscule abrasions are scattered over both sides. (#8011)

PROOF FOUR DOLLAR GOLD PIECE

Stunning 1879 Flowing Hair Stella, Judd-1635, PR65

**1397** 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR65 NGC. The 1879 Flowing Hair gold stellas were offered in sets that also contained the Judd-1617 and Judd-1626 patterns, both known as “goloid metric dollars” with obverse design by William Barber. The Judd-1617 was designed to contain a small proportion of gold to silver, about 1:213. The Judd-1626 was designed to contain gold to silver proportioned at about 6:94. As far as we can determine (and as USPatterns.com and patterns expert Saul Teichman reinforce), none of those patterns have ever undergone metallurgical testing to determine their actual composition. Although we tend to view the 1879 stellas with awe and in isolation, they were part of a series of alternate proposals aimed at:

- Developing new markets, domestic and international, for U.S. silver
- Creating new, workable alloys of gold and silver
- Establishing viable international coinages with metric exactitude

William D. Kelley, Richard P. Bland, and John A. Kasson were three Congressmen, all members of the House of Representatives, with nearly 70 years of service among them. With his well-developed flair for hyperbole, Walter Breen in his *Complete Encyclopedia* calls them an “unholy trinity” that “also became instrumental in various proposals (1868-1880) for international coinage, aimed at creating a larger foreign market for domestic silver. This explains in part their adoption of metric weights of U.S. silver coins 1873-1964, as well as for the ‘goloid’ and ‘metric’ coins, including the Stellas.” Breen cites the Trade dollars (1873-1885) and Morgan dollars (1878-1921) as among their proposals “for new issues of silver coin as a captive market for silver bullion at artificially inflated prices.”

#### **William Darrah “Pig Iron” Kelley (1814-1890)**

Philadelphia native Kelley pursued classical studies but worked as an apprentice, then jeweler from 1828-40. He got his law degree in 1841 and rose through Philadelphia political circles in the 1840s and 1850s. After losing a bid for Congress, he was a delegate in 1860 to the Republican National Convention (where he is likely to have first met Kasson). Winning a second election bid, he served in Congress from 1861-90. Kelley was nicknamed “Pig Iron” because of his advocacy of Pennsylvania mining interests. He chaired the House Committee on Coinage, Weights, and Measures from 1867-73, later serving on numerous other committees. He died in Washington and is interred in Philadelphia.

#### **Richard Parks “Silver Dick” Bland (1835-1899)**

Bland was born in Ohio but moved to Missouri at age 20, then on to California and the western Utah Territory (present-day Nevada). There he taught school and tried prospecting and mining, a subject that interested him keenly and that was a mainstay of the western Nevada economy. After passing the bar, he practiced in Virginia City and Carson City. His first elected office was as Carson City treasurer from 1860-64, the year Nevada became a state. (It was there that he undoubtedly would have met town founder Abraham “Abe” Curry, who established Carson City in 1858 and would be the first superintendent of the Carson City Mint.) Bland returned to Missouri in 1865 and was elected to Congress in 1872, serving from 1872-94 and 1896-99. Bland chaired the Committee on Mines and Mining from 1875-77 and the Committee on Coinage, Weights, and Measures from 1883-89 and 1891-95. In 1878 he cosponsored the Bland-Allison Act, which reintroduced the silver dollar. Bland was known as “Silver Dick,” reflecting his 25-year campaign to establish bimetallism and support silver mining. Bland lost the 1896 Democratic presidential nomination to William Jennings Bryan, who campaigned for unlimited “Free Silver” coinage.

---

### **John Adam Kasson (1822-1910)**

Kasson was elected to the U.S. House of Representatives six times, a career he repeatedly interrupted for diplomatic service. Kasson in 1860 was an Iowa delegate to the Republican National Convention. Abraham Lincoln named him first assistant postmaster general in 1861, an office he held until 1862. He was elected to the House of Representatives from 1863-67, during which time he chaired the Committee on Coinage, Weights, and Measures. In 1863 and again in 1867 he served as a delegate and commissioner to international postal conventions. In 1866 he drafted the Metric Act, legalizing the previously illegal metric system for use in the United States. He was an Iowa state representative in 1868-72 and served again in Congress 1873-77. He was an envoy to Austria-Hungary in 1877-81, the period in which the 1879 stellas were coined.

Although Breen's description of the men as an "unholy trinity" may be somewhat offensive, their biographies enable us to understand them a bit better, rather than demonizing them. Two of the three had such deep and abiding identification with mining interests that they were nicknamed "Pig Iron" and "Silver Dick." The third, Kasson, was a veteran international traveler-diplomat with interests in the metric system as well as coinage.

It is nonetheless true that the stellas, along with the goloid dollars and the various metric coinage proposals, were flawed and unworkable. The stellas would only approximate, rather than exactly equal, the values of several well-established European gold coins—a proposition of doubtful value. And the goloid and metric goloid dollars—silver alloyed with varying amounts of gold and copper, just as the stellas purportedly were—were indistinguishable from the normal "coin silver" dollars containing no gold. This was an immediate inducement to "wicked coiners," as Mint chief coiner Oliver Bosbyshell termed it.

We believe the Mint produce no experimental metric alloy for the stella *patterns*; rather, it shaved down half eagle planchets of normal .900 fine gold for their coinage, leading to the striations seen on all pieces we have cataloged. The striations on the present lovely Gem run slightly west-southwest to east-northeast through Liberty's hair, cheek, and eye areas, as well as faintly out into the field behind her head. On the reverse after a normal coin turn, the striations run slightly west-northwest to east-southeast. A couple of shallow, undistracting indentations on Liberty's cheek are noted, along with a few hair-thin scrapes in the field just above the date. Unmentioned on the holder is the considerable cameo contrast visible over the yellow-gold surfaces. This is a stunning piece, with equal parts immense numismatic interest and enormous eye appeal. Census: 17 in 65, 15 finer (9/09). (#8057)

## EARLY HALF EAGLES

1398 No lot. (#8066)

Luminous 1795 Five Dollar Small Eagle, BD-3, XF Details

1399 1795 Small Eagle—Scratched—NCS. XF Details. Breen-6412, BD-3, High R.3. Because the wear on this yellow-orange piece is present mostly on the high points, the fields retain considerable luster. The obverse, though lightly abraded, displays attractively, but on the reverse below the branch, there are a number of scratches that account for the details grade. Still, a readily collectible piece.  
From The Mulkin Collection. (#8066)

Rare 14 Star Reverse 1798 Five Dollar, BD-3 Heraldic Eagle, Large 8, VF Details

1400 1798 Large Eagle, Large 8, 14 Star Reverse—Improperly Cleaned—NCS. VF Details. Breen-6427, BD-3, R.5. Bass-Dannreuther Die State a/c. This elusive die variety is promptly attributed by die cracks through the M in UNUM and the branch stem. A slightly bright but minimally abraded example with apricot, apple-green, lilac, and powder-blue toning.  
From The Mulkin Collection. (#8080)

AU50 Details 1800 Half Eagle, BD-2

1401 1800—Cleaned—ANACS. AU50 Details. Breen-6438, BD-2, High R.3. The reverse with the E in STATES positioned with vertical stroke to the left of where the clouds touch. A light yellow-gold piece that has the details of an AU specimen, though the hairlined fields show disturbed luster from a past cleaning and each side shows a number of small digs. (#8082)

## AU Definition 1800 Half Eagle, BD-2

1402 1800—Obverse Damage—NCS. AU Details. Breen-6438, BD-2, High R.3. Bass-Dannreuther Die State b/b. A relatively small dig is noted on the right obverse field. Otherwise, this is a pleasing piece with virtually full luster on the reverse and unbroken luster across the obverse periphery.

*From The Mulkin Collection. (#8082)*

Attractive 1811 Small 5 Half Eagle, BD-2, MS61

1403 1811 Small 5 MS61 NGC. Breen-6464, BD-2, R.3. Two varieties for the year (Tall 5 and Small 5 reverses) share an obverse die; the small 5 with the feather tip over the center of the flag of the 5 in the closely spaced denomination is diagnostic for this reverse. Attributed as “Obverse State e” from the John Dannreuther and Harry Bass Early U.S. Gold Coin Varieties reference, showing obverse reclashing and die crack from star 9 to star 10, and “Reverse State b, clashed.”

The brass-gold surfaces display soft luster and are imbued with traces of greenish-tan. A well executed strike imparts sharp detail to the design elements. Light handling marks do not detract, nor do faint adjustment marks on the upper reverse. This is quite an attractive coin for the designated grade.

*Ex: Dr. Conway A. Bolt Collection (Stack's, 4/1966), lot 912 (Stack's envelope included).*

*From The Mulkin Collection. (#8109)*

MS62 1811 Small 5 Half Eagle, BD-2

1404 1811 Small 5 MS62 NGC. Breen-6464, BD-2, R.3. Bass-Dannreuther Die State e/b with prominently clashed dies. This lemon-gold early half eagle has a lustrous reverse and full luster across the obverse periphery. Friction is minimal, and both sides are refreshingly devoid of singular abrasions. Only two die varieties are known for the 1811. The obverse die is the same, but the reverses are readily distinguished by the size of the 5. The Large 5 variety is believed moderately scarcer. Both marriages are much more elusive than the 1807 BD-8 or the 1810 Large Date, Large 5, BD-4. (#8109)

Borderline Uncirculated 1812 Five Dollar Wide 5D, BD-1

1405 1812 AU58 NGC. Wide 5D, Breen-6466, BD-1, R.3. The open fields are reflective, while the legends and devices demonstrate cartwheel luster. A few trivial adjustment marks are detected on the upper left reverse border. This die pairing is noteworthy for a lengthy curved die scratch, as made, within the eagle's shield and left (facing) wing. (#8112)

## CLASSIC HALF EAGLES

Impressive MS62 1834 Classic Five Plain 4, Second Head

1406 1834 Plain 4 MS62 PCGS. Second Head, Breen-6502, McCloskey 2-C, R.4. A scarcer variety with a triple punched 4 in the date and a repunched D in 5 D. Both dies are seen more often in other 1834 pairings, such as M. 2-A and M. 4-C. The heavy die break through most of UNITED may account for the scarcity of M. 2-C. This is an unabraded example with substantial luster and minor mint-made strike-throughs near OF and star 12. (#8171)

Marvelous 1834 Five Dollar Classic Head, Plain 4, MS64

1407 1834 Plain 4 MS64 NGC. First Head, Breen-6501, McCloskey 1-A, R.3. There are four types of half eagles produced in 1834: the Capped Head to Left coins with Plain 4 or Crosslet 4, and the Classic Head coins, also with Plain or Crosslet 4. The Capped Head 1834 half eagles are, of course, the last of their type, and among the Classic Heads the Crosslet 4 is much more elusive than the Plain 4 variety. The Plain 4 is appealing in high grade, however, precisely because it is the most obtainable. In MS64, 1834 Plain 4s are far from common, but when found they make wonderful type coins. NGC has certified 52 pieces in this near-Gem grade, with only eight coins finer (9/09). The surfaces of this piece are a lustrous, bright yellow-gold, with lots of eye appeal and minimal marks for the grade. A small arcing die crack connects stars 4 and 5 to the obverse rim in two places. Another plus is the bold strike, and there are no distractions save for a couple of tiny dark toning areas of little import. (#8171)

---

**MS63 1835 Half Eagle, First Head**

- 1408 **1835 MS63 PCGS.** First Head, Breen-6504, McCloskey 1-A, R.2. The 5 in the denomination is completely under the fletchings, and the leaf pair is distant from the bottom of the U in UNITED. On the obverse star 7 points to the forward half of the third curl atop the head. This is a wonderful early 19th century type coin in the Classic half eagle series, one that we think is much underrated. Pretty yellow-gold surfaces radiate much eye appeal, despite the minor ticks that prevent an even finer grade. (#8173)
- 1409 **1836 AU50 ICG.** Second Head, Small Date, Breen-6508, McCloskey 5-D, R.3. Luster fills the devices and legends of this straw-gold Classic five. Minimally abraded aside from a faint pinscratch above the beak. (#8174)
- 1410 **1836 AU55 PCGS.** Second Head, Large Date, Breen-6509, McCloskey 2-B, R.4. A scarce die marriage distinguished by a prominent vertical die crack that nearly bisects the obverse between 12:30 and 5:30. Splendidly detailed and partly lustrous. One thin obverse mark noted at 10:30. (#8174)
- 1411 **1837 AU53 NGC. CAC.** Large Date, Large 5, Breen-6512, McCloskey 2-B, R.3. A sun-gold better date Philadelphia Classic five with substantial luster and uncommonly few marks. Sharply struck and pleasing. Certified in a prior generation holder. (#8175)
- 1412 **1838-D—Improperly Cleaned—NCS. VF Details.** McCloskey 1-A, R.3, the sole dies. Slightly bright and glossy, but the eagle's plumage has a wealth of detail. The borders display occasional tiny digs. This introductory Dahlonega issue is costly in better circulated grades, but the present piece should be affordable to the budget-minded Southern gold collector. (#8178)

---

**LIBERTY HALF EAGLES**

**Lovely, Conditionally Rare  
1839 Liberty Half Eagle, MS63**

- 1413 **1839 MS63 PCGS.** The 1839 Liberty half eagles were the first of a denomination that would continue for nearly 70 years, although the design is actually quite different from the issues of 1840 and later, making it technically a one-year subtype. Most known survivors from the mintage of 118,000 coins are well-circulated, and Mint State examples are rare. The yellow-gold surfaces on this specimen offer rich, frosty luster and ebullient eye appeal. A few of the obverse stars around the periphery are incompletely struck up, but the central details are boldly impressed. Scattered light abrasions account for the grade, and a couple of small dark flecks appear on the reverse, which also shows some strike incompleteness on the dentilation. Despite such minor quibbles, this is a nonetheless lovely and elusive conditional rarity. Population: 5 in 63, 1 finer (9/09). (#8191)
- 1414 **1839-C—Improperly Cleaned—NCS. VF Details.** Variety 1. The yellow-gold surfaces of this C-mint representative display traces of luster in some of the recessed areas, and the design elements retain relatively strong detail. Fine hairlines show under magnification; these should not dissuade the interested bidder as the cleaning is light. The obverse mintmark location makes this a popular design type. *From The Mulkin Collection.* (#8192)

- 1415** 1841-C—Repaired, Improperly Cleaned—NCS. AU Details. Variety 1, the only known. Fine hairlines are visible on the yellow-gold surfaces of this AU Details coin, as are scattered contact marks and four or five shallow scrapes in the upper left obverse field. What appear to be two small rim cuts are visible in the upper right obverse and lower right reverse. The design elements are sharply defined, save for the typical softness on the claws and arrow feathers. Few Mint State 1841-C fives are known.  
*From The Mulkin Collection.*(#8203)

**Coveted 1841-D Small D Five Dollar, XF45**

- 1416** 1841-D Small D XF45 NGC. Variety 5-D. This straw-gold Dahlonega five dollar piece is devoid of obtrusive abrasions, and has considerable hair and wing detail. Occasional portions of the devices are incompletely brought up, as usual for the remote Georgian facility. Fewer than 30,000 pieces were struck. (#8204)

- 1417** 1842-C Large Date—Improperly Cleaned—NCS. XF Details. Variety 1. This green-gold representative lacks obvious hairlines and has pleasing detail on the eagle's wings. Liberty's curls and the eagle's neck are typically struck. Only one mark of any consequence, located near the uppermost arrowhead.  
*From The Mulkin Collection.*(#8209)

- 1418** 1843-C XF40 NGC. Variety 1. Well-defined for the grade with rich orange-gold color that shows glimpses of radiant luster in the fields. Lightly abraded overall, as expected of the grade, but highly pleasing nonetheless.  
*From The Mulkin Collection.*(#8214)

**Lustrous Choice XF 1843-D Medium D Five**

- 1419** 1843-D Medium D XF45 PCGS. Variety 10-H, the sole Medium D variety. Like many of its fellows, this Medium D half eagle has soft central definition, but the coin's actual level of wear is minor. Warm yellow-gold surfaces have considerable remaining luster in the protected areas, and the fine abrasions on each side are a minimal influence on the eye appeal. (#8215)

**Crisp 1843-D Medium D Half Eagle, AU53**

- 1420** 1843-D Medium D AU53 PCGS. Variety 10-H. The more available of two Dahlonega half eagle varieties for the year. A line of three tiny die lumps between stars 1 and 2, another lump below star 12, and other minute lumps over the 43 in the date affirm the variety (Douglas Winter, 2003, p. 171). Semibright yellow-gold surfaces give off a slight greenish cast and the design elements exhibit strong detail. None of the distributed small marks are worthy of individual mention. Population: 11 in 53 for the issue, 28 finer (9/09). (#8215)

**Rare XF Small D 1843-D Half Eagle**

- 1421** 1843-D Small D XF40 PCGS. Variety 10-G. The rarer mintmark variety of the 1843-D half eagle. The Small D is over the V in FIVE, while the more available Medium D variety has the mintmark centered above the VE in FIVE. Luster fills the hair, plumage, and legends of the present XF Dahlonega five. Richly detailed, and the only consequential marks are concealed on the shield and relegated to the field near the AM in AMERICA. (#98215)

**Pursued XF 1844-C Five Dollar**

- 1422** 1844-C XF40 PCGS. Variety 1. This Charlotte Mint five is from a low production of 23,631 pieces, most of which have long since been melted or lost. The present example is pale green-gold and has smooth, minimally marked fields. The eagle is richly defined, while Liberty's hair shows some incompleteness of strike. (#8220)

### Sharply Struck 1845 Half Eagle, MS62

**1423 1845 MS62 NGC.** As expected from the relatively large mintage (417,099 circulation strikes), the 1845 half eagle can be found with little difficulty below Mint State. NGC and PCGS have graded fewer than 80 Uncirculated pieces, none above MS64. The yellow-gold surfaces of this MS62 example display partially prooflike fields and sharply struck design elements. Scattered small marks limit the grade. Census: 11 in 62, 15 finer (9/09). (#8223)

**1424 1846-D—Improperly Cleaned—NCS. AU Details.** Variety 14-I. The date is high and the mintmark is mostly above the V in FIVE. The semibright yellow-gold surfaces display traces of luster in some of the recesses. The design elements are well defined and some minute contact marks are visible on each side. Magnification brings out some fine hairlines, but the cleaning is not all that bad. From The Mulkin Collection. (#8228)

### Dynamic 1847 Half Eagle, MS64

**1425 1847 MS64 NGC.** For a currently unexplained reason, more ounces of gold were converted to coin in 1847 than in any other year before the California gold discoveries. Nearly 1 million half eagles were coined in Philadelphia in 1847, including this piece that has few peers. Despite the high mintage, the average grade of surviving examples hovers near the AU55 grade level. The present example has stunning, reflective luster with bold design elements and rich lemon-yellow surfaces. A few tiny marks prevent a higher grade, but this piece ranks as one of the finest survivors known. Census: 9 in 64, 0 finer (9/09). (#8231)

**1426 1847-C XF45 ANACS.** Variety 1. Despite a mintage of 84,151 pieces, generous by Charlotte Mint standards, only a single die pair is known. This luminous straw-gold representative displays distributed small marks and incompleteness of strike on the highpoints, as expected for the grade and issue. (#8233)

**1427 1848 MS60 NGC.** Yellow-gold surfaces are tinted with light green and show a splash of multicolored toning at 1:00 on the reverse margin, and the design elements are well impressed throughout. The few minuscule contacts do not detract, nor do some wispy field marks that only show with high magnification. The overall eye appeal is much better than what is expected for the designated grade. (#8236)

**1428 1848-C—Improperly Cleaned—NCS. AU Details.** Variety 1, the only known. A uniformly microgranular representative of the Charlotte Mint. The luster is subdued, but little if any wear is present. The strike is above-average, save for softness on the E in LIBERTY and the fletchings. (#8237)

**1429 1848-D XF45 PCGS. CAC.** Variety 19-N. This is the same die marriage as the repunched mintmark variety, but the present piece is the later die state with no evidence of the initial low-entered mintmark. A well detailed yellow-gold Choice XF Dahlonega five with a few moderate marks on the reverse field and a rim ding beneath the 8 in the date. (#8238)

### Incredible 1849 Half Eagle, MS61

**1430 1849 MS61 PCGS.** California gold discoveries clearly influenced production of gold coins at the branch mints, and at Philadelphia. Despite a mintage of 133,070 coins, the 1849 half eagles are still very elusive, especially in higher grades. Only a little over 30 Mint State examples have been certified by NGC and PCGS in all Mint State grades. This piece is highly attractive with rich lemon-yellow luster and prooflike fields. Hints of orange toning add to its overall eye appeal. Population: 4 in 61, 2 finer (9/09). (#8240)

### Near-Mint 1850-C No Motto Five

**1431 1850-C AU58 NGC.** Variety 4. A yellow-gold Borderline Uncirculated Charlotte half eagle with uncommonly few marks and a mildly subdued appearance. Luster shimmers throughout the legends and devices. The mintmark is faint but nearly fully outlined. Census: 21 in 58, 21 finer (9/09). (#8244)

### Rare 1850-D Weak D Half Eagle, AU53

**1432 1850-D Weak D AU53 NGC.** Variety 23-O. The Weak D reverse showing heavy peripheral die cracks at the left reverse border. The yellow-gold surfaces display a faint greenish-gray tint, and the design elements are well defined except for the usual weakness on the eagle's neck. Small marks are visible, especially on the obverse, but these are fewer and of less severity than typically seen. Rare in AU and virtually unknown in Mint State. (#98245)

---

### Important 1851 Half Eagle, MS61

**1433** 1851 MS61 PCGS. This is an extremely important opportunity for the advanced specialist because the 1851 five dollar is quite scarce in Mint State grades. Mintage of 1851 half eagles in Philadelphia numbered 377,505 coins, but only about 100 have been graded Mint State by PCGS and NGC. This one is sharply struck with bright yellow-gold surfaces. Minute marks over each side limit the grade. Population: 12 in 61, 25 finer (9/09). (#8246)

**1434** 1851-O—Improperly Cleaned—NCS. AU Details. Most 1851-O half eagles entered circulation, and today they are a rare date in any grade. Mint State pieces are virtually unobtainable. The yellow-gold surfaces of this AU Details specimen have been dulled a bit by the light cleaning. The design features are well defined save for the usual minor softness on the eagle's neck. Scattered ticks do not detract. From The Mulkin Collection. (#8249)

---

### Flashy MS62 1852 Half Eagle Elusive in Mint State

**1435** 1852 MS62 PCGS. Despite the generous mintage approaching 600,000 pieces, Mint State examples of this antebellum issue are surprisingly rare; Garrett and Guth estimate (2006) that only about 150 examples survive. There is some rim crumbing beneath the date, and some of the peripheral stars around the obverse are incompletely struck. The strike on the reverse is bold, save for minor weakness on the fletchings and eagle's claws. Flashy golden luster complements the overall good eye appeal. A small patch of scrapes in the right reverse field likely limits an even finer grade. Population: 37 in 62, 29 finer (9/09). (#8250)

---

---

### Conditionally Rare 1854 Half Eagle, MS64

**1436** 1854 MS64 NGC. Bright lemon-yellow color complements the satiny luster that glistens over the barely abraded surfaces. The centers are a bit soft, as often seen, but the stars are fully defined. Given its rarity in Mint State grades, the 1854 half eagle is an underrated—and thus undervalued—issue. Neither NGC nor PCGS has certified any coins finer than the present specimen (9/09). (#8256)

**1437** 1854-D Weak D AU50 NGC. The curve of the mintmark is barely discernible on this Dahlonega five. Light yellow-gold and orange surfaces retain considerable radiant luster. (#98258)

---

### Desirable AU 1855-C Five Dollar

**1438** 1855-C AU50 ANACS. Variety 1, sole die pair for the year. The portrait is crisply detailed, though the eagle's neck lacks the level of fine detail sometimes seen. Pale yellow-gold surfaces show minimal alloy and exhibit surprising radiance for an AU50 piece. Housed in a small-format ANACS holder. (#8262)

**1439** 1856-D—Improperly Cleaned—NGC. AU Details. Variety 33-BB. This low mintage Dahlonega half eagle has only minimal wear, but the surfaces are slightly bright and minutely granular. The stars are typically brought up, but the designs are otherwise well struck by the standards of the remote Georgian branch mint. (#8268)

---

Appealing 1856-O Half Eagle, AU53

**1440** 1856-O AU53 PCGS. CAC. The 1856-O half eagle, with a mintage of 10,000 pieces, is tied with the 1892-O for the lowest production total of any O-mint five. In fact, after the 1857-O half eagles, New Orleans would make no more half eagles for 35 years, until the 1892-O. The 1856-O is rare in About Uncirculated, and extremely rare in Mint State. This AU53 example boasts appealing orange-gold surfaces with a few light contact marks, although fewer than might be expected for the grade. The strike, as is typical for the issue, shows flatness on some of the stars around the periphery and at the bottom of the date. The reverse is choice for the grade. Population: 5 in 53, 10 finer (9/09). (#8269)

**1441** 1858 AU53 PCGS. CAC. A yellow-gold example that boasts a generous quotient of mint luster. No marks merit mention, and the strike is good despite softness on the eagle's neck and fletchings. The mintage of 15,136 pieces makes the 1858 a decidedly better date. Population: 4 in 53, 16 finer (9/09). (#8276)

---

Pleasing Choice XF 1858-C Five

**1442** 1858-C XF45 PCGS. Variety 1, the one more frequently seen. This is an attractive Choice XF example with strong central definition on the stars as well as pleasing hair detail. Lightly worn with dusky yellow-orange surfaces that show few overt abrasions. PCGS has graded 87 finer examples (9/09). (#8277)

---

High Grade 1859-D Half Eagle, MS63

Ex: Montgomery, Milas, Chestatee

**1443** 1859-D Medium D MS63 PCGS. Variety 36-CC. Easily one of the finest survivors known for this elusive late-date Dahlonega half eagle issue, listed in Doug Winter's Condition Census for the issue and previously part of the Chestatee Collection offered by Heritage in August 1999, which consisted of duplicates (!) from the incomparable Duke's Creek Collection. Considered the second finest known at that time. The two small abrasions below the truncation of the bust are unmistakable pedigree markers.

Rich orange-tinged yellow-gold luster shows slight granularity but is fine and pleasing nonetheless. Slight striking softness as usual on the central devices, though each side shows few marks for the grade. A great opportunity for the dedicated Dahlonega gold lover.

Ex: Arthur Montgomery Collection; Auction '84 (Stack's session, 8/1984), lot 1351; Ed Milas; Ed Milas Collection (Stack's, 5/1995), lot 516; Numisma '95 (Stack's/RARCOA/Akers, 11/1995), lot 1469; Chestatee Collection (Heritage, 8/1999), lot 7700. (#8282)

---

---

**Exemplary XF45 1860-D Half Eagle, Medium D**

**1444 1860-D Medium D XF45 PCGS.** Variety 38-FF, the only known Medium D dies. The 1860-D half eagle is among the better-produced issues of this Southern mint, and this is an exemplary representative of its output. The strike is bold, save for flatness on star 1, and on the eagle's lower neck on the reverse. Neither side shows any singular abrasions, despite wear consistent with the grade. Lovely orange-gold surfaces round out the broad appeal. (#8286)

**1445 1861 MS60 NGC.** Well-defined with no trace of wear and swirling luster. Moderately abraded surfaces are yellow-orange near the rims with lightening color at the centers. (#8288)

**1446 1866-S No Motto VF30 PCGS.** Moderately circulated yet wholly pleasing, this is a highly desirable survivor from among the 9,000 pieces of its issue, the last of the No Motto half eagles. Luminous orange-gold surfaces are minimally marked, and the wear on each side is balanced. Population: 6 in 30, 20 finer (9/09). (#8300)

---

**Elusive 1866-S Motto Half Eagle, XF40**

**1447 1866-S Motto XF40 NGC.** Both 1866-S issues (With Motto and No Motto) are extremely rare in the higher circulated grades and all but unknown in Mint State (a single MS61 NGC 1866-S Motto coin has been certified). This XF40 Motto example is on the high side for certified survivors, most of which average about VF30. The antique-gold surfaces show a fairly sharp strike and minimal abrasions for the grade, despite the 20 points of wear. Census: 5 in 40, 25 finer (9/09). (#8312)

**1448 1869-S XF45 NGC.** The San Francisco Mint struck close to 700,000 double eagles in 1869, but other denominations were neglected. Only 31,000 half eagles were struck, and few if any were set aside. NGC and PCGS combined have certified only four Mint State examples, none above MS62. This is an unblemished example with noticeable luster throughout the reverse legends. The devices show inexactness of strike, usual for the facility and era. (#8318)

---

**Key 1870-CC Half Eagle, VF30  
Low-Mintage First-Year Issue**

**1449 1870-CC VF30 ICG.** A perennial collector favorite as the first year of half eagles (or any coinage) from the legendary Carson City Mint, as chronicled so delightfully in *The Mint on Carson Street* by the indefatigable Rusty Goe. A meager 7,000 pieces were coined, a total subject to the whims and vagaries of the miners who deposited bullion for coinage. The 1870-CC is the key to the Carson City half eagles, rarely seen above Choice VF or so. This VF30 piece shows the normal weak strike on the eagle's neck and the fletchings. For a coin that has seen 30 points of wear, however, there are remarkably few abrasions on the orange-gold surfaces, and a pleasing amount of detail remains. (#8320)

---

---

**Prized 1871-CC Five Dollar, AU55**

**1450 1871-CC AU55 NGC.** Produced in only the second year of the fabled Carson City Mint's short lifespan, the 1871-CC half eagles were made to the extent of only 20,770 pieces. That was a fairly generous number for the series and the era; compare it with the 7,675 coins that facility managed to make in its first year. The Carson City Mint was a demand-driven establishment. The need for a local mint—rather than distant San Francisco—drove its creation, and its products were readily snapped up to feed the needs of regional commerce. CC-mint pundit Rusty Goe estimates a survival rate below 1% for the issue, or 140-175 coins in all grades. In AU55 this piece is one of only nine so graded at NGC, with eight coins finer (9/09). The apricot-gold surfaces are relatively free of singular abrasions, with excellent eye appeal. A hint of strike softness appears on the high points of each side, but otherwise there are few distractions. (#8323)

---

**Challenging 1879-CC AU50 Five Dollar**

- 1451 1879-CC AU50 PCGS.** The various levels of About Uncirculated are the highest condition that most collectors will encounter when searching for an 1879-CC half eagle. Mint State specimens are extremely rare; PCGS and NGC have seen a mere six such coins, all in MS60 and MS61. Traces of luster show in the protected areas of this yellow-gold AU coin, and most of the devices are well defined. The few minor marks are inconsequential. (#8349)
- 1452 1879-CC—Polished—NCS. AU Details.** The Carson City Mint struck minuscule quantities of half eagles compared to most Philadelphia and San Francisco issues of that era. For example, the 1879-CC had a mintage of just 17,281 pieces, while Philadelphia struck 301,920 half eagles that year and San Francisco produced another 426,200 fives. This example is unnaturally prooflike and a bit bright from buffing. The reverse field displays a pair of short pinscratches. (#8349)
- 1453 1880 MS64 NGC.** A satiny Choice Liberty five from the first high mintage date of the series. MS64 examples are very scarce, however, since most Uncirculated survivors were loosely stored. Well preserved save for a few delicate obverse field grazes. (#8351)
- 1454 1881 MS64 PCGS.** An impressively well-defined near-Gem with great eye appeal. The yellow-gold surfaces have delightful satiny luster. PCGS has graded just 12 finer pieces (9/09). (#8354)

---

### Softly Frosted MS65 1881 Half Eagle

---

### Popular 1890-CC Select Five Dollar

1455 1881 MS65 PCGS. The enormous production of more than 5.7 million coins makes available exciting Gem coins such as the present piece, with superlative reddish-gold coloration and minimal contact, large or small. The bold strike is compelling. The only minor drawback are some tiny dark areas of unknown origin along the obverse rim. (#8354)

1456 1882-S MS64 NGC. A pleasing near-Gem with vivacious luster, a precise strike, and a smooth appearance. NGC has certified only 27 pieces finer (9/09). (#8360)

1457 1884-S MS63 PCGS. Light blue patina along the rims surrounds the yellow-gold centers of this lustrous piece. Several pin-sized abrasions and a couple of tiny spots define the grade. Population: 43 in 63, 8 finer (8/09). (#8366)

1458 1885 MS64 PCGS. Lustrous and crisply struck with splashes of orange that accent the straw-gold surfaces. The obverse is beautifully preserved, and the reverse field has only a few field abrasions. Certified in a green label holder. Population: 51 in 64, 2 finer (9/09). (#8367)

1459 1885-S MS64 NGC. The 1885-S is scarce in grades finer than MS64. This example is boldly detailed with frosty light yellow-gold luster and brilliant surfaces. (#8368)

---

### Bright MS62 1890-CC Half Eagle

1460 1890-CC MS62 NGC. The 1890-CC five is a plentifully available (relatively speaking) Carson City five. This piece shows the bright yellow-gold mint luster typical of the issue. The surfaces are minimally abraded for the grade, and the only striking weakness is seen in the centers of each side. (#8376)

---

1461 1890-CC MS63 PCGS. The 1890-CC is popular with collectors desiring a coin struck at the Carson City Mint. Rich orange-gold patina adorns the lustrous surfaces of this Select example, imbued with sky-blue and reddish freckles. A well directed strike also leaves fairly sharp definition on the motifs. Light handling marks are slightly more noticeable on the obverse. Population: 28 in 63, 31 finer (9/09). (#8376)

1462 1891-CC MS61 PCGS. The mintage of 208,000 coins is the highest mintage of any gold issue struck in Carson City. As such it is an ideal candidate for the type collector who seeks a single representative of the Nevada Mint. This piece is fully lustrous with rich green-gold surfaces and sharp details. (#8378)

1463 1891-CC MS62 PCGS. CAC. A highly pleasing Carson City gold type coin that lacks the myriad small scuff typically associated with the MS62 level. Although available in higher Mint State grades, the present piece nonetheless provides excellent value. (#8378)

---

### Deeply Patinated 1893-CC Five, MS61

1464 1893-CC MS61 NGC. Gold coins were exported widely between 1891 and 1893, and over the past couple of decades many of those same coins have been repatriated. This is a pleasing example of this final year of issue for the Carson City mint. The strike is strong throughout, and the surfaces show deep reddish patina overall with no objectionable marks on either side. (#8384)

1465 1894-O MS60 NGC. This bright greenish-yellow half eagle has reflective fields around satiny devices. The surfaces are lightly abraded, as expected for the grade. Both sides have sharp design definition, and the overall appearance is excellent. The 1894-O half eagle is scarce, with a mintage of only 16,000 coins. NGC and PCGS have combined to grade about 125 of these in all Mint State grades. (#8388)

**1466** 1899-S MS64 NGC. Here is a common, high mintage date that is a major rarity in MS64 or finer grades. NGC and PCGS have combined to certify a mere 80 pieces in MS64, and only 25 finer. The bold strike and brilliant lemon-yellow surfaces of this frosty near-Gem provide exceptional eye appeal. (#8399)

**1467** 1900 MS64 NGC. An exquisite near-Gem that boasts pleasing preservation and original toning. The obverse is olive-green, while the reverse is peach-tinged. Well struck aside from a couple of right-side star centrals. (#8400)

#### Remarkable MS66 1901-S Half Eagle

**1468** 1901-S MS66 PCGS. CAC. The 1901-S offers the twin appeals of the popular S mintmark and its status as probably the most common half eagle in high grades—a status due as much to the large mintage as to the overall excellent production criteria. This remarkable Premium Gem displays those criteria in abundance, with a nearly full strike (save for a couple of obverse star centers), glorious luster, and attractive red-orange coloration. Abrasions are virtually absent. Population: 43 in 66, 2 finer (9/09). (#8404)

#### Radiant MS64 1904-S Five

**1469** 1904-S MS64 NGC. Only 97,000 examples of this issue were coined—a significant drop from the levels of the previous few years—and Gem examples are unsurprisingly elusive. This splendid near-Gem example offers radiant luster over lovely orange-gold surfaces. The strike is quite close to full, as expected on S-mint productions of the era. It is perhaps only a hair-thin mark on Liberty's cheek that prevents an even finer grade, but the eye appeal is considerable. Census: 6 in 64, 3 finer (9/09). (#8410)

## INDIAN HALF EAGLES

#### Lovely Gem 1908 Indian Half Eagle

**1470** 1908 MS65 PCGS. CAC. The year 1908 marked the transition among half eagles from the long-running Liberty Head to the new Indian Head design. Quarter eagles saw no “split year transition,” as the 1907s were Liberty Heads, the 1908s Indian Heads. For eagles and double eagles, the transition was in 1907, and to the Saint-Gaudens design rather than to the one by Pratt. So the 1908 half eagle pair is something of an oddity among gold coins. This lovely Gem is a wonderful commemoration of the new beginning. The exposed obverse fields and the Indian’s cheek are remarkably smooth and abrasion-free, and the strike is bold except for the lowest three feathers. Generous luster and amazing orange-gold and lime-green colors are a further complement. PCGS has certified only 18 examples finer (9/09). (#8510)

Satiny MS66 1909 Half Eagle

1471 1909 MS66 PCGS. Although the 1909 Indian Head half eagles are not series rarities, Akers points out in his recent *Handbook* that the issue is “virtually unobtainable above the MS-65 grade level.” Of course, many collectors would be more than proud to own a Gem Indian five dollar, but this Premium Gem piece goes one better. The color is a consistent, mellow orange-gold throughout both sides, neither of which shows mentionable distractions, large or small. The strike is much better executed than normal, and the thick, satiny luster is a plus. This coin is one of only eight Premium Gem examples certified at PCGS, and there are none finer (9/09). (#8513)

Bright 1909-O XF45 Half Eagle

1472 1909-O XF45 NGC. The brass-gold surfaces of this bright Choice XF O-mint representative display subtle hints of reddish-tan. Minute distributed marks are more or less in line with a coin having seen light circulation, and the design elements retain a good amount of detail. (#8515)

Key 1909-S Indian Five Dollar  
Remarkable, High-End MS64

1473 1909-S MS64 PCGS. The 1909-S is one of the keys to the five dollar Indian series. Plenty were struck, with a mintage just shy of 300,000 pieces, but survival is the problem. Few high grade examples are known today. PCGS has only certified 16 examples in MS64 with four finer, and NGC has graded half that many (8/09). This is a well-produced issue, with the present piece showing the usual strong striking details and rich, frosted mint luster. The surfaces display even reddish-tinted color. This is a remarkably clean coin, with no singularly mentionable abrasions on either side. (#8516)

1474 1910-D MS62 PCGS. Light yellow patina coats both sides of this lustrous specimen. Scattered abrasions define the grade, but none merit specific mention. The 1910-D had the sixth-lowest mintage in the Indian Head half eagle series. (#8518)

1475 1910-D MS62 NGC. Predominantly light orange-gold, with glimpses of powder-blue across the borders. The satiny fields and devices lack obtrusive marks. The 1910-D is conditionally rare above MS63, perhaps due to its mintage of less than 200,000 pieces. (#8518)

### Pleasing Select 1910-D Half Eagle

1476 1910-D MS63 NGC, CAC. The 1910-D half eagle is borderline scarce in MS63 and a condition rarity any finer, with just 12 such pieces known to NGC (9/09). This Select piece has distinctive eye appeal, with lustrous gold-orange centers giving way to generous amounts of violet alloy close to the rims. Only a few wispy marks preclude an even better grade. (#8518)

1477 1911-D AU58 NGC. A lustrous near-Mint example of the important 1911-D half eagle, with light yellow devices and darker fields that show splashes of olive patina. (#8521)

1478 1911-S MS62 NGC. Both sides have dappled yellow-orange color with dots of forest-green alloy at the margins. Well-defined with scattered light to moderate marks that preclude a Select designation. (#8522)

1479 1911-S MS62 NGC. This scarcer date Indian five is primarily apricot-gold, although a few tiny gray spots are distributed. Close inspection beneath a loupe reveals a distinct mintmark and only moderate abrasions. (#8522)

1480 1911-S MS62 PCGS. A satiny mustard-gold example of this high mintage but conditionally challenging issue. The mintmark is clear, the strike is bold, and the few noticeable marks are confined to the reverse. (#8522)

1481 1911-S MS62 NGC. Bright yellow-gold surfaces exhibit well struck devices save for weakness on the eagle's shoulder. Several small marks scattered about limit the grade. (#8522)

1482 1911-S MS62 PCGS. The luminous surfaces of this S-mint half eagle display brass-gold coloration, and a well executed strike imparts relatively strong definition to the design elements, though the lowest feathers on the headdress reveal the usual softness. Grade-defining contact marks are most prevalent in the raised exposed fields. A scarce date despite its rather generous mintage of over 1.4 million pieces. (#8522)

### Captivating MS64 1913 Half Eagle

1483 1913 MS64 NGC, CAC. Rich orange-gold luster is the rule on this remarkable near-Gem. The central details are bold, and finer elements such as the necklace are also fully outlined. A touch of peripheral duskskin does little to affect the noteworthy eye appeal. NGC has graded only 42 finer examples (9/09). (#8525)

### Delightful Near-Gem 1913 Five Dollar

1484 1913 MS64 NGC, CAC. A shining yellow-orange piece with remarkable eye appeal for the issue. Well-defined and minimally abraded overall, though three near-vertical marks in the fields close to the portrait preclude an even finer designation. NGC has graded just 42 numerically superior pieces (9/09). (#8525)

1485 1914 MS63 NGC. Bold sun-yellow color with suggestions of brass and butter-yellow. Well-defined and modestly abraded for the grade assigned. Considerable eye appeal. (#8527)

### Shining 1914 Five Dollar, MS64

1486 1914 MS64 NGC. Bright luster invigorates the peach-gold surfaces of this near-Gem, complemented by sharply struck design features. A few minute marks in the raised exposed fields, especially on the reverse, preclude Gem classification. The 1914 is available through MS64, but becomes considerably more difficult any finer. NGC and PCGS have graded only about 40 pieces MS65 and better (9/09). (#8527)

### Appealing Near-Gem 1914 Half Eagle

1487 1914 MS64 PCGS, CAC. Wonderful wheat-gold color with glimpses of peach at the margins. Well-defined with only a few wispy marks present in the reverse fields. While the 1914 half eagle is available for a price at the MS64 level, finer examples are rarities. PCGS has graded only 23 such pieces (9/09). (#8527)

**1488** 1914-S MS61 PCGS. Tints of light tan are embedded on the brass-gold surfaces of this S-mint five dollar and a well directed strike leaves strong definition on the design elements. Despite a few scattered small marks, this is a nice piece for the designated grade. (#8529)

**1489** 1915 MS63 PCGS. Pale yellow-gold surfaces have bright, almost brassy luster. Strong definition on the headdress and necklace. A line of tiny reed marks appears on the Indian's face. (#8530)

**Delightful 1915 Half Eagle, MS64**

**1490** 1915 MS64 PCGS. CAC. Primarily bright yellow-gold with arcs of deeper orange at the left rims, more prominently on the obverse. Great luster with a significantly above-average strike. This Choice piece would make an excellent addition to a similarly graded date set. PCGS has graded just 39 finer pieces (9/09). (#8530)

**Uncirculated 1915-S Indian Five**

**1491** 1915-S MS61 ICC. Like all San Francisco Indian fives, the 1915-S is conditionally rare, and Uncirculated examples are coveted. This is an unblemished honey-gold representative that has a good strike, save for the customary incompleteness within the lower headdress. Only a single piece (an MS65 NGC) has been certified above the MS64 level. (#8531)

**EARLY EAGLES**

**XF Details 1795 Small Eagle Ten  
13 Leaves, BD-2**

**1492** 1795 13 Leaves—Improperly Cleaned—NCS. XF Details. Breen-6830, Tarasza-2, BD-2, High R.4. This slightly subdued and faintly hairlined olive-gold representative displays noticeable luster throughout the stars, letters, wings, and hair. An unimportant pin scratch passes through the beak, and a short, faded thin mark is beneath the IB in LIBERTY. A small area of granularity is present on the reverse exergue, and a small pellet-shaped strike-through is west of the date. A few trivial adjustment marks, as made, are concealed on Liberty's cap. The preceding list of defects appears much worse than it actually is, and most gold collectors would be delighted to possess this desirable Small Eagle early ten. (#8551)

---

**Significant Early State 1797 BD-2 Eagle, AU53  
Perfect Obverse Die**

**1493 1797 Large Eagle AU53 PCGS.** Breen-6834, Tarasza-12, BD-2, High R.4. Three die varieties are known for the 1797 Heraldic Eagle tens, all from a single obverse die. Until cataloger John Dale Beety of the Heritage staff examined this coin, it was believed that every example from all three die pairings had a die crack through the final 7.

The BD-2 die combination was first used to produce a copper die trial early in the year. The unique surviving copper example has no trace of the obverse die crack. Next, the present example and probably a few others were struck, also without the obverse crack, while showing the small rust lump on the top of the second T in STATES, apparently present on all die states. Those coins were followed by examples of BD-2 with a light die crack through the 7. Later die states exist with a much heavier crack through the 7, the same die state also seen on all examples of BD-3 and BD-4.

The present coin has light yellow color with minor abrasions in the obverse fields. Slight central weakness is seen on the obverse, but the reverse is sharply defined. There is no evidence of die lapping or clash marks that might indicate a later die state. Prooflike luster is present on the obverse near the border, through the date, and through LIBERTY. The reverse is entirely prooflike. The prooflike appearance lends credence to our belief that this specific coin was among the first 1797 eagles struck in April of that year. Its importance as a possible unique early die state piece cannot be overstated. (#8559)

---

**Boldly Struck 1797 Large Eagle  
Ten Dollar, BD-2, AU55**

**1494 1797 Large Eagle AU55 NGC.** Breen-6834, Taraszka-8, BD-2, High R.4. This obverse is the only one used with the Large Eagle reverse; it has 10 stars left and six right. On the reverse, a star touches cloud 4, whereas in BD-3 and BD-4 the star is distant from cloud 4. Also, the eagle has a long thin neck.

Yellow-gold and apricot colors compete for territory on this Choice AU specimen that displays traces of luster in the recessed areas. Uniformly sharp definition is apparent on the design features. Fine hairlines show up under high magnification on the obverse, where a couple of hair-thin marks are also visible. The last 7 in the date shows a marked die crack running upward from the rim through the top serif where it thins out before extending onto the drapery. Ex: The Grant Pierce & Sons Collection (Stack's, 5/1965), lot 1434 (Stack's envelope included).

From The Mulkin Collection. (#8559)

---

---

**XF Sharpness 1799 Eagle, BD-10  
Large Stars Obverse**

**1495 1799 Large Stars Obverse—Removed From Jewelry—NCS. XF Details.** Breen-6841, Taraszka-22, BD-10, R.3. A bold but overly bright example that is pebbled with myriad small marks. A faded rose spot above obverse star 1 is pinscratched, and the reverse has a minor rim ding at 5 o'clock. An affordable representative of this pricey early gold type. (#8562)

---

**Appealing Near-Mint 1800 Eagle, BD-1**

**1496 1800 AU58 PCGS. CAC.** Breen-6842, Taraszka-23, BD-1, High R.3. Only a single die combination is known of this issue. The combination of its 19th-century date and relative availability makes it a popular choice in high grades for gold type sets. Only light high-point rub divides this piece from a Mint State grade. The orange-yellow surfaces show no adjustment marks or singular abrasions on either side, which together with the bold strike make for a piece with loads of eye appeal. Bidders should give serious consideration to this type coin. Population: 21 in 58, 42 finer (9/09). (#8563)

---

## LIBERTY EAGLES

- 1497** 1841—Scratched—NCS. Unc. Details. Fully detailed aside from minor bluntness on the nostril and the hair above the ear. Luster is evident on the borders and devices, but both sides are hairlined, more prominently on the obverse. (#8582)

### Rare Mint State 1842 Large Date Ten

- 1498** 1842 Large Date MS60 PCGS. The date is noticeably larger than on the Small Date, and the clear crosslet on the 4 cinches the deal. Garrett and Guth note that the Large Date, while more common overall, is equally as rare in Mint State as the Small Date. The PCGS population data provide confirmation.

This piece is much more attractive than the MS60 grade suggests, with deep orange-gold coloration and considerable prooflikeness present under light haze in the fields. Numerous minor abrasions pepper the surfaces, but a single scrape in the reverse field between STATES and OF, extending downward almost to the eagle's neck, is the determinant. A die break is noted from the eagle's left (facing) claw down to the E in TEN and to the rim. Population: 1 in 60, 4 finer (9/09). (#8584)

### Wonderful AU55 1842-O Ten

- 1499** 1842-O AU55 NGC. Round O. The 1842-O is midway in rarity between the nearly uncollectible 1841-O and the relatively plentiful 1843-O. The 1842-O is scarce in all grades. Most certified examples are in XF and AU, and NGC has certified only three pieces as Mint State, one each between MS60 and MS62. This partly lustrous and crisply struck piece is slightly bright but lacks mentionable marks. Census: 30 in 55, 22 finer (9/09). (#8587)

- 1500** 1843 XF45 NGC. Distinctly worn on the obverse high points but with impressive yellow-gold luster remaining in the fields. Despite scattered abrasions, an appealing coin deserving the Choice XF designation. (#8588)

- 1501** 1843-O AU53 NGC. Still-lustrous yellow-gold surfaces show glimpses of orange. Well struck with little wear, though each side shows a number of fine abrasions and a large mark is noted near star 4. From The Mulkin Collection. (#8589)

- 1502** 1844-O AU53 PCGS. Yellow-gold surfaces display a slight greenish cast and retain luster in the protected areas of this well detailed ten dollar. Distributed small marks consistent with a lightly circulated coin occur over each side. (#8591)

- 1503** 1845 AU50 NGC. Hints of luster in the protected areas accent the charming orange-gold patina that covers both sides. Scattered abrasions are consistent with the grade. The details are well defined save for some softness on a couple of stars and around Liberty's ear. Census: 14 in 50, 52 finer (8/09). (#8592)

- 1504** 1845-O AU50 NGC. Breen-6869, "rare." All four date digits are repunched, most prominently on the 8 and 4. The top of the second vertical shield stripe has a small circular area absent. This mint-made feature is undoubtedly related to the "Shield Ring" varieties found on selected 1848 to 1853 Philadelphia and New Orleans issues. A richly detailed and luminous O-mint representative with scattered minor to moderate marks. (#8593)

### Lustrous Choice XF 1849-O Ten

- 1505** 1849-O XF45 PCGS. A luminous yellow-gold Choice XF representative of this antebellum issue, softly struck as usual at the peripheries but with slightly above-average definition on the portrait when one takes wear into account. Abrasions are noted at stars 1 and 6 and at the word TEN on the reverse. Population: 19 in 45, 13 finer (9/09). (#8602)

- 1506** 1850-O AU50 NGC. The typical 1850-O eagle grades around XF40, or perhaps a little higher, and this issue is seldom seen above AU. Delightful lilac and red accents grace the mostly yellow-gold surfaces of this minimally marked piece. Some softness is noted on the stars, but there is pleasing luster in the periphery. (#8605)

- 1507** 1852-O AU53 NGC. The 1852-O eagle is a low mintage issue (18,000 pieces) that is seldom seen in high grades. Mint State examples are virtually impossible to find, which makes AU pieces especially desirable. Flashy luster shines beneath the delightful yellow-gold patina. The surfaces are minimally abraded. The stars have weak centrils, but the rest of the details are crisply defined. Census: 20 in 53, 29 finer (8/09).  
From The Mulkin Collection. (#8609)

- 1508** 1853-O AU53 NGC. A delightfully lustrous New Orleans eagle. Pleasing watery reflectivity in the periphery enhances the olive-gold patina that covers the majority of the surfaces, with occasional red and russet accents around the perimeter. An above-average representative. (#8612)

**1509** 1854-O Small Date AU53 PCGS. The '54-O has a low mintage of 52,500 pieces, further divided into Small Date and Large Date examples, which are of approximately equal rarity. A pale gold representative with ample luster and no mentionable marks. Population: 17 in 53, 25 finer (9/09). (#8614)

**1510** 1855 AU58 NGC. Boldly defined centers but with softness on the peripheral stars. Nonetheless, this scarcely worn yellow-gold example has great eye appeal, thanks to its immense luster. (#8616)

**1511** 1855-O XF40 NGC. Prohibitively rare in Mint State, the 1855-O eagle was produced to the extent of only 18,000 coins in antebellum New Orleans. Luster is evident throughout the legends. A moderately abraded piece with a couple of abrasions near the date and a minor obverse rim ding near 8 o'clock. Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 3127, which realized \$1,955. (#8617)

**1512** 1856-O XF40 ANACS. A well defined example with moderate incompleteness of strike limited to the curls northwest of Liberty's ear. The apricot-gold surfaces are slightly glossy and show small marks. A difficult New Orleans issue with a meager mintage of 14,500 pieces. (#8620)

#### Appealing 1856-O Eagle, AU50

**1513** 1856-O AU50 PCGS. The coinage of 1856, including the 1856-O eagle, comprises the first antebellum issues in which the Mint reverted to its former style of using Upright 5s in place of the Slanted 5s, which are thought to have been a signature or preference of Mint Engraver James B. Longacre. Light wear appears as expected on the antique-gold surfaces, but plenty of appeal remains, and there are no singular abrasions. This is an issue that is all but unknown in Mint State, where only PCGS has certified a single MS60 example—despite the presence of several pieces, all AU, aboard the S.S. Republic. Population: 11 in 50, 21 finer (9/09). (#8620)

#### Delightful 1856-O Eagle, AU50

**1514** 1856-O AU50 NGC. The 1856-O ten had a paltry mintage of just 14,500 pieces, and most examples grade around XF45. The present coin is above-average, with crisp details and traces of luster in the fields. Traces of verdigris are seen around the stars and date, but there are no individually significant marks. A nice example of this elusive issue.

From The Mulkin Collection. (#8620)

#### Borderline Uncirculated 1856-S No Motto Ten

**1515** 1856-S AU58 NGC. Medium S. Because double eagles were the preferred West Coast denomination, S-mint eagle mintages were generally low prior to 1879. The 1856-S has the second highest mintage between 1854 and 1878, behind only the 1854-S, yet a scant 68,000 pieces were struck. This is a moderately abraded yellow-gold example with considerable peripheral luster. Census: 45 in 58, 1 finer (9/09). (#8621)

**1516** 1857 AU50 NGC. Brass-gold coloration adorns both sides of this low-mintage eagle (16,606 business strikes), each of which retains traces of luster in the recessed areas. Generally well detailed and revealing scattered light marks. (#8622)

#### AU55 Details 1858-S Ten

**1517** 1858-S—Cleaned—ANACS. AU55 Details. This earlier San Francisco eagle issue has a characteristically low mintage of 11,800 pieces, and this mintage, combined with a high attrition rate, accounts for how elusive it is in all grades. The present piece retains strong detail, though the original luster of the yellow-orange surfaces has been lost to cleaning. (#8627)

#### Bold Near-Mint 1860 No Motto Ten

**1518** 1860 AU58 NGC. Six-fold or bulging bun, one of two design subtypes known for this low mintage (15,105 pieces) issue. Luster brightens the devices and legends, and while the untoned surfaces display marks, none are singularly distracting. Census: 27 in 58, 6 finer (9/09). (#8631)

**1519** 1861 AU53 NGC. Five-fold or rounded bun subtype. A lustrous Civil War-era ten dollar with splendid yellow-gold patina. The stars are softly defined, but the rest of the details are bold. Scattered abrasions are entirely minor. (#8633)

**Striking 1861-S Eagle**

**1520** 1861-S PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU58 specimen that has been cleaned. Both sides have excellent central definition with only a trace of friction on the high points. Surfaces are generally light yellow-gold with subdued luster from cleaning, though two small alloy spots are noted on the left reverse. (#8634)

**Extremely Scarce 1862 Ten Dollar, AU58**

**1521** 1862 AU58 NGC. This Civil War era ten dollar is extremely scarce in circulated condition and virtually unobtainable in Mint State. This near-Mint State specimen is thus an important offering for the date collector. Its yellow-gold surfaces exhibit a good amount of luster in the recessed areas, and the design elements are strongly defined. Minute surface marks are noted on both sides and a few rim bruises occur on the reverse. Census: 16 in 58, 3 finer (9/09). (#8635)

**Rare AU53 1871-CC Liberty Ten**

**1522** 1871-CC AU53 NGC. The first-year 1870-CC gets all the glory, but the 1871-CC is also an important Carson City rarity. Just 8,085 pieces were struck, and those remained in circulation since there were no West Coast gold coin collectors until at least the 1890s. NGC and PCGS have each certified examples in grades as low as VG8. The two services have encapsulated a total of three pieces as Mint State, but even advanced collectors can only hope to acquire a nice AU representative, such as the present coin. Copious luster fills the borders and devices, and the sun-gold surfaces are radiant and bear only the expected number of moderate abrasions. An important opportunity for the specialist. (#8661)

**Remarkable 1873-S Eagle, AU50**

**1523** 1873-S AU50 NGC. Ample luster remains, especially in the protected areas of this pleasing light yellow-gold eagle. Only 12,000 coins were minted at a time when double eagles were the primary coinage issue. Most of those that were struck entered circulation where they stayed for a long time, as evidenced by the average certified grade of less than XF. This piece is a remarkable survivor. Census: 10 in 50, 29 finer (9/09). (#8668)

Rare 1876 Liberty Eagle, VF25  
Only 687 Minted

1524 1876 VF25 ANACS. As the mintage of just 687 business strikes implies, this is an extremely rare date in any grade. Enough of the mintage has survived that examples, while challenging to find, are still available from time to time. This piece has pleasing medium yellow surfaces with hints of pale orange toning around the devices. A few marks are present on each side, but the overall appearance is excellent. (#8674)

Challenging XF 1876-CC Ten

1525 1876-CC XF40 PCGS. With the exception of the 1874-CC, which is merely very scarce, all Carson City ten dollar issues from the 1870s are rarities. The 1876-CC is no exception, since only 4,696 pieces were struck, most of which no longer survive. The present example has less wear than the grade suggests, but the straw-gold surfaces are slightly bright and Liberty's hair is softly brought up, as is usual for the issue. Population: 16 in 40, 39 finer (9/09). (#8675)

1526 1878 MS62 PCGS. Strongly struck for this Philadelphia issue with pleasing yellow-gold luster. Wispy marks and a few more significant field abrasions largely account for the grade. Population: 37 in 62, 17 finer (9/09). (#8680)

1527 1878 MS62 PCGS. The 1878 is the lowest mintage Philly issue between 1878 and 1886, yet is the highest mintage issue struck between 1862 and 1878. Though a number of wispy abrasions visit the yellow-gold surfaces, this remains an attractive coin. The stars exhibit minor die doubling. Population: 41 in 62, 18 finer (1/09). (#8680)

Attractive MS63 1880 Ten Dollar

1528 1880 MS63 PCGS. Well struck and lustrous with a copper-golden finish. The obverse field has a few light luster grazes, but this is nonetheless a pleasing eagle with considerable eye appeal. The 1880 issue is the earliest in the series that has a mintage above one million pieces, but survivors tend to be much more bagmarked than is the present example. Population: 49 in 63, 15 finer (9/09). (#8687)

Popular 1880 Eagle, MS63  
Ideal With Motto Coin

1529 1880 MS63 NGC. The copious mintage exceeding 1.6 million coins translates today into examples being available up to MS63, but Choice and finer coins are quite difficult. This Select piece offers classic eye appeal via the lustrous golden-orange surfaces and bold strike. A few wispy obverse marks fail to diminish the appeal of this With Motto type coin. Census: 29 in 63, 10 finer (9/09). (#8687)

Challenging Near-Gem 1880 Ten Dollar

1530 1880 MS64 PCGS. After decades of slumbering, mintages of Liberty eagles soared in 1880. The 1880 was the first issue with a mintage above 1 million pieces, a level surpassed by the first-year 1850 double eagle. Nonetheless, the 1880 ten dollar is rare at the MS64 level due to non-numismatic handling and storage. The present near-Gem is well struck, lustrous, and beautifully preserved. The reverse is nearly immaculate. Population: 14 in 64, 0 finer (9/09). (#8687)

### Affordable 1880-CC Eagle, AU50

1531 1880-CC AU50 ANACS. Light yellow surfaces retain considerable luster on this pleasing Carson City eagle. The surfaces have faint marks and abrasions as usual. This is an excellent grade for acquisition, as examples are still affordable, which is untrue for AU55 or finer pieces. (#8688)

### Deeply Patinated 1880-S Ten, MS63

1532 1880-S MS63 PCGS. Breen-7000, Taller S. This well struck eagle has deep reddish-gold color, and the mint luster swirls around both sides. The marks seen on the obverse remain cumulatively moderate. The 1880-S is usually seen in bagmarked Mint and near-Mint grades, but relatively clean pieces are rare. Population: 26 in 63, 5 finer (9/09). (#8690)

1533 1881-CC XF45 NGC. A violet-accented orange-gold piece with faint glimmers of luster in the fields. Despite light wear, neither side shows more than a few faint marks and abrasions. (#8692)

### Well Struck 1881-CC Eagle, MS61

1534 1881-CC MS61 NGC. The 1881-CC is fairly common in Extremely Fine and About Uncirculated condition, and what few Mint State pieces that have survived are mainly in the MS60 to MS62 levels of preservation. This well struck MS61 specimen displays a good amount of luster on its yellow-gold surfaces that are imbued with tints of light tan. Distributed contact marks limit the grade. Census: 16 in 61, 19 finer (9/09). (#8692)

1535 1881-O XF40 PCGS. The New Orleans Mint reopened in 1879 to coin silver dollars, but the facility also struck limited quantities of eagles each year through 1883. The '81-O mintage was only 8,350 pieces. The sharpness and extent of the luster are impressive for the XF level, and the honey-gold color is original. There is one concealed mark on Liberty's jaw. Encased in a green label holder. (#8693)

1536 1883 MS63 ICG. A sharply detailed and lustrous lemon-yellow coin, lightly abraded as expected for the grade. This year's mintage was substantial, exceeding 200,000 coins, although few have survived in finer grades. Strongly appealing. (#8699)

1537 1883-CC—Improperly Cleaned—NCS. AU Details. Medium-yellow patina covers both sides of this minimally abraded specimen. Traces of luster reside in the protected areas around the perimeter. Liberty's hair is softly defined, but the rest of the details are crisp. The 1883-CC is seldom seen better than AU. (#8700)

### Flashy AU53 1883-CC Ten, Ex: Rainy Day

1538 1883-CC AU53 PCGS. Ex: Rainy Day Collection. Most immediately noteworthy about this briefly circulated yellow-gold eagle is its reflective luster, which is most persistent in the protected areas around the peripheral lettering. Excellent definition with strong eye appeal despite a number of wispy abrasions. Population: 11 in 53, 17 finer (9/09). (#8700)

### Pleasing Select 1885 Ten Dollar

1539 1885 MS63 PCGS. This lower mintage issue is available in bagmarked Uncirculated grades, but becomes very scarce at the MS63 level. The green-gold surfaces display unencumbered luster and obtrusive marks are absent. Sharply struck on both sides. Population: 35 in 63, 9 finer (9/09).

Ex: Baltimore Signature (Heritage, 7/2003), lot 10470, which realized \$2,127.50. (#8706)

1540 1888-O MS62 PCGS. A canary-gold example with good luster, prominent clashmarks, and an interesting strike-through on the reverse rim at 1 o'clock. A low mintage New Orleans issue unavailable above the MS63 level. (#8713)

---

### Resplendent 1888-O Eagle, MS63

**1541** 1888-O MS63 NGC. The 1888-O is relatively available in most grades compared to some of its earlier New Orleans Mint counterparts, and collectors can actually find low Mint State examples with little difficulty. Nonetheless, this issue becomes rare at the MS63 level, and it is virtually impossible to locate a finer example. Only one piece has been certified in a higher grade (MS64 PCGS) by either major service (8/09). Pleasing straw-gold patina embraces the semiprooflike surfaces of this remarkable specimen. Several wispy grazes do not detract. A sharply struck and conditionally scarce example. (#8713)

**1542** 1890-CC AU55 NGC. The honey-gold surfaces of this Choice AU eagle display traces of greenish-tan and possess a fair amount of luster. Well defined for the most part and revealing scattered small circulation marks. (#8718)

**1543** 1890-CC AU58 NGC. Both sides of this near-Mint Carson City ten retain considerable swirling luster, satiny on the obverse and flashy on the reverse. Well-defined and attractive overall, though a long abrasion is noted on Liberty's portrait and traces of alloy are present near the rims. (#8718)

---

### Desirable 1890-CC Liberty Ten MS62

**1544** 1890-CC MS62 NGC. Despite its chronological proximity to the 1891-CC, the 1890-CC is much scarcer in Mint State, undoubtedly due to its low mintage of 17,500 pieces. NGC has yet to certify any above the MS63 level. This MS62 example has unbroken luster and a sharp strike. Tiny marks here and there are inoffensive, leading to eye appeal that is superior for the grade. Census: 38 in 62, 11 finer (9/09). (#8718)

---

### Attractive Select 1891 Eagle

**1545** 1891 MS63 NGC. A sharply struck wheat-gold representative of this underrated Philadelphia issue, which received this note in Garrett and Guth: "The 1891 is generally available up to MS-62, after which it becomes quite scarce in MS-63." Though modestly abraded, this frosty Select example offers wonderful eye appeal for the designation. NGC has graded a mere three coins finer (9/09). (#8719)

**1546** 1891-CC MS61 PCGS. FS-501. The mintmark is clearly repunched, a variety first reported by gold specialist Douglas Winter. A crisply struck Carson City type coin with pleasing luster and the expected number of moderate abrasions. (#8720)

---

### Richly Patinated MS62 1891-CC Ten

**1547** 1891-CC MS62 NGC. The strike and luster of this piece are reminiscent of a finer coin, although scattered abrasions—commensurate to the assigned grade—are noted on both sides of this apricot-gold twenty. The 1890-CC is often the coin of choice for those assembling type sets of Carson City issues. (#8720)

---

### Impressive 1891-CC Eagle, MS63

**1548** 1891-CC MS63 NGC. Deep orange-gold luster, frosty surfaces, and sharp design definition characterize this delightful MS63 Carson City eagle. The 1891-CC ten had a large mintage of 103,712 coins, the largest mintage of eagles at that facility and far greater than the second largest mintage of 40,000 eagles in the following year. Census: 84 in 63, 9 finer (9/09). (#8720)

**1549** 1892-O MS62 PCGS. Both sides of this lustrous O-mint ten sport rich orange-gold color, duskier on the obverse than the reverse. Boldly struck with impressive visual appeal. PCGS has graded a mere five coins finer (9/09). (#8723)

**1550** 1893 MS64 NGC. Vibrant luster and an exacting strike combine with unblemished butter-gold surfaces to confirm the quality of this ten dollar near-Gem. Substantially scarcer than the common date '01-S, especially in better grades. (#8725)

**1551** 1893 MS61 Prooflike NGC. Sharply struck with readily appreciable mirrors. The yellow-gold surfaces show a number of scattered abrasions, but the devices are comparatively clean. (#8725)

**1552** 1894 MS64 PCGS. Lustrous orange-gold surfaces are tinged with light green, and the design elements display well struck devices save for minor weakness in the first few star centers. Scattered minute marks preclude Gem status. Housed in a green label holder. Population: 88 in 64, 0 finer (9/09). (#8729)

**1553** 1894 MS64 NGC. A trifle softly struck on the obverse stars but with impressive, swirling luster. This near-Gem ten would be ideal for a similarly graded 19th century type set. (#8729)

**1554** 1894 MS64 NGC. Decisively struck with a touch of the prooflike to each side, both in the reflectivity of the yellow-gold fields and the faint frostiness of the devices. A sharp and beautiful near-Gem. (#8729)

#### Challenging 1895-S MS62 Ten Dollar

**1555** 1895-S MS62 PCGS. The 1895-S ten dollar, from a mintage of 49,000 pieces, can be located in circulated grades with patience and searching. Mint State coins, however, especially in the higher levels thereof, are very difficult to come by. This sharply struck MS62 specimen displays yellow-gold patina on its lustrous surfaces. Minute contact marks are more prevalent on the obverse. Population: 6 in 62, 3 finer (8/09). (#8734)

**1556** 1896 MS63 NGC. Yellow-gold and greenish-tan coloration runs over the lustrous surfaces of this well struck ten dollar. Light grazes deny a higher grade assignment. (#8735)

**1557** 1897 MS64 PCGS. A lustrous green-gold example that has moderate obverse grazes and a few drops of lacquer near 1 o'clock on the reverse. Scarce at the MS64 level, yet available at little if any premium over common dates such as the 1901-S. Population: 81 in 64, 5 finer (9/09). (#8737)

#### Stunning MS66 1899 Eagle

**1558** 1899 MS66 PCGS. An exquisitely detailed Premium Gem representative of this turn-of-the-century Liberty eagle issue, one of just four tied for numerically finest certified by PCGS (9/09). The strike on the portrait is exquisite, and the apricot-infused yellow-gold surfaces are practically untouched. Housed in a green label holder. (#8742)

#### Charming MS63 1899-S Ten Dollar

**1559** 1899-S MS63 PCGS. The 1899-S eagle is a popular type coin due to its good production qualities and generous mintage of 841,000 pieces, an excellent alternative for collectors who want an S-mint alternative to the always-available 1899 Philadelphia issue. This charming piece displays lustrous, boldly struck surfaces with few singular abrasions, save for a slight one behind Liberty's nose. An excellent type coin candidate. Population: 51 in 63, 17 finer (9/09). (#8744)

**1560** 1901 MS64 NGC. A desirable near-Gem gold type coin that boasts a powerful strike, vibrant luster, and an unblemished appearance. The 1901 is plentiful in Mint State, but exemplary examples are always in demand. (#8747)

**1561** 1901 MS64 NGC. This resplendent near-Gem has lovely straw-gold patina over both sides. The strike is nearly full, and there are only a couple of insignificant luster grazes. An attractive example. (#8747)

#### Sensational 1901-S Ten, MS65

**1562** 1901-S MS65 NGC. CAC. A sensational Liberty eagle for the advanced specialist or the type collector. The 1901-S is a plentiful date from a mintage of nearly 3 million coins. Gem or finer grade coins are relatively easy to locate, although a wide range of quality exists at each grade level. Be sure to choose a coin like the present piece that is properly graded and attractive. This Gem has a bold strike, satiny yellow luster, and excellent surface quality. (#8749)

- 1563** 1902 MS63 PCGS. Greenish-gold hues radiate from both sides of this nicely struck Select ten dollar piece. Some minute abrasions, more so on the obverse, limit the grade. Population: 85 in 63, 21 finer (9/09). (#8750)

#### Low Mintage Near-Gem 1902 Liberty Ten

- 1564** 1902 MS64 PCGS. The 1902 is perhaps underappreciated due to its proximity to the 1901, the most common Philadelphia issue of the series. But the 1902 has a mintage of just 82,400 pieces and is very scarce at the MS64 level. This is a lovely canary-gold near-Gem with unmarked surfaces and a hint of aqua patina near the IB in LIBERTY. Population: 18 in 64, 3 finer (9/09). (#8750)

- 1565** 1903-S MS64 PCGS. Bold yellow-gold color with a degree of orange and a hint of duskiness on the obverse. Unusually precise detail on both central and peripheral devices. Housed in a green label holder. (#8754)

#### Superlative 1903-S Eagle, MS66

- 1566** 1903-S MS66 PCGS. CAC. While more elusive than the 1901 and 1901-S, the 1903-S is otherwise one of the most frequently encountered Liberty eagles in Gem and finer condition. The reddish-orange surfaces on this splendid Premium Gem are quite close to a full strike, and the little evidence of contact is completely undistracting. A superlative type coin, worthy of serious consideration. Population: 15 in 66, 3 finer (9/09). (#8754)

#### Condition Rarity 1905-S Ten Dollar, MS63

- 1567** 1905-S MS63 NGC. The grade of MS63 is the finest most collectors will ever encounter of the 1905-S ten dollar. Apparently, few were saved by collectors and few were sent overseas. Consequently, coins above this grade level are virtually unobtainable. Soft luster resides on the greenish-gold surfaces of this Select example, and a well executed strike imparts sharp detail to the devices. Scattered small marks preclude a finer grade but do not diminish the coin's appeal. Census: 5 in 63, 0 finer (9/09). (#8758)

- 1568** 1906-D MS64 PCGS. CAC. Dazzling luster and a precise strike combine with original peach-gold color to ensure the eye appeal. A few unobtrusive abrasions decide the grade. The 06 in the date is lightly repunched. (#8760)

- 1569** 1907 MS64 NGC. Dazzling luster radiates from apricot-gold surfaces tinted with mint-green and a decisive strike imparts strong definition to the design features. Light handling marks deny attainment of a higher grade level. (#8763)

- 1570** 1907 MS64 NGC. Crisply struck with strong luster. A great example of this final-year issue, dusky yellow-orange with only faint, scattered abrasions. NGC has graded 90 numerically finer pieces (9/09). (#8763)

- 1571** 1907 MS64 NGC. Deep green and violet accents give this near-Gem exotic eye appeal. Deep yellow-gold shadings are present elsewhere, and the strike is sharp. (#8763)

- 1572** 1907-D MS63 PCGS. Deep yellow-orange color dominates the eye appeal of this satiny Select coin. Crisply detailed in the centers with only wispy abrasions present on the obverse. (#8764)

- 1573** 1907-D MS64 PCGS. A wonderful near-Gem with smooth and radiant butter-gold surfaces. Exactingly struck and essentially unimprovable. Considerably scarcer in Mint State than the only other Denver issue, the 1906-D, despite a slightly higher mintage. Population: 43 in 64, 0 finer (9/09). (#8764)

## PROOF LIBERTY EAGLE

### Gorgeous 1882 Ten, PR65 Cameo

1574 1882 PR65 Cameo NGC. Just 40 proof eagles were minted in 1882, and most numismatic students believe that about 12 to 15 pieces survive today. Among the survivors are two pieces in the Smithsonian Institution, and one in the American Numismatic Society. In addition to those, we are aware of the Ed Trompeter coin, the Bass specimen, the Garrett coin, the Carter example, and the present piece from the 1959 ANA auction.

Auction records suggest that five or six additional pieces may exist. The finest that we have seen is a PR66 Ultra Cameo NGC coin, followed closely by this example and another PR65 Cameo coin. A complete Census would be a challenging but worthwhile project for someone to undertake. While new specimens still appear from time to time, such as the present piece that was hidden away for 50 years, enough information exists today that a complete roster of all proof gold coins is finally feasible.

This Gem Cameo proof has light yellow-gold surfaces. The fields are deeply mirrored with the watery appearance usually associated with 19th century proof gold coins. The devices have a high degree of frosty mint luster, and the sharp contrast between the fields and devices is remarkable. The obverse has four or five tiny lint marks. However, there are no copper spots, scratches, or other blemishes of note.

Ex: 1959 ANA Convention auction; Frank M. Stirling Collection. (#88822)

## INDIAN EAGLES

### Incredible 1907 Wire Rim Eagle, MS64

**1575 1907 Wire Rim MS64 NGC.** The 1907 Wire Rim, Periods eagles are the first of the series, the original conception of that incandescent artistic genius, Augustus Saint-Gaudens. They share an interesting history that is similar to the 1879 Flowing Hair stellas, in that they were specially made and distributed to Congressmen, Washington insiders, and VIPs as part of President Theodore Roosevelt's campaign to engender political support for what he dubbed his "pet crime." (Although the exact mintage of the stellas is unknown, it is likely not far off from the 500 examples produced of the 1907 Wire Rim.)

Since Saint-Gaudens finally decided to reserve his standing figure of Liberty for the larger double eagle, he placed the profile portrait of Liberty—modeled after the figure of Athena from his General Sherman monument in New York—on the eagle's obverse. One wonders what the "Saint" must have thought privately about Roosevelt's cavalier demand that a headdress be placed on the head of Liberty, "a fanciful object for either Liberty or a Native American woman to wear," according to Garrett and Guth. However, in his written responses to Roosevelt, Saint-Gaudens appears to endorse the concept enthusiastically. (Perhaps the sculptor knew enough to choose his battles wisely—with Charles Barber rather than President Roosevelt.)

The 1907 Wire Rim, Periods issue is to the Indian Head eagle series what the High Relief double eagles are to that series—a limited mintage of coins in a relief unsuited for high-speed mass production that would never have been produced except for the personal intervention of the president. Mint Chief Engraver Charles Barber, with a long history of relentless animosity toward the more talented sculptor, steadfastly opposed both issues. The 1907 Wire Rim, Periods eagles were fortunately saved in plentiful numbers, due to their method of distribution.

The present near-Gem example has the typical surface texture, a fine-grained, mattelike consistency, with a somewhat pebbly appearance visible under a loupe, but few distractions of any sort. For pedigree purposes we mention a small area of hazel-gray color between the headdress and the first three peripheral stars on the obverse. A few distributed ticks account for the grade, while failing to diminish the incredible eye appeal. Census: 79 in 64, 59 finer.

From The Little Rock Collection. (#8850)

---

## Wonderful Near-Gem 1907 Wire Rim Eagle

**1576** 1907 Wire Rim MS64 NGC. A wonderful volume titled *Augustus Saint-Gaudens: American Sculptor of the Gilded Age*, by Henry J. Duffy and John F. Dryfhout, gives numismatists a refreshing view of the artist's *oeuvre* from a wider perspective than that of mere coinage. (It also clarifies for readers who are numismatically astute some of the fundamental differences between "the Saint" and Charles Barber—but that is a tale for another day.)

Saint-Gaudens was most comfortable working in large forms. One of his most famous sculptures, a nude, full-length figure of the Greek goddess *Diana*, was created in the 1890s, when architect Stanford White was designing Madison Square Garden. The 18-foot-tall statue was mounted as a weather vane atop the building's 347-foot-tall tower. Once it was installed "with great fanfare" in October 1891, it was the tallest feature in the New York City skyline.

The sculpture dwarfed the tower on which it rested, a fact that the artist soon realized, reworking it the following year to a height of 13 feet. The reduced-size figure remained atop Madison Square Garden until 1925, when it went to the Philadelphia Museum of Art. The original 18-foot statue was placed atop the Agriculture Building at the 1893 World's Columbian Exposition in Chicago, where it burned along with many empty exposition buildings the following year.

Duffy writes, "Saint-Gaudens's gift was his subtle balance between surface realism and psychic energy unmatched by any of his contemporaries." While Saint-Gaudens used his model of Athena Nike on the General Sherman Monument as his original conception for the 1907 Wire Rim, Periods eagles, he managed to translate that massive sculptural form into a vital profile portrait, while still maintaining its vitality and "psychic energy" in a credible, small coin format.

This piece offers glorious deep orange-gold coloration overall. A couple of abrasions are noted on the eagle's upper neck. Notice how the eagle manages to appear massive even at such a small scale, and the incredible grandeur and believability it projects. A wonderful type coin. Census: 79 in 64, 62 finer (9/09). (#8850)

**1577** 1907 No Periods MS62 NGC. Sweeping luster invigorates this butter-gold No Motto Indian eagle. Sharply struck and surprisingly unabraded aside from a faint mark above the jaw. Formerly housed in a PCGS MS62 holder; the insert accompanies the lot. (#8852)

#### Appealing 1907 No Periods Eagle, MS63

**1578** 1907 No Periods MS63 NGC. The circulation-strike reinterpretation by Charles Barber of Augustus Saint-Gaudens' masterwork, the 1907 No Periods, is always a popular type issue, as well as in demand from date collectors. This is an appealing Select Mint State piece with orange-gold surfaces and lots of eye appeal that is undiminished by minor contact marks on Liberty's cheek. (#8852)

#### Amazing Choice 1907 No Motto Ten

**1579** 1907 No Periods MS64 PCGS. A remarkably unabraded near-Gem that, at least to the present cataloger, appears to have eye appeal consistent with a higher grade. Precisely struck and lustrous with smooth butter-gold surfaces. The No Motto subtype was only coined for two years, and examples of the present quality are desirable. (#8852)

#### Lovely Near-Gem 1907 No Periods Eagle

**1580** 1907 No Periods MS64 PCGS. The 1907 No Periods are the only readily available Indian Head eagles from this first year of issue. Fortunately, ample numbers exist in higher Mint State grades, due to the large mintage of nearly a quarter-million coins. This near-Gem example offers lovely, bright reddish-gold and pale lilac color and somewhat mattelike surfaces that are only a few wispy marks away from an MS65 grade. (#8852)

#### Splendid 1907 No Periods Eagle, MS67

**1581** 1907 No Periods MS67 NGC. The 1907 No Periods eagle issue, like those that follow it, is Charles Barber's workmanlike revision of the original Saint-Gaudens concept, one suited for high-speed coinage production but a far cry aesthetically from the dramatic high relief of the 1907 Wire Rim, Periods issue. Nonetheless, its suitability for mass production led to 239,406 examples made of the 1907 No Periods.

Fortunately, the issue was saved in sufficient numbers to enable the survival of conditional rarities such as this splendid Superb Gem coin. Bounteous luster radiates from both sides of this apricot-gold piece. The strike is nearly complete, and to mention any of the minuscule contact marks would be to overemphasize them. A type coin that is nearly unobtainable any finer. Census: 28 in 67, 2 finer (9/09). (#8852)

### Superlative 1908 No Motto Eagle, MS66

**1582** 1908 No Motto MS66 NGC. The mintage of the 1908 No Motto is less than one-tenth that of the 1908 With Motto eagles, and it is one of only five No Motto issues in the series. It is an underrated issue, particularly in the rarefied atmosphere above the Gem level. This Premium Gem example is one of only 14 pieces so graded at NGC, with six finer (9/09). The obverse high points have a lilac accent, while the remainder of the coin is a superlative, mellow orange-gold. Singular abrasions are virtually absent, although some strike weakness, typical for the issue, appears on the reverse where the claw joins the branch. (#8853)

**1583** 1908-D No Motto MS61 NGC. A lustrous canary-gold Mint State example of this briefly produced design subtype. Refreshingly unabraded. The cheekbone and the curl beneath the B in LIBERTY show a hint of gray toning. The mintmark, usually seen near the arrow tips, is located above the branch for this issue only. (#8854)

### Pleasing 1908-D No Motto Eagle, MS63

**1584** 1908-D No Motto MS63 NGC. The 1908-D No Motto is in the upper echelon of difficult issues within this challenging series, and most certified survivors fall a shade below Mint State. Select Mint State coins such as the present piece are in great demand, since few examples were saved of this second-year issue. The present coin offers strong mint luster radiating from the reddish-gold surfaces. The strike is somewhat weak on the lower headdress feathers—a feature common to most survivors—but the few minor marks, chiefly on the obverse, are in keeping with the grade. Census: 31 in 63, 36 finer (9/09). (#8854)

### Lustrous 1908-D No Motto Select Ten Dollar

**1585** 1908-D No Motto MS63 PCGS. The 1908-D No Motto ten dollar is scarce in lower Mint State grades and rare at or above the near-Gem level. This Select example radiates pleasing luster from its brass-gold surfaces tinged with peach. The design elements are well impressed, better so than usually seen. Small contact marks, particularly on the reverse, limit the grade. Population: 68 in 63, 43 finer (9/09). (#8854)

---

## Exceptional 1908-D No Motto Ten Dollar, MS65

**1586 1908-D No Motto MS65 NGC.** The 1908-D No Motto ten dollar piece, with its moderately low mintage of 210,000 pieces, is difficult to locate in Mint State grades. Indeed, NGC and PCGS have certified about 750 Uncirculated coins, with the vast majority falling into the MS60 to MS62 range. Another 150 or so grade MS63 or MS64, and only about 20 Gems and Premium Gems are known, as are a mere three MS67 specimens. A number of certified Mint State pieces are likely resubmitted or crossed-over coins, especially in the MS60 to MS62 or MS63 levels.

A point of interest regarding the 1908-D No Motto is that the mintmark placement is unique to the Indian Head ten dollar series, located to the upper left of the olive branch. On all subsequent dates it is to the left of the arrow points. Perhaps Mint officials thought that when the motto IN GOD WE TRUST was added in the left field there would be too much clutter in that area, or that maybe the mintmark would not stand out as much.

The 1908-D No Motto eagle has the reputation as one of the least attractive in the series. Walter Breen (1988) contends that it is weak in the centers and often dull. Similarly, David Akers (2008) says that it is not only flatly struck on the obverse and lackluster with dull, muted surfaces, but is usually heavily bagmarked and possesses below-average eye appeal. These factors contribute to the paucity of Gem and better examples in the certified population.

The current MS65 offering is exceptional in many respects. Both sides display pleasing apricot-gold color with subtle greenish undertones and radiant luster. The design features are sharp, especially the headdress, LIBERTY, and the eagle's plumage. The usual softness is noted in the hair over the ear. The frosty surfaces are remarkably smooth. A solitary mark on the cheekbone probably prevents an even higher grade. In sum, this charming specimen yields superior eye appeal and will surely elicit spirited bidding among connoisseurs of quality gold coinage. Census: 9 in 65, 8 finer (9/09). (#8854)

**1587** 1908 Motto MS62 NGC. This green-gold example possesses satin luster and minimally unabraded fields. The reverse rim narrows slightly at 9:30, and the obverse rim has a minor nick at 9 o'clock. (#8859)

**1588** 1908 Motto MS62 NGC. A lustrous sun-gold Motto representative that lacks the scattered bagmarks normally associated with the MS62 grade. The strike is precise except for the tops of UNITED STATES OF. (#8859)

### Outstanding 1908 Motto Ten Dollar, MS66

**1589** 1908 Motto MS66 PCGS. Congress disagreed with President Theodore Roosevelt's decision to omit the motto IN GOD WE TRUST from the newly designed ten and twenty dollar gold coinage. As an expression of public sentiment, Congress passed the Mint Act of 1908 mandating that the motto be restored to gold coinage. On the tens, it was placed in the field near the eagle's breast where it remained for the duration of coinage.

A subtle blend of peach-gold, mint-green, and lilac patina resides on the highly lustrous surfaces of this gorgeous Premium Gem, and a well executed strike imparts crisp definition to the design features. A few unobtrusive ticks fail to take away from the coin's outstanding overall eye appeal. Population: 28 in 66, 8 finer (9/09). (#8859)

### Exemplary 1908-D Motto Ten Dollar, MS66

**1590** 1908-D Motto MS66 NGC. Although the 1908-D Motto eagle has one of the highest mintage figures in the series at 836,500 business strikes, it is nearly as elusive in the higher Mint State grades at its No Motto counterpart, which had a mintage only one-fourth as large. Unusually, NGC has certified only three coins in Gem grade, but seven pieces in MS66 and four finer (9/09). The present Premium Gem boasts glorious luster radiating from orange-gold surfaces that are nearly mark-free. The strike is bold throughout, and the eye appeal is exemplary. This splendid coin would be a wonderful acquisition for a gold type set of the finest quality. (#8860)

### Appealing 1908-S Ten Dollar, MS64

**1591** 1908-S MS64 NGC. CAC. Despite its relatively small mintage of 59,850 pieces, Mint State 1908 eagles can be located without too much difficulty. Apparently, the contemporary public saved many examples as novelty items (David Akers, *A Handbook of 20th Century United States Gold Coins*).

Strong luster invigorates this near-Gem, and a solid strike imparts sharp definition to the design features. A few unobtrusive marks on the brass-gold surfaces barely preclude full Gem classification. This highly appealing ten dollar is sure to please the fussiest collector. Census: 22 in 64, 23 finer (9/09). (#8861)

### Elusive 1909-D Indian Eagle MS62

**1592** 1909-D MS62 PCGS. Although Denver coined more than 3.4 million half eagles in 1909, the Midwestern facility's production of eagles was much more frugal: only 121,540 pieces were struck. The issue is understandably scarce at the MS62 level, and the few Gems are out of reach for most collectors. This suitably struck and lustrous representative has minimally abraded fields and only a few thin marks on the portrait. (#8863)

**1593** 1910 MS63 NGC. An impressive Indian ten whose orange-tinged fields and devices lack most of the faint scuffs usually associated with the MS63 level. An excellent selection for the collector in search of both quality and value. (#8865)

**1594** 1910 MS64 NGC. Frosty surfaces yield attractive yellow-gold coloration with subtle greenish undertones. The design elements are well struck throughout. Some dark spots are noted on the lower reverse. (#8865)

**1595** 1910-D MS64 PCGS. Orange-gold and rose-gold colors vie for territory on the highly lustrous surfaces of this near-Gem D-mint eagle. Sharply struck and minimally marked. Housed in a green label holder. (#8866)

**1596** 1910-D MS64 PCGS. Pumpkin-gold hues invigorate this lustrous Choice Indian type coin. Well struck aside from the right portion of the branch. The obverse is particularly free from the scuffs typically seen on lower graded examples. (#8866)

### Lustrous MS66 1910-D Eagle A Wonderful Type Coin

**1597** 1910-D MS66 NGC. CAC. The 1910-D eagle production, a plentiful 2.4 million coins, was the largest in the series, save for the prodigious Depression-era coinage of 1932, at 4.5 million pieces. The 1910-D is accordingly one of the issues most frequently selected for type purposes, along with the 1926 and 1932 coins. In the case of the 1910-D that is doubly fortunate, as most examples are well-struck, with frosty luster, a bold strike, and high appeal overall.

This piece is no exception, with a fine-grained, mattelike appearance that is in keeping with most examples of the issue. The satiny, orange-gold surfaces exhibit generous eye appeal. A couple of tiny ticks are barely noticeable, and the strike is nearly full. Census: 48 in 66, 8 finer (9/09). (#8866)

**1598** 1911 MS64 NGC. Yellow-gold aside from glimpses of peach within the portrait. This lustrous Choice Indian ten has pleasing sharpness, with inexactness located only a fraction of the branch above the R in DOLLARS. (#8868)

**1599** 1911 MS64 NGC. Boldly struck with coruscating luster. This peach-gold and lime near-Gem appears to merit an even higher grade upon first glance. A loupe reveals a hair-thin vertical line on the cheek. (#8868)

### Superior 1911 Ten Dollar, MS67

**1600** 1911 MS67 NGC. The 1911 ten dollar is a relatively high-mintage issue with just over half a million circulation strikes. Inspection of NGC/PCGS population data also indicates that it is one of the more available dates in the series through MS64. Gems are scarce, however, with a little over 200 pieces graded by the two services. Premium Gems account for about 70 specimens, and there are fewer than 20 Superb Gems certified.

This MS67 example displays finely granular, frosty surfaces covered in yellow-gold patina and giving off a faint greenish cast. A decisive strike imparts sharp detail to the design elements. Close inspection reveals no mentionable contact marks, nor is there evidence of copper-colored alloy spots that are so frequently seen on the issue. All of this adds up to superior eye appeal that will be highly appreciated by high-end type collectors or aficionados of high-grade gold coinage. (#8868)

### Key AU58 1911-D Indian Eagle

**1601** 1911-D AU58 NGC. The 1911-D quarter eagles, half eagles, and eagles all had low mintages within their series, but of the three, the Indian eagle had the lowest by far, at 30,100 pieces. The 1911-D is thus a key to the series, along with the 1913-S and the near-unobtainable 1933. This near-Mint example shows orange-gold surfaces overall with a hint of smoky-gold on the high points and in the fields. Abrasions are minimal, with the sole exception of a tiny rim tick on the obverse at 3:30, and much appeal beckons bidders. (#8869)

**1602** 1912 MS64 NGC. Dynamic luster and exemplary preservation confirm the appeal of this Choice Indian ten. The branch is nearly fully struck, and the highpoints of the portrait show only minute blending of detail. (#8871)

**1603** 1913 MS63 PCGS. Brassy-gold surfaces exude pleasing luster and possess well struck devices. Scattered obverse marks limit the grade. (#8873)

### Splendid Near-Gem 1914-D Eagle

**1604** 1914-D MS64 PCGS. The 1914-D is a popular type coin for the many collectors who prefer a mintmarked Indian Head eagle to the ubiquitous 1926 and 1932 issues. This lovely near-Gem offers mellow antique-gold coloration with glints of lilac and hazel in the fields. A splendid coin with lots of eye appeal. (#8876)

**1605** 1915 MS63 NGC. Strongly struck with remarkable sun-yellow luster. Though abrasions on and near Liberty's neck preclude a finer designation, the eye appeal is strong for a Select coin. (#8878)

### Smooth Near-Gem 1915 Ten

**1606** 1915 MS64 PCGS. This boldly impressed and thoroughly lustrous Choice double eagle is yellow-gold throughout save for a dash of aqua within the B in LIBERTY. There are no noticeable marks, and the fields display only faint grazes. The final Philadelphia issue until 1926, since double eagles were more convenient for foreign payments. (#8878)

**1607** 1915 MS64 PCGS. Flashy yellow-gold color with hints of butter-yellow and sun-gold also present. With its incredible flashiness and sharp strike, this coin's visual appeal is closer to 1926 or 1932 than the usual impression of the 1915 issue. Challenging any better; PCGS has graded just 48 finer pieces (8/09). (#8878)

#### Impressive 1915-S Indian Eagle, MS64

**1608** 1915-S MS64 NGC. With a mintage of only 59,000 coins, the 1915-S automatically qualifies as a rarity in 20th century numismatics. It easily makes the top 10 list of important Indian eagles, a list that includes the 1907 Rolled Edge, 1913-S, 1920-S, and 1933 issues, among others. The 1915-S is also a condition rarity. NGC and PCGS have graded just 32 examples in MS64, and only 13 coins in higher grades.

This frosty light yellow-gold specimen just misses the Gem grade category because of a few tiny abrasions on each side. It is sharply defined, even at the centers, and exhibits impressive eye appeal. Census: 12 in 64, 6 finer (9/09). (#8879)

#### Attractive MS62 1916-S Eagle

**1609** 1916-S MS62 NGC. This issue is available in Mint State due to a couple of hoard discoveries and repatriations from Europe. Today Garrett and Guth rank it the 10th most difficult issue in the series. This attractive piece has deep orange-gold surfaces, with a few high-point abrasions on Liberty's cheek and the eagle precluding an even finer grade (9/09). (#8880)

#### Challenging Select 1916-S Ten Dollar

**1610** 1916-S MS63 NGC. All San Francisco Indian tens are conditionally scarce, but the 1916-S is additionally elusive in Mint State since only 138,500 pieces were struck. This lustrous example has unmarked fields and devices, and appears at first glance to merit an even finer grade. Thorough evaluation locates a subtle rim ding at 3 o'clock on the reverse. Census: 29 in 63, 34 finer (9/09). (#8880)

---

## Grand MS62 1920-S Indian Head Eagle A Classic 20th Century Gold Rarity

**1611 1920-S MS62 NGC.** This is an issue that has long been acknowledged as one of the prime rarities of U.S. 20th century gold coinage. The 1920-S was the first issue made in the Indian Head eagle series in the four years since the 1916-S, and it would be the last in the series until the generous 1926 production. The 1920-S is a late-series key along with its sibling, the 1930-S. Although the mintage was a respectable 126,500 pieces, Garrett and Guth call the 1920-S third-rarest in the series, behind only the illustrious 1933 and the 1907 Rounded Rim, Periods. Remarkably, such a ranking places the 1920-S ahead of even the 1907 Wire Rim, with a mintage of only 500 coins but a high survival rate.

Akers' recent *Handbook of 20th Century United States Gold Coins 1907-1933* notes that even circulated examples in XF or AU are exceedingly rare, the preponderance of the issue most assuredly having been melted during the Gold Recall of 1933. According to Akers:

“The 1920-S is the rarest Indian Eagle in terms of total number of Mint State coins known. Most examples are fairly evenly spread throughout the MS-60 to MS-64 range.”

The present MS62 example falls into the middle of that grade range, where NGC has certified six examples, with 12 pieces finer, less duplications. PCGS has graded eight coins in MS62, with 16 finer (9/09). Most specimens of the 1920-S show moderate strike softness, usually on the Indian's hair and the forepart of the eagle's right (facing) wing, right feathers, and talon. At first glance this coin appears considerably finer than the assigned grade, despite a few unbothersome ticks on Liberty's cheek and neck. It is probably more the typical strike softness as we describe here, rather than any other attribute that precludes an even finer grade. Even so, this coin manages to radiate that most ineffable quality, eye appeal, along with a considerable amount of numismatic grandeur.

*From The Little Rock Collection. (#8881)*

---

**1612 1926 MS64 PCGS.** A radiant canary-gold type coin that has a good strike and vibrant luster. Magnification reveals only tiny scattered marks. Since double eagles were a more convenient denomination for counting large sums, and gold coins seldom circulated after World War I, no ten dollar pieces were struck at Philadelphia for the ten years between 1916 and 1925. (#8882)

---

## Gleaming 1930-S Indian Eagle, MS64

### A Key to the Series

**1613 1930-S MS64 NGC.** The two late-series mintmarked issues, the 1920-S and 1930-S, are the keys to the Indian Head, Type Two (With Motto) eagles, foundational rarities in all grades. Even well-circulated examples sell for prices in the high four digits, with Mint State examples well up into five-digit territory. Even though the original mintage was a skimpy 96,000 coins, most of the issue was melted in the Gold Recall of 1933, save for a few pieces that collectors apparently stashed away. Since the issue was produced so close to the gold recall, there are few circulated specimens known of the 1930-S. NGC has certified two coins in AU58, while PCGS adds seven more in the same grade. All the other coins certified at both services are MS60, with the majority averaging MS63 to MS64.

Both Walter Breen and David Akers before him mentioned the existence of a small hoard of 1930-S eagles. Breen wrote in his 1988 *Complete Encyclopedia*: "For some decades one 1930-S turned up in the San Francisco area every three years, probably from a single roll." Such a roll would, of course, have long since been completely absorbed into the numismatic marketplace. Akers updates this mention in his more recent *Handbook*.

The typical 1930-S is much better struck than an average 1920-S, but it may still show weakness on the Indian's hair under the headdress and on the eagle's hind leg. The present piece offers gleaming luster throughout, with yellow-gold and orange-gold areas predominating amid glints of deeper color in the headdress tips. Minor strike softness appears on the Y of LIBERTY, as often seen, and on the high points of eagle's trailing leg. Tiny ticks on the base of Liberty's neck, a couple on the cheek, and on the reverse high points, none significant, preclude an even finer grade. Census: 39 in 64, 19 finer (9/09). *From The Little Rock Collection. (#8883)*

**1614** 1932 MS64 NGC. Bold sun-yellow color with strong luster that includes considerable frostiness. Modestly abraded in the fields but with clean devices. (#8884)

**1615** 1932 MS64 NGC. This well preserved Choice Indian ten has exemplary luster and consistent honey-gold color. The eagle's wing plumage shows minor blending of detail, but the overall strike is crisp. (#8884)

**1616** 1932 MS64 NGC. A smooth obverse field and ebullient luster proclaim the appeal of this evenly struck near-Gem. Only minor facial marks preclude an even finer grade. The only collectible gold issue from the 1930s. (#8884)

**1617** 1932 MS64 NGC. Apricot and olive-gold hues emerge when this lustrous gold type coin is rotated beneath a light. The strike is good, and there are no distractions. (#8884)

**1618** 1932 MS64 PCGS. Lemon-gold overall with glimpses of ice-blue and olive-green along the margins. The fields show a few delicate grazes, but this lustrous near-Gem will satisfy the gold type collector. (#8884)

**1619** 1932 MS64 PCGS. Rich butter-yellow with occasional glimpses of lighter gold. Decisively struck with only a few faint ticks scattered on each side that preclude an even finer designation. (#8884)

**1620** 1932 MS64 PCGS. Strong yellow-gold color overall with occasional wheat accents. Delightfully lustrous but with a shallow scrape between the portrait and date. (#8884)

**1621** 1932 MS64 PCGS. Strong yellow-gold color and amazing luster. Two dots of alloy are present on the reverse, one above the eagle's tailfeathers and the other on the leading leg. (#8884)

**1622** 1932 MS64 PCGS. Strong yellow-orange color with a touch of duskiness on the reverse. This well-defined beauty has just a few isolated flaws precluding Gem status. (#8884)

**1623** 1932 MS64 PCGS. Rich butter-yellow color and impressive luster. With a solid strike and considerable eye appeal, an ideal selection for the type enthusiast. (#8884)

#### Scintillating Gem 1932 Eagle

**1624** 1932 MS65 PCGS. CAC. One of the all-time most popular gold type coins and one of the few gold dates from the decade of the 1930s that can actually be acquired at reasonable cost, the 1932 eagles were produced in record quantities during the dark days of the Great Depression. This splendid Gem boasts scintillating luster radiating from yellow-gold surfaces on both sides. The CAC endorsement is spot-on. (#8884)

#### Radiant MS66 1932 Indian Eagle Only One Finer at PCGS

**1625** 1932 MS66 PCGS. An interesting and illogical issue—minted during the grim Great Depression era and a year before the Gold Recall, to the extent of 4.4 million coins. Despite the enormous issue, this Premium Gem is one of only a few dozen so graded at PCGS, which has seen but a single coin finer (9/09). The splendid golden-orange surfaces offer top-notch appeal and radiant luster. (#8884)

#### LIBERTY DOUBLE EAGLES

**1626** 1850—Improperly Cleaned—NCS. XF Details. The yellow-gold surfaces of this double eagle present a slight greenish cast. Finely hairlined on both sides, with each revealing some slight planchet roughness. A popular issue as the first collectible double eagle.

*An old Paramount International Coin Corporation envelope (lot 1274) is included.  
From The Mulkin Collection. (#8902)*

#### Charming AU 1850 Twenty

**1627** 1850 AU50 PCGS. This well defined introductory-year Liberty twenty retains most of its luster on the reverse, and obverse luster is evident near the stars and curls. The minor distributed marks are fewer than is commonplace for the grade and denomination. The double eagle denomination was an outcome of the California Gold Rush. (#8902)

---

### Attractive 1850 Double Eagle, AU55

**1628** 1850 AU55 NGC. CAC. A perennially popular issue as the first year of double eagle coinage, the 1850s were produced to the extent of 1.17 million pieces in Philadelphia, with another 141,000 in New Orleans. This piece shows attractive orange-gold surfaces with a few small, undistracting abrasions. (#8902)

---

### Sharp AU58 1850 Double Eagle Ex: S.S. Republic

**1629** 1850 AU58 NGC. Ex: S.S. Republic. This lustrous, near-Mint example is an excellent representative of the first year of production, with bright yellow surfaces. Both sides are minimally abraded. This important piece represents the beginning of the double eagle denomination, created in response to California gold discoveries. (#8902)

---

### Charming 1850-O Double Eagle, XF Details

**1630** 1850-O—Improperly Cleaned—NCS. XF Details. A popular first-year double eagle. Bright yellow patina drapes both sides of this lightly cleaned specimen. The details are boldly defined save for some softness on Liberty's hair. Scattered abrasions are consistent with the grade, but none merit specific mention. The 1850-O is scarce in AU and higher grades.  
*From The Mulkin Collection.* (#8903)

**1631** 1851 AU55 PCGS. The peach-gold surfaces of this Choice AU specimen display luster in the recessed areas of the well defined design elements. The expected number of marks are visible over both sides. (#8904)

**1632** 1851 AU55 PCGS. Ex: Rainy Day Collection. A problem-free yellow-gold Choice AU example with substantial luster across the reverse. Liberty double eagle holders with the "Rainy Day" pedigree began to appear on the market in 1999. The rainy day came too early, since gold bullion has approximately quadrupled in value since. (#8904)

---

### Appealing 1851 Double Eagle, AU58

**1633** 1851 AU58 NGC. Charming light yellow patina embraces both sides, with dazzling cartwheel luster throughout the surfaces. Peppered abrasions are typical of the grade and issue, but none merit specific mention. The strike is sharp save for the usual softness at the top of Liberty's head. An excellent piece for a type collector.  
*From The Mulkin Collection.* (#8904)

---

### 1851-O Twenty, AU Details

**1634** 1851-O—Scratched—NCS. AU Details. Light hairlines and minor abrasions are visible on each side of this piece, but the overall appearance is still excellent. Generous portions of original mint luster can still be seen on the lemon-yellow surfaces. The design elements are boldly defined. (#8905)

---

### Desirable 1851-O Double Eagle, AU55

**1635** 1851-O AU55 NGC. A brilliant green-gold example, almost certainly minted from freshly mined California gold that was shipped to New Orleans for coinage production. The mintage of 315,000 coins was the largest output of double eagles at that facility. This lovely piece has considerable remaining luster with few abrasions of any consequence. (#8905)

### Crisply Struck Mint State 1852 Twenty

**1636 1852 MS61 PCGS.** The obverse of this marvelous coin is relatively clean and suggestive of an even finer grade, although some scattered moderate abrasions on the reverse likely are the final determinant. The strike is crisp throughout, with attractive yellow-gold color on both sides and splendid luster. Population: 18 in 61, 37 finer (9/09). (#8906)

### Choice XF 1852-O Liberty Twenty

**1637 1852-O XF45 NGC.** All double eagle collectors know that New Orleans is the most elusive mint of the series. Although the facility coined the denomination annually through 1861, in addition to a small emission upon reopening in 1879, only a few issues are readily collected. Among those is the 1852-O, under strong demand from O-mint type set assemblers. This is a well defined and moderately abraded straw-gold example that has many glimpses of luster about the devices. (#8907)

### Magnificent 1852-O Double Eagle, Choice AU

**1638 1852-O AU55 NGC.** Eye-catching semiprooflike fields shine beneath the lovely yellow-gold patina. A touch of deeper coloration is seen on the reverse. Scattered abrasions are entirely minor and barely affect the impressive luster. This boldly struck Choice AU specimen has excellent eye appeal. Scarce any finer. From The Mulkin Collection. (#8907)

**1639 1853 AU53 NGC.** Wondrous reflectivity adds to the aesthetic appeal of this bright yellow-gold specimen. There are no marks worthy of specific mention, and the design elements are boldly struck. (#8908)

**1640 1853 AU55 NGC.** Pleasingly detailed for this earlier issue, most notably at the centers of the stars. Still-lustrous orange-gold surfaces show suggestions of lavender near the rims. (#8908)

**1641 1853/2 VF35 NGC.** FS-301, formerly FS-008. The diagnostic die lump is visible below the R in LIBERTY. Lovely dusted-gold patina envelops the lightly abraded surfaces, with hints of purple near the rims. A scarce and desirable variety. (#8909)

### Scarce 1853-O Twenty, XF Details

**1642 1853-O—Improperly Cleaned—NCS. XF Details.** The 1853-O twenty is a challenging issue with a relatively low mintage of 71,000 pieces. Most are seen in XF or low AU grades. Traces of luster reside in protected areas of this medium-yellow representative. Liberty's hair is softly defined, but the peripheral details are bold. Peppered abrasions define the grade, but none are individually significant. A nice example despite cleaning.  
From The Mulkin Collection. (#8910)

**1643 1854 Small Date VF25 NGC.** A collector grade example of this scarcer Type One issue. Unlike its S-mint counterpart, the 1854 is nearly unobtainable above MS62. An inconsequential rim ding is noted at 3:30 on the reverse.  
From The Mulkin Collection. (#8911)

**1644 1854 Small Date XF45 NGC.** The 1854 Small Date is significantly more available than its Large Date counterpart. A touch of purple patina visits the mostly yellow-gold and lustrous surfaces. Several small marks are noted in the margins of the obverse. (#8911)

### Near-Mint 1854 Small Date Twenty

**1645 1854 Small Date AU58 PCGS.** There is not great deal of difference in the size of the Small and Large Dates, but the Large Date is much rarer. This Small Date shows a small but noticeable space between the top of the 1 and the bottom of the bust, while on the Large Date the top of 1 touches the bust. Much orange-gold luster radiates from this barely circulated piece. A sharp strike lends added appeal. Population: 29 in 58, 21 finer (9/09). (#8911)

### Scarce 1854 Large Date Twenty Dollar, AU55

1646 1854 Large Date AU55 NGC. The die dot located on Liberty's neck just to the left of the lower left curl confirms the Large Date variety, which is much scarcer than the Small Date. Indeed, Douglas Winter and Adam Crum in their *Type I Double Eagles* reference indicate that only about 10% of all 1854 double eagles show a Large Date. This Choice AU specimen displays considerable luster residing on its honey-gold surfaces, along with well struck design elements. Distributed small abrasions are scattered about. Census: 18 in 55, 28 finer (9/09). (#98911)

### Satiny 1854-S Double Eagle, MS64

1647 1854-S MS64 NGC. CAC. This was the first year that gold coins were manufactured at the San Francisco Mint, with most of the production focused on double eagles. The issue was widely distributed, resulting in many specimens seen today being heavily worn. Mint State pieces, especially in the higher levels, are difficult to locate.

This near-Gem possesses satiny luster on peach-gold surfaces imbued with hints of mint-green and apricot. The design features are uniformly defined, and just a few minor marks prevent the attainment of a higher grade. A field graze to the left of Liberty's mouth and chin and a small mark to the lower right of star 6 identify the piece. Census: 9 in 64, 1 finer (9/09). (#8913)

1648 1855-S XF45 NGC. The brassy-gold surfaces of this Choice XF twenty dollar retain a fair amount of luster despite distributed small marks. High-point wear does not significantly diminish the design detail. (#8916)

1649 1856-S XF45 PCGS. Substantial luster emerges from this typically bagmarked Type One Liberty twenty. A tiny obverse rim ding at 12:30 requires only passing mention. Certified in an old green label holder, which precludes it from any pedigree to the S.S. Central America or S.S. Republic. (#8919)

1650 1856-S—Obverse Graffiti—NCS. AU Details. A capital letter "W" and a Roman numeral "II" are pinscratched into the upper left obverse field. Otherwise, the coin looks like a nice AU example, with rich coloration and considerable amounts of remaining luster. (#8919)

### Lovely 1856-S Twenty, AU58

1651 1856-S AU58 NGC. Dark olive patina is evident on the high points and in the fields on the obverse of this light yellow-gold twenty. Only slight wear is present on the highest design points. The surfaces are pleasing with noticeable reflective luster on each side. The appearance suggests that this piece may pre-date the S.S. Central America treasure discovery. (#8919)

1652 1857 AU50 NGC. Honey-gold surfaces yield a slight greenish cast along with traces of luster in the recessed areas. Generally well defined with a scattering of small marks. (#8920)

1653 1857-S VF35 NGC. Significant luster remains in the fields of this pale yellow-gold specimen. Liberty's hair is softly defined, as one would expect from the grade, but the peripheral details are bold. Scattered abrasions are entirely minor. (#8922)

### Attractive AU58 1857-S Twenty

1654 1857-S AU58 ICG. A significant amount of mint luster remains on each side of this attractive 1857-S twenty. The present piece was not from the famous S.S. Central America shipwreck, since the mintmark is too close to the N in TWENTY to match any of the varieties described by Robert Evans in the July 2000 *Numismatist*. This is a strongly struck example that has light reddish patina over each side and a few handling marks that are consistent with the grade. (#8922)

---

### Impressive Gem 1857-S Twenty

**1655** 1857-S MS65 NGC. Variety 20A, the well known “Spiked Shield” reverse. Not specifically attributed to the S.S. Central America but almost assuredly from that source; the high level of preservation and the distinctive yellow-orange color are both signatures of a shipwreck source for the issue. Boldly impressed with booming mint luster and fantastic eye appeal. (#8922)

---

### Spectacular Premium Gem 1857-S Double Eagle

**1656** 1857-S MS66 NGC. CAC. Variety 20B, identified by the faint diagonal die scratch from the base of the first T in STATES. Prior to the salvage of the S.S. Central America, the vast majority of 1857-S double eagles were seen in Very Fine to Extremely Fine grades. The shipwreck, however, contained more than 5,000 examples of this issue, many of which were still in mint condition.

The present coin was likely recovered from the SSCA, but it is particularly significant as one of only a few MS66 examples certified by NGC and PCGS. After more than 130 years at the bottom of the ocean, this piece still appears nearly perfect. A loupe locates just a couple of tiny grazes. Captivating cartwheel luster radiates from the light yellow surfaces. This razor-sharp Premium Gem has outstanding eye appeal and would be an excellent acquisition for any collector. (#8922)

---

### Gem ‘Spiked Shield’ 1857-S Double Eagle From the S.S. Central America

**1657** 1857-S Spiked Shield MS65 PCGS. Variety 20A. Ex: S.S. Central America. A magnificent Gem with smooth butter-gold fields and intricately impressed devices. The Spiked Shield variety is the most widely recognized from the SSCA hoard, identified by two hair-thin die lines (as made) near the left shield border. Housed in a gold label holder. (#70000)

---

### Shining Select 1857-S Twenty Ex: S.S. Central America

**1658** 1857-S Narrow Serif MS63 PCGS. Ex: S.S. Central America. Variety 20C. SSCA 0211. A sharp representative of this famous shipwreck issue, with perhaps a few more marks than usually seen but strong eye appeal nonetheless. The luster is characteristically bold, and the surfaces are pale straw-gold with deeper yellow-orange elements near the rims. Housed in a gold label holder. (#70002)

---

### 1858-O Twenty, AU Details

**1659** 1858-O—Improperly Cleaned—NCS. AU Details. Despite light hairlines and other imperfections that indicate it has been cleaned, this 1858-O twenty is an attractive green-gold example that retains traces of prooflike luster in the protected areas close to the design elements. The surfaces are lightly marred, but otherwise the overall quality is good. (#8924)

---

### Desirable AU Details 1858-O Twenty

- 1660 1858-O—Repaired, Improperly Cleaned—NGC. AU Details. For its issue, this O-mint twenty has excellent central design definition, even if certain stars show a degree of softness. Both sides show a number of fine abrasions as well as subdued, granular luster that is the result of a past cleaning. Still, a readily collectible example. (#8924)
- 1661 1858-S XF45 NGC. Nearly all 1858-S twenties saw extensive circulation, and this piece has the typical abrasions. Nonetheless, there are no significant marks and the fields retain a good amount of luster. Wafts of olive-green and light red intermingle with apricot-gold on both sides. (#8925)
- 1662 1858-S AU53 ANACS. Well-defined for the issue with brightly lustrous sun-yellow and pale gold surfaces. Modestly worn across the high points with scattered abrasions. Housed in a small-format ANACS holder. (#8925)

- 1663 1858-S AU53 PCGS. A partly lustrous and undipped green-gold example that has the usual number of moderate abrasions for the grade, alloy, and diameter. Struck too late to emerge from the S.S. Central America hoard, and thus rare in Mint State despite a generous mintage. Certified in a green label holder. (#8925)
- 1664 1858-S AU53 ANACS. A partially lustrous green-gold example with only one consequential mark, seen on the lower right obverse. Last year of the first obverse hub with a recut Y in LIBERTY. (#8925)

---

### Delightful 1858-S Twenty, AU55

- 1665 1858-S AU55 NGC. Nearly full luster is visible with only a trace of wear on the high points of this attractive double eagle. Both sides have traces of pink toning over the light yellow surfaces. A few grade-consistent marks are visible on each side. This piece is much finer than the typical 1858-S twenty. (#8925)

---

### Important 1859 Double Eagle, XF40

- 1666 1859 XF40 NGC. The Philadelphia Mint coined 43,597 double eagles in 1859, one of the lowest productions of any Type One twenty from that facility. This piece has light yellow surfaces, moderate wear, and myriad tiny marks with only a few of consequence. Examples are scarce and infrequently offered in all grades. (#8924)
- 1667 1859-S XF45 NGC. FS-101, formerly FS-011. LIBERTY and the eye are strongly die doubled. A splendid lilac hue adds color to this mostly pale yellow-gold representative. Plenty of luster glistens in the fields, and there are no marks of any consequence. (#8928)
- 1668 1859-S XF45 NGC. Yellow-gold surfaces exhibit a good amount of luster for the designated grade. Aside from high-point wear, the devices display nice detail. Minimally abraded for the issue and grade. (#8928)
- 1669 1859-S XF45 NGC. This Choice XF displays traces of luster in the recesses of the well defined design features. Peach-gold patina with reddish accents shows on both sides. Distributed marks are noticeable, but less heavy than usually seen on surviving specimens. (#8928)

---

### Bold 1859-S Twenty Dollar, AU53

- 1670 1859-S AU53 PCGS. A rare issue in Mint State; the San Francisco Mint was only five years old when these double eagles were struck, and most of them circulated widely despite the generous mintage of 636,445 coins. This AU53 example displays excellent eye appeal. The orange-gold surfaces are relatively smooth, although a single, tiny dark fleck appears on the obverse rim at 2:30. A couple of others appear on the reverse, but the bold strike and superior overall appeal more than compensate. Population: 31 in 53, 97 finer (9/09). (#8928)

- 1671** 1860 AU50 NGC. Splendid pale yellow patina coats the lustrous surfaces of this Type One double eagle. A small reeding mark on Liberty's cheek barely merits specific mention. The details are crisp save for the typical weakness on the hair. (#8929)
- 1672** 1860 AU53 PCGS. A strongly struck and scarcely-worn piece with distinctive luster. The butter-yellow surfaces are practically matte, though with abrasions on the cheek and just below Liberty's chin. (#8929)
- 1673** 1861 AU53 NGC. Peppered deep purple toning spots mix with hazy yellow-gold patina on the lightly abraded surfaces. Both sides are delightfully lustrous, and the design elements are well defined. (#8932)
- 1674** 1861 AU55 NGC. Bright yellow-gold surfaces exhibit relatively strong design features. Scattered surface and rim marks are noted over both sides. (#8932)
- 1675** 1861 AU55 NGC. Dusky yellow-gold surfaces are remarkably lustrous despite a degree of wear on the high design elements. Abrasions are noted in the fields around the portrait with smaller marks present elsewhere. (#8932)
- 1676** 1861 AU55 NGC. This pleasing Choice AU double eagle has brass-gold surfaces that possess a good amount of luster and are generally well defined. The scattering of small marks is consistent with those of a large, heavy gold coin. (#8932)

#### Popular 1861 Double Eagle, AU58

- 1677** 1861 AU58 NGC. A wonderful example for a type collection, this lustrous near-Mint 1861 double eagle has frosty yellow-gold surfaces with exceptional design details. Prior to the discovery of the S.S. Republic and S.S. Brother Jonathan treasures, 1861 was the only widely available date in higher grades. (#8932)
- 1678** 1861-S XF45 NGC. Hints of violet in the margins blend with yellow-gold over the surfaces of this still-lustrous example. The top of Liberty's head is a bit soft, as usual, but the rest of the details are nicely defined. The scattered abrasions are typical. (#8935)

---

## Sensational 1861-S Double Eagle Longacre Reverse, MS62

**1679 1861-S MS62 PCGS. CAC.** The first 19,250 double eagles coined in San Francisco early in 1861 had the special Paquet Reverse design. Once word was received to discontinue using that special reverse die, another 768,000 coins were minted with the normal Longacre reverse design. At the time they were struck, there were few if any collectors in San Francisco to preserve those coins, and virtually the entire mintage quietly slipped into the channels of commerce. The small number of Mint State coins known today, including the present example, survived purely as a matter of chance. For a denomination of such high value as a twenty dollar gold coin, the chance of survival is diminished further because of the significant face value of the coin. It was a lot of money at the time, and few could afford to have any similar pieces preserved for the future. In the past 16 years we have handled 261 examples of this issue in our auctions, but only seven of them graded Mint State—six in MS61 and a single MS62. The present example is only the second MS62 piece in our auctions, representing the finest we have ever seen.

In all Mint State grades, PCGS has certified 13 pieces and NGC has certified 14 examples (9/09). A single MS63 PCGS specimen is the finest of those coins. The present specimen is brilliant and fresh, with outstanding orange-gold luster and frosty surfaces. A few light abrasions on each side are strictly consistent with the grade. Seldom does such an important opportunity arise—but when it does, specialists will act accordingly.  
*From The Volunteer Collection. (#8935)*

---

**Lovely Choice XF 1862 Double Eagle**

**1680 1862 XF45 NGC.** The Civil War-era double eagle issues beginning in 1862 are challenging and highly prized today. This Choice XF example from that year retains considerable luster on its pale yellow-gold surfaces. Both sides are moderately abraded with typical striking weakness on the highest design elements. Census: 14 in 45, 53 finer (9/09). (#8937)

**1681 1862-S XF45 NGC.** A surprising amount of luster remains in the fields of this Choice XF specimen. Numerous abrasions are seen on both sides, but none are individually significant. A lovely light yellow representative. (#8938)

**1682 1862-S XF45 NGC.** Slightly dusky butter-yellow color with elements of orange. A softly struck S-mint twenty from the Civil War era with abrasions noted on the portrait and in the fields on each side.

*From The Mulkin Collection.* (#8938)

**1683 1863-S XF45 NGC.** Straw-gold patina coats the softly lustrous surfaces. A tiny rim disturbance below the tip of the bust is barely worthy of mention, and there are no otherwise distracting marks. A well defined Choice XF specimen. (#8940)

---

**Lustrous 1863-S Double Eagle, AU53**

**1684 1863-S AU53 NGC.** Although the encapsulation does not note it, this coin has good odds of being a recovery from the S.S. Republic or the S.S. Brother Jonathan, which between them brought to light about 300 examples of this formerly rare issue in mostly AU condition. A few minor abrasions on Liberty's cheek likely determine the grade, but the orange-gold surfaces still display considerable luster, and even more eye appeal. (#8940)

---

---

**Glorious 1863-S Twenty Dollar, AU58**

**1685 1863-S AU58 PCGS.** Like so many early S-mint double eagles, the story for the 1863-S was the old saw "common in low grades, rare in Mint State." But there was a new theme after the recoveries of the S.S. Republic and S.S. Brother Jonathan steamship wrecks. Both vessels contained numerous examples, adding 300 chiefly AU coins with a few Uncirculated examples to the numismatic market. This piece is only a baby's breath away from Mint State, with glorious orange-gold patina and few individually relevant marks. The bold strike is a delight. Population: 50 in 58, 57 finer (9/09). (#8940)

**1686 1864-S VF30 NGC.** This typically abraded example has surprising sharpness and noticeable luster. Although the 1864-S half eagle and eagle are formidable rarities, their double eagle counterpart is highly collectible. Housed in a prior generation holder. (#8942)

**1687 1864-S XF40 NGC.** Charming olive-gold patina drapes both sides, with a trace of violet coloration around the rims. Liberty's hair and several stars are softly defined, and there are a number of grade-defining abrasions. (#8942)

**1688 1864-S AU53 PCGS.** Still-lustrous yellow-gold surfaces lend this lightly worn Civil War S-mint twenty considerable eye appeal. Light abrasions overall, including a vertical one along the hair below Liberty's coronet. (#8942)

**1689 1865 AU53 PCGS.** This sharply struck twenty displays traces of luster in the recesses of the well defined design features. Distributed small marks on the peach-gold surfaces are slightly more evident on the obverse. (#8943)

---

Select 1865-S Twenty, Ex: S.S. Brother Jonathan

1690 1865-S MS63 PCGS. Ex: *Brother Jonathan* 739. The S.S. *Brother Jonathan* was lost at sea July 30, 1865, and in addition to a considerable loss of life there was a significant amount of gold lost. The salvage of the gold considerably increased the availability of Type One twenties in mint condition. This piece has soft, frosted luster, and there are no abrasions of note on either side. Well but not fully struck. (#8944)

---

Important No Motto 1866-S Twenty  
XF40, Ex: Rainy Day

1691 1866-S No Motto XF40 PCGS. Ex: Rainy Day Collection. The No Motto 1866-S double eagles are far more elusive than their stated mintage of 120,000 pieces might suggest, and this XF coin represents a significant opportunity to own the date. Though softly struck with appreciable wear across each side, the lightly abraded yellow-gold surfaces still claim glimmers of luster. Population: 23 in 40, 71 finer (9/09). (#8945)

---

Coveted 1866-S No Motto Twenty, AU50

1692 1866-S No Motto AU50 PCGS. The 1866-S No Motto twenty dollar is an extremely rare coin, one that was produced in San Francisco, along with the Motto variety, immediately after the end of the Civil War. The No Motto has a mintage about one-seventh of the With Motto coins. The No Motto issue for many years was unknown in Mint State, although recently PCGS has certified a single MS60 piece. (It is interesting to note that the current *Guide Book* (2010 edition) pegs the price of an MS60 at \$185,000—exactly 10 times as much as the With Motto in the same grade.)

This AU50 PCGS-certified example is one of 14 coins, with 14 others finer at that service (9/09). About half of the original luster remains on this piece, which has attractive orange-gold coloration and only a few light, scattered abrasions. A dark fleck in the top loop of S(TATES) serves for pedigree purposes, along with one at the extreme edge near star 1. A single mark on Liberty's cheek and a short grease stain (as struck) between stars 9 and 10 on the obverse require singular mention but are not overly distracting. This coin presents a remarkable opportunity to acquire a classic 19th century gold coin issue, one of the coveted keys to a complete Liberty Head collection. (#8945)

---

---

Lustrous Near-Mint 1866 Double Eagle

1693 1866 AU58 PCGS. CAC. A widely collected issue as the first P-mint Type Two double eagle, those with the motto IN GOD WE TRUST on the reverse. Despite a circulation strike production approaching 700,000 coins, this issue is scarce in Mint State. This near-Mint State piece is one of 46 so certified at PCGS, with 18 finer (9/09). Only a bit of high-point rub separates this alluring coin from a much higher grade, with pleasing orange-yellow surfaces and some smoke-gray on the highest areas. (#8949)

1694 1866-S Motto XF45 NGC. The 1866-S saw extensive circulation in the Western states, with the result that most survivors are well worn. High-end XFs or AU pieces are the finest most collectors will be able to obtain, as relatively few Mint State pieces are known. Yellow-gold and olive-green shades cover both sides of the current Choice XF, each of which retains luster in the protected areas. Nicely detailed and revealing just a few small marks. (#8950)

---

Exemplary AU53 1866-S Motto Twenty

1695 1866-S Motto AU53 PCGS. Most survivors of this bountiful issue are well-circulated, and few Uncirculated coins are known. This AU53 piece is definitely at the top end of certified survivors, both numerically and aesthetically. Much luster radiates from the orange-gold surfaces, which show only a fine peppering of scattered, wispy marks. (#8950)

1696 1867-S XF45 PCGS. Traces of luster are visible in the recesses of this Choice XF S-mint specimen. Brass-gold surfaces display hints of reddish-tan on the reverse. Numerous small abrasions are scattered over the obverse. (#8952)

---

Choice AU 1867-S Type Two Twenty

1697 1867-S AU55 PCGS. Evenly textured surfaces adorn this partially lustrous example of an S-mint Type Two double eagle. This type is always of importance to collectors and seldom available in higher grades. A slight mark on the face of Liberty is noted while the reverse is typically pleasing. Even reddish color covers both sides. (#8952)

1698 1868 XF45 NGC. Bright brassy-gold surfaces yield traces of luster in the protected areas of this nicely defined twenty. Small contact marks are uniformly distributed, especially on the obverse. (#8953)

1699 1868-S XF45 NGC. Original orange-gold patina coats the surfaces, with lovely greenish accents in the periphery. A few of the stars lack definition in the centrals, but the major details are crisp. There are no bothersome marks. (#8954)

1700 1868-S XF45 NGC. Yellow-gold surfaces give off a greenish cast and are lightly abraded. Well defined save for strike weakness in the stars along the left obverse border. Most survivors are in the Very Fine to Extremely Fine range. (#8954)

1701 1868-S AU50 NGC. Hints of luster are visible in the protected areas of this honey-gold double eagle. Well defined except for the left-border stars and portions of Liberty's hair. A pinscratch on the cheekbone is more visible under magnification. (#8954)

1702 1869-S XF45 PCGS. Still-lustrous yellow-gold surfaces show wear mostly at the hair below Liberty's coronet. Though lightly abraded with several digs on the portrait, this Choice XF coin retains impressive eye appeal. (#8956)

---

Appealing AU53 1870 Double Eagle

1703 1870 AU53 NGC. Slightly above average in terms of the certified populations at NGC and PCGS combined, this piece shows generous luster remaining over the yellow-gold surfaces. There are a few stray contact marks, but this sharply struck coin nonetheless generates much appeal. The coinage of the 1870 double eagle was more than 155,000 coins, most of which apparently circulated; the issue is rare in Mint State. (#8957)

---

Bold Choice AU 1870 Twenty Dollar

Lovely 1871-CC Twenty, AU55

1704 1870 AU55 NGC. CAC. Garrett and Guth call this issue "surprisingly scarce in all grades," adding that many famous collections have the date in AU condition. The present Choice AU coin shows only minor, grade-consistent abrasions. Its considerable appeal is further enhanced by attractive orange-gold coloration and a bold strike. (#8957)

Bright Yellow-Gold 1871 Twenty, Choice AU

1705 1871 AU55 PCGS. The mintage of the 1871 double eagles was a relatively paltry 80,150 coins, and most of them appear to have circulated. The average certified survivor is only Choice XF to AU. This commendable Choice AU example shows abundant luster remaining on the bright yellow-gold surfaces, with only a few minor contact marks consistent with a short stay in the channels of commerce. Population: 26 in 55, 19 finer (9/09). (#8960)

1706 1871-CC AU55 NGC. After the extremely limited production of double eagles in Carson City the previous year, that mint set about striking 17,387 double eagles in 1871. Hardly a high mintage, but sufficient that enough have survived to make the hunt only mildly challenging. This lovely piece has faint green over light yellow surfaces with considerable luster. Few marks are evident on either side, certainly fewer than normal for these coins. Choosing an example with relatively few marks will pay dividends as the typical survivor is well worn and heavily abraded. Census: 24 in 55, 27 finer (9/09).

From The Little Rock Collection. (#8961)

---

### Lustrous Mint State 1871-S Twenty Dollar

**1707 1871-S MS60 NGC.** Most examples of this plentiful issue in an earlier time were either VF or XF, as most circulated out West, like so many S-mint gold coins of the 1860s and 1870s. A few Mint State pieces have since been repatriated from overseas hoards, however. Generous luster abounds on both sides of the strictly Mint State piece, but numerous abrasions prevent an even finer grade. The lovely orange-gold color is a plus. (#8962)

**1708 1872 AU55 NGC.** A fair amount of luster remains on the lightly abraded peach-gold surfaces of this Choice AU double eagle. Relatively strong definition is noted on the design elements. (#8963)

**1709 1872 AU58 Prooflike NGC.** Both fields are flashy, and although the obverse has scattered tiny marks, there are no distractions. The reverse is only lightly abraded. One of just six 1872 double eagles certified as Prooflike by NGC (9/09). (#78963)

### Conditionally Rare 1872-S Twenty, MS61

**1710 1872-S MS61 NGC.** A lovely Mint State example of this conditionally rare double eagle. In fact, most or all San Francisco Mint twenties from the same time are condition rarities. This frosty Mint State specimen shows brilliant yellow-gold luster with a hint of green, and it is lightly abraded as expected for the grade. Census: 59 in 61, 9 finer (9/09). (#8965)

### Sharply Struck 1873 Open 3 Twenty, MS62

**1711 1873 Open 3 MS62 NGC. CAC.** Although the 1873 Open 3 double eagle is a widely collected type coin and the most available Type Two double eagle, it is nonetheless scarce in the higher Mint State grades and "quite rare and seldom available" in Choice Condition, per Garrett and Guth. This piece has a few too many scattered contact marks for a finer grade, but generous appeal is present nonetheless. The bold strike and plentiful luster increase the desirability. (#8967)

### Desirable MS62 1873 Open 3 Double Eagle

**1712 1873 Open 3 MS62 NGC.** An important Type Two twenty with frosty yellow luster and deep olive patina on the high points of the design that attests to its originality. This pleasing piece is ideal for the type collector who wants a nice example of the design without breaking the bank. It is also rare in higher grades, with only 60 finer pieces certified by NGC (9/09). (#8967)

### Luminous Choice XF 1873-CC Twenty

**1713 1873-CC XF45 NGC.** A charming Choice XF coin. After accounting for wear, the central detail is slightly soft, and a number of faint to moderate abrasions are scattered in the fields. Still, the coin's still-potent orange-gold luster cements the eye appeal. Overall, a desirable example of a Type Two Carson City double eagle. (#8968)

---

Choice AU 1873-CC Twenty

1714 1873-CC AU55 NGC. An outstanding example with highly lustrous, yellow-gold surfaces and light but numerous abrasions on each side. The 1873-CC double eagle is an elusive issue from a mintage of 22,410 coins. It is much scarcer than those of the next few years, and it is highly desirable in Choice AU. (#8968)

1715 1873-S Closed 3 AU58 ★ NGC. An above-average specimen with eye-catching semiprooflike fields. Numerous light abrasions barely affect the splendid reflectivity. The strike is sharp save for the usual weakness on Liberty's hair. (#8969)

1716 1873-S Closed 3 MS60 NGC. The Closed 3 variety is commoner than the Open 3, yet it becomes scarce in Mint State. This Uncirculated example possesses a good amount of luster on its orange-gold and greenish-gray surfaces. A couple of light mint-made grease streaks are visible on the reverse. (#8969)

1717 1874-CC XF40 NGC. Both sides of this CC-mint twenty are bathed in honey-gold patina accented with traces of greenish-gray and reddish-gold. Small marks are more prevalent on the obverse. (#8971)

---

Popular 1874-CC Twenty Dollar, Choice AU

1718 1874-CC AU55 NGC. CAC. The 1874-CC has a plentiful mintage that is among the highest for this popular mint, making examples of this issue a popular choice for type set purposes. Like most coins from Carson City, however, it appears that many 1874-CCs saw widespread circulation. This Choice AU piece boasts rich orange-gold patina and only minor, scattered abrasions. (#8971)

---

Flashy 1874-CC Twenty, AU58  
Ex: Bass

1719 1874-CC AU58 NGC. Ex: Bass. The 1874-CC double eagles are an issue that is fairly available in AU, but much more elusive once the Mint State levels are reached. This is a piece that would have traded as "Uncirculated" before the advent of certified grading, as just the merest whisper of rub—visible primarily as a slight color change on Liberty's cheek—keeps this coin from an MS62 or MS63 grade. The coloration is a typical (but desirable) apricot-gold, with nearly all of the luster remaining, bright semiprooflike fields, and a strong strike. NGC has certified only 17 pieces finer (9/09).  
Ex: Bass II (Bowers and Merena, 10/1999), lot 1831. (#8971)

1720 1875 MS61 NGC. Yellow-gold surfaces imbued with hints of light tan retain an ample amount of luster. Both sides are lightly marked, and a reddish-purple toning spot is located in the lower left obverse quadrant. Known Mint State examples are at the low end of the scale. (#8973)

---

Richly Patinated 1875 Double Eagle, MS62

1721 1875 MS62 NGC. Hints of pink and orange toning enhance the aesthetic desirability of this lustrous Mint State piece. The high points of the obverse have dark olive patina. The strike is sharp and the surfaces have light grade-consistent abrasions, none of any consequence. NGC has only certified 28 finer examples of this issue (9/09). (#8973)

1722 1875-CC XF40 NGC. This attractive greenish-gold example is minimally abraded and would make a great Carson City Mint Type Two representative. Both sides exhibit flashy luster, but the reverse is particularly appealing. (#8974)

---

**1875-CC Twenty, AU55**  
**An Important Type Two Issue**

**1723 1875-CC AU55 NGC.** The 1875-CC is one of the more available Type Two twenties as well as one of the more available CC twenties, which is good news for type collectors. This sharply defined example shows deep reddish color over most of each side with accents of lilac over the high points. Minimally abraded. (#8974)

**Reddish-Tinted 1876-CC Twenty, AU**

**1724 1876-CC AU50 PCGS.** Ex: Rainy Day Collection. For the grade this piece exhibits a great deal of appeal. The fields show noticeable glints of reflectivity still surrounding the devices, and the friction from circulation is minimal and even over each side. Rich, reddish patina is distributed over each side of this minimally marked Type Two CC twenty. (#8977)

**Popular 1876-CC Double Eagle, AU55**

**1725 1876-CC AU55 NGC.** A doubly popular issue with the fabled Western mintmark and Centennial-year date, the 1876-CC double eagle was also the last of the Type Two double eagles from that mint. Fortunately, more examples appear to have been saved than normally, due to the 1876 dating. This Choice AU coin boasts considerable remaining luster and only scattered light abrasions over the orange-gold surfaces. The reverse is well-struck, but some strike softness appears on the obverse on the high points of Liberty's hair. (#8977)

---

**Attractive 1876-CC Twenty Dollar, AU58**

**1726 1876-CC AU58 PCGS.** The vast majority of 1876-CC double eagles extant today are in the Extremely Fine to About Uncirculated grade levels. Mint State survivors are primarily in the very lower levels thereof, mainly because of bag marks. This near-Mint State specimen displays attractive peach-gold color with greenish imprints. Its design features are well impressed, and scattered minute marks are in line with a heavy gold coin that saw brief circulation. (#8977)

**Appealing MS60 1876-CC Double Eagle**

**1727 1876-CC MS60 PCGS.** Large numbers of 1876-CC double eagles have returned to America from European and South American vaults over the past couple of decades. The vast majority of certified Mint State coins are in the MS60 to MS62 range as most were shipped loose in bags resulting in numerous abrasions. Indeed, a mere five coins have been assigned MS63 or MS64 and none finer. The peach-gold surfaces of this Uncirculated offering display a splash or two of bluish-purple at the obverse rim between 10:00 and 11:00, and partially prooflike fields offset the well impressed design features. Distributed small marks are fewer and of less severity than what might be expected for the designated grade, and the coin is more appealing than what the numeric grade might suggest. Housed in a green label holder.

*From The E.J. Mutton Collection of U.S. Gold. (#8977)*

**Captivating Uncirculated 1876-CC Twenty**

**1728 1876-CC MS60 PCGS.** This Mint State example's most distinctive feature is a prominent alloy spot that flanks star 5. Otherwise, the yellow-gold surfaces show extensive but shallow abrasions throughout the fields that account for the grade. Still, a strongly lustrous coin that offers distinctive charm.

*From The E.J. Mutton Collection of U.S. Gold. (#8977)*

---

Lovely MS60 1876-CC Double Eagle

**1729 1876-CC MS60 PCGS.** Carson City Mint guru Rusty Goe points out that the 1876-CC production was the high-water mark for double eagles from that mint, although that it intersected with the U.S. Centennial was probably coincidental. This piece shows the moderate abrasions and bold strike usually seen on Mint State examples of the issue. The lovely orange-gold coloration is also in character. Semireflective fields.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Attractive Mint State 1876-CC Twenty

**1730 1876-CC MS60 PCGS.** The mintage of the 1876-CC double eagle was roughly 20,000 pieces higher than the 1875-CC and 1874-CC issues, probably due more to the vagaries of bullion deposits than to the popularity of the Centennial date. This piece displays attractive, flashy orange-gold surfaces that show moderate scattered, mostly light abrasions in keeping with the grade. The excellent strike is typical for this well-produced issue, one that is more available than previously, due to repatriations of coins hoarded overseas.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Lustrous MS60 1876-CC Liberty Double Eagle

**1731 1876-CC MS60 PCGS.** The fields are yellow-gold to orange-gold, with some smoke-gray accents on the high points. The surfaces are moderately abraded, but considerable luster remains on the unabraded areas. The reverse is choice for the grade, and on its own would likely garner an MS61. Semireflective, as usual.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Sharp Mint State 1876-CC Double Eagle  
Last CC-Mint Type Two Twenty

**1732 1876-CC MS60 PCGS.** Bowers writes of this issue in his *Guide Book*, "Until the present generation, AU and Mint State coins were seldom seen, but recent importations have changed that." The minihoard of 1876-CCs in the present auction offers a prime collecting opportunity. This example boasts a typical "look," with moderate contact marks, a strong strike, attractive apricot-gold patina, and semireflective flash in the fields.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Desirable Mint State 1876-CC Twenty Dollar

**1733 1876-CC MS60 PCGS.** Well struck with no trace of wear. Yellow-gold fields are lustrous with a slightly glassy texture near the rims, while the devices show dusky highlights. Appealing despite the numerous abrasions that contribute to the grade. The reverse is rotated approximately 45 degrees clockwise from coin turn.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Unworn 1876-CC Double Eagle

**1734 1876-CC MS60 PCGS.** Flashy fields are mildly reflective on this Mint State coin, housed in a green label holder. The strike is crisp for the issue, and though numerous wispy abrasions and other marks pass through the fields, the overall eye appeal remains surprisingly high. A great example of this Type Two issue.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Intriguing MS60 1876-CC Double Eagle

**1735** 1876-CC MS60 PCGS. The yellow-gold of the lustrous fields is bright, while that on the devices, particularly the high points, is slightly dulled, perhaps from contact with another coin while in storage. The numerous light to moderate marks on the obverse support the storage theory, though the reverse is comparatively clean. Housed in a green label holder.

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Sumptuous 1876-CC Twenty, MS61

**1736** 1876-CC MS61 PCGS. Here is the most obtainable Carson City Mint double eagle from the 1866 to 1876 Type Two design period. It is housed in a green-label PCGS holder and has sumptuous green and yellow brilliance with hints of orange toning and areas of darker patina. The fields are satiny with fully brilliant. PCGS has only certified 51 finer examples (9/09).

From The E.J. Mutton Collection of U.S. Gold. (#8977)

---

Popular 1876-S Double Eagle, MS63

**1737** 1876-S MS63 PCGS. A popular Centennial-year S-mint issue, the 1876-S is also among the last of the Type Two double eagles with the denomination expressed as TWENTY D. This piece offers many pluses: copious luster, deep orange-gold color, and a bold strike, as well as generous eye appeal. A super type coin, seldom seen finer. Population: 89 in 63, 10 finer (9/09). (#8978)

---

Pleasing 1876-S Double Eagle, MS63

**1738** 1876-SMS63 NGC. CAC. The 1876-S double eagle, with a mintage of nearly 1.6 million pieces, is easily located in grades Extremely Fine to MS62. The NGC/PCGS certified population declines significantly at the MS63 level of preservation and again in MS64 and MS65. Neither service has seen specimens finer than Gem.

The lustrous surfaces of this pleasing Select specimen reveal hints of greenish-tan and the design elements exhibit relatively good detail. A few minute obverse bagmarks preclude finer status; nevertheless, the coin possesses pleasing overall eye appeal for the numerical grade. (#8978)

**1739** 1877 MS61 NGC. The first year of issue for the new Type Three Liberty double eagle design with the denomination spelled out in its entirety as TWENTY DOLLARS. This lustrous Mint State example is highly attractive with rich honey gold color on reflective surfaces. (#8982)

**1740** 1877-CC VF30 NGC. One state away, the San Francisco Mint struck more than 1.7 million double eagles in 1877. But Carson City managed only 42,565 pieces, as the facility concentrated on silver coinage that year. The present example retains pockets of mint luster, and although wear is evident on the highpoints, the surfaces are only moderately abraded. (#8983)

---

Appealing 1877-CC Double Eagle, XF40

**1741** 1877-CC XF40 PCGS. This is the first year of the Type Three (value of TWENTY DOLLARS on the reverse) double eagle, struck at the Philadelphia, Carson City, and San Francisco Mints. Traces of luster reside in the protected areas of this peach-gold specimen that displays strong detail after discounting high-point wear. Scattered small marks are in line with the designated grade and do not detract from the overall appeal. (#8983)

**1742** 1877-CC—Polished—NCS. AU Details. A scarce Carson City Mint issue. The surfaces are unnaturally bright, but the details are well defined. Although polished, there are no individually significant marks. (#8983)

**1743** 1877-CC—Improperly Cleaned—NCS. AU Details. A lightly hairlined example with a bagmark-free reverse and the expected moderate obverse abrasions. Lower mintage than the immediately preceding Carson City issues. (#8983)

**1744** 1877-S MS61 NGC. Well-defined for this initial Type Three San Francisco double eagle issue. Bold sun-yellow luster in the fields amplifies the eye appeal despite moderate abrasions. (#8984)

#### Conditionally Scarce MS62 1877-S Double Eagle Recut ME in AMERICA

**1745** 1877-S MS62 PCGS. Lime-green borders surround apricot-gold centers. Lustrous and attentively struck with minor distributed marks that conform to the designated grade.

1877 was the first year of the Type Three design, and some working dies have interesting recutting on the reverse legends. Lot 2082 in our recent July West Palm Beach Signature had a widely repunched final A in AMERICA. The present piece has a notch on the upper right serif of the M in AMERICA, and the neighboring E shows recutting on the upper left serif. (#8984)

#### Lustrous 1878-S Double Eagle, MS62

**1746** 1878-S MS62 NGC. The plentiful mintage of 1.74 million 1878-S double eagles is surprising, considering that the San Francisco Mint was also tasked with churning out 9.77 million silver Morgan dollars and 4.16 million Trade dollars. It was the other denominations that suffered in comparison, most notably the rare 1878-S half dollar. This piece shows good luster, along with some typical abrasions consistent with the grade and smoke-gray accents on the obverse high points. The reverse is high-end for the grade. NGC has graded only nine examples finer (9/09). (#8987)

**1747** 1879 MS60 NGC, FS-801. The reverse is nicely die doubled, with the spread between hubbings most noticeable on PLURIBUS. The variety is unattributed on the NGC insert. Lustrous and crisply struck with scattered small marks and a minor alloy spot between the CA in AMERICA. (#8988)

#### Die Doubled Mint State 1879 Twenty Dollar

**1748** 1879 MS61 NGC, FS-801. UNITED STATES and other reverse legends exhibit die doubling. The parity between gold, silver, and paper currency that was achieved in late December 1878, as well as huge numbers of gold and silver coins flowing back into the United States from Canada that had been hoarded since the Civil War, decreased the need for new coinage. Despite a moderate mintage exceeding 200,000 coins, the 1879 double eagle is scarce in Mint State, with most certified examples grading no more than AU55 to AU58, as a rule. This piece offers bounteous luster on the orange-gold surfaces, with fewer abrasions than might be expected for the grade confined largely to the reverse. (#8988)

### Bright AU55 1879-CC Double Eagle

**1749** 1879-CC AU55 PCGS. Probably less than a dozen different examples of the 1879-CC double eagle are known in Mint State, despite the combined NGC/PCGS population totals. This is a function both of its skimpy original mintage of 10,708 coins and subsequent survival rate that *The Mint on Carson Street* author Rusty Goe estimates at 3%-4% in all grades. Most examples encountered fall into the XF-AU grade range. The present Choice AU piece boasts bright yellow-gold coloration of much CC-mint gold with noticeably semiprooflike fields. What is atypical, however, is the lack of the myriad abrasions that often plague the issue. A few abrasions are present, but they are certainly less bothersome than usual. The strike and overall eye appeal are also above-average. A small patch of reddish alloy is noted on the reverse at the eagle's beak. Population: 19 in 55, 24 finer (9/09). (#8989)

### Appealing 1883-S Twenty Dollar, MS63

**1750** 1883-S MS63 NGC. As so many Type Three S-mint Liberty Head issues, the 1883-S is available up to the MS62 level, but Select examples are rare. It is most especially the relative absence of distracting marks that puts this piece over the top, coupled with a sharp strike, attractive orange-gold surfaces, and excellent eye appeal. Some minor grease stains, as made, appear near the reverse border. NGC has certified five coins finer (9/09). (#9000)

### Popular AU55 1884-CC Twenty Dollar

**1751** 1884-CC AU55 NGC. This CC-mint issue, fortunately for collectors, is available up through the Mint State levels, generally MS62 with a handful finer. This Choice AU piece displays most of its original luster remaining over the yellow-gold surfaces. A few ticks and slight wear diagnose a short spate in circulation, but high eye appeal remains. (#9001)

### Attractive 1884-CC Twenty, Choice AU

**1752** 1884-CC AU55 NGC. This is a date that is fairly available, although the typical certified example ranges from XF to AU. Mint State pieces are available only up to MS61, with MS62 and finer coins elusive. This Choice AU specimen generates high interest and eye appeal, with attractive orange-gold surfaces and only moderate abrasions consistent with a short spate in circulation. (#9001)

### Lustrous Choice AU 1884-CC Twenty

**1753** 1884-CC AU55 PCGS. This Carson City double eagle has nearly full luster, and is surprisingly unabraded for its denomination and era. A strong lens is necessary to locate the highpoint friction. A few nearly imperceptible hairlines are noted near a couple of specks of mint-made struck-in grease. (#9001)

---

## Memorable 1885 Double Eagle, MS61 One of Only 751 Examples Struck

1754 1885 MS61 PCGS. The 1885 double eagle is on the short list of the United States' lowest mintage gold coins that were actually produced as business strikes rather than in proof-only format. The 1885 twenties have an impossibly low mintage of 751 coins, although its foundational rarity is somewhat overshadowed by the 1882 double eagle, which has an even lower production, recorded at 571 pieces.

Despite the incredibly low business strike production, the issue may be somewhat underrated, even today. Garrett and Guth posit the following in their gold *Encyclopedia*:

"The availability of Proof examples is the only thing keeping this issue from being extremely expensive. The Smithsonian collection lacks a circulation-strike example of the date for this reason. It is estimated that there are fewer than 100 known in all grades. Most of the 1885 double eagles seen by the authors have been in circulated condition. There are a few examples known at the Choice level."

What Garrett and Guth allude to here is the 19th century preference (of the few well-heeled collectors who could afford to dabble in twenty dollar gold pieces) for proof coins over business strikes, no matter how low the mintage. Of course, the desirability and costly nature of high-grade proof Liberty Head gold coinage from the 19th century only reinforces how difficult, elusive, and desirable the business-strike 1885 double eagles truly are.

In MS61 this coin is one of two so certified at PCGS, with five coins finer (9/09). This example offers splendid eye appeal throughout the orange-gold surfaces. A few ticks on the obverse are noted, along with a couple of others on the reverse shield. But it is probably two small obverse digs, between stars 4 and 5, that preclude an even higher grade. The coin nonetheless radiates eye appeal in considerable quantities.

Why were so few double eagles produced of this date and mint? For much of the 1880s, the San Francisco Mint had churned out double eagles by the millions each year; perhaps there was simply little need for P-mint twenties. 1885 was a year of great contrasts overall: Millions of dollars, cents, and dimes were produced in Philadelphia, yet three cent nickels, quarters, and halves were all made in tiny amounts—and the 1885 quarter eagle's mintage is nearly as low as the double eagle, 800 coins.  
*From The Little Rock Collection. (#9003)*

---

**Sharp MS63 1885-S Liberty Twenty**

**1755 1885-S MS63 NGC.** The 1885-S Liberty Head double eagle is a fairly low-mintage issue within the context of the series, but Select Mint State examples are actually somewhat more available than many other Type Threes. Generous luster flows throughout the apricot-gold surfaces of this specimen, and the few minor abrasions, while undistracting, prevent an even finer grade. The strike is especially sharp, another attractive characteristic of these coins. (#9005)

---

**Appealing 1885-S Twenty, MS63**

**1756 1885-S MS63 NGC.** The average certified survivor of this S-mint issue only grades MS60 or MS61, usually due to extensive bagmarks. This specimen has no such distractions, as the scattered abrasions are minor for the grade. The yellow-orange surfaces radiate flashy luster, and the bold strike, while typical for the issue, is pleasing and adds to the high appeal. (#9005)

---

**Highly Lustrous 1885-S Twenty, MS63 ★**

**1757 1885-S MS63 ★ NGC.** Type Three S-mint double eagles are underrated overall, and this relatively low-mintage issue in Select grade with the NGC Star should attract plenty of attention from the legions of collectors interested in type gold issues. The boisterous luster emanating from the orange-gold surfaces justly merits the Star, complemented by clean surfaces for the grade and a bold strike. NGC has certified only 11 numerically finer examples (9/09). (#9005)

---

**1758 1888 MS61 NGC. FS-801.** The reverse is sharply doubled, especially on the letters of TWENTY DOLLARS. A strongly struck Type Three Philadelphia twenty with pleasing butter-yellow luster. A number of abrasions in the portrait area account for the grade. (#9008)

---

**Scarce 1888 Liberty Twenty, MS62**

**1759 1888 MS62 PCGS.** A khaki-gold example of this better date Philadelphia issue. Nicely struck and lustrous with a number of wispy abrasions appropriate for the grade. The only reportable mark affects the I in LIBERTY. Rare any finer, and PCGS has yet to certify an 1888 above the MS64 level. (#9008)

---

**Important 1888 Liberty Twenty, MS62**

**1760 1888 MS62 PCGS.** Frosty yellow-gold surfaces have accents of pale pink at the centers and light green near the borders on both sides. The strike is sharp and the surfaces are pleasing for the grade. PCGS has only certified 23 finer examples of this conditionally rare issue. (#9008)

**1761 1889-CC—Scratched—NCS. AU Details.** This better date apricot-gold CC-mint double eagle has nearly full luster, and remains desirable despite four hair-thin marks on the lower right obverse field. (#9011)

**1762 1889-S MS62 NGC.** A khaki-gold double eagle with good luster and an assertive strike. On its own, the reverse has the look of a higher grade, while the obverse has the expected number of individually minor marks. (#9012)

**1763 1889-S MS62 NGC.** Green-gold fields encompass apricot-gold centers. This lustrous double eagle has the scattered small marks customary for the grade, but none individually distract the eye. (#9012)

**1764 1890-CC XF45 NGC.** Traces of luster cling to the recesses of this CC-mint representative and each side yields hints of greenish-gray on its yellow-gold surfaces. The design elements exhibit good detail despite high-point wear. A couple of relatively heavy marks on the cheek and neck are mentioned for complete accuracy. (#9014)

**1765** 1890-CC AU53 NGC. With a relatively large mintage of 91,209 pieces, the 1890-CC double eagle would make an excellent choice for a Carson City Mint type collector. Flashy luster graces the medium-yellow surfaces of this well defined piece. There are no marks of any significance. (#9014)

#### Smooth Choice AU 1890-CC Twenty

**1766** 1890-CC AU55 NGC. Luster dominates all but the open fields and cheek of this attractive Carson City twenty. Refreshingly bereft of marks, especially given the alloy and diameter. The reverse die doubling on TWENTY and PLURIBUS is nearly imperceptible.  
*From The Mulkin Collection.* (#9014)

#### Popular Uncirculated 1890-CC Twenty

**1767** 1890-CC MS60 PCGS. A lustrous khaki-gold Uncirculated Carson City double eagle with marks appropriate for the grade. As is the case with most '90-CC twenties, the present piece is lightly die doubled, with the hubbed spread evident on TWENTY and PLURIBUS. Encased in a green label holder.  
*From The E.J. Mutton Collection of U.S. Gold.* (#9014)

#### Pleasing 1890-CC Twenty, MS60

**1768** 1890-CC MS60 PCGS. A pleasing light yellow-gold example with frosty luster on each side. The brilliant surfaces exhibit hints of pink toning on the obverse and faint green on the reverse. Some dark olive patina adheres to the high points of the devices. Faint hairlines and trivial abrasions explain the grade of this green label PCGS double eagle.  
*From The E.J. Mutton Collection of U.S. Gold.* (#9014)

#### Satininy MS61 1890-CC Twenty

**1769** 1890-CC MS61 PCGS. Decisively detailed with wonderfully satiny luster that brings out the best of the yellow and apricot-gold color. Only a few minor abrasions are noted in most zones of the coin, though there is a slight concentration at the cheek and two significant marks are present on the hair above the coronet. Housed in a green label holder.

*From The E.J. Mutton Collection of U.S. Gold.* (#9014)

#### Lustrous MS61 1890-CC Double Eagle

**1770** 1890-CC MS61 PCGS. This Uncirculated Carson City representative is lustrous and crisply struck. The cheek displays marks corresponding to the grade. The reverse is well preserved, which makes the minute die doubling on that side more noticeable than is usual for the issue. Certified in a green label holder.

*From The E.J. Mutton Collection of U.S. Gold.* (#9014)

#### Attractive MS61 1890-CC Double Eagle

**1771** 1890-CC MS61 PCGS. An absence of notable abrasions distinguishes this impressive Mint State example. Booming luster contributes further to the eye appeal. PLURIBUS is minutely die doubled, usual for this popular low mintage Carson City issue. Resides in a green label holder.

*From The E.J. Mutton Collection of U.S. Gold.* (#9014)

---

**1890-CC Type Three Twenty, MS61**

**1772** 1890-CC MS61 PCGS. An original green-gold representative that has dynamic cartwheel sheen and a few concealed marks on the shield lines. The reverse displays minor die doubling, as seen on most '90-CC twenties. Housed in a green label holder.  
*From The E.J. Mutton Collection of U.S. Gold. (#9014)*

**Mint State 1890-CC Twenty**

**1773** 1890-CC MS61 PCGS. Mostly butter-gold, with glimpses of lime here and there. Faint marks are distributed, but no distractions are present. Most '90-CC twenties exhibit slight die doubling on PLURIBUS, and the present piece is no exception. Encapsulated in a green label holder.  
*From The E.J. Mutton Collection of U.S. Gold. (#9014)*

**Shining MS61 1890-CC Twenty**

**1774** 1890-CC MS61 PCGS. Strongly struck for this later Carson City twenty issue with attractive yellow-gold luster and a degree of alloy close to the high points. Despite marks in Liberty's hair and on her face, a minimally abraded coin for the grade. Housed in a green label holder. PCGS has certified 45 finer pieces (9/09).  
*From The E.J. Mutton Collection of U.S. Gold. (#9014)*

---

**Colorful 1890-CC Double Eagle, MS61**

**1775** 1890-CC MS61 PCGS. After a three-year intermission, the Carson City Mint began striking Morgan dollars and Liberty double eagles in 1889, and continued producing the same two denominations in 1890. This piece is housed in a green label PCGS holder. It is an exceptional example for the grade, with rich green-gold luster and dark patina highlighting the obverse.  
*From The E.J. Mutton Collection of U.S. Gold. (#9014)*

**Favored 1890-CC Twenty, MS61**

**1776** 1890-CC MS61 PCGS. An attractive example housed in a green-label PCGS holder, this double eagle has frosty light yellow luster with dark patina on the high points. The surfaces and overall quality is pleasing for the assigned grade. PCGS has only certified 45 finer examples.  
*From The E.J. Mutton Collection of U.S. Gold. (#9014)*

---

**Classic Rarity 1891 Double Eagle, AU58  
One of 1,390 Circulation Strikes Made**

**1777 1891 AU58 NGC.** The 1891 double eagle is one of those classic American gold rarities that was struck in business strike format, but whose total mintage approaches the minuscule magic level of 1,000 coins—in this case 1,390 pieces. In 2000 Michael Fuljenz and Doug Winter, in *Type III Double Eagles 1877-1907*, called the issue “the rarest Type Three Double Eagle struck after the 1880’s. Despite its obvious rarity, it is an issue which remains curiously overlooked and undervalued in comparison to some of the other ultra-low mintage dates from the 1880’s.”

A short list of those dates would include the 1886 double eagle (mintage 1,000 coins), the 1885 double eagle (mintage a near-mythic 751 coins), the 1882 (even more incredible at 571 coins), and the 1881 (2,199 coins). An analysis of price data versus production totals suggests that the 1881 and 1891 may be considerably underpriced still, in relation to some of their lower-mintage cousins. For example, the 1891 has a mintage that is 39% more than the 1886’s, yet the PCGS price of the 1886 is more than double that of the 1891 in AU55 (the nearest published grade to the present coin). We should here note the PCGS disclaimer that its prices only apply to PCGS-certified coins, and that the data here do not factor in survival rates, which might alter the outcomes.

Jeff Garrett and Ron Guth wrote in their gold coin reference (2006) that they believe fewer than 100 examples survive of the 1891 double eagle in all grades. With such a tiny emission, a number of the certified survivors are Prooflike. The present coin, while not so certified, is one of only 15 non-Prooflike pieces at NGC, which has seen but three pieces numerically finer: one each in MS60, MS61, and MS62 (9/09).

Only the slightest amount of rub separates this piece from Mint State, appearing on the obverse as a slight color change amid a patch of roughness on the cheek, caused by minor contact. A similar whisper of wear appears on the leading edges of the eagle’s wings. This piece was clearly plucked from circulation (if it ever saw it) shortly after its release.

*From The Little Rock Collection. (#9016)*

---

Uncirculated Low Mintage 1892 Twenty

**1778** 1892 MS60 NGC. The 1892 has an uncommonly low mintage of 4,430 pieces, yet dealers of the day appeared to put few aside, unlike three dollar dates of the prior decade. Examples went into circulation, and most survivors are in AU or XF grades. This is a boldly impressed and lustrous representative that shows a smattering of small abrasions. (#9019)

Impressive 1892 Double Eagle, MS62

**1779** 1892 MS62 PCGS. A wonderful example of the rare 1892 double eagle, an important date outright, in addition to its condition rarity. Only 4,430 business strikes were minted, and most entered circulation. The average grade of certified pieces hovers around the low AU level. This specimen has satiny green-gold luster with hints of salmon toning and dark olive patina on the design high points. It is entirely original and wholesome. Only about 100 to 150 examples survive in all grades. Contemporary collectors chose proofs to represent the date, explaining the absence of high grade business strikes. This example is extremely important to specialists. Population: 7 in 62, 6 finer (9/09).

From The Little Rock Collection. (#9019)

---

Elusive Choice AU 1892-CC Twenty

**1780** 1892-CC AU55 PCGS. Although less rare than its highly regarded 1891-CC predecessor, the 1892-CC is nonetheless elusive due to its meager mintage of 27,265 pieces. This canary-gold Carson City twenty has unblemished fields, a lustrous reverse, and a partly lustrous obverse. Slight friction on the cheek, eyebrow, and hair deny a higher grade. (#9020)

---

Semireflective 1892-CC Twenty, AU58

**1781** 1892-CC AU58 NGC. The former scarcity of the 1892-CC has been lessened in recent years by a couple of XF-AU hoards. This is a pleasing coin that exhibits the often-seen semireflective fields on each side. The strike is sharp throughout, and each side has just a bit of light reddish patina. (#9020)

**1782** 1893 MS63 NGC. Soft luster emanates from both sides of this Select twenty dollar, each of which possesses a medley of peach-gold, mint-green, and light tan patina along with well struck design elements. Some grease stains are visible in the upper left obverse field. (#9022)

---

Sharp Near-Gem 1893 Liberty Twenty

**1783** 1893 MS64 NGC. A peach-gold Choice Type Three twenty that benefits from sweeping luster and a precise strike. The cheek and fields display only the minor grazes that are nearly unavoidable for the issue. Banks both domestic and abroad saved examples of the 1893, but indifferent storage resulted in mostly MS61 and MS62 survivors. Census: 49 in 64, 3 finer (9/09). (#9022)

---

Attractive 1893-CC Twenty, AU53

- 1784 1893-CC AU53 NGC. The 1893-CC is a popular coin for type purposes, in large part because of its availability in AU and Mint State grades. This is an attractive coin for the grade that shows slight reflectivity in the fields and minimal abrasions. Light reddish patina is seen overall, giving the coin a pleasing, original appearance. (#9023)
- 1785 1895 MS64 PCGS. CAC. Bold yellow-gold peripheral color with slight paling into the center. Crisply defined with only small and scattered marks on the obverse, though the reverse has an abrasion traveling through the glory. Extremely rare any finer; PCGS has graded a mere two finer examples (8/09). (#9027)
- 1786 1895 MS64 NGC. CAC. The 1895 double eagle is found in abundant numbers owing to thousands of examples returning from overseas vaults. The majority of these grade MS60 to MS63. This lovely apricot-gold near-Gem specimen displays pleasing luster and sharply struck design elements. A well executed strike imparts strong detail to the design features. This date is extremely difficult to locate any finer. (#9027)
- 1787 1895 MS64 NGC. A precisely struck and lustrous yellow-gold near-Gem. The fields are impressively bereft of marks, and the cheek shows only faint grazes. NGC has graded just nine examples finer (9/09). (#9027)
- 1788 1898-S MS64 PCGS. The lustrous surfaces of this near-Gem display soft greenish-gold hues and well struck design features. Minute marks preclude Gem classification. This issue is readily available in MS64 but becomes more difficult any finer. (#9034)
- 1789 1898-S MS64 PCGS. This lovely khaki-gold near-Gem exhibits dynamic luster and a precise strike. The reverse is gorgeously devoid of marks, and the obverse is only minimally abraded. (#9034)
- 1790 1900 MS64 PCGS. A solid strike leaves crisp definition on the design features of this yellow-gold twenty. Both sides display ebullient luster, while the obverse reveals a few minute contact marks that prevent Gem classification. Readily available through near-Gem, after which the certified population declines significantly. Housed in a green label holder. (#9037)
- 1791 1900 MS64 NGC. CAC. Boldly struck with enticing sun-yellow luster. This turn-of-the-century double eagle has a few minor abrasions, but the eye appeal is incredible. (#9037)
- 1792 1900 MS64 NGC. A canary-gold Type Three near-Gem whose lustrous surfaces have only a minimum number of faint grazes. The strike is unassailable, and the issue is difficult to secure in finer grades. (#9037)
- 1793 1900 MS64 NGC. Orange toning visits the lustrous fields of this decisively struck Type Three twenty. The reverse is particularly free from marks. Difficult to locate any finer. (#9037)

---

Scarce Gem 1901 Twenty Dollar

- 1794 1901 MS65 PCGS. A precisely struck peach-gold Gem with vibrant luster and good eye appeal. Smooth aside from inconspicuous contact near the S in DOLLARS. Housed in a green label holder. As of (9/09), PCGS has certified only three pieces finer. *From The E.J. Mutton Collection of U.S. Gold.* (#9039)

---

Desirable Gem 1901 Double Eagle

- 1795 1901 MS65 PCGS. This yellow-gold Gem features an intricate strike and has splendidly smooth fields. Only moderate marks on the chin denies an even higher grade. Encapsulated in a green label holder. Both major services combined have graded just three coins finer (9/09). *From The E.J. Mutton Collection of U.S. Gold.* (#9039)

---

Incredible 1901 Double Eagle, MS65

- 1796 1901 MS65 NGC. Although the 1901 double eagle has a mintage many times smaller than the enormous 1904—111,400 pieces versus 6.2 million—both are available for a price up to the Gem level. The difference is, the 1901 is almost never seen finer: NGC has graded none finer, while PCGS has seen three. Incredible coruscating luster is the hallmark of the present MS65 example, with deep orange-reddish coloration and a bold strike. A wonderful type coin. *From The E.J. Mutton Collection of U.S. Gold.* (#9039)

### Reddish-Orange 1901 Double Eagle, MS65

**1797 1901 MS65 NGC.** Despite the low mintage for the 1901 double eagles they were exported in considerable numbers, so that today Gems are relatively available, if far more elusive than the ubiquitous 1904 issue. This sparkling MS65 specimen boasts wonderful reddish-orange patina, an extremely sharp strike, and no mentionable distractions on either side. NGC has never graded an example finer than MS65, while PCGS has certified three MS66 pieces (9/09).  
From The E.J. Mutton Collection of U.S. Gold. (#9039)

### Splendid Gem 1901 Liberty Twenty

**1798 1901 MS65 NGC.** Liberty Head double eagles have a special allure all their own. While many volumes have been written (including some at Heritage) about the beauty of the Saint-Gaudens design, the classic appeal of the century-spanning Liberty Head design ensures that it will remain a collector favorite. This splendid Gem emanates solid eye appeal, with a sharp strike, bounteous luster, and lovely orange-gold patina.  
From The E.J. Mutton Collection of U.S. Gold. (#9039)

**1799 1903 MS64 PCGS.** The vibrant yellow-gold surfaces show impressive cartwheel luster throughout. The strike is sharp, and there are only a few inconsequential abrasions. An excellent piece for a type collector. (#9043)

### Exemplary Gem 1903 Twenty Dollar

**1800 1903 MS65 NGC.** A beautiful honey-gold Gem that boasts a sharp strike and dazzling luster. The reverse is close to immaculate, and the obverse has only sparse faint marks. Encased in a former generation holder. NGC and PCGS combined have certified only 10 pieces finer (9/09). (#9043)

**1801 1904 MS64 PCGS.** Orange-gold centers are encompassed by lime-green margins. A gorgeous Choice double eagle with far fewer marks than the typical Uncirculated example. Encased in a first generation holder. (#9045)

**1802 1904 MS64 NGC.** A fully lustrous Choice Mint State example, this piece has the appearance of a full Gem at first glance. Only close inspection reveals the few tiny surface marks that limit the grade. (#9045)

### Appealing Gem 1904 Double Eagle

**1803 1904 MS65 PCGS.** One of the most prodigious gold coinages in history produced the 1904 double eagles, making it the quintessential type coin. This lovely orange-gold Gem has ebullient luster and a bold strike, with its desirability further enhanced by the old PCGS green-label holder. A thoroughly appealing piece. (#9045)

### Magnificent 1904 Twenty Dollar, MS65 ★

**1804 1904 MS65 ★ NGC. CAC.** The 1904 is the most common date of the Liberty Head double eagle series, evidenced by the tens of thousands certified by NGC and PCGS. In fact, the two services have graded nearly 10,000 coins in MS65 alone! The present Gem ranks near the top of this voluminous figure as it has been given not only the CAC green label, but is also one of just 14 specimens assigned NGC's coveted Star. That designation has been given to only two numerically higher '04 twenties (9/09).

Variegated apricot-gold and mint-green patina embraces both sides of this magnificent specimen, each of which is awash with ebullient luster. An exacting strike complements these attributes by delivering crisp definition to the design features. A few grade-consistent marks on Liberty's cheek are undisturbing, and mentioned only because they might help pedigree the coin. (#9045)

### Sparkling Gem 1904 Double Eagle

**1805 1904 MS65 NGC. CAC.** The optimal coin to represent the Liberty Head type. Due to the enormous mintage, many handsome survivors exist today, in Gem and even finer grades. This sparkling MS65 example boasts radiant luster and nearly perfect fields, with lots of eye appeal and orange-gold coloration. (#9045)

---

### Charming 1904 MS65 Double Eagle

**1806 1904 MS65 PCGS.** Bright luster exudes from the yellow-gold surfaces of this charming double eagle, and a well executed strike imparts complete delineation to the motifs. Some scattered inoffensive grazes fail to detract from the coin's overall eye appeal. Housed in a green label holder.

*From The E.J. Mutton Collection of U.S. Gold. (#9045)*

---

### Radiant 1904 Gem Double Eagle

**1807 1904 MS65 PCGS.** The Gem level of preservation is the highest grade most collectors will encounter when seeking to obtain a 1904 double eagle. The PCGS/NGC population decreases precipitously above MS65 to fewer than 340 coins, many of which are likely resubmissions or crossovers. The present Gem offering radiates pleasing luster from peach-gold surfaces imbued with hints of light green and its design features exhibit uniformly sharp delineation. A few small marks are insignificant. The coin is holdered with a green insert.

*From The E.J. Mutton Collection of U.S. Gold. (#9045)*

---

### Exquisite 1904 Gem Double Eagle

**1808 1904 MS65 PCGS.** Rich orange-gold color accented with splashes of subtle mint-green adorns the radiantly lustrous surfaces of this lovely Gem. The design elements exhibit exquisite detail, including Liberty's hair strands, the star centers, and the eagle's plumage. A few minute contact marks are within the parameters of the MS65 grade classification. This is an excellent piece for a high-grade type collection. Encapsulated in a green label holder.

*From The E.J. Mutton Collection of U.S. Gold. (#9045)*

---

### Reflective 1904 Twenty, MS65

**1809 1904 MS65 NGC.** This incredible Gem has prooflike fields with considerable reflectivity on both sides. It is boldly defined and features brilliant yellow-gold surfaces with subtle iridescent splashes on each side. With its incredibly high 6 million coin mintage, the 1904 is the popular choice for type collectors who want the best available quality at the most advantageous price.

*From The E.J. Mutton Collection of U.S. Gold. (#9045)*

---

### Glorious Gem 1904 Twenty Dollar

**1810 1904 MS65 NGC.** The numerous Gem 1904 double eagles from this consignor give us the privilege of examining the remarkable strike of these coins as a group. Note the full centrals on every star around the periphery, the incredible wealth of detail in Liberty's hair and on the coronet, the crispness of the initials of James B. Longacre (Mint chief engraver who served from 1844-1869). On the reverse note the articulation in the glory of rays, the eagle's feathers, and the separation of all the horizontal shield lines. This is a glorious Gem, with excellent luster and orange-gold patina.

*From The E.J. Mutton Collection of U.S. Gold. (#9045)*

---

### Vibrant 1904 Double Eagle, MS65

**1811 1904 MS65 NGC.** Vibrant luster emanates from the greenish-gold satiny surfaces of this imposing Gem. All of the design elements exhibit crisp detail, heightening even more the coin's eye appeal, and both sides are minimally marked. This is an exceptional example for the type collector who would have to pay a three-fold higher price for an MS66.

*From The E.J. Mutton Collection of U.S. Gold. (#9045)*

---

**Superlative Gem 1904 Twenty Dollar**

**1812 1904 MS65 NGC.** Superlative luster is the hallmark of this radiant Gem Liberty double eagle. The prodigious mintage of the 1904 exceeded 6.2 million coins, enabling wonderful examples such as the present piece. The peach-gold surfaces are boldly struck and appear nearly flawless. A couple of tiny dark flecks on the reverse are minor in context of the obvious appeal.  
From The E.J. Mutton Collection of U.S. Gold. (#9045)

---

**Splendid MS65 1904 Twenty Dollar**

**1813 1904 MS65 NGC.** Between the 1904 and the 1904-S issues there were nearly 11.4 million double eagles coined, making them the first- and second-largest issues of the Liberty Head type and the Type Three subtype. Type gold collectors avidly seek splendid Gem examples such as the present coin. When found, Gems of the 1904 issues are typically sharply struck, as here. The orange-gold surfaces emanate copious luster, and the eye appeal is uniformly high throughout.  
From The E.J. Mutton Collection of U.S. Gold. (#9045)

---

**Appealing 1904 Gem Twenty Dollar**

**1814 1904 MS65 NGC.** The 6 1/4 million double eagle mintage at the Philadelphia Mint in 1904 is the largest gold emission of any date or mint except for 1928, leading Walter Breen to opine: "The archetype of 'common gold.'" The yellow-gold surfaces of this Gem specimen display whispers of apricot and exquisitely defined devices. The few minute marks are within the confines of the MS65 grade designation.  
From The E.J. Mutton Collection of U.S. Gold. (#9045)

---

**1904 Double Eagle, Lustrous Gem**

**1815 1904 MS65 NGC.** It is fortunate that the large production of 1904 double eagles occurred a few decades before the great Gold Recall of 1933, else these splendid Gems might have gone the way of the 1933 double eagles and eagles. As it stands, many 1904s were exported before World War I, only to become numismatic treasures later on. This MS65 piece radiates appeal on both sides. The lustrous, mellow peach-gold surfaces appear free of all but a couple of small obverse abrasions well away from the focal points.  
From The E.J. Mutton Collection of U.S. Gold. (#9045)

---

**Memorable Gem 1904 Twenty Dollar**

**1816 1904 MS65 NGC.** A memorable Gem representative, this splendid piece offers delightful orange-gold coloration with only the most minor traces of contact. The large mintage exceeding 6.2 million coins and their overall exemplary preservation make the 1904 the quintessential gold type coin.  
From The E.J. Mutton Collection of U.S. Gold. (#9045)

---

**Exemplary 1904 Double Eagle, MS65**

**1817 1904 MS65 NGC.** As this coin is being described, the price of gold has closed above \$1,000/ounce for more than a week, a notable event that will probably further spur the buying of gold type coins. One suspects that Gem double eagle type coins such as this 1904 will be near the top of many collectors' want lists. This exemplary coin offers yellow-orange coloration with good luster and only a few scattered abrasions. (#9045)

---

### Impressive 1904 Twenty, MS66

1818 1904 MS66 PCGS. James B. Longacre created the Liberty Head design in the late 1830s for use on the quarter eagles, half eagles, and eagles. When Congress authorized a double eagle, Longacre modified his design with a new robust head of LIBERTY. The reverse design was also modified for the large 20 dollar pieces. This delightful Premium Gem is fully lustrous and sharply struck, with sensational satiny yellow luster. The surfaces are pristine with few marks on either side. Housed in a green label holder. PCGS has only certified two finer examples of this common date (9/09).  
From The E.J. Mutton Collection of U.S. Gold. (#9045)

1819 1904 MS62 Prooflike NGC. Impressive prooflike reflectivity radiates beneath the yellow-gold patina that covers both sides. A few minuscule marks blend nicely with this lustrous surfaces. The strike is nearly full. (#79045)

1820 1904-S MS64 PCGS. The 1904-S double eagle is the most available San Francisco twenty of the Type Three design. The highly lustrous surfaces of this near-Gem specimen yield peach-gold patina blushed with traces of sky-blue and lavender. Sharply struck, and revealing a few scattered marks that preclude Gem status. Gems are more difficult to locate. (#9046)

1821 1904-S MS64 NGC. CAC. This yellow-gold near-Gem possesses dynamic luster and attractive surfaces. The 1904-S will never be rare, but quality examples are treasured for their status as large diameter gold type coins. (#9046)

1822 1904-S MS61 Prooflike NGC. Fantastically reflective yellow-gold fields dominate the eye appeal. Though numerous abrasions are scattered on the obverse, the reverse is comparatively clean. (#79046)

1823 1907 MS64 NGC. A canary-gold Choice double eagle from the last year of the long-lived Liberty type. The obverse field and the reverse are well preserved, and the cheek has only inconspicuous abrasions. (#9052)

---

### Splendid Near-Gem 1907-S Double Eagle

1824 1907-S MS64 PCGS. CAC. The 1907-S is the last S-mint Liberty Head double eagle, and this piece is a splendid near-Gem worthy of representing the last of its kind. Most Mint State examples seen are heavily bagmarked, but not so this piece. There are few mentionable abrasions on either side, and the orange-gold color and boldly impressed details put this coin in a small minority. PCGS has certified only two Gems (9/09). (#9054)

---

## HIGH RELIEF DOUBLE EAGLES

---

### Sharp 1907 High Relief Twenty Wire Rim, AU Details

1825 1907 High Relief, Wire Rim—Reverse Repaired—NCS. AU Details. The 1907 High Relief double eagles are among the most desirable U.S. coins. When viewed obverse-side-up, the present coin is quite pleasing, with only a touch of rub on the highest points and a few inconsequential marks. The reverse, however, has been repaired at the left rim, and there is a shallow scratch above the eagle. Although certainly not flawless, this piece would make a relatively affordable type coin. (#9135)

---

### 1907 High Relief With Slight Friction

1826 1907 High Relief, Wire Rim—Improperly Cleaned—NCS. AU Details. The artistic beauty of the High Relief was immediately apparent to anyone who saw these pieces after they were released more than a hundred years ago. Some wanted to continue admiring them and a few ended up as pocket pieces. This appears to be such a piece. Slight friction is seen over the high points, and there are a number of tiny ticks on the wire rim. Cleaned, as one would expect, the surfaces are slightly hazy with deeper reddish patina around the devices. (#9135)

Commendable MCMVII  
High Relief, Wire Rim, MS62

**1827** 1907 High Relief, Wire Rim MS62 PCGS. While collectors must usually bid in major auctions or buy from large coin dealers to have a reasonably good chance of acquiring a Mint State High Relief, there is a second tier of High Reliefs—those with circulation wear (usually from use as a pocket piece) or impaired via the various forms of abuse that can be inflicted upon them. Those coins sometimes show up at regional coin shows—and if one watches, even there, they sell quickly. Such is the perennial demand for what is probably the most coveted single U.S. gold coin issue (and were it not for the 1909-S VDB cent, we might be tempted to leave out the word “gold”).

This strictly problem-free Mint State example offers much to commend itself. The yellow-gold surfaces are free of all but the smallest abrasions, but they are somewhat bright. The strike is sharp, as usually seen on the issue, and the reverse in particular appears high-end for the assigned grade. Traces of the wire rim, also as usual, appear only partway around each side. This is a wonderful example for a gold type set. (#9135)

Desirable 1907 High Relief Twenty  
Wire Rim, Choice Mint State

**1828** 1907 High Relief, Wire Rim MS64 NGC. CAC. The beauty and fame of the High Relief Saint-Gaudens double eagles are equally enduring, and this lustrous yellow-gold near-Gem showcases both. The only marks of any note are present in the field to the left of the eagle's beak, and the coin displays attractively. Housed in a recent NGC holder that permits examination of the edge, the “third side” of this High Relief twenty, and while the obverse and reverse show the sumptuously sculptural quality for which the issue is famous, curiously enough, parts of the edge design are indistinct, most notably the letters in PLURIBUS. (#9135)

---

## Lustrous MS65 1907 High Relief Double Eagle

**1829 1907 High Relief, Wire Rim MS65 NGC.** When President Theodore Roosevelt decided that it was time to revise the designs of our nation's coins, he selected Augustus Saint-Gaudens for the task. At the time Saint-Gaudens was considered the preeminent sculptor in the country, and there is no doubt that he was prepared for the challenge. He went about creating designs at his Cornish, New Hampshire studio on the banks of the Connecticut River along the western border of that state. Although the road to a completed design had many curves and bumps, the destination was clearly worth the trip. The striding Liberty on the obverse and the eagle in flight on the reverse create an American classic. The design is almost universally considered the most beautiful coinage design to ever appear in this country. Saint-Gaudens continued his work, creating the Indian eagle designs, but succumbed to cancer at the age of 59 before he was able to prepare additional coinage designs.

The present Gem clearly shows every element of the Saint-Gaudens design exactly as it was intended. Liberty is boldly detailed, with a sharp view of Washington, D.C. in the background. The torch, branch, lettering, and date are each in full relief. Similarly, the westward flight of the eagle is fully defined. Both sides exhibit remarkable lemon-yellow luster, with splashes of pale orange toning. The surfaces are satiny and pristine. Every aspect of this exceptional Gem approaches perfection. (#9135)

---

### Entry Level 1907 High Relief Twenty, XF Details

- 1830 1907 High Relief, Flat Rim—Edge Damage, Improperly Cleaned—NCS. XF Details. The rims have been lightly filed, and the edges show slight flattening, in addition to the worn high points. Many collectors hold a desire to own a High Relief twenty, and this piece provides just such an opportunity for the collector with a limited budget. (#9136)

### SAINT-GAUDENS DOUBLE EAGLES

- 1831 1907 Arabic Numerals MS62 NGC. Bold sun-yellow luster cements the eye appeal of this unworn first-year Saint-Gaudens twenty. Though abrasions are noted across the obverse and in the rays below the eagle on the reverse, these are not too dramatic for the grade assigned. (#9141)
- 1832 1907 Arabic Numerals MS64 NGC. A satiny finish endows this sharply struck near-Gem and a delicate blend of peach-gold, mint-green, and soft lilac adorns both sides. An impressive strike imparts strong detail to the design features, including the panes of the Capitol building and Liberty's branch hand. Minor marks deny Gem status. (#9141)
- 1833 1907 Arabic Numerals MS64 NGC. This green-gold first-year Saint-Gaudens twenty offers potent luster and nearly unabraded devices. A few subtle marks near the base of the torch are all that limit the grade. (#9141)

### Gem 1907 Saint-Gaudens Arabic Date Twenty

- 1834 1907 Arabic Numerals MS65 PCGS. A lovely Gem whose butter-gold fields and devices are awash in cartwheel shimmer. Unlike most examples of the issue, the present piece is impressively devoid of scuffs and other abrasions. The strike is full on the Capitol building and Liberty's torch fingers, although Liberty's raised knee shows slight rounding. (#9141)

---

### Bold Gem 1907 Arabic Numerals Twenty

- 1835 1907 Arabic Numerals MS65 PCGS. The 1907 Arabic numerals is the only readily obtainable issue from the debut year of the Saint-Gaudens series, but Gems are scarce compared to the enormous demand for them. This MS65 example blends a bold strike with highly lustrous khaki-gold surfaces that are evenly matched overall. A superlative type coin. (#9141)

- 1836 1908 No Motto MS66 NGC. Long Rays obverse. A gorgeous orange-gold example of this shortly coined design subtype. Nearly bereft of marks, and the strike is intricate on Liberty's face and the Capitol building. (#9142)

- 1837 1908-D No Motto MS64 PCGS. Long Rays Obverse. Apricot and green-gold tints augment this lustrous and lightly abraded near-Gem. A good strike overall, even if the leg feathers lack absolute detail. (#9143)

- 1838 1908-D No Motto MS64 PCGS. CAC. Long Rays obverse. This honey-gold Saint-Gaudens twenty provides scintillating luster and a pinpoint-sharp strike. Splendidly preserved aside from a few unobtrusive abrasions on the drapery. (#9143)

- 1839 1908-D No Motto MS64 PCGS. Scintillating luster envelops the peach-gold, lightly abraded surfaces of this near-Gem. Sharply defined, evidenced by virtually complete delineation on the panes of the Capitol building and Liberty's fingers. A graze is visible in the upper reverse field. (#9143)

- 1840 1908-D No Motto MS64 PCGS. Pale yellow patina covers both sides of this appealing Choice Mint State specimen, with a few faint hints of purple. Soft luster is unaffected by a few nearly imperceptible abrasions. (#9143)

---

### Popular 1908-D No Motto Double Eagle, MS65

- 1841 1908-D No Motto MS65 PCGS. Copious luster emanates from the surfaces of this orange-gold Gem, which has eye appeal in spades in addition to its wide popularity as a type coin to represent the No Motto issues. While near-Gems are seen with regularity, Gems of this issue are elusive. PCGS has certified only nine examples finer than the present coin (9/09). (#9143)

- 1842 1908-D Motto MS64 NGC. CAC. Light yellow-gold color with elements of tan intermixed. Excellent strike on a number of small details, such as the Capitol on the obverse. NGC has graded 88 numerically finer pieces (8/09). (#9148)

- 1843 1908-D Motto MS64 PCGS. Honey-gold lustrous surfaces exhibit well struck design features. Tiny flecks that dot the reverse are not all that disturbing. (#9148)

---

### Low Mintage 1908-S Twenty, AU58

**1844 1908-S AU58 NGC.** An important rarity in the Saint-Gaudens series with a mintage of only 22,000 coins. Only the 1907 High Relief had a lower mintage. While Mint State examples are available from time to time, circulated grades are more plentiful. This pleasing near-Mint piece has satiny light yellow luster, high point wear, and relatively mark-free surfaces, providing an excellent combination of quality and price. (#9149)

---

### Elusive Select 1909 Double Eagle

**1845 1909 MS63 PCGS.** Lime-green borders encompass peach-toned centers. Lustrous and alertly struck with no more than the usual number of faint field abrasions. The low mintage 1909 is divided into two issues of roughly equal rarity, the normal date and the 1909/8. The latter trades for a higher price, perhaps due to additional demand from overdate specialists. (#9150)

**1846 1909/8 AU55 ANACS.** FS-301. The 1909/8 double eagle is immensely popular because of its pronounced overdate, which is easily seen without magnification. Bright yellow patina coats the resplendent surfaces of this Choice AU example. Several minor abrasions define the grade. (#9151)

**1847 1909/8 MS61 PCGS.** FS-301. The bright yellow-gold surfaces of this popular overdate representative yield decisively struck design features. Distributed small marks do not significantly detract. Indeed, this is a nice piece for the designated grade. (#9151)

---

### Appealing MS62 1909/8 Double Eagle

**1848 1909/8 MS62 NGC, FS-301.** Judging from the current population data, it appears that the 1909 double eagles were about evenly split between the nonoverdate and overdate varieties, even though we also believe that just one die pair was used for all of the overdates. The jury is still out on this point, although we have noticed most examples have the same small die crack on the reverse, running obliquely through the lower part of (G)O(D). The moderate ticks seen on both sides are consistent with the MS62 grade, but much appeal radiates along with the luster off of the orange-gold surfaces. (#9151)

---

### Notable 1909/8 Twenty Dollar, MS63

**1849 1909/8 MS63 PCGS.** FS-301. This coin is one of several notable 20th century overdate varieties, coins that were created mostly during World War I or World War II. The 1909/8 is the exception, in that it is the largest denomination and a nonwartime issue. This peach-gold specimen has a few wispy abrasions on the obverse high points that account for the grade, but generous luster and high eye appeal are the order of the day. (#9151)

---

## Popular 1909/8 Overdate Twenty, MS65

**1850 1909/8 MS65 PCGS.** FS-301. The 1909/8 overdate double eagle is a famous and popular variety, one of few known 20th century overdates. Like all 20th century overdates, this is actually a hubbing error rather than the selection of an incorrect punch. The die received an impression from a 1908 hub, and then received a second impression from a 1908 hub. In addition to its beauty that results from frosty lemon-yellow luster, sharp design details, and pristine surfaces, it also ranks near the top of the census for the variety. Population: 15 in 65, 3 finer (9/09). (#9151)

### Glowing Near-Gem 1909-D Double Eagle Low-Mintage With Motto Issue

**1851 1909-D MS64 PCGS.** This issue is somewhat overshadowed by the 1908-S, but it bears remembering that the 1909-D's mintage is itself a stingy 52,500 coins, making it the third-lowest of the With Motto issues, behind the '08-S and '13-S. This near-Gem example boasts warm, glowing luster over orange-gold surfaces that are just a few wispy contact marks away from a Gem grade. An appealing and high-end example. PCGS has certified only 20 pieces finer (9/09). (#9152)

**1852 1909-S MS64 PCGS.** Shimmering satiny luster radiates from the light rose-yellow surfaces. A few wispy grazes are barely noticeable. Garrett and Guth (2006) note that the 1909-S is surprisingly scarce in grades above MS64. (#9153)

**1853 1910 MS64 PCGS.** This exquisite butter-gold near-Gem provides potent luster and is refreshingly devoid of marks. Nicely struck and worthy of specialist attention. An excellent value relative to the next higher grade. (#9154)

**1854 1910-D MS65 PCGS.** A peach-gold Gem that boasts an exemplary strike and impressive eye appeal. Those in search of marks will require patience and a powerful loupe. For the 1910-D, the MS65 grade provides a good combination of value and scarcity, since MS66 examples cost more than twice as much. (#9155)

**1855 1910-D MS65 PCGS.** A gorgeous example of the 1910-D double eagle, a date that is relatively available at the MS65 level but quite scarce any finer. This piece has satiny yellow-gold luster with sharp design features and just a few grade-consistent marks. Although some type collectors may gravitate to the most common dates of the 1920s, astute buyers prefer pieces that are substantially scarcer for only a modest premium, such as this issue. (#9155)

**1856 1910-D MS65 PCGS.** This Gem twenty has traces of light pink toning over frosty and lustrous yellow surfaces. The 1910-D is considered a common date, although its mintage was only 429,000 coins. (#9155)

**1857 1910-D MS65 PCGS.** Traces of light salmon reside over the lustrous yellow-gold surfaces of this lovely Gem 1910-D Saint-Gaudens double eagle. Hints of pale green enhance the borders. (#9155)

**1858 1910-S MS64 PCGS.** The honey-gold lustrous surfaces of this near-Gem exhibit sharply struck devices, including the panes of the Capitol building, Liberty's facial features and fingers, and the eagle's plumage. Light surface and rim marks preclude Gem classification. Housed in a green label holder. (#9156)

**1859 1910-S MS64 PCGS.** An apricot-gold Choice Saint-Gaudens twenty with scintillating luster and only minimal marks. The panes of the Capitol building blend, but the strike is otherwise bold. (#9156)

**1860 1910-S MS64 NGC.** Luster emanates from the yellow-gold surfaces of this near-Gem and a well directed strike leaves strong detail on the design features. A few light marks deny Gem status. This issue becomes difficult to locate any finer. (#9156)

**1861 1911 MS63 PCGS.** An excellent example with frosty yellow-gold luster and pale pinkish highlights. The luster is average for the series, and far above average for the date. Although the surfaces are lightly abraded, this is a pleasing example of the issue. (#9157)

**1862 1911 MS63 PCGS.** A pleasing green-gold example of the scarce Philadelphia Mint 1911 twenty. Less than 200,000 were struck and many entered circulation at the time. Luster is good for the date, but below average for the series. (#9157)

---

### Excellent MS64 1911 Twenty Dollar

1863 1911 MS64 NGC. CAC. The 1911 double eagle is occasionally found in MS64, but Gems are elusive. This near-Gem displays yellow-gold surfaces with excellent luster and good overall eye appeal. Some minor ticks are mostly scattered, and some smoke-gray accents appear on the high points. NGC has certified only 57 examples finer (9/09). (#9157)

1864 1911-D MS65 PCGS. Collectors assembling date sets will likely seek a 1911-D or 1911-S twenty to represent the year. This Gem has traces of iridescence over light yellow surfaces and frosty gold luster. (#9158)

1865 1911-D MS66 NGC. CAC. The normal mintmark version of this popular prewar Denver issue. Specialists who have grown jaded from examinations of bagmarked 1911-D twenties will delight at the present Premium Gem, which is remarkably free from abrasions. NGC has certified only 31 pieces finer (9/09). (#9158)

---

### Popular Gem 1911-D/D Double Eagle

1866 1911-D/D MS65 NGC. FS-501. The mintmark is sharply repunched east. Scintillating luster and a powerful strike assert the quality of this pre-war Saint-Gaudens Gem. The fields have a few delicate luster grazes, but the absence of noticeable marks confirms the high numerical grade. (#145010)

---

### Scintillating Gem 1911-D/D Twenty Dollar

1867 1911-D/D MS65 NGC. FS-501. The mintmark is blatantly repunched east, as seen on perhaps half of all high grade 1911-D double eagles. Most such pieces presumably came from the same European bank hoard. The present Gem is well struck and lustrous with exemplary surfaces save for a single tick on the eagle's breast. A speck of debris is seen above the E in STATES. (#145010)

---

### Gem 1911-D/D Double Eagle

1868 1911-D/D MS65 PCGS. CAC. FS-501. Bold yellow-orange luster is the prime feature of this repunched mintmark Gem's eye appeal. The strike is strong, and save for a single tiny abrasion at Liberty's waist, the surfaces are refreshingly mark-free. The overmintmark is clear under magnification, as always for the variety. Population: 39 in 65, 9 finer (9/09). (#145010)

---

### Condition Census 1911-D/D Twenty, FS-501, MS66 One of the Finest Certified Varieties at PCGS

1869 1911-D/D MS66 PCGS. CAC. FS-501. Repunched Mintmark. For a series of which so many millions of coins were originally produced, there are few widely collected error or variety coins in the Saint-Gaudens double eagle series. This is likely a function of a couple of reasons: First, most of the survivors were melted during the Gold Recall of 1933; second, the series is so difficult even for nonvariety coins that the few recognized varieties take on diminished importance. Nonetheless, the 1909/8 overdate and the 1911-D/D are the most widely known, of which only the former has so far attained a *Guide Book* listing. Both are listed in *Cherrypickers'*, along with four other Saint-Gaudens varieties.

This 1911-D/D in MS66 is one of the top nine examples certified at PCGS, and there are none finer. It is also certified as 1911-D/D RPM FS-501 using PCGS' new six-digit variety number (145010), ready to pop into your Registry Set if you so choose. This is a simply stunning Saint-Gaudens twenty, regardless of the variety. Flashy luster radiates from the reddish-orange surfaces, and the repunching to the east on the mintmark is as bold as the strike is throughout. Abrasions of any size are few and far between. (#145010)

---

### Blazing 1911-D/D Double Eagle, FS-501, MS66

**1870 1911-D/D MS66 NGC.** FS-501. This 1911-D/D is certified as such using NGC's Variety Plus attribution. The 1911-D and 1911-D/D issues use a smaller mintmark than the 1910-D, which was the year the Mint (Philadelphia, not Denver, which made the mintmark punches and dies for the branch mints) last used the Wide D variant. On the 1911-D/D, the broad repunching east of the subsequent and final punch makes the mintmark appear much broader than on the regular issue. This is among the handful of finest certified at either service, with blazing orange-gold luster and premium eye appeal. Census (for FS-501): 22 in 66, 2 finer (9/09). (#145010)

### Splendid MS66 1911-D/D Double Eagle

**1871 1911-D/D MS66 PCGS.** FS-501. Although uncertified as such, this is clearly a 1911-D/D, with the second mintmark standing out boldly east of the final punch. This splendid Premium Gem boasts wonderful luster radiating from khaki-gold surfaces that show the typical satiny, somewhat mattelike finish of double eagles of this era. The strike is nearly full, and mentionable abrasions are absent from either side. PCGS has certified only nine examples of the 1911-D/D in MS66 (9/09). (#145010)

**1872 1911-S MS64 NGC.** The Capitol building is fully struck on this lustrous near-Gem double eagle. The obverse field is beautifully unabraded. The eagle and sun show subtle marks, and the reverse field has traces of translucent residue. (#9159)

**1873 1911-S MS64 PCGS.** We present here a radiant peach-gold near-Gem with well struck design elements. Some light surface and rim marks preclude Gem status. (#9159)

**1874 1911-S MS64 PCGS.** A lustrous near-Gem with splendid apricot-gold patina. Light purple accents visit the margins. A loupe locates only a few insignificant marks, and the details are sharply defined. (#9159)

**1875 1911-S MS64 PCGS.** A lovely example of the plentiful 1911-S twenty, an issue that becomes rare in Gem or finer grades. This frosty representative has brilliant yellow-gold luster with trivial grade-consistent marks. (#9159)

### Attractive Gem 1911-S Twenty Dollar

**1876 1911-S MS65 PCGS.** A crisply impressed representative that provides vibrant cartwheel luster and a minimally abraded appearance. One small nick on the obverse rim at 2:30. The 1911-S is readily available in MS62 through MS64, but is uncollectible above MS66. 1911 was the final year with 46 obverse stars, since New Mexico and Arizona joined the Union in 1912. (#9159)

### Satiny 1911-S Double Eagle, MS65

**1877 1911-S MS65 NGC.** Gems of this issue usually show a mattelike, satiny texture, and this charming specimen is no exception. The surfaces are aglow with facets like tiny fires, with exemplary reddish-gold coloration and the bold impression usually seen on this date. NGC has certified only 34 pieces finer (9/09). This would make a marvelous addition to a fine gold type set. (#9159)

**1878 1912 MS63 NGC.** Lustrous surfaces give off a greenish-gold hue and exhibit relatively strong design elements. A few small marks include a rim bruise at 10:00 on the obverse. (#9160)

### Sharply Struck, Radiant 1912 Twenty, MS64

**1879 1912 MS64 PCGS.** How does the 1912 double eagle differ, besides the date, from the 1911? Two tiny stars were added near the oak leaves, symbolizing the addition of New Mexico and Arizona to the Union. The current MS64 piece is about the top end for most Mint State pieces, as PCGS has certified only 32 coins finer (9/09). The yellow-gold surfaces boast plenty of eye appeal, a combination of radiant luster and surfaces free of any major distractions. The strike is marvelously sharp on both sides. A tiny dark toning spot appears inside the O of OF on the reverse. (#9160)

**1880** 1913-D MS64 NGC. Light surface marks on each side are consistent with the grade. This attractive and lustrous example has brilliant pinkish-gold surfaces and strong design motifs. (#9162)

#### Radiant Gem 1913-D Twenty Dollar

**1881** 1913-D MS65 PCGS. The 1913-D double eagle, when found in Gem condition as here, is a well-produced and attractive issue. The present example is certainly no exception, with radiant, frosty mattelike luster over orange-gold surfaces. Abrasions are minor, and the strike is boldly executed. PCGS has certified only five coins finer (9/09). (#9162)

**1882** 1913-S AU58 NGC. The 1913-S is a low mintage issue with just 34,000 pieces struck. Scintillating luster complements the well struck design elements. Several minuscule abrasions do not distract. (#9163)

#### Low Mintage 1913-S Twenty, MS62

**1883** 1913-S MS62 PCGS. Its meager mintage of 34,000 pieces has long held the attention of speculators, and the 1913-S is indeed a rarity at the Gem level. MS62 examples are more available, but they are also affordable given the scarcity of the issue. This lustrous canary-gold piece is nicely struck and has the expected quotient of small to moderate marks. (#9163)

#### Scarce 1913-S Saint-Gaudens Twenty, MS63

**1884** 1913-S MS63 PCGS. A straw-gold representative of this widely pursued issue. The Capitol building lacks a full impression, but the overall strike is good. Minor marks are scattered and correspond to the grade. Among Arabic Date issues, only the 1908-S has a lower mintage than the 1913-S. (#9163)

#### Attractive 1914 Twenty, MS63

**1885** 1914 MS63 PCGS. The total production of the 1914 double eagle was a meager 95,250 coins but, unlike some later issues, many appear to have survived in Mint State. PCGS has graded several hundred coins in the range from MS63 to MS66. This Select specimen displays a few scattered ticks on the obverse that account for the grade, while the reverse is comparatively clean. Orange-gold surfaces with thick mint luster complete this attractive offering. (#9164)

#### Bold Near-Gem 1914 Double Eagle

**1886** 1914 MS64 PCGS. This orange-gold near-Gem offers eye appeal to spare, a combination of its brilliant luster, a paucity of relevant marks, and an extremely bold strike save for minor bluntness on Liberty's face. This is a low-mintage issue that is seldom seen in MS65, where PCGS has certified only 36 examples (9/09). (#9164)

**1887** 1914-D MS64 NGC. Lustrous yellow-gold surfaces blushed with apricot greet the observer of this D-mint twenty dollar. Sharp detail is apparent on the Capitol building, Liberty's branch hand, and the eagle's plumage. Scattered obverse marks prevent the attainment of Gem classification. (#9165)

**1888** 1914-D MS65 NGC. A blend of peach and yellow-gold coloration adorns the radiantly lustrous surfaces of this attractive Gem. Both sides are well struck and minimally abraded. (#9165)

**1889** 1914-D MS65 PCGS. The satiny surfaces of this brilliant Gem exhibit pleasing orange-gold luster with a few scattered marks that are expected for the grade. PCGS has only certified 56 finer examples (9/09). (#9165)

**1890** 1914-S MS65 PCGS. Orange and lime-green compete for territory across this lustrous Gem. The strike is precise aside from slight blending on the tops of LIBERTY. Devoid of relevant marks, and a good value relative to both lower and higher grades. (#9166)

**1891** 1914-S MS65 PCGS. Flashy cartwheel luster shines throughout the yellow-gold surfaces of this carefully preserved representative. There are only a couple of tiny marks. The strike is nearly full, and the eye appeal is excellent. (#9166)

**1892** 1914-S MS65 NGC. Perhaps the most plentiful issue of the early series (1907-1916), this Gem 1914-S has soft, frosty yellow-gold luster with traces of orange color. Minimal abrasions on each side are of little consequence. (#9166)

**1893** 1914-S MS65 NGC. A shimmering yellow-gold Gem that boasts an exacting strike and minimally abraded surfaces. Similarly priced with the considerably more common issues from the middle 1920. (#9166)

**1894** 1915 MS63 PCGS. A scarce and desirable early Philadelphia Mint issue, the 1915 had a mintage of only 152,000 coins. It is scarce in higher grades, and this lustrous green-gold representative provides an excellent combination of grade and price. (#9167)

**1895** 1915-S MS65 PCGS. This stunning Gem boasts magnificent cartwheel luster across the bright yellow-gold surfaces. The strike is razor-sharp. Several minuscule marks do not affect the impressive eye appeal. (#9168)

**1896** 1915-S MS65 NGC. Traces of salmon-link toning enhance the lustrous yellow-gold surfaces of this pleasing Gem. The few abrasions on each side are consistent with the grade of this appealing piece. (#9168)

**1897** 1915-S MS65 PCGS. A gorgeous and sharply defined Gem, this brilliant orange-gold example has excellent surfaces and remarkable eye appeal. A lovely candidate for a date or type collection. (#9168)

**1898** 1915-S MS65 PCGS. Fully brilliant with rich yellow-gold luster, this Gem 1915-S is an excellent candidate for collectors who seek a single example from every year of production. Such date sets provide a challenge, with a smaller cash outlay than a complete set requires. (#9168)

**1899** 1920 MS63 PCGS. After a four-year gap due to World War I, production of double eagles resumed in 1920 in Philadelphia and San Francisco. The 1920's mintage of 228,250 pieces proved to be the lowest of any issue from the 1920s, with the exception of the 1927-D. This is a lustrous canary-gold example with moderate marks concealed on Liberty's drapery. (#9170)

**1900** 1920 MS63 PCGS. The 1920 is overshadowed by the 1920-S and 1921 double eagles, perhaps the reason that this issue is underrated. Just 228,250 were struck, and lower grade Mint State examples are plentiful, but MS63 or finer pieces remain elusive. This one has lovely orange-gold luster with frosty surfaces and darker high point patina. (#9170)

#### Splendid 1920 Double Eagle, MS64 Impossibly Rare in Gem Grade

**1901** 1920 MS64 PCGS. One single coin. That is the number of Gem examples of the 1920 double eagle that PCGS has certified finer than the present piece, one of several hundred MS64 coins at that service. [NGC has certified seven coins in MS65 (9/09).] The 1920 would garner no special attention were it not for the skewed population data, which lead Garrett and Guth to call the 1920 "probably the most underrated gem in the entire series." This splendid MS64 coin offers glowing luster throughout the orange-gold surfaces on both sides. A random smattering of small marks is characteristic of the grade, although we note a somewhat blunt strike on Liberty's face and a small die crack through LIBERT. The reverse is choice for the grade. (#9170)

#### Choice 1920 Saint-Gaudens Twenty

**1902** 1920 MS64 NGC. This better date double eagle has vibrant luster and a good strike. No marks are worthy of comment, and sufficiently few are present to ensure high eye appeal. Nearly unobtainable any finer, since NGC and PCGS combined have certified a scant eight pieces above the MS64 level. (#9170)

**1903** 1922 MS64 PCGS. Strong yellow-gold luster with blushes of deeper orange prominent in parts of the fields. This sharp Choice coin shows a single vertical abrasion on the eagle's wing that precludes Gem status. Housed in a green label holder. (#9173)

#### Exquisite Gem 1922 Twenty Dollar

**1904** 1922 MS65 PCGS. A gorgeous orange-tinged Gem with exactly struck devices and splendidly smooth fields. Only unimportant contact on Liberty's left (facing) thigh prevents an even finer grade. The combined forces of PCGS and NGC have certified just 15 pieces finer, all as MS66 (9/09). (#9173)

#### Outstanding 1922 Double Eagle, MS65

**1905** 1922 MS65 PCGS. Although easily located in nearly all grades, the 1922 double eagle becomes rare above MS65. NGC and PCGS combined have certified only 15 examples finer than the present coin (8/09). This attractive Gem boasts scintillating satiny luster across the sun-gold surfaces. The strike is razor-sharp, and there are no marks of any significance. (#9173)

---

### Impressive 1922 Double Eagle, MS65

**1906 1922 MS65 PCGS.** The 1922 is a frequent choice for type collections, and this impressive Gem would make an excellent representative. Coruscating luster shimmers beneath the yellow-gold patina that drapes both sides. Pleasing lilac accents add to the appeal. The top of the obverse has a number of striations and the strike is a trifle soft in that area. A few nearly microscopic spots do not distract. (#9173)

---

### Bold Gem 1922 Double Eagle

**1907 1922 MS65 PCGS.** Even for this Saint-Gaudens issue that is considered a relatively available date, the MS65 level is basically the top of the line; PCGS has certified only seven coins finer, and they are likely to be in strong hands today. (We note that of the current top six PCGS St. Gaudens \$20 Gold, Circulation Strikes [1907-1932] Registry Sets, only one of them, the top-rated Dr. & Mrs. Steven Duckor Set #2, contains an MS66 example of this issue.) Deep, mellow orange-gold patina and near-pristine surfaces are the hallmarks of this splendid Gem. The strike is uniformly bold save at the extreme lower obverse rim, and singular abrasions are absent. (#9173)

---

**1908 1922-S MS61 PCGS.** A much better date despite a mintage of more than 2.65 million pieces, as most of the production never left Treasury vaults and was eventually melted. The present coin has full mint luster, an abraded right obverse field, and a couple of moderate obverse bagmarks. (#9174)

---

### Scarce Select 1922-S Twenty

**1909 1922-S MS63 NGC.** A green-gold representative of this high mintage but much melted issue. This example is interesting for its partial wire edge, present on the obverse between 9 and 12 o'clock and on the reverse near 8 o'clock. Lustrous khaki-gold fields and devices are nicely struck and only lightly abraded. (#9174)

---

### Appealing 1922-S Twenty, MS64

**1910 1922-S MS64 PCGS.** More than 2.5 million 1922-S double eagles were minted, but most were melted just over a decade later, as massive melts of gold coins took place in the mid 1930s. Compare mintages and populations of the 1922 and 1922-S issues to understand the effect of the 1930s gold melts. In all grades, PCGS has certified just over 1,000 submissions of 1922-S twenties, while the same service has certified more than 30,000 1922 double eagles, an issue with half the mintage.

This attractive piece has frosty butter-yellow surfaces with few abrasions on either side. The strike is bold and the eye appeal is excellent. PCGS has only certified 12 finer examples of this issue (9/09). (#9174)

---

### Conditionally Rare 1923 Double Eagle, MS65

**1911 1923 MS65 PCGS.** There are several P-mint issues from the 1920s that are often lumped together to represent the glories of the Saint-Gaudens design for type purposes. They usually include the 1922 through 1928 dates, plus the 1923-D. But compare the number of Gems certified for each issue at PCGS as of (9/09):

- 1922. 1,121
- 1923. 331.
- 1923-D. 2,271.
- 1924. 34,410
- 1925. 5,160.
- 1926. 3,453
- 1927. 21,605.
- 1928. 7,179.

The 1923 is often included in this list, but it is not a similar issue in Gem condition. While there are many 1923s certified, most are in MS62 or MS63 condition. Gems are quite elusive, especially in comparison to the strong demand. This example shows deep, mellow apricot-gold color with splendid luster, although minor strike softness shows at the lower obverse. PCGS has certified only three Premium Gems finer. (#9175)

### Dazzling Gem 1923 Double Eagle

**1912 1923 MS65 PCGS.** The Gem level is about as good as it gets for this P-mint issue, where PCGS has certified only three examples in finer grades (9/09). The dazzling luster and overall broad appeal are complemented by attractive reddish-orange coloration and a paucity of relevant marks. Simply a splendid coin for a date, type, or Registry set. (#9175)

**1913 1923-D MS65 PCGS.** Scintillating luster radiates beneath the sun-gold patina that envelops both sides. This sharply struck Gem has no distracting marks and would be an excellent addition to a type collection. (#9176)

**1914 1923-D MS66 NGC.** Simply outstanding luster with incredible surface quality, as demanded of the Premium Gem designation. Color is a mix of striking apricot-orange and bright light yellow. Crisply detailed with an almost sculptural quality to the folds of Liberty's gown. NGC has graded 39 finer pieces (8/09). (#9176)

**1915 1923-D MS66 NGC.** Generous shades of peach and lime-green enrich this lustrous and well struck Premium Gem. The reverse is essentially pristine, and the obverse has only minor contact. The 1923-D is the only readily collectible branch mint postwar issue, and was apparently distributed in a manner similar to the 1922 through 1928 Philadelphia dates. (#9176)

**1916 1923-D MS66 NGC.** Ebullient luster endows this Premium Gem complemented with pretty greenish-gold patina and well struck devices. Both sides are devoid of mentionable marks. (#9176)

**1917 1923-D MS66 PCGS. CAC.** While the '23-D is commonplace in Uncirculated grades, the present piece is noteworthy for its remarkably unabraded obverse. The reverse is also smooth save for a concealed thin mark on the eagle's breast. (#9176)

**1918 1923-D MS66 NGC.** A rather common issue, the 1923-D becomes conditionally rare in higher Mint State grades. NGC has only certified 39 finer examples of this issue (9/09). Extraordinary surfaces have splendid green-gold peripheries around salmon centers. (#9176)

**1919 1924 MS66 NGC. CAC.** Although there is no shortage of 1924 twenties on the bourse floor, most are bagmarked. This impressive representative provides an exception, since thorough inspection with a loupe is required to locate even inconsequential contact. (#9177)

**1920 1924 MS66 PCGS.** An amazing Saint-Gaudens double eagle, this green label PCGS holdered example has excellent surfaces with light yellow color. Both sides are highly lustrous and boldly defined. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1921 1924 MS66 PCGS.** A wonderful satin Premium Gem in a green label holder, this Saint-Gaudens double eagle with its deep orange-gold luster is one of the finest we have seen at the MS66 grade level. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1922 1924 MS66 PCGS.** This green label PCGS Premium Gem has remarkable egg yolk-yellow surfaces with satin luster. Pinpoint design definition is the result of an exacting strike. Hints of pale salmon are evident on the reverse. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1923 1924 MS66 PCGS.** Housed in a green label PCGS holder, this lovely Premium Gem displays soft, frosty luster with light yellow surfaces and traces of pink highlights. Sharply struck with nearly all design motifs brought up. Only a little over three percent of all PCGS certified 1924 double eagles grade MS66 or finer. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1924 1924 MS66 PCGS.** An extraordinary example of the 1924 double eagle coinage, this Premium Gem has frosty lemon-yellow luster with pristine surfaces. It is housed in a green label PCGS holder. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1925 1924 MS66 PCGS.** A green label PCGS holder houses this Premium Gem 1924 twenty that exhibits deep yellow-gold luster with frosty mint brilliance. The surfaces are exceptional, even for the lofty MS66 grade. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1926 1924 MS66 PCGS.** Deep yellow-gold luster is evident on both sides of this wonderful Premium Gem in its green label holder. The strike is bold and the surfaces are limited to only the most inconsequential marks. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1927 1924 MS66 PCGS.** This amazing double eagle displays satiny luster with reflective obverse fields and a soft frosty reverse surface. Both sides show lovely rich orange-gold luster that creates excellent aesthetics. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1928 1924 MS66 PCGS.** Full frosty canary-yellow surfaces accompany strong design motifs and excellent eye appeal. These 1924 twenties, housed in green label PCGS holders, are great coins for the casual gold aficionado. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1929** 1924 MS66 NGC. This boldly detailed Premium Gem has satiny, nearlyreflectivesurfaceswithbrilliantyellowluster.Itisharshlydefined and possesses excellent eye appeal. A delightful piece for the date or type collector, or for the 85 year old numismatist born in 1924. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1930** 1924 MS66 NGC. Nearly one-third of all NGC and PCGS certified Saint-Gaudens double eagles are dated 1924, making that date the perfect coin for a type collection. This scintillating piece has frosty and brilliant yellow luster with considerable bright orange toning. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

**1931** 1924 MS66 NGC. This satiny Premium Gem exhibits butter-yellow surfaces with a full quota of eye appeal. Both sides have bold design motifs and pleasing surfaces. Only a few trivial grade-consistent marks are evident. *From The E.J. Mutton Collection of U.S. Gold.* (#9177)

#### Seldom-Seen 1924-D Double Eagle, MS63

**1932** 1924-D MS63 PCGS. Garrett and Guth point out that the D-mint double eagles made in 1924 "sat around" in banks except for a few thousand shipped overseas, so those that stayed in the United States were available for melting in that great extinction event, the Gold Recall of 1933. Most of the survivors, for the most part in the lower Mint State levels, appear to have been repatriated by now. This piece has excellent eye appeal for the grade, a function of generous luster and mellow orange-gold coloration. Moderate high-point abrasions are consistent with the Select grade. (#9178)

#### Flashy MS63 1924-D Double Eagle

**1933** 1924-D MS63 PCGS. The high mintage figure exceeding 3 million coins bears no relevance to the number of survivors today; it is likely that most were melted in the 1930s, and the 1924-D is a scarce issue in Mint State. This MS63 coin offers flashy luster over orange-gold surfaces, with a few minor abrasions consistent with the grade. The strike is somewhat blunt on Liberty's head and at the rim nearby. (#9178)

**1934** 1925 MS65 NGC. A common date, the 1925 has a lower population than the 1924 or 1928 double eagles, but the number certified still exceeds 10,000 coins in Gem or finer grades. That makes this issue an ideal type coin. Both sides are brilliant with frosty luster and sharp details..(#9180)

**1935** 1925 MS66 PCGS. Housed in a green label PCGS holder, this Premium Gem is a splendid piece with excellent eye appeal created through a combination of satiny yellow and orange-gold luster with a bold strike. PCGS has only certified five finer pieces (9/09). *From The E.J. Mutton Collection of U.S. Gold.* (#9180)

#### Desirable MS64 1925-D Twenty

**1936** 1925-D MS64 PCGS. CAC. Garrett and Guth note for this issue: "When found, this date normally exhibits frosty luster and a bold strike." Both are on full display with this noteworthy near-Gem, which shows pale peach overtones against light wheat-gold and deeper sun-yellow shadings. A handful of small abrasions that dot the obverse preclude a finer designation but have minimal impact on the eye appeal. MS64 is the highest grade for which the always-elusive 1925-D has any sort of significant availability; beyond that level lies condition rarity. PCGS has graded only six such coins (9/09). (#9181)

---

## Semikey 1925-S Twenty, MS66

**1937** 1925-S MS66 NGC.

The 1925-S Saint-Gaudens double eagle is one of the prime condition rarities in the series. NGC and PCGS have combined to grade just two pieces in MS66 and three in MS67, according to current population data. Revising David Akers' reference on 20th century gold coins, Jeff Ambio writes: "The 1925-S is the only mintmarked Double Eagle from the 1920s that is easier to obtain in circulated grades than Mint State." The rarity of this issue is especially fascinating as the 1925-S has the third highest mintage of any Saint-Gaudens double eagle. Dave Bowers also comments on this issue in his *Guide Book* of double eagles: "The 1925-S is a sleeper. The large mintage belies the rarity of this coin. The population of 1925-S double eagles is about evenly divided between high grade worn pieces and lower level Mint State examples."

The two finest survivors are the Norweb specimen that was later part of the Dr. Thaine Price collection, a coin that PCGS has graded MS68, and the Phillip H. Morse specimen that PCGS graded MS67. NGC has also certified a higher grade MS67 example. The present specimen, NGC certified MS66, ranks next in line, and is tied for fourth finest known, to the best of our knowledge. This Premium Gem has a bold strike with excellent definition on both sides, although there is slight weakness at the lower obverse, as seen on many survivors. The rims are somewhat beveled as usual for S-Mint twenties from the decade. The surfaces have brilliant yellow luster with a satin texture. Faint traces of pinkish-orange toning are visible, with green-gold peripheries. The surfaces are nearly perfect and the overall eye appeal of this remarkable double eagle is exceptional. (#9182)

- 1938** 1926 MS66 PCGS. This appealing Premium Gem is housed in an older green label PCGS holder. The surfaces are fully lustrous with brilliant yellow-gold surfaces and faint pink highlights. The design elements are bold. PCGS has only certified three finer pieces (9/09).

From The E.J. Mutton Collection of U.S. Gold. (#9183)

#### Near-Gem 1926-S Double Eagle

- 1939** 1926-S MS64 PCGS. The 1926-S double eagle is a former great rarity that is now merely on the “elusive in high grade” list, along with numerous other issues in the series. Most certified survivors top out at about MS63, however, making near-Gems in constant demand. Soft, frosted mint luster radiates from orange-gold and lilac surfaces on this coin, which shows just a few scattered, grade-consistent abrasions along with plenty of eye appeal. PCGS has certified only 29 examples finer (9/09). (#9185)

#### Exemplary 1926-S Double Eagle, MS64

- 1940** 1926-S MS64 PCGS. The 1926-S is one of several entries in the Saint-Gaudens double eagle series that can be considered “less rare than formerly,” since overseas repatriations have increased the available supply. Attractive near-Gem examples such as the present coin are still much in demand, however. Ebullient luster shines forth from the orange-gold surfaces, and there are few significant marks. A nice coin for the grade. (#9185)

#### Impressive 1927 Twenty, MS66

- 1941** 1927 MS66 PCGS. A stunning Premium Gem, this double eagle is housed in an older green-label PCGS holder. Both sides have satiny luster with faint reflectivity in the fields. Both sides have gorgeous orange-gold surfaces with subtle violet and powder blue highlights. The strike is bold. Every aspect of this impressive twenty suggests one of the finest existing pieces. PCGS has only certified 12 finer coins (9/09).

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1942** 1927 MS66 PCGS. A gorgeous Premium Gem housed in a green label PCGS holder, this piece is sharply defined with outstanding eye appeal. The surfaces are brilliant and frosty with intense luster.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1943** 1927 MS66 PCGS. This delightful piece will please any date or type collector with its impressive yellow-gold luster and bold design elements. Housed in an older green-label holder.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1944** 1927 MS66 PCGS. This older green label PCGS certified piece has outstanding eye appeal created through the combination of yellow, orange, and iridescent toning on both sides. It is boldly struck with excellent design details on both sides.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1945** 1927 MS66 PCGS. A common issue, the 1927 is an ideal candidate for the date or type collector. This example, in an older green label PCGS holder, presents exceptional aesthetic appeal. The surfaces are fully brilliant and highly lustrous with excellent orange-gold color.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1946** 1927 MS66 NGC. The 1927 Saint is a common date that is available in nearly any desired grade of Mint State, up to the MS66 grade of the present piece. Finer pieces are quite rare, with only 48 certified at NGC. This beauty has frosty yellow luster with traces of pink patina at the centers.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1947** 1927 MS66 NGC. Fully brilliant and highly lustrous, this Premium Gem 1927 double eagle has unimpaired bright yellow surfaces and bold design details. It is an excellent candidate for our date and type collecting friends.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

- 1948** 1927 MS66 NGC. A beautiful lemon-gold Premium Gem that has far fewer than the usual number of bagmarks associated with this plentiful double eagle issue. Each side has one small rose alloy spot on the lower left quadrant. Certified in a former generation holder.

From The E.J. Mutton Collection of U.S. Gold. (#9186)

---

## High-End 1927-S Twenty, MS63 With Unusual Die Chip in Date

**1949 1927-S MS63 NGC. CAC.** This unusual 1927-S double eagle has a prominent raised die chip or die line from the 9 to the 2 in the date. The position and shape resemble the base of an extra misplaced 2, although such a misplaced digit defies logic considering the use of date logotypes at the time. A review of our Permanent Auction Archives shows that just four out of the last 50 examples offered have this same feature.

In the late 1920s, the branch mints at Denver and San Francisco had a significant production of double eagles. However, few of those coins were actually released, and all are rare today. For example, the San Francisco Mint struck more than 3 million twenties in 1927, but less than 300 of those coins survive today. Most of those survivors grade in the range of AU58 to MS64, with a few higher- and lower-grade pieces extant. NGC and PCGS have certified a total of 261 submissions, with an average grade of 60.7.

In the past 16 years we have offered 1927-S double eagles 74 times, an average of just four per year in all grades. We have only sold 15 pieces in grades finer than this coin, or less than one per year. During that same 16-year period, we have sold over 1,100 1927 Philadelphia Mint twenties in MS64 or finer grades, or more than 68 per year. When considering those totals, remember that the Philadelphia Mint only struck 2.9 million double eagles in 1927.

This specimen has lovely yellow-gold luster with light pink highlights on the obverse and faint green patina on the reverse. The surfaces are lightly abraded and the strike is a trifle weak, as usual for this issue. Census: 15 in 63, 28 finer (9/09). *From The Volunteer Collection. (#9188)*

---

**Beautiful MS66 1927-S Double Eagle  
Rare in Any Grade**

---

**1950 1927-S MS66 NGC.** In today's market, the 1927-S double eagle is somewhat overshadowed by its close cousin, the 1927-D. While the present coin cannot equal the rarity of the Denver issue, it is still an acknowledged key to the Saint-Gaudens double eagle series. Moreover, unlike the 1927-D, most examples of the current issue are seen in circulated or lower Mint State grades. In higher Mint State grades, this date is quite rare. NGC and PCGS, for example, have certified a total of six 1927-S examples in MS66, and a mere three coins grade finer (9/09).

Fifty years ago, the situation was reversed. In that era, the 1927-S was believed to be a fantastic rarity, considerably more desirable than its Denver counterpart. In 1949, B. Max Mehl believed that there were only three or four specimens known. The coin was generally regarded as the fourth-rarest of the design type, behind the 1924-S, 1926-D, and 1926-S. All of those vaunted issues gradually became more available as individual examples were repatriated from European bank holdings in the 1950s and 1960s. The 1927-S never surfaced in hoard quantities (unlike the 1926-S, for example), and its decline in the rarity rankings has been gradual. In recent times, David Akers ranks it as the 10th-rarest issue in the 55-coin series. Not one single example of the 1927-D issue is believed to have surfaced from those sources, and it holds the preeminent spot in the rarity estimates today.

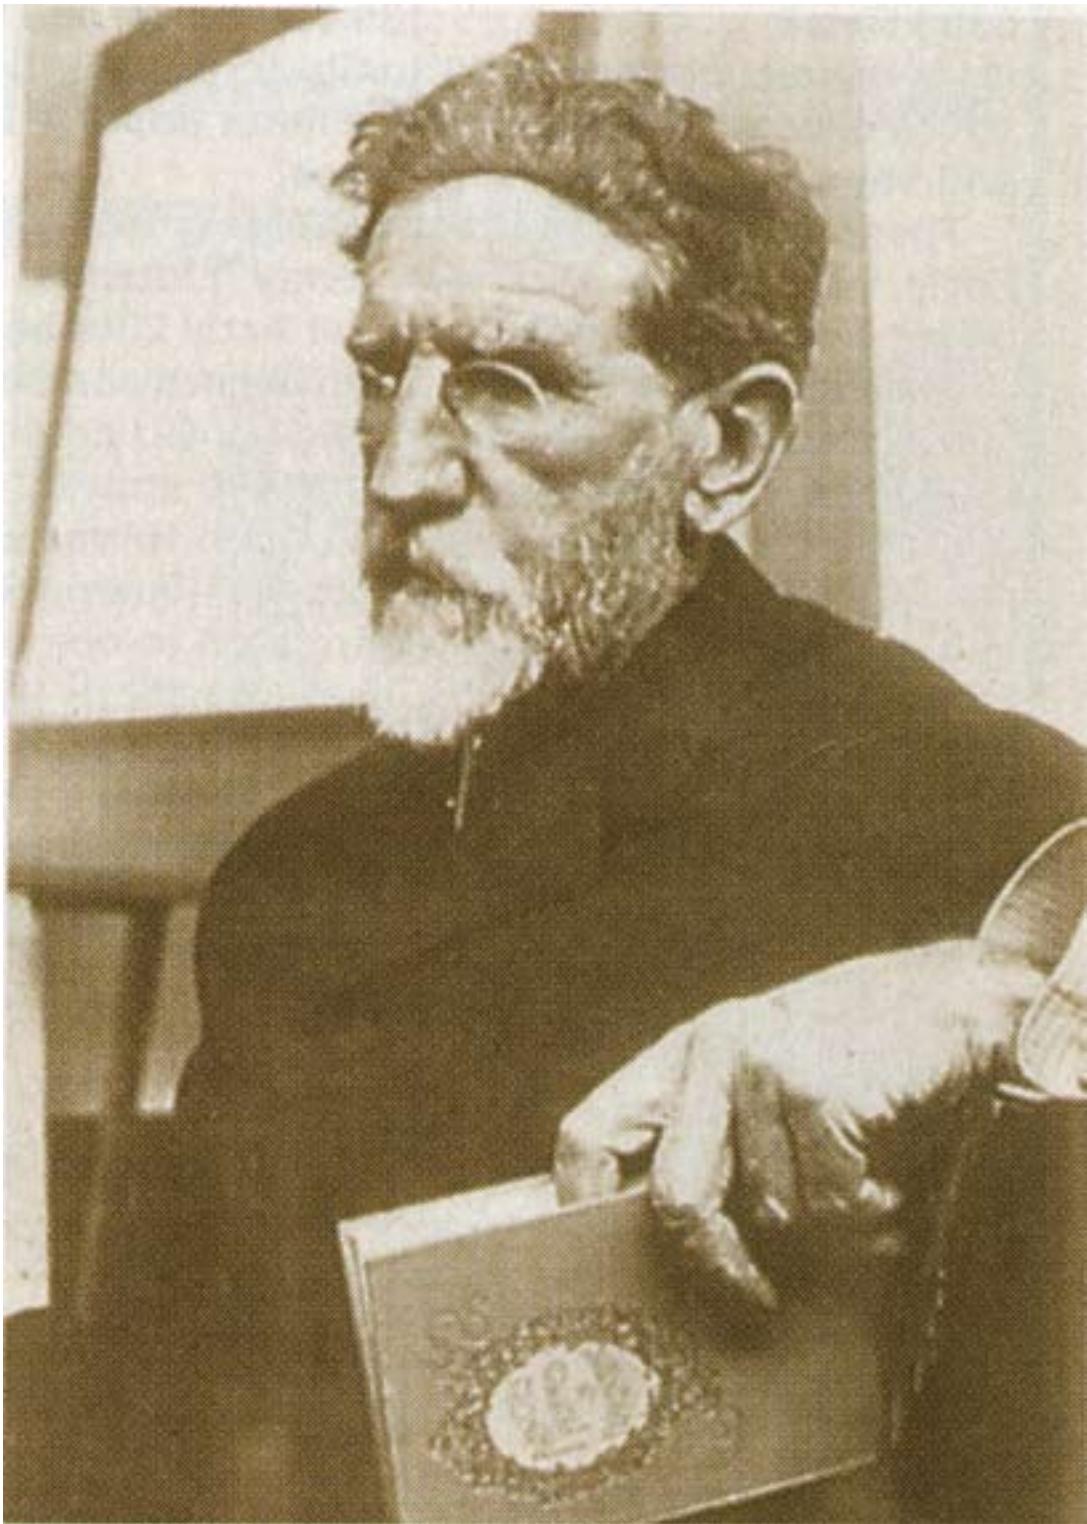

Probably only 160-170 specimens of the 1927-S double eagle survive today. One is certified XF40 by PCGS, and six pieces have been certified as AU50 by PCGS, which suggests that some 1927-S double eagles were actually spent in West Coast commerce prior to the Great Depression. Most Uncirculated survivors grade between MS61 and MS64.

One of the earliest auction appearances of the 1927-S was in the J.F. Bell Collection (Stack's, 12/1944), lot 990, where it realized a price of \$500 on a \$300 estimate. Two years later, an example appeared in the World's Greatest Collection (Numismatic Gallery, 1/1946), lot 1043. Abe Kosoff showcased the coin in that sale, and it realized \$925, a respectable sum for the time. The 1927-S was so rare in its heyday that even legendary collectors such as Louis Eliasberg and John Jay Pittman settled for AU specimens in their collections.

An MS67 NGC coin from the Museum of Connecticut History was sold in the Long Beach sale (Heritage, 6/1995), lot 6027. That piece later appeared in the celebrated sale of the Phillip H. Morse Collection (Heritage, 11/2005), lot 6698. The present coin also appeared in the Morse sale, as lot 6699. Another spectacular specimen was cataloged in the Thaine B. Price sale (David Akers, 5/1998), lot 116. In that offering, Akers described the piece as being "absolutely fully struck."

The current coin possesses a wonderful mix of apricot and yellow-gold patination and exhibits vibrant luster. The design elements are exceptionally well struck, with the Capitol showing excellent definition. It is devoid of significant marks, save for an inoffensive shallow linear abrasion on Liberty's chest. Interestingly though, a slightly curved mint-made "scrape" is noted on the sun. As it runs parallel to the rim, the feature is probably some sort of mint-made flaw, possibly having to do with ejection from the die. The same feature appeared on the Superb Gem coin in lot 6698 of the Phillip H. Morse Collection mentioned above. This circumstance leads us to believe that these two coins were struck from the same reverse die within a relatively short period of time—an interesting coincidence, since both coins were later discovered in the same collection. This is a magnificent specimen that is sure to generate spirited bidding. Census: 4 in 66, 2 finer (9/09). (#9188)

- 1951** 1928 MS66 ★ NGC. CAC. This magnificent gold type coin has green-gold fields and wisps of orange across the devices. The strike is precise, and abrasions are scarce. Census: 75 in 66 ★, five finer with a Star designation (8/09). (#9189)
- 1952** 1928 MS66 PCGS. Soft frosty luster and amazing orange and yellow-gold surfaces are important aspects of this boldly struck double eagle. Housed in a green-label PCGS holder, this is an amazing double eagle for the advanced date or type collector. PCGS has only certified 65 finer examples (9/09).  
*From The E.J. Mutton Collection of U.S. Gold. (#9189)*
- 1953** 1928 MS66 PCGS. PCGS has certified 65 finer examples (9/09), indicating a more plentiful issue than those of 1925 and 1926. The 1928 is a popular issue for type collectors and for those who seek a single Saint-Gaudens double eagle. This wonderful Premium Gem, housed in a green label holder, has rich lemon-yellow surfaces with frosty luster.  
*From The E.J. Mutton Collection of U.S. Gold. (#9189)*
- 1954** 1928 MS66 NGC. This NGC certified Saint has a large number of peers, but few that are finer. In fact, NGC has only graded 80 examples finer than the present piece. Both sides are sharply defined with satiny yellow-gold luster and traces of iridescent toning.  
*From The E.J. Mutton Collection of U.S. Gold. (#9189)*

---

## Exceptional 1929 Double Eagle, MS65

**1955** 1929 MS65 PCGS. CAC. Like many issues of this era, the 1929 double eagle was produced in large quantities with an extremely low survival rate. Nearly every one of the 1,779,750 coins was later melted, leaving a net population of just a few hundred coins.

At one time the 1929 double eagle was considered a major rarity in the Saint-Gaudens series. With the importation of examples from overseas in recent decades, this issue is available to a wider audience. A single group of about 40 coins was discovered in England in 1984. In *A Guide Book of Double Eagle Gold Coins*, Dave Bowers writes: "For the first time in modern numismatic history the 1929 is readily available and somewhat affordable (but hardly inexpensive). Now, many collections will end with the 1929 date instead of 1928 as formerly." NGC and PCGS have certified nearly 300 submissions in all grades, but only 32 of those coins grade MS65 or finer. In the 16 years that we have tracked our auctions, we have offered 93 examples of the 1929 twenty, including six offerings of MS66 coins and 18 in MS65, including duplicate appearances of a smaller number of coins.

This bold specimen has a sharp strike with frosty yellow and orange-gold luster. A few minuscule abrasions are evident on each side although they are of no consequence. A lovely piece, this Gem carries exceptional aesthetic appeal. Population: 22 in 65, 5 finer (9/09). *From The Volunteer Collection. (#9190)*

## TERRITORIAL GOLD

**1956** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—Improperly Cleaned—NCS. AU Details. K-24, R.3. This variety is similar to the extremely rare K-25, except it has a plain edge. Interestingly, although this issue has a stated weight of 27 grains, Don Kagin (1981) writes that the actual weight of these pieces is a lower 21.8 grains. Wafts of magenta visit this mostly orange-gold representative. A tiny grease stain is noted on the reverse, and there is a thin die crack through the obverse. Listed on page 361 of the 2010 Guide Book.  
From The Mulkin Collection. (#10040)

**1957** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—Improperly Cleaned—NCS. AU Details. K-24, R.3. This is one of only two known varieties of gold dollars struck by August Bechtler. The other, K-25, is virtually unobtainable and is considered to be R.8 by Don Kagin (1981). A lovely mix of rose-red and olive-gold patina envelops the surfaces. The reverse has an additional light blue tint. Traces of luster are still seen in the protected areas around the letters. A curious dentil-like pattern is observed below the NA in CAROLINA. A relatively affordable choice for a type collector. Listed on page 361 of the 2010 Guide Book.  
From The Mulkin Collection. (#10040)

**1958** (1837-42) C. Bechtler Dollar, N Reversed—Scratched—NCS. AU Details. K-4, R.4. The N in ONE is retrograde. Lovely medium-yellow patina covers both sides of this later Christopher Bechtler issue. A number of pinscratches are seen below 28G, and a small lamination is noted above the O in ONE. The upper left rim of the reverse also has a few roller marks (as made). Listed on page 360 of the 2010 Guide Book.  
From The Mulkin Collection. (#10055)

### Significant C. Bechtler Dollar K-1, AU Details

**1959** (1831-34) C. Bechtler Dollar, 30G.—Improperly Cleaned—NCS. AU Details. K-1, R.4. This variety is important because it represents the first gold dollar produced in the United States. Christopher Bechtler began striking these pieces as early as 1831—a full 18 years ahead of the U.S. Mint. Pale yellow patina coats the minimally abraded surfaces, with a touch of lilac around the devices. The strike is slightly off-center, as often seen, and about half of the dentils are missing. A few tiny retained laminations are noted on each side. This lightly cleaned AU piece would make a nice example of this historic issue. Listed on page 359 of the 2010 Guide Book.  
From The Mulkin Collection. (#10064)

### Challenging C. Bechtler Quarter Eagle K-10, AU Details

**1960** (1837-42) C. Bechtler Quarter Eagle, 67G. 21C.—Scratched, Improperly Cleaned—NCS. AU Details. K-10, R.5. Kagin (1981) listed nine varieties of quarter eagles struck by Christopher Bechtler, with K-10 being the most available. Nonetheless, all examples are scarce to rare and highly desirable. This rich yellow-gold specimen has been lightly cleaned, but still exhibits flashy luster in the protected areas. A number of shallow scratches are noted on the obverse, while the reverse is minimally abraded. This briefly circulated piece would make a nice representative of this elusive issue. Listed on page 360 of the 2010 Guide Book.  
Ex: Ninth Greater Houston Coin Club Convention (Henry J. Berube—New England Coin Company, 1/1966), lot 602 (envelope included).  
From The Mulkin Collection. (#10067)

### Charming C. Bechtler Five Dollar With Star, K-20, AU Details

**1961** (1837-42) C. Bechtler Five Dollar, 134G, With Star—Improperly Cleaned—NCS. AU Details. K-20, R.4. This variety features a large star on the obverse. Don Kagin (1981) considers this piece to be part of the sixth series (out of seven) of Christopher Bechtler issues. Bright yellow patina coats the surfaces of this lightly circulated specimen. A number of faint hairlines on both sides account for the modifier from NCS, but there are no individually significant marks. Listed on page 361 of the 2010 Guide Book.  
Ex: Dr. Conway A. Bolt Collection (Stack's, 4/1966), lot 1177 (envelope included).  
From The Mulkin Collection. (#10097)

XF Sharpness Kagin-23 Five Dollar  
C. Bechtler, RUTHERF:

1962 (1834-37) C. Bechtler Five Dollar, RUTHERF:—Improperly Cleaned—NCS. XF Details. K-23, High R.6. Luster clings to the legends of this rare variety straw-gold Bechtler gold piece. Mildly granular from cleaning, and a few faded scratches beneath GEORGIA merit mention. Listed on page 361 of the 2010 Guide Book.  
From The Mulkin Collection. (#10109)

Seldom-Seen C. Bechtler Five Dollar  
K-23, XF Details

1963 (1837-42) C. Bechtler Five Dollar, RUTHERF:—Damaged, Harshly Cleaned—NCS. XF Details. K-23, High R.6. RUTHERF is abbreviated. This was one of the final five dollar pieces issued by Christopher Bechtler. The yellow-gold surfaces are unnaturally bright, and there are a number of tiny marks. A slight bend in the middle accounts for the Damaged modifier from NCS. A very rare variety. Listed on page 361 of the 2010 Guide Book.  
Ex: The Charles Jay Collection (Stacks, 10/1967), lot 345.  
From The Mulkin Collection. (#10109)

AU Details C. Bechtler Five Dollar  
Rare K-23 RUTHERF: Variety

1964 (1834-37) C. Bechtler Five Dollar, RUTHERF:—Improperly Cleaned—NCS. AU Details. K-23, High R.6. All five dollar Bechtler gold coins are rare, and Kagin-23 is the only such variety with RUTHERF instead of RUTHERF. This yellow-gold example is a bit bright and displays faint marks from light circulation, but will satisfy advanced collectors of this challenging private gold maker. Listed on page 361 of the 2010 Guide Book.  
From The Mulkin Collection. (#10109)

Kagin-23 C. Bechtler Five Dollar  
128 G., RUTHERF; AU Details

1965 (1834-37) C. Bechtler Five Dollar, RUTHERF:—Harshly Cleaned—NCS. AU Details. K-23, High R.6. A hairlined and moderately granular example of this elusive Bechtler denomination. A retained lamination is noted on the lower left obverse, and the reverse has a retained lamination at 4 o'clock and a small peeled lamination on the second R in RUTHERF. Listed on page 361 of the 2010 Guide Book.  
From The Mulkin Collection. (#10109)

Desirable 1860 Clark, Gruber & Co.  
Five Dollar, K-2, AU Details

1966 1860 Clark, Gruber & Co. Five Dollar—Improperly Cleaned—NCS. AU Details. K-2, R.4. Clark, Gruber & Co. gold pieces are among the most popular Territorial issues. Sun-gold patina covers both sides of this well detailed piece. A couple of stars and the central high points are just a touch soft. Several small scrapes in the fields are consistent with the grade. A lovely piece despite cleaning. Listed on page 377 of the 2010 Guide Book.  
Probably Ex: 1968 ANA Convention Auction (A. Kosoff, 8/1968), lot 1634 (envelope included).  
From The Mulkin Collection. (#10136)

Gorgeous 1860 Clark, Gruber & Co.  
Half Eagle, K-2, Choice AU

1967 1860 Clark, Gruber & Co. Five Dollar AU55 NGC. K-2, R.4. Pleasing deep red-orange patina envelops the well preserved surfaces of this Choice AU representative. A trace of violet color visits the lower rim. Subtle luster adds to the aesthetic appeal. The strike is sharp save for the often-seen weakness at the top of the shield and on the hair by Liberty's ear. An attractive example. Listed on page 377 of the 2010 Guide Book.  
Ex: 1968 ANA Convention Auction (A. Kosoff, 8/1968), lot 2192.  
From The Mulkin Collection. (#10136)

---

**1851 Humbert Octagonal Fifty Dollar  
887 Thous., K-4, AU55**

---

**Outstanding 1851 Humbert Fifty Dollar  
880 Thous., K-5, Choice XF**

**1968 1851 Humbert Fifty Dollar, 887 Thous. 50 Rev. AU55 PCGS.** Lettered Edge, K-4, High R.5. While there are examples available of these historic octagonal “slugs” for a price, it is seldom that we have the privilege to offer so fine a specimen in problem-free Choice AU condition. PCGS has certified only five coins as such, with five examples finer—three in AU58, one each in MS61 and MS62 (6/09).

The 1851-52 octagonal fifty dollar gold pieces of Augustus Humbert and the U.S. Assay Office of Gold were known by various names, some obviously descriptive, some of unknown derivation. “Adobes,” “quints [short for ‘quintuple eagle’],” “ingots,” and “slugs” all served as monikers for these impressive gold coins during their heyday. Probably the most significant among those names is “ingot,” for in their time they were considered exactly that—not so much a coin as a preassayed and -weighed quantity of gold at a given fineness and with a recognizable design. It is noteworthy that the dies of the first design (K-1) for the 1851 Lettered Edge Humbert fifty dollar had blanks beside the D and C for dollars and cents, as well as the fineness, so that those modular dies could be completed with varying finesses and dollar-cent amounts as needed. The design is only one step removed from “ingots” in the usual sense of the word.

Although they were for a time virtually the only domestically produced gold coins in circulation in California, that very circulation sometimes proved problematic: When they were dropped, which they frequently were, their odd shape meant that they were apt to incur bumps or dings on their eight-cornered edges, which if severe enough could prevent their certification by NGC or PCGS. This AU55 example has no such corner bumps. The striking details are remarkably strong for this design type. The rich orange-gold surfaces show a faint trace of reddish patina around the devices. Listed on page 364 of the 2010 Guide Book. (#10208)

**1969 1851 Humbert Fifty Dollar, 880 Thous. XF45 NGC.** Reeded Edge, No 50 on Reverse. K-5, Low R.5. The State Assay Office of California was opened in 1850, but it was a marginal success, impeded in its operation by bankers and others who refuse to accept its ingots, hoping to glean added profit by performing such assays themselves. There were increasing demands for an official U.S. branch mint. A compromise was reached whereby the United States would establish an Assay Office in San Francisco that could act as a sort of pseudomint until the issue could be taken up again in the next session of Congress. While some might debate whether the U.S. Assay Office issues should be considered “regular” U.S. coins, there is no question as to their historical significance.

Delightful medium-yellow patina enhances the surfaces of this moderately circulated specimen. The lower portion of the eagle and the peripheral legends show the usual softness. Both sides have a number of tiny abrasions, as commonly seen on these large-size pieces, but there are no marks of individual significance. An excellent example of this scarce and popular issue, listed on page 364 of the 2010 Guide Book.

*From The Mulkin Collection. (#10211)*

---

**1851 Humbert Reeded Edge Fifty Dollar  
887 Thous., K-7, VF25**

**1970 1851 Humbert Fifty Dollar, 887 Thous. VF25 PCGS. K-7, R.4.** At the time this hefty coin was struck, the United States Assay Office of Gold was operating under the auspices of Moffat & Co. Augustus Humbert served as the assayer of the U.S. government at the facility, and each of the fifty dollar gold pieces produced by the Assay Office in 1851 carried his name, either on the edge or around the obverse periphery. An elusive representative of the reeded edge 1851 Humbert slug, this pleasingly original coin displays reddish-copper highlights around the obverse devices. The balance of the surfaces are green-gold, and both sides are typically abraded for a circulated frontier-era gold coin of this size. We note several moderate rim dings on each side. Plenty of appreciable definition remains, however, along with traces of luster. Listed on page 364 of the 2010 Guide Book.  
Ex: FUN Signature (Heritage, 1/2006), lot 3680. (#10214)

**Scarce 1852 Humbert Fifty, 887 Thous.  
K-11, XF Details**

**1971 1852 Humbert Fifty Dollar, 887 Thous.—Damaged—NCS. XF Details. K-11, R.5.** The impressive octagonal "slugs" made by Augustus Humbert are among the most iconic U.S. issues, although they are usually collected as part of the Territorial series despite being made under the auspices of the U.S. government. This apricot-gold specimen lacks peripheral details, as almost all do, and the eagle is also weakly struck. Myriad abrasions are noted on each side. Listed on page 364 of the 2010 Guide Book. (#10217)

**1972 1852 Assay Office Ten Dollar—Scratched—NCS. VF Details. K-12a, R.5.** Although designated as Scratched, this green-gold representative lacks any obvious marks on either side. The obverse border has minor die cracks, and a network of slender cracks is present on the reverse near 9 o'clock. Listed on page 366 of the 2010 Guide Book.  
From The Mulkin Collection. (#10001)

**Challenging 1853 Assay Office Ten  
900 Thous., K-16, AU50**

**1973 1853 Assay Office Ten Dollar, 900 Thous. AU50 NGC. K-16, Low R.6.** Don Kagin (1981) writes that this rare variety was struck between March and April 1853. Light purple and rose-gold colors intermingle on the surfaces of this well detailed specimen. Hints of luster in the fields are barely affected by a number of minuscule abrasions. There are no marks worthy of specific mention. An appealing example this elusive issue. Listed on page 366 of the 2010 Guide Book.  
From The Mulkin Collection. (#10007)

Rare 1853 U.S. Assay Office Ten  
900 Thous., K-16, Mint State

1974 1853 Assay Office Ten Dollar, 900 Thous. MS60 NGC. K-16, Low R.6. The U.S. Assay Office tens with a fineness of .900 (as opposed to .884 as previously used) were an effort by the minters to avoid trouble with Federal authorities over coins that were less than the minimum required fineness specified by the 1837 Mint Act governing gold coinage. All of those revised pieces were struck between March and April 1853. The surfaces have a distinct greenish-gold color (Kagin notes that this is typical for the variety), and there is a good amount of luster in the fields. There are many minuscule abrasions noted under a loupe, but none are individually significant. Listed on page 366 of the 2010 Guide Book. (#10007)

Splendid 1853 Assay Office Twenty  
900 Thous., K-18, AU55

1975 1853 Assay Office Twenty Dollar, 900 Thous. AU55 NGC. K-18, R.2. 900 is punched over .880, as usually seen. Delightful straw-gold patina endows the surfaces of this well defined representative. Peppered abrasions on the obverse define the grade, but none are particularly bothersome. A hint of luster is seen on both sides. The U.S. Assay Office issues are particularly significant because of their status as a federally authorized coinage prior to the opening of the San Francisco Mint. Listed on page 367 of the 2010 Guide Book. An old Paramount International Coin Corporation envelope (lot 1722) is included.

From The Mulkin Collection. (#10013)

Short Arrows 1854 Kellogg Twenty  
K-1a, AU Sharpness

1976 1854 Kellogg & Co. Twenty Dollar—Damaged, Rim Filed—NCS. AU Details. Short Arrows, K-1a, R.4. Both rims are extensively filed, particularly the reverse rim. Both sides have bright areas formed by closely spaced scratches, most apparent on the left obverse field and Liberty's cheek and neck. Listed on page 374 of the 2010 Guide Book.

From The Mulkin Collection. (#10222)

---

**Delightful 1849 Moffat & Co. Five  
K-4, XF40**

**1977** 1849 Moffat & Co. Five Dollar XF40 NGC. K-4, R.5. A rarer early die state. Pleasing rose-gold patina enhances the surfaces of this still-lustrous specimen. Liberty's hair is weakly struck, as usually seen, but the reverse is crisply detailed. Several light abrasions are consistent with the grade, and none are individually significant. This desirable 1849-dated piece was struck at the height of the California Gold Rush. Listed on page 363 of the 2010 Guide Book.  
*From The Mulkin Collection.* (#10240)

---

**Attractive AU53 1850 Moffat & Co. Five, K-7**

**1978** 1850 Moffat & Co. Five Dollar AU53 NGC. Small Eagle. K-7, R.4. Cherry-red and olive-gold alternate across this unblemished private gold piece. The second and final year of the Moffat denomination, since the firm founded the San Francisco Assay Office in 1851. Struck from moderately rotated dies. Listed on page 363 of the 2010 Guide Book. (#10243)

---

**K-2 1849 Mormon Five Dollar, XF Details**

**1979** 1849 Mormon Five Dollar—Repaired, Improperly Cleaned—NCS. XF Details. K-2, R.5. A readily collectible example of this rare and historically important issue. Though the lightly worn surfaces are hairlined from a past cleaning, the obverse still displays well. Apparent repairs in the reverse fields were meant to smooth out abrasions there. Listed on page 376 of the 2010 Guide Book.  
*From The Mulkin Collection.* (#10262)

---

**1849 Norris, Gregg, & Norris Five  
Reeded Edge, VF Details, K-4**

**1980** 1849 Norris, Gregg, & Norris Five Dollar, Reeded Edge—Damaged—NCS. VF Details. K-4, R.4. Both sides have a smattering of small marks, as one might expect from a circulated territorial gold coin, but no "damage" is readily evident. Orange-red in design recesses, while the open fields and highpoints are yellow-gold. The first California private gold coiner, but quickly displaced by the well-run Moffat & Co. Listed on page 360 of the 2010 Guide Book.  
*From The Mulkin Collection.* (#10282)

---

**1852 Wass Molitor Ten Dollar, XF45  
Large Head, Wide Date, K-4**

**1981** 1852 Wass Molitor Ten Dollar, Large Head, Wide Date XF45 NGC. K-4, R.5. The neck is short and the lower left corner of the bust is pointed. The obverse die was cut too deep, which caused the reverse to appear significantly weaker. The peripheral details are also softly struck. A number of thin die cracks are seen around the perimeter of the obverse, as always for this variety. Charming apricot-gold patina envelops both sides. Scattered abrasions limit the grade. An appealing example of this rare variety. Listed on page 372 of the 2010 Guide Book.  
*From The Mulkin Collection.* (#10348)

---

**1855 Small Head Wass Molitor  
Twenty Dollar, K-7, VF Details**

**1982** 1855 Wass Molitor Twenty Dollar, Small Head PCGS Genuine. K-7, R.6. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an VF specimen that has been tooled, repaired, reengraved, cleaned (totally resurfaced). The Small Head Wass Molitor is one of the classics among Territorial gold. As noted in Don Kagin's 1982 reference, this piece shows the expected weak strike on parts of the eagle's wings and eagle's neck. The surfaces on each side show extensive evidence of smoothing and tooling, which alternately have lessened impairments and strengthened design elements. The coin has a subdued yellow-gold color. One impairment remains: several parallel, shallow scratches in the right obverse field. Listed on page 373 of the 2010 Guide Book. (#10357)

## S.S. CENTRAL AMERICA GOLD BAR

### Kellogg & Humbert Gold Ingot, 33.85 Ounces Recovered from the S.S. Central America

1983 (1855-57) Kellogg & Humbert Gold Ingot. Dimensions 53 mm x 43 mm x 28 mm. CAGB-450. Top face reads from top to bottom: NO (number abbreviation with two diagonal lines below the "O") 546 / 33.85 OZ / 891 FINE / \$623.46. A turn to the left, and the incuse KELLOGG / & / HUMBERT / ASSAYERS imprint is stamped, oriented to the long side. Another left turn, and the serial number is repeated. Two "corner cuts" directly opposed to one another, plus a third corner that looks like it has a corner cut at first glance, though the displaced metal around it suggests that the corner was bumped and not cut.

This ingot has multiple distinctive features, both obvious and not. On the top face, the number punches are not regular; in fact, they border on the haphazard. This is most notable at "891 FINE", where the number 8 starts more than a quarter of the way from the ingot's left border, the 9 is tilted left and low relative to the 8, and the 1 crowds the word FINE; that word barely fits in the space provided.

Less readily apparent but highly intriguing is an apparent impression from a coin, which appears on the side a right turn from the top face. A partial arc from a coin's rim and reeding is plain, as is part of a letter "T". Given the cargo of the S.S. Central America, a double eagle is the most likely source of the impression, though this cannot be determined with certainty. Still, the impression is an unexpected but welcome reminder of where this ingot has spent most of its existence: at the bottom of the ocean, part of a jumble of priceless golden cargo.

This medium-sized ingot is generally bright yellow-gold with only small areas of encrustation. Comes with a PSA/DNA (Collectors Universe) certificate of authenticity picturing the ingot and providing basic information such as dimensions and serial number.

## S.S.C.A. RELIC GOLD MEDALS

**1984** 1855 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck August 20, 2001. A gleaming example of this popular and massive restruck. Coin and PCGS holder, along with the outer box, certificate, screwdriver, etc. (#10358)

2008 'Humbert Commemorative'  
With 2.5 Oz. California Gold

**1985** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. This 2.5 ounce 999.9 fine gold medal does not derive from S.S.C.A.-recovered gold bars, but the bullion does derive from a California source, according to the NGC insert. Similar in appearance to the Kigin-11 1852 Humbert fifty, but the denomination and fineness are modified, and the reverse has a verbose legend asserting a 2008 mintage.

Handsome 2008 'Humbert Commemorative'  
2.5 Ounces of Pure California Gold

**1986** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. A modern reproduction, this item contains 2.5 troy ounces of gold, from a California source (but not S.S.C.A. ingots) per the NGC insert. Designed similar to Kigin-11, but the denomination is replaced with PURE CAL. GOLD, and the fineness is changed to 999.9 Thous. The central reverse has a four-line legend that states a 2008 production. (#10361)

**1987** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. This flashy octagonal medal weighs 2.5 ounces of 999.9 fine California gold. A modern reproduction of K-11, the 1852 Humbert fifty dollar variety. No gold from S.S.C.A. ingots is included.

**1988** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. This modern memento contains 2.5 ounces of pure gold, which comes from California although not from the S.S. Central America. Styled after the Kigin-11 1852 Humbert fifty "slug," but FIFTY DOLLS. is replaced with PURE CAL. GOLD, and the fineness is no longer 887 Thous. but is instead 999.9 Thous.

**1989** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. This 2.5-ounce 999.9 fine gold medal derives from a California origin but is not made from S.S.C.A.-recovered gold bars, per the NGC insert. Similar in appearance to the Kigin-11 1852 Humbert fifty, but the denomination and fineness are modified, and the reverse has a verbose legend asserting a 2008 mintage.

**1990** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. A modern reproduction, this item contains 2.5 troy ounces of gold, from a California source (but not S.S.C.A. ingots) per the NGC insert. Similar to Kigin-11, but the denomination is replaced with PURE CAL. GOLD, and the fineness is changed to 999.9 Thous. The central reverse has a four-line legend that states a 2008 production.

**1991** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. A modern facsimile of the K-11 1852 Humbert fifty dollar slug, except the denomination and fineness are changed, and a four-line legend on the reverse is added. This piece contains 2.5 ounces of "pure California gold," per the NGC insert. No gold from S.S.C.A. ingots is implied.

2008 'Humbert Commemorative' Gold Piece

**1992** 2008 Humbert Commemorative Gem Proof Ultra Cameo NGC. This 2008 replica of Kigin-11 contains 2.5 troy ounces of 999.9 thous. fine "pure California gold, according to the modernized legends. The central reverse has a four-line rectangular inscription that reads: "HUMBERT GOLD INGOT/COMMEMORATIVE 2008/PURE CALIFORNIA GOLD/ 2.5 OZ TROY 999.9 FINE."

**1993** 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. This modern replica of Kigin-11 contains 2.5 troy ounces of 999.9 thous. fine "pure California" gold, per the NGC insert. No gold is from S.S.C.A. ingots. The obverse legends for the denomination and fineness are appropriately changed from the original design, and the central reverse has a four-line rectangular inscription indicating a 2008 production.

## CALIFORNIA FRACTIONAL GOLD

**1994** 1854 Liberty Octagonal 1 Dollar, BG-508, High R.4, MS63 Prooflike NGC. Brass-gold surfaces display splashes of subtle peach color and well struck design features except for the typical softness in 85 of the date. Nice field-motif contrast is evident and both sides are devoid of significant marks. Census: 2 in 63 Prooflike, 2 finer (8/09).

From The Mulkin Collection. (#710485)

Attractive 1853 Liberty Octagonal  
One Dollar, BG-531, MS64

**1995** 1853 Liberty Octagonal 1 Dollar, BG-531, R.4, MS64 NGC. This piece was struck by Antoine Louis Nouizillet, who was in operation from 1852 to 1858. Wafts of lilac combine with yellow-gold on the surfaces of this boldly struck near-Gem. A few nearly imperceptible handling marks are visible under magnification. Captivating prooflike fields show nice contrast against the frosted devices.

From The Mulkin Collection. (#10508)

Extremely Rare BG-733 1863  
Liberty Octagonal 25 Cent, MS62

1996 1863 Liberty Octagonal 25 Cents, BG-733, High R.7, MS62 PCGS. Extremely rare. The second edition of Breen-Gillio enumerates only five known survivors, one of which permanently reposes in the Smithsonian. This is the Jay Roe specimen, reholdered from its last Heritage auction appearance, but the alloy spot at 3 o'clock on the obverse is unmistakable. Mildly reflective with faint abrasions that account for the grade. (#10560)

1997 1876 Indian Octagonal 50 Cents, BG-953, R.5, MS65 PCGS. This gorgeous Gem has fully brilliant and prooflike yellow-gold surfaces with noticeable cameo contrast between the mirrored fields and frosty devices. It is sharply struck by rather crudely prepared dies, adding to its interest and desirability. Population: 4 in 65, 0 finer (9/09). (#10811)

Beautiful Gem Deep Mirror Prooflike  
BG-1060 1876 Indian Round Half

1998 1876 Indian Round 50 Cents, BG-1060, High R.5, MS65 Deep Mirror Prooflike NGC. A gorgeous Gem with highly reflective fields that provide obvious contrast with the icy motifs. A superior strike for the variety, since all reverse legends are bold. Spindly die cracks cross the Indian's neck and the upper reverse. Census: 1 in 65 Deep Mirror Prooflike, 1 finer (9/09). (#710889)

1999 1871 Liberty Octagonal 1 Dollar, BG-1109, Low R.4, MS62 Prooflike NGC. A yellow-gold octagonal dollar with flashy fields and frosty devices. Evenly struck and attractive with a few trivial obverse hairlines. Census: 3 in 62 Prooflike, 1 finer (9/09). (#710920)

MS63 1876 Octagonal Indian Dollar  
Rare BG-1116 Variety

2000 1876 Indian Octagonal 1 Dollar, BG-1116, High R.6, MS63 PCGS. Incorrectly attributed as BG-1115 by PCGS, a variety with a star instead of scroll work beneath DOLLAR. Orange-red patina bathes this well struck Select octagonal dollar. Appears mark-free to the unaided eye, and a loupe reveals only a few trivial hairlines on the central reverse. (#10927)

Well Defined 1875 Indian Octagonal  
Dollar, BG-1127, MS64 Prooflike

2001 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS64 Prooflike NGC. Frosted design elements stand out against the prooflike fields of this near-Gem. The second L in DOLLAR is a bit weak, but overall the design elements, including those in the usually weak centers, are better defined than typically seen. Both sides are quite well preserved. Census: 1 in 64 Prooflike, 1 finer (9/09). (#710938)

Exceptional 1876/5 Indian Octagonal  
One Dollar, BG-1129, MS65

2002 1876/5 Indian Octagonal 1 Dollar, BG-1129, R.4 MS65 NGC. Walter Breen and Ronald Gillio (2003) say of this variety that it is "always weakly struck." The present Gem is exceptional in this regard, in that all design elements are well brought up; only the star centers are flat. Orange-gold surfaces splashed with mint-green are devoid of mentionable marks. The reverse is rotated 90 degrees. (#10940)

**End of Session Three**

# Isn't it time to talk to us about your collection?

Heritage Auction Galleries, the World's Third Largest Auctioneer, invites you to consign to an upcoming auction.

- Timely payments to every single consignor since our first auction in 1976
- Generous cash advances available
- Competitive consignment terms
- Outstanding prices realized

# SESSION FOUR

## (NO FLOOR OR PHONE BIDDING)

Heritage Live!™, Internet, Fax, and Mail Signature® Auction #1130  
Saturday, October 24, 2009, 10:00 AM CT, Lots 7001-9365

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

Visit HA.com to view full-color images and bid.

### SPECIAL INTERNET BIDDING FEATURE:

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live, our NEW bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

## PROOF KENNEDY HALF DOLLARS

**7931** 1988-S PR70 Deep Cameo PCGS. PCGS Population (64). NGC Census: (45). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$210. (#96829)

**7932** 1992-S Silver PR70 Deep Cameo PCGS. PCGS Population (154). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$150. (#96834)

**7933** 1993-S Silver PR70 Deep Cameo PCGS. PCGS Population (99). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$150. (#96836)

**7934** 1996-S Silver PR70 Deep Cameo PCGS. PCGS Population (85). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$190. (#96842)

**7935** 1997-S Silver PR70 Deep Cameo PCGS. PCGS Population (109). NGC Census: (206). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$130. (#96848)

**7936** 1999-S Clad PR70 Deep Cameo PCGS. PCGS Population (49). NGC Census: (206). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$160. (#96910)

**7937** 2001-S Clad PR70 Deep Cameo PCGS. PCGS Population (40). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$330. (#96914)

**7938** 2001-S Clad PR70 Deep Cameo PCGS. PCGS Population (40). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$330. (#96914)

**7939** 2006-S Clad PR70 Deep Cameo PCGS. PCGS Population (56). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$73. (#96976)

## EARLY DOLLARS

**7940** 1799 7x6 Stars—Plugged—NCS. VG Details. BB-161, B-11. NGC Census: (35/1420). PCGS Population (42/2257). Mintage: 423,515. Numismedia Wsl. Price for NGC/PCGS coin in VG8 : \$975. (#6878)

**7941** 1799 7x6 Stars—Damaged—NCS. VG Details. BB-160, B-12. NGC Census: (35/1420). PCGS Population (42/2257). Mintage: 423,515. Numismedia Wsl. Price for NGC/PCGS coin in VG8 : \$975. (#6878)

**7942** 1799 7x6 Stars—Damaged—ANACS. VF Details, Net VG8. NGC Census: (35/1419). PCGS Population (42/2257). Mintage: 423,515. Numismedia Wsl. Price for NGC/PCGS coin in VG8 : \$975. (#6878)

**7943** 1801—Damaged, Improperly Cleaned—NCS. VF Details. BB-211, B-1. NGC Census: (9/201). PCGS Population (42/272). Mintage: 54,454. Numismedia Wsl. Price for NGC/PCGS coin in VF20: \$2,350. (#6893)

## SEATED DOLLARS

**7944** 1840—Cleaning—PCGS Genuine. Mintage: 61,005. (#6926)

**7945** 1842 VF30 PCGS. PCGS Population (18/409). NGC Census: (9/363). Mintage: 184,618. Numismedia Wsl. Price for NGC/PCGS coin in VF30: \$360. (#6928)

**7946** 1843 Fine 15 PCGS. PCGS Population (3/382). NGC Census: (3/299). Mintage: 165,100. Numismedia Wsl. Price for NGC/PCGS coin in Fine 15: \$268. (#6929)

**7947** 1843 XF45 PCGS. PCGS Population (78/207). NGC Census: (40/217). Mintage: 165,100. Numismedia Wsl. Price for NGC/PCGS coin in XF45: \$520. (#6929)

**7948** 1843 AU58 NGC. NGC Census: (58/53). PCGS Population (40/39). Mintage: 165,100. Numismedia Wsl. Price for NGC/PCGS coin in AU58: \$1,125. (#6929)

**7949** 1845 XF40 PCGS. PCGS Population (23/130). NGC Census: (8/111). Mintage: 24,500. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$625. (#6931)

**7950** 1846—Rim Filed, Scratched—ANACS. AU Details Net XF40. NGC Census: (19/304). PCGS Population (49/331). Mintage: 110,600. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$425. (#6932)

**7951** 1848—Cleaned—ICG. XF45 Details. NGC Census: (13/52). PCGS Population (19/100). Mintage: 15,000. Numismedia Wsl. Price for NGC/PCGS coin in XF45: \$1,040. (#6935)

**7952** 1849—Cleaned—ICG. AU53 Details. NGC Census: (14/151). PCGS Population (30/127). Mintage: 62,600. Numismedia Wsl. Price for NGC/PCGS coin in AU53: \$675. (#6936)

**7953** 1853—Improperly Cleaned—NCS. AU Details. NGC Census: (5/117). PCGS Population (18/122). Mintage: 46,110. Numismedia Wsl. Price for NGC/PCGS coin in AU50: \$945. (#6941)

**7954** 1859-O AU53 ICG. NGC Census: (26/335). PCGS Population (23/461). Mintage: 360,000. Numismedia Wsl. Price for NGC/PCGS coin in AU53: \$640. (#6947)

**7955** 1860-O VF25 PCGS. PCGS Population (7/970). NGC Census: (5/600). Mintage: 515,000. Numismedia Wsl. Price for NGC/PCGS coin in VF25: \$314. (#6950)

**7956** 1860-O XF45 PCGS. PCGS Population (55/848). NGC Census: (34/539). Mintage: 515,000. Numismedia Wsl. Price for NGC/PCGS coin in XF45: \$477. (#6950)

**7957** 1860-O—Improperly Cleaned—NCS. AU Details. NGC Census: (18/522). PCGS Population (50/795). Mintage: 515,000. Numismedia Wsl. Price for NGC/PCGS coin in AU50: \$620. (#6950)

**7958** 1871 AU55 NGC. NGC Census: (45/205). PCGS Population (61/186). Mintage: 1,074,760. Numismedia Wsl. Price for NGC/PCGS coin in AU55: \$800. (#6966)

**7959** 1871 AU55 ANACS. NGC Census: (45/205). PCGS Population (61/186). Mintage: 1,074,760. Numismedia Wsl. Price for NGC/PCGS coin in AU55: \$800. (#6966)

**7960** 1872 VF35 PCGS. PCGS Population (32/323). NGC Census: (5/268). Mintage: 1,106,450. Numismedia Wsl. Price for NGC/PCGS coin in VF35: \$384. (#6968)

**7961** 1872—Improperly Cleaned—NGC. XF Details. NGC Census: (27/241). PCGS Population (48/275). Mintage: 1,106,450. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$425. (#6968)

## TRADE DOLLARS

- 7962** 1873-CC—Whizzed—ICG. AU50 Details. NGC Census: (2/86). PCGS Population (15/94). Mintage: 124,500. Numismedia Wsl. Price for NGC/PCGS coin in AU50: \$1,375. (#7032)
- 7963** 1874—Cleaning—PCGS Genuine. Mintage: 987,100. (#7034)
- 7964** 1875—Altered Surface—PCGS Genuine. Mintage: 218,200. (#7037)
- 7965** 1875-CC—Damaged—PCGS Genuine. Mintage: 1,573,700. (#7038)
- 7966** 1875-S AU58 ANACS. NGC Census: (90/626). PCGS Population (103/772). Mintage: 4,487,000. Numismedia Wsl. Price for NGC/PCGS coin in AU58: \$475. (#7039)
- 7967** 1875-S MS61 ANACS. NGC Census: (106/500). PCGS Population (90/637). Mintage: 4,487,000. Numismedia Wsl. Price for NGC/PCGS coin in MS61: \$900. (#7039)
- 7968** 1876-S—Cleaned, Repunched Date—ICG. MS60 Details. FS-301. NGC Census: (13/401). PCGS Population (29/376). Mintage: 5,227,000. Numismedia Wsl. Price for NGC/PCGS coin in MS60: \$850. (#7043)
- 7969** 1877—Cleaned—ANACS. AU55 Details. NGC Census: (13/285). PCGS Population (42/261). Mintage: 3,039,710. Numismedia Wsl. Price for NGC/PCGS coin in AU55: \$340. (#7044)
- 7970** 1877-S—Corroded—ANACS. MS60 Details. NGC Census: (36/582). PCGS Population (52/678). Mintage: 9,519,000. Numismedia Wsl. Price for NGC/PCGS coin in MS60: \$835. (#7046)
- 7971** 1878-CC—Scratch—PCGS Genuine. Mintage: 97,000. (#7047)
- 7972** 1878-S XF40 PCGS. PCGS Population (46/733). Mintage: 4,162,000. (#7048)

## MORGAN DOLLARS

- 7973** 1878 8TF MS62 NGC. VAM-15, Top 100, DDO “Liberty”. NGC Census: (1004/4189). PCGS Population (1529/5808). Mintage: 699,300. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$125. (#7072)

- 7974** 1878 8TF MS64 PCGS. PCGS Population (2168/468). NGC Census: (1759/349). Mintage: 699,300. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$320. (#7072)

- 7975** 1878 8TF MS64 NGC. NGC Census: (1760/347). PCGS Population (2175/469). Mintage: 699,300. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$320. (#7072)

- 7976** 1878 8TF MS64 PCGS. PCGS Population (2181/471). NGC Census: (1762/347). Mintage: 699,300. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$320. (#7072)

- 7977** 1878 7/8TF Strong MS62 NGC. VAM-39, 7/5TF. Mintage: 544,000. (#7078)

- 7978** 1878 7/8TF Strong MS63 NGC. VAM-33. NGC Census: (1329/1008). PCGS Population (2107/1524). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$220. (#7078)

- 7979** 1878 7/8TF Strong MS63 NGC. NGC Census: (1329/1008). PCGS Population (2107/1524). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$220. (#7078)

- 7980** 1878 7/8TF Strong MS63 NGC. VAM-42, 7/7TF. NGC Census: (1328/1004). PCGS Population (2096/1514). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$220. (#7078)

- 7981** 1878 7/8TF Strong MS63 PCGS. PCGS Population (2096/1514). NGC Census: (1328/1004). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$220. (#7078)

- 7982** 1878 7/8TF Strong MS63 PCGS. PCGS Population (2101/1522). NGC Census: (1329/1006). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$220. (#7078)

- 7983** 1878 7/8TF Strong MS64 NGC. NGC Census: (915/91). PCGS Population (1318/204). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$400. (#7078)

- 7984** 1878 7/8TF Strong MS64 PCGS. PCGS Population (1320/204). NGC Census: (917/91). Mintage: 544,000. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$400. (#7078)

- 7985** 1878 7/8TF Strong MS62 Prooflike NGC. VAM-41, 7/7TF. A Top 100 Variety. NGC Census: (62/158). PCGS Population (79/163). Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$185. (#7079)

- 7986** 1878 7/8TF Strong MS62 Prooflike ANACS. VAM-34, Hot 50. NGC Census: (62/158). PCGS Population (79/163). Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$185. (#7079)

- 7987** 1878 7/8TF Strong MS63 Prooflike NGC. Hot 50, VAM-43 7/0TF. NGC Census: (94/64). PCGS Population (100/63). Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$320. (#7079)

## MODERN BULLION COINS

**9264** Set of Silver Eagles 1986-S to 2008-W. All graded Proof 69 and NGC. (Total: 23 coins)

**9265** 1986-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC. First Year of Issue. NGC Census: (925). PCGS Population (151). Mintage: 446,290. Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$1,475. (#9807)

**9266** 1987-P Half-Ounce Gold Eagle PR69 Deep Cameo PCGS. PCGS Population (3703/51). NGC Census: (3428/402). Mintage: 143,398. Numismedia Wsl. Price for NGC/PCGS coin in PR69: \$625. (#1107)

**9267** 1988-P Half-Ounce Gold Eagle PR69 Deep Cameo PCGS. PCGS Population (2470/58). NGC Census: (2975/405). Mintage: 76,528. Numismedia Wsl. Price for NGC/PCGS coin in PR69: \$625. (#9823)

**9268** 1990-S Silver Eagle PR70 Ultra Cameo NGC. NGC Census: (947). PCGS Population (101). Mintage: 695,510. Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$360. (#9837)

**9269** 1991-S Silver Eagle PR70 Deep Cameo PCGS. PCGS Population (55). NGC Census: (591). Mintage: 511,925. Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$665. (#9847)

**9270** 1992-S Silver Eagle PR70 Ultra Cameo NGC. NGC Census: (641). PCGS Population (51). Mintage: 498,654. Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$480. (#9857)

**9271** 1997-P Silver Eagle PR70 Ultra Cameo NGC. NGC Census: (9327). PCGS Population (85). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$740. (#9913)

- 9272** 1997-W Quarter-Ounce Platinum Eagle PR69 Ultra Cameo NGC. NGC Census: (2/0). PCGS Population (981/28). Mintage: 18,726. Numismedia Wsl. Price for NGC/PCGS coin in PR69: \$370. (#9753)
- 9273** 1998-P Silver Eagle PR70 Deep Cameo PCGS. PCGS Population (137). NGC Census: (865). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$320. (#9930)
- 9274** 1999-W Quarter-Ounce Gold Eagle—Struck From Unfinished Proof Dies—MS69 ICG. NGC Census: (0/0). PCGS Population (648/0). Numismedia Wsl. Price for NGC/PCGS coin in MS69: \$810. (#99942)
- 9275** 2001-W Silver Eagle PR70 Deep Cameo PCGS. PCGS Population (297). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$145. (#99954)
- 9276** 2002-W Silver Eagle PR70 Deep Cameo PCGS. PCGS Population (253). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$130. (#99959)
- 9277** 2003 Quarter-Ounce Platinum Eagle MS70 PCGS. PCGS Population (249/0). NGC Census: (0/0). Numismedia Wsl. Price for NGC/PCGS coin in MS70: \$460. (#21101)
- 9278** 2003-W Quarter-Ounce Platinum Eagle PR69 Deep Cameo PCGS. PCGS Population (459/75). NGC Census: (0/0). Numismedia Wsl. Price for NGC/PCGS coin in PR69: \$320. (#921101)
- 9279** 2005 Quarter-Ounce Platinum MS70 PCGS. PCGS Population (38). NGC Census: (0). (#21109)
- 9280** 2006-W Eagle 20th Anniversary MS69, Eagle Proof Mint mark W and a Eagle Reverse Proof mint mark P. All graded 69 and NGC. (Total: 3 coins)
- 9281** 2006-W Silver Eagle MS70 PCGS. PCGS Population (301). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in MS70: \$150. (#9996)
- 9282** 2006-P Reverse Proof Silver Eagle, 20th Anniversary PR70 NGC. NGC Census: (0). PCGS Population (1472). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$480. (#799977)
- 9283** 2006-P Reverse Proof Silver Eagle, 20th Anniversary PR70 PCGS. PCGS Population (1473). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$480. (#799977)
- 9284** 2006 Half-Ounce Gold Eagle MS69 NGC. NGC Census: (0/0). PCGS Population (1009/107). (#89987)
- 9285** 2006-W Buffalo One-Ounce Gold PR70 Deep Cameo PCGS. PCGS Population (2407). NGC Census: (12882). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$1,325. (#9990)
- 9286** 2007 Quarter-Ounce Gold Eagle Early Releases MS70 NGC. NGC Census: (0). PCGS Population (32). Numismedia Wsl. Price for NGC/PCGS coin in MS70: \$300. (#146916)
- 9287** 2007-W Quarter-Ounce Gold PR70 Ultra Cameo NGC. Early Releases. NGC Census: (0). PCGS Population (80). (#148078)
- 9288** 2007-W Tenth-Ounce Platinum Eagle PR69 Ultra Cameo NGC. NGC Census: (0/0). PCGS Population (273/59). Numismedia Wsl. Price for NGC/PCGS coin in PR69: \$150. (#149573)
- 9289** 2007-W Tenth-Ounce Platinum Eagle PR70 Deep Cameo PCGS. PCGS Population (75). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$215. (#149579)
- 9290** 2007-W Tenth-Ounce Platinum Eagle PR70 Deep Cameo PCGS. PCGS Population (75). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$215. (#149579)
- 9291** 2007-W Quarter-Ounce Platinum Eagle PR70 Deep Cameo PCGS. PCGS Population (87). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$440. (#149575)
- 9292** 2007-W Quarter-Ounce Platinum Eagle PR70 Deep Cameo PCGS. PCGS Population (87). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$440. (#149575)
- 
- 9293** 2007-W Half-Ounce Platinum Eagle PR70 Deep Cameo PCGS. PCGS Population (173). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$765. (#149577)
- 9294** 2007-W Half-Ounce Platinum Eagle PR70 Deep Cameo PCGS. PCGS Population (173). NGC Census: (0). Numismedia Wsl. Price for NGC/PCGS coin in PR70: \$765. (#149577)
- 9295** 2007-W Half-Ounce Platinum Eagle PR69 Ultra Cameo NGC. NGC Census: (0/0). PCGS Population (286/44). (#149578)
- 9296** 2007-W Platinum Half-Ounce First Releases, 10th Anniversary PR70 Deep Cameo ANACS. ANACS Certified #33 of 49. NGC Census: (0). PCGS Population (114). (#393055)

## CALIFORNIA FRACTIONAL GOLD

- 9297** 1854 Liberty Octagonal 25 Cents, BG-108, Low R.4,—Mount Removed, Polished—NCS. AU Details. NGC Census: (0/15). PCGS Population (0/116). (#10377)  
*From The Mulkin Collection.*
- 9298** Undated Liberty Round 25 Cents, BG-222, R.2, MS63 PCGS. PCGS Population (108/119). NGC Census: (14/22). (#10407)
- 9299** 1856 Liberty Round 25 Cents, BG-230, Low R.4, MS65 NGC. Ex: Jay Roe. NGC Census: (3/0). PCGS Population (3/0). (#10415)
- 9300** 1853 Liberty Round 50 Cents, BG-409, R.3,—Improperly Cleaned—NCS. AU Details. NGC Census: (0/20). PCGS Population (2/134). (#10445)  
*From The Mulkin Collection.*
- 9301** 1853 Liberty Round 50 Cents, BG-409, R.3, AU58 NGC. NGC Census: (5/15). PCGS Population (32/85). (#10445)  
*From The Mulkin Collection.*
- 9302** 1855 Liberty Octagonal 1 Dollar, BG-533, Low R.4, AU50 PCGS. PCGS Population (6/88). NGC Census: (0/10). (#10510)
- 9303** 1859 Liberty Octagonal 25 Cents, BG-705, High R.6, AU53 NGC. NGC Census: (1/1). PCGS Population (0/13). (#10532)
- 9304** 1867 Liberty Octagonal 25 Cents, BG-709, R.4, MS64 NGC. NGC Census: (2/9). PCGS Population (22/35). (#10536)
- 9305** 1870 Liberty Octagonal 25 Cents, BG-762, Low R.4,—Holed—NCS. XF Details. NGC Census: (0/10). PCGS Population (1/105). (#10589)  
*From The Mulkin Collection.*
- 9306** 1873 Liberty Octagonal 25 Cents, BG-772, High R.6,—Scratched—NCS. Unc Details. NGC Census: (0/1). PCGS Population (0/10). (#10599)

**9307** 1870 Liberty Round 25 Cents, BG-835, R.3, MS63 Prooflike NGC. NGC Census: (6/1). PCGS Population (0/0). (#710696)

**9308** 1871 Liberty Round 25 Cents, BG-838, R.2,—Bent—NCS. AU Details. NGC Census: (0/65). PCGS Population (10/395). (#10699)

**9309** 1871 Liberty Round 25 Cents, BG-838, R.2,—Improperly Cleaned—NCS. AU Details. NGC Census: (0/65). PCGS Population (10/396). (#10699)  
*From The Mulkin Collection.*

**9310** 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS65 NGC. NGC Census: (4/1). PCGS Population (11/1). (#10730)

**9311** 1870 Liberty Octagonal 50 Cents, BG-908, R.5, MS65 NGC. NGC Census: (2/3). PCGS Population (9/6). (#10766)

**9312** 1871 Liberty Octagonal 50 Cents, BG-924, R.3, AU53 NGC. NGC Census: (0/42). PCGS Population (5/199). (#10782)  
*From The Mulkin Collection.*

**9313** 1871 Liberty Octagonal 50 Cents, BG-925, High R.4, AU55 PCGS. PCGS Population (6/48). NGC Census: (0/4). (#10783)

**9314** 1860/56 Liberty Round 50 Cents, BG-1014, High R.4, AU58 PCGS. PCGS Population (11/35). NGC Census: (1/4). (#10843)

**9315** 1875 Indian Round 50 Cents, BG-1037, R.4, AU58 PCGS. PCGS Population (11/45). NGC Census: (0/7). (#10866)

**9316** 1875 Indian Round 50 Cents, BG-1057, High R.5,—Improperly Cleaned—NCS. AU Details. NGC Census: (0/4). PCGS Population (0/27). (#10886)  
*From The Mulkin Collection.*

## COINS OF HAWAII

**9317** 1847 Hawaii Cent—Improperly Cleaned—NGC. AU Details. NGC Census: (6/160). PCGS Population (22/269). Mintage: 100,000. (#10965)

**9318** 1883 Hawaii Quarter—Improperly Cleaned—NGC. Unc Details. NGC Census: (4/652). PCGS Population (7/1021). Mintage: 500,000. (#10987)

**9319** 1883 Hawaii Half Dollar—Improperly Cleaned—NGC. AU Details. NGC Census: (19/227). PCGS Population (46/320). Mintage: 700,000. (#10991)

**9320** 1883 Hawaii Dollar—Cleaned—ANACS. AU50 Details. NGC Census: (21/150). PCGS Population (52/180). Mintage: 500,000. (#10995)

## PATTERN

**9321** 1853 Judd-151 Cent—Rim Damaged—NCS. Proof. NGC Census: (0/0). PCGS Population (0/0). (#60237)

## ERRORS

**9322** 1857 Flying Eagle Cent—Obverse Lamination—MS64 NGC.

**9323** 1943 Lincoln Cent—Struck on a 10C Planchet 2.5 grams, Altered Surface—NCS. VG Details.

**9324** 1982 Large Date Lincoln Cent, Struck on a Dominican Rep. 10C Blank—MS64 NGC.

**9325** 1977 Jefferson Nickel—Struck on a struck Cent—NCS. AU Details.

**9326** 1999-D Delaware Statehood Quarter—Struck on a 5C Planchet—MS64 PCGS. (#5945)

**9327** 197 -D Kennedy Half—Triple Clip, Damaged—AU58 ICG. AU58 Details.

**9328** 1904 Double Eagle—Obverse Struck Thru—MS62 NGC.

**9329** 1928 Saint-Gaudens Double Eagle—Reverse Lamination—MS62 NGC.

**9330** No lot.

## EXPOSITIONS AND FAIRS

**9331** 1904 Louisiana Purchase Expo 1/4 Gold MS63 NGC. Hendershott-61-310. Missouri.  
*From The Mulkin Collection.*

**9332** 1904 Louisiana Purchase Expo 1/2 Gold MS63 NGC. Hendershott-61-330. Missouri.  
*From The Mulkin Collection.*

## HARD TIMES TOKEN

**9333** 1838 Am I Not A Woman Medal VF30 NGC. Low-54, Rulau-HT-81, R.1. Copper.

## CONFEDERATE STATES OF AMERICA

**9334** “1861” Confederate States of America Cent, 1961 Copper Bashlow Restrike MS67 Red NGC. “1861” Confederate States of America Cent, 1961 Goldine Bashlow Restrike MS68 NGC. “1861” Confederate States of America Cent, 1961 Silver Bashlow Restrike MS67 NGC. (Total: 3)

## CALIFORNIA GOLD CHARMs

**9335** “1851” California Gold 1/2, Round, Indian, Bear MS64 NGC. 0.72 gm.  
*From The Mulkin Collection.*

**9336** “1852” California Gold 1/2, Round, Liberty, Bear MS65 NGC. 0.76 gm.  
*From The Mulkin Collection.*

**9337** “1853” California Gold 1/2, Round, Indian, Bear MS64 NGC. 0.75 gm.  
*From The Mulkin Collection.*

**9338** “1854” California Gold, Octagonal, Indian, Wreath, Star MS65 NGC. 0.23 gm.  
*From The Mulkin Collection.*

**9339** “1854” California Gold, Octagonal, Indian, Wreath, Star MS65 NGC. 0.22 gm.  
*From The Mulkin Collection.*

**9340** “1854” California Gold 1/4, Octagonal, Liberty, Bear MS65 NGC. 0.20 gm.  
*From The Mulkin Collection.*

**9341** “1854” California Gold 1/4, Octagonal, Liberty, Bear MS66 NGC. 0.24 gm.  
*From The Mulkin Collection.*

**9342** “1854” California Gold 1/4, Octagonal, Liberty, Bear MS66 NGC. 0.24 gm.  
*From The Mulkin Collection.*

**9343** “1854” California Gold 1/4, Round, Liberty, Bear MS65 NGC. 0.20 gm.  
*From The Mulkin Collection.*

**9344** “1854” California Gold 1/4 Round, Liberty, Bear MS65 NGC. 0.19 gm.  
*From The Mulkin Collection.*

**9345** “1854” California Gold 1/4, Round, Liberty, Bear MS65 NGC. 0.20 gm.  
*From The Mulkin Collection.*

**9346** “1854” California Gold 1/4, Round, Liberty, Bear MS65 NGC. 0.19g.  
*From The Mulkin Collection.*

**9347** “1855” California Gold, Octagonal, Liberty, Wreath, Star MS66 NGC. 0.53 gm.  
*From The Mulkin Collection.*

**9348** “1856” California Gold, Octagonal, Indian, Wreath, Star MS66 NGC. 0.50 gm.  
*From The Mulkin Collection.*

**9349** "1858" California Gold 1/4, Octagonal, Indian, Bear MS63 NGC. 0.27 gm. From The Mulkin Collection.

**9350** "1858" California Gold 1/2, Round, Liberty, Bear MS64 NGC. 0.67 gm. From The Mulkin Collection.

**9351** "1858" California Gold, Round, Liberty, Wreath—Damaged—NCS. XF Details. 0.33 gm. From The Mulkin Collection.

**9352** "1860" California Gold, Round, Indian, Wreath, Star MS65 NGC. 0.23 gm. From The Mulkin Collection.

## MISCELLANEOUS MEDALS AND TOKENS

**9353** 2008 Humbert Commemorative Pewter Die Trial. Gem Uncirculated NGC. Struck in 2008. One of 49 Produced. From the same dies also used to strike S.S. Central America gold relic medals.  
From The San Patricio Collection.

**9354** 2008 Humbert Commemorative Copper Die Trial. Gem Uncirculated NGC. Struck in 2008. One of 12 Produced. From the same dies also used to strike S.S. Central America gold relic medals.  
From The San Patricio Collection.

**9355** 2008 Humbert Commemorative Pewter Die Trial. Gem Uncirculated NGC. Struck in 2008. One of 49 Produced. From the same dies also used to strike S.S. Central America gold relic medals.  
From The San Patricio Collection.

## GSA DOLLARS

**9356** 1878-CC MS63 NGC. GSA Soft Pack. NGC Census: (3917/5054). PCGS Population (6523/7218). Mintage: 2,212,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$275. (#7080)

**9357** 1878-CC GSA Hoard MS64 NGC. NGC Census: (3903/1151). PCGS Population (5510/1708). Mintage: 2,212,000. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$460. (#7080)

**9358** 1878-CC MS64 NGC. GSA Soft Pack. NGC Census: (3862/1132). PCGS Population (5505/1739). Mintage: 2,212,000. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$465. (#7080)

## End of Session Four

# Heritage Auction Galleries Staff

## Steve Ivy - Co-Chairman and CEO

Steve Ivy began collecting and studying rare coins in his youth, and as a teenager in 1963 began advertising coins for sale in national publications. Seven years later, at the age of twenty, he opened Steve Ivy Rare Coins in downtown Dallas, and in 1976, Steve Ivy Numismatic Auctions was incorporated. Steve managed the business as well as serving as chief numismatist, buying and selling hundreds of millions of dollars of coins during the 1970s and early 1980s. In early 1983, James Halperin became a full partner, and the name of the corporation was changed to Heritage Rare Coin Galleries. Steve's primary responsibilities now include management of the marketing and selling efforts of the company, the formation of corporate policy for long-term growth, and corporate relations with financial institutions. He remains intimately involved in numismatics, attending all major national shows. Steve engages in daily discourse with industry leaders on all aspects of the rare coin/currency business, and his views on grading, market trends and hobby developments are respected throughout the industry. He serves on the Board of Directors of the Professional Numismatists Guild (and was immediate past president), is the current Chairman of The Industry Council for Tangible Assets, and is a member of most leading numismatic organizations. Steve's keen appreciation of history is reflected in his active participation in other organizations, including past or present board positions on the Texas Historical Foundation and the Dallas Historical Society (where he also served as Exhibits Chairman). Steve is an avid collector of Texas books, manuscripts, and national currency, and he owns one of the largest and finest collections in private hands. He is also a past Board Chair of Dallas Challenge, and is currently the Finance Chair of the Phoenix House of Texas.

## James Halperin - Co-Chairman

Jim Halperin and the traders under his supervision have transacted billions of dollars in rare coin business, and have outsold all other numismatic firms every year for over two decades. Born in Boston in 1952, Jim attended Middlesex School in Concord from 1966 to 1970. At the age of 15, he formed a part-time rare coin business after discovering that he had a knack (along with a nearly photographic memory) for coins. Jim scored a perfect 800 on his math SATs and received early acceptance to Harvard College, but after attending three semesters, he took a permanent leave of absence to pursue his full-time numismatic career. In 1975, Jim personally supervised the protocols for the first mainframe computer system in the numismatic business, which would catapult New England Rare Coin Galleries to the top of the industry in less than four years. In 1983, Jim's business merged with that of his friend and former archrival Steve Ivy. Their partnership has become the world's largest and most successful numismatic company, as well as the third-largest auctioneer in America. Jim remains one of the best "eyes" in the coin business today (he won the professional division of the PCGS World Series of Grading the last time he competed). In the mid-1980s, he authored "How to Grade U.S. Coins" (now posted on the web at [www.CoinGrading.com](http://www.CoinGrading.com)), a highly-acclaimed text upon which the NGC and PCGS grading standards would ultimately be based. Jim is also a well-known futurist, an active collector of EC comics and early 20th-century American art (visit [www.jhalpe.com](http://www.jhalpe.com)), venture capital investor, philanthropist (he endows a multimillion-dollar health education foundation), and part-time novelist. His first fictional novel, "The Truth Machine," was published in 1996 and became an international science fiction bestseller, and was optioned for movie development by Warner Brothers and Lion's Gate. Jim's second novel, "The First Immortal," was published in early 1998 and immediately optioned as a Hallmark Hall of Fame television miniseries.

## Greg Rohan - President

At the age of eight, Greg Rohan started collecting coins as well as buying them for resale to his schoolmates. By 1971, at the age of 10, he was already buying and selling coins from a dealer's table at trade shows in his hometown of Seattle. His business grew rapidly, and by 1985 he had offices in both Seattle and Minneapolis. He joined Heritage in 1987 as Executive Vice-President and Manager of the firm's rare coin business. Today, as an owner and as President of Heritage, his responsibilities include overseeing the firm's private client group and working with top collectors in every field in which Heritage is active. Greg has been involved with many of the rarest items and most important collections handled by the firm, including the purchase and/or sale of the Ed Trompeter Collection (the world's largest numismatic purchase according to the Guinness Book of World Records), the legendary 1894 San Francisco Dime, the 1838 New Orleans Half Dollar, and the 1804 Silver Dollar. During his career, Greg has handled more than \$1 billion of rare coins, collectibles and art, and provided expert consultation concerning the authenticity and grade condition of coins for the Professional Coin Grading Service (PCGS). He has provided expert testimony for the United States Attorneys in San Francisco, Dallas, and Philadelphia, and for the Federal Trade Commission (FTC). He has worked with collectors, consignors, and their advisors regarding significant collections of books, manuscripts, comics, currency, jewelry, vintage movie posters, sports and entertainment memorabilia, decorative arts, and fine art. Additionally, Greg is a Sage Society member of the American Numismatic Society, and a member/life member of the PNG, ANA, and most other leading numismatic organizations. Greg is also Chapter Chairman for North Texas of the Young Presidents' Organization (YPO), and is an active supporter of the arts. Greg co-authored "The Collectors Estate Handbook," winner of the NLC's Robert Friedberg Award for numismatic book of the year. Mr. Rohan currently serves on the seven-person Advisory Board to the Federal Reserve Bank of Dallas, in his second appointed term.

## Paul Minshull - Chief Operating Officer

As Chief Operating Officer, Paul Minshull's managerial responsibilities include integrating sales, personnel, inventory, security and MIS for Heritage. His major accomplishments include overseeing the hardware migration from mainframe to PC, the software migration of all inventory and sales systems, and implementation of a major Internet presence. Heritage's successful employee-suggestion program has generated 200 or more ideas each month since 1995, and has helped increase employee productivity, expand business, and improve employee retention. Paul oversees the company's highly-regarded IT department, and has been the driving force behind Heritage's Web development, now a significant portion of Heritage's future plans. As the only numismatic auction house that combines traditional floor bidding with active Internet bidding, the totally interactive system has catapulted Heritage to the top rare coin Web site (according to Forbes Magazine's "Best of the Web"). Paul came to Heritage in 1984. Since 1987, he has been a general partner in Heritage Capital Properties, Sales Manager, Vice President of Operations, and Chief Operating Officer for all Heritage companies and affiliates since 1996.

## Todd Imhof - Executive Vice President

Todd Imhof did not start collecting coins in his teens, unlike most professional numismatists. Shortly after graduating college, Todd declined an offer from a prestigious Wall Street bank to join a former high school classmate in his small rare coin firm in the Seattle area. In the mid-1980s, the rare coin industry was rapidly changing, with the advent of third-party grading and growing computer technologies; as a newcomer, Todd more easily embraced these new dynamics. In 1991, he co-founded Pinnacle Rarities, a firm specialized in servicing the savviest and most prominent collectors in numismatics. At 25, he was accepted into the PNG, and currently serves on its Consumer Protection Committee and its Legislation/Taxation Issues Committee. In 1992, he was invited to join the Board of Directors for the Industry Council for Tangible Assets, later serving as its Chairman (2002-2005).

**Leo Frese - Vice President**

Leo has been involved in numismatics for nearly 40 years, a professional numismatist since 1971, and has been with Heritage for more than 20 years. He literally worked his way up the Heritage "ladder," working with Bob Merrill for nearly 15 years, then becoming Director of Consignments. Leo has been actively involved in assisting clients sell nearly \$500,000,000 in numismatic material. Leo was recently accepted as a member of PNG, is a life member of the ANA, and holds membership in FUN, CSNS, and other numismatic organizations.

**Jim Stoutjesdyk - Vice President**

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. He was named ANA's Outstanding Young Numismatist of the Year in 1987. A University of Michigan graduate, he was first employed by Superior Galleries, eventually becoming their Director of Collector Sales. Since joining Heritage in 1993, Jim has served in many capacities. Jim's duties now include buying and selling, pricing all new purchases, assisting with auction estimates and reserves, and overseeing the daily operations of the rare coin department.

**Norma L. Gonzalez - VP of Auction Operations**

Norma Gonzalez joined the U.S. Navy in August of 1993 and received her Bachelor's Degree in Resource Management. She joined Heritage in 1998 and was promoted to Vice President in 2003. She currently manages the operations departments, including Coins, Currency, World & Ancient Coins, Sportscards & Memorabilia, Comics, Movie Posters, Pop Culture and Political Memorabilia.

**Debbie Rexing - VP - Marketing**

Debbie Rexing joined the Heritage team in 2001 and her marketing credentials include degrees in Business Administration and Human Resources from The Ohio State University. Debbie has worked across many categories within the company leading to her comprehensive and integrative approach to the job. She guides all aspects of Heritage's print marketing strategies – advertisements, brochures, direct mail campaigns, coordination of print buying, catalog design and production, The Heritage Magazine, and media and press relations.

**Ron Brackemyre - Vice President**

Ron Brackemyre began his career at Heritage Auction Galleries in 1998 as the Manager of the Shipping Department, was promoted to Consignment Operations Manager for Numismatics in 2004 and in 2009 added oversight of the entire photography operation at Heritage, wherein his department coordinates all photography, scanning and photoshopping. He is also responsible for the security of all of Heritage's coin and currency consignments, both at the Dallas world headquarters and at shows, as well as cataloging of coins for upcoming auctions, coordination of auction planning, security and transportation logistics, lot-view, auction prep and oversight for the entire shipping department.

**Marti Korver - Manager - Credit/Collections**

Marti Korver was recruited out of the banking profession by Jim Ruddy, and she worked with Paul Ryneerson, Karl Stephens, and Judy Cahn on ancients and world coins at Bowers & Ruddy Galleries, in Hollywood, CA. She migrated into the coin auction business, and represented bidders as agent at B&R auctions for 10 years. She also worked as a research assistant for Q. David Bowers for several years.

**Mark Prendergast - Director, Trusts & Estates**

Mark Prendergast earned his degree in Art History from Vanderbilt University and began his career in the arts working with a national dealer in private sales of 20th Century American Art. Joining Christie's in 1998 and advancing during a 10 year tenure to the position of Vice President, he was instrumental in bringing to market many important and prominent works of art, collections and estates. Having established a Houston office for Heritage, he serves as Director of Business Development, Trusts & Estates, providing assistance to fiduciary professionals and private clients with appraisals, collection assessments and auction consignments in all areas of art and collectibles.

# Coin Department Specialists

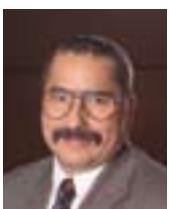

## **David Mayfield - Vice President, Numismatics**

David Mayfield has been collecting and trading rare coins and currency for over 35 years. A chance encounter with his father's coin collection at the age of nine led to his lifetime interest. David has been buying and selling at coin shows since the age of 10. He became a full time coin and currency dealer in the mid-1980s. David's main collecting interest is in all things Texas, specializing in currency and documents from the Republic of Texas.

## **Jim Jelinski - Consignment Director & Senior Numismatist**

Jim Jelinski has been involved in numismatics for more than five decades as a collector, dealer and educator. He started as Buyer for Paramount International Coin Corporation in 1972, opened Essex Numismatic Properties in 1975 in New Hampshire and has held numerous executive positions at M.B. Simmons & Associates of Narberth, Pennsylvania. He works at Heritage as a Senior Numismatist and Consignment Coordinator.

## **Bob Marino - Consignment Director & Senior Numismatist**

Bob Marino joined Heritage in 1999, managing and developing Internet coin sales, and building Heritage's client base through eBay and other Internet auction Web sites. He has successfully concluded more than 40,000 transactions on eBay. He is now a Consignment Director, assisting consignors in placing their coins and collectibles in the best of the many Heritage venues.

## **Sam Foose - Consignment Director and Auctioneer**

Sam Foose joined Heritage Numismatic Auctions, Inc., in 1993 as an Auction Coordinator. He rose to Assistant Auction Director in 1998, and began calling auctions. After a stint serving as a Senior Manager and Consignment Director in other collectible fields, he returned to Heritage in 2002 as a Consignment Director to help Heritage's expansion into other collectibles fields. Besides calling auctions as one of Heritage's primary auctioneers, he travels the nation assisting clients who wish to liquidate their collections of coins, paper money, decorative arts, and sports collectibles.

## **Katherine Kuracheck - Consignment Director**

Katherine Kuracheck graduated from the University of Mississippi in 1993 as an art major. She came to Heritage in January 2003, working alongside Leo Frese for several years, learning the numismatic wholesale trade. Katherine frequently travels to coin shows to represent Heritage and service her dealer accounts along with her wide ranging duties as Consignment Director.

## **Shaunda Fry - Consignment Director**

Shaunda Fry ran her own textile company for 22 years before meeting Leo Frese while co-coordinating a local school auction. She followed his suggestion to add auctioneering to her list of talents and, after training, worked part-time at Heritage auctions and began to call. She became a Consignment Director and now travels to shows as part of the "Wholesale Dealers Team."

## **Mike Sadler - Consignment Director**

Mike Sadler joined the Heritage team in September 2003. He attended the United States Air Force Academy, flew jets for the military and is a longtime pilot with American Airlines. Before coming to Heritage, his unlimited access to air travel enabled Mike to attend coin shows around the nation, and to build a world class collection that was auctioned by Heritage in 2004. He is known for his tremendous knowledge of rare coins, making him a trusted colleague to many of today's most active collectors.

## **Chris Dykstra - Consignment Director**

Chris Dykstra joined Heritage October 2006. He has held a number of jobs at Heritage including a stint in Wholesale Sales assisting Heritage's dealer clients in locating specific coins and travelling to shows to work the Heritage booth. In August 2008 Chris was promoted into the US Coin Consignments department as a Consignment Director where he now assists consignors in bringing their collections to auction.

**Jason Friedman - Consignment Director**

Jason's interest in rare coins, which began at 12 and expanded into his own numismatic business, allowed him to pay for most of his college tuition at the University of North Texas, from which he graduated in 2005. He joined Heritage soon after. He is a member of the American Numismatic Association (ANA) and Florida United Numismatists (FUN).

**Bert DeLaGarza - Consignment Director**

Bert DeLaGarza joined Heritage in 2008, capitalizing on a longtime passion for, and expertise in rare coins from a very young age. Prior to Heritage, Bert spent over 25 years in Landscape Construction and Estate Management having achieved the Texas Master Nurseryman certification. A member of the ANA, Bert is known for his strong knowledge of U.S. coins and an eye for rare U.S. stamps.

**Win Callender - Consignment Director & Senior Numismatist**

Win Callender has joined Heritage Auction Galleries as a professional numismatist and consignment director. A lifelong numismatist - he found a 1770 Russian 5 Kopek when he was just 5 years old - Callender parlayed his hobby into a fulltime business when he was in his mid-30s, starting his own business in Broken Arrow, Okla., in 1993. He subsequently worked for Carter Numismatics and David Lawrence Rare Coins, working his way up to Vice President in both firms.

**Mark Van Winkle - Chief Cataloger**

Mark has worked for Heritage, and Steve Ivy, since 1979. He has been Chief Cataloger since 1990, and has handled some of the premier numismatic rarities sold at public auction. Mark was editor of Legacy magazine, won the 1989 NLG award for Best U.S. Commercial Magazine, and has won numerous awards for his writing, including the 1990 NLG award for Best Article for his *Interview With John Ford*, the 1996 NLG Best Numismatic Article for *Changing Concepts of Liberty*. He has published extensively and written articles for *Coin World*, *Numismatic News* and has contributed to editions of the *Red Book*, *United States Patterns and Related Issues*, and *The Guide Book of Double Eagle Gold Coins*.

**Mark Borckardt - Senior Cataloger**

Mark started attending coin shows and conventions as a dealer in 1970, and has been a full-time professional numismatist since 1980. He received the Early American Coppers Literary Award, and the Numismatic Literary Guild's Book of the Year Award, for the *Encyclopedia of Early United States Cents, 1793-1814*, published in 2000. He serves as a contributor to *A Guide Book of United States Coins*, and has contributed to many references, including the Harry W. Bass, Jr. Sylloge, and the *Encyclopedia of Silver Dollars and Trade Dollars of the United States*. Most recently, he was Senior Numismatist with Bowers and Merena Galleries. Mark is a life member of the A. N. A., and an active member of numerous organizations.

**Brian Koller - Cataloger & Catalog Production Manager**

Brian Koller has been a Heritage cataloger since 2001, before that working as a telecom software engineer for 16 years. He is a graduate of Iowa State University with a Bachelor's degree in Computer Engineering, and is an avid collector of U.S. gold coins. His attention to detail ensures that every catalog, printed and on-line, is as error free as technology and human activity allows. In addition to his coin cataloging duties, he also helps with consignor promises and client service issues.

**Dr. Jon Amato - Cataloger**

Jon Amato has been with Heritage since 2004. He earned his Ph. D. from the University of Toronto, and was previously a Program Manager in the NY State Dept. of Economic Development, and an Adjunct Professor at the State University of New York at Albany. He is currently writing a monograph on the draped bust, small eagle half dollars of 1796-1797. He has published numerous articles in prestigious numismatic publications and belongs to many numismatic organizations, including the ANA, ANS, John Reich Collectors Society, and the Liberty Seated Collectors Club, and has made several presentations at ANA Numismatic Theaters.

**John Dale Beety - Cataloger**

John Dale Beety accepted a position with Heritage as a cataloger immediately after graduation from Rose-Hulman Institute of Technology, after serving an internship at Heritage during the summer of 2004. He grew up in Logansport, Indiana, a small town associated with several numismatic luminaries. Highlights as a Young Numismatist include attending Pittman III, four ANA Summer Seminars, and placing third in the 2001 World Series of Numismatics with Eric Li Cheung.

**Cataloged by:** Mark Van Winkle, Chief Cataloger

Mark Borckardt, Senior Numismatist; Jon Amato, John Beety, George Huber, Brian Koller, Max Spiegel

**Edited by:** Mark Van Winkle, John Beety, George Huber, Stewart Huckabee

**Operations Support by:** Cristina Gonzales, Miguel Reynaga Sr., Alma Villa, Maria Flores, Celeste Robertson,  
Manuela Bueno, Cristina Ibarra, Maria Jimenez

**Catalog and Internet Imaging by:** Travis Awalt, Maribel Cazares, Joel Gonzalez, Colleen McInerney,  
Sharon Johnson, Nancy Ramos, Jason Young, Tony Webb

**Production and Design by:** Carl Watson, Mary Hermann, Mark Masat, Debbie Rexing

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auction Galleries, a d/b/a of Heritage Auctions, Inc., or its affiliates Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. On bids placed through Auctioneer, a Buyer's Premium of fifteen percent (15%) will be added to the successful hammer price bid on lots in Coin, Currency, and Philatelic auctions or nineteen and one-half percent (19.5%) on lots in all other auctions. There is a minimum Buyer's Premium of \$14.00 per lot. In Gallery Auctions (sealed bid auctions of mostly bulk numismatic material), the Buyer's Premium is 19.5%.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, and Vintage Movie Poster); Heritage Monthly Internet Auctions (Sports, and Stamps). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; Heritage Live and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").  
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.  
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) well in advance of the Auction or supply valid credit card information. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders; Bidders who are not members of HA.com or affiliates should pre-register at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit may be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof to us so a credit check may be performed prior to Auctioneer's acceptance of a bid.

## Bidding Options:

8. Bids in Signature Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.  
9. Presentation of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.  
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Internet bids may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-4438425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless rearranged.  
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

Current Bid.....	Bid Increment	Current Bid.....	Bid Increment
<\$10	\$1	\$20,000 - \$29,999	\$2,000
\$10 - \$29	\$2	\$30,000 - \$49,999	\$2,500
\$30 - \$49	\$3	\$50,000 - \$99,999	\$5,000
\$50 - \$99	\$5	\$100,000 - \$199,999	\$10,000
\$100 - \$199	\$10	\$200,000 - \$299,999	\$20,000
\$200 - \$299	\$20	\$300,000 - \$499,999	\$25,000
\$300 - \$499	\$25	\$500,000 - \$999,999	\$50,000
\$500 - \$999	\$50	\$1,000,000 - \$1,999,999	\$100,000
\$1,000 - \$1,999	\$100	\$2,000,000 - \$2,999,999	\$200,000
\$2,000 - \$2,999	\$200	\$3,000,000 - \$4,999,999	\$250,000
\$3,000 - \$4,999	\$250	\$5,000,000 - \$9,999,999	\$500,000
\$5,000 - \$9,999	\$500	>\$10,000,000	\$1,000,000
\$10,000 - \$19,999	\$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the buyer. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer or its affiliates may consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors, and may extend financing or other credits at varying rates to certain Bidders in the auction.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.
- Payment:
23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, all subject to reporting requirements). All are subject to clearing and funds being received in Auctioneer's account before delivery of the purchases. Auctioneer reserves the right to determine if a check constitutes "good funds" when drawn on a U.S. bank for ten days, and thirty days when drawn on an international bank. Credit Card (Visa or Master Card only) and PayPal payments may be accepted up to \$10,000 from non-dealers at the sole discretion of the Auctioneer, subject to the following limitations: a) sales are only to the cardholder, b) purchases are shipped to the cardholder's registered and verified address, c) Auctioneer may pre-approve the cardholder's credit line, d) a credit card transaction may not be used in conjunction with any other financing or extended terms offered by the Auctioneer, and must transact immediately upon invoice presentation, e) rights of return are governed by these Terms and Conditions, which supersede those conditions promulgated by the card issuer, f) floor Bidders must present their card.
24. Payment is due upon closing of the Auction session, or upon presentation of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentation(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys..

# Terms and Conditions of Auction

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website [www.HA.com/common/shipping.php](http://www.HA.com/common/shipping.php) for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. Any risk of loss during shipment will be borne by the buyer following Auctioneer's delivery to the designated common carrier or third-party shipper, regardless of domestic or foreign shipment.
35. Due to the nature of some items sold, it shall be the responsibility for the successful bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
36. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtleshell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions..
39. Auctioneer is selling only such right title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the alternative dispute resolution provided herein. Arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Arbitration Clause: All controversies or claims under this Agreement or arising from or pertaining to: this Agreement or related documents, or to the Properties consigned hereunder, or the enforcement or interpretation hereof of this or any related agreements, or damage to Properties, payment, or any other matter, or because of an alleged breach, default or misrepresentation under the provisions hereof or otherwise, that cannot be settled amicably within one (1) month from the date of notification of either party to the other of such dispute or question, which notice shall specify the details of such dispute or question, shall be settled by final and binding arbitration by one arbitrator appointed by the American Arbitration Association ("AAA"). The arbitration shall be conducted in Dallas, Dallas County, Texas in accordance with the then existing Commercial Arbitration Rules of the AAA. The arbitration shall be brought within two (2) years of the alleged breach, default or misrepresentation or the claim is waived. The prevailing party (a party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorney's fees and costs. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof; provided, however, that the law applicable to any controversy shall be the law of the State of Texas, regardless of its or any other jurisdiction's choice of law principles and under the provisions of the Federal Arbitration Act.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed Auctioneers are Harvey Bennett, No. 0924050, and Samuel W. Foose, No.0952360, who will conduct the Auction on behalf of Heritage Auctions, Inc. ("Auctioneer"). All lots are subject to: the consignor's right to bid thereon in accord with these Terms and Conditions of Auction, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or reserve. Auctioneer has made advances to various consignors in this sale.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions: COINS & CURRENCY

**COINS and CURRENCY TERM A:** Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

**COINS and CURRENCY TERM B:** Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege. You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

**COINS and CURRENCY TERM C:** Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

**COINS and CURRENCY TERM D:** Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

**COINS and CURRENCY TERM E:** Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

**COINS and CURRENCY TERM F:** Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

**COINS and CURRENCY TERM G:** Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

**COINS and CURRENCY TERM H:** Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

**COINS and CURRENCY TERM I:** Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

**COINS and CURRENCY TERM J:** All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

**COINS and CURRENCY TERM K:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS and CURRENCY TERM L:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS and CURRENCY TERM M:** NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

**COINS and CURRENCY TERM N:** For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

## WIRING INSTRUCTIONS:

**BANK INFORMATION:**  
Wells Fargo Bank  
420 Montgomery Street  
San Francisco, CA 94104-1207

**ACCOUNT NAME:** Heritage Auction Galleries

**ABA NUMBER:** 121000248

**ACCOUNT NUMBER:** 4121930028

**SWIFT CODE:** WFBIUS6S

## Your five most effective bidding techniques:

### 1 Interactive Internet™ Proxy Bidding

(leave your maximum Bid at HA.com before the auction starts)

**Heritage's exclusive Interactive Internet™ system is fun and easy! Before you start, you must register online at HA.com and obtain your Username and Password.**

1. Login to the HA.com website, using your Username and Password.
2. Choose the specialty you're interested in at the top of the homepage (i.e. coins, currency, comics, movie posters, fine art, etc.).
3. Search or browse for the lots that interest you. Every auction has search features and a 'drop-down' menu list.
4. Select a lot by clicking on the link or the photo icon. Read the description, and view the full-color photography. Note that clicking on the image will enlarge the photo with amazing detail.
5. View the current opening bid. Below the lot description, note the historic pricing information to help you establish price levels. Clicking on a link will take you directly to our Permanent Auction Archives for more information and images.
6. If the current price is within your range, Bid! At the top of the lot page is a box containing the Current Bid and an entry box for your "Secret Maximum Bid" – the maximum amount you are willing to pay for the item before the Buyer's Premium is added. Click the button marked "Place Bid" (if you are not logged in, a login box will open first so you can enter your username (or e-mail address) and password).
7. After you are satisfied that all the information is correct, confirm your "Secret Maximum Bid" by clicking on the "Confirm Absentee Bid" button. You will receive immediate notification letting you know if you are now the top bidder, or if another bidder had previously bid higher than your amount. If you bid your maximum amount and someone has already bid higher, you will immediately know so you can concentrate on other lots.
8. Before the auction, if another bidder surpasses your "Secret Maximum Bid", you will be notified automatically by e-mail containing a link to review the lot and possibly bid higher.
9. Interactive Internet™ bidding closes at 10 P.M. Central Time the night before the session is offered in a floor event. Interactive Internet™ bidding closes two hours before live sessions where there is no floor bidding.
10. The Interactive Internet™ system generally opens the lot at the next increment above the second highest bid. As the high bidder, your "Secret Maximum Bid" will compete for you during the floor auction. Of course, it is possible in a Signature® or Grand Format live auction that you may be outbid on the floor or by a Heritage Live bidder after Internet bidding closes. Bid early, as the earliest bid wins in the event of a tie bid. For more information about bidding and bid increments, please see the section labeled "Bidding Options" found in the Terms & Conditions of this catalog.
11. After the auction, you will be notified of your success. It's that easy!

Current Bid: \$0 (100.00 w/Buyer's Premium (BIP))

Please Confirm Your Bid - Auction #1118, Lot #1068

Bidder: Half Dollars  
1951-D 50¢ PR65 NGC...

The Current Bid on this lot is: \$88.00 (88.00 w/BIP)

Secret Status: No Reserve

Your Maximum Bid is \$50 (50.00 w/BIP)

Before bidding your bid please read the information below:

Secret Maximum Bid: Our system will place bids on your behalf, using only as much of (but no more than) your secret maximum as is necessary to maintain your high bid position. If another bidder places a higher secret maximum than yours, you will be notified via e-mail that you have been outbid.

Congratulations, you're the current high bidder!

Your secret maximum: \$88.00 (88.00 w/BIP)

Current Bid: \$88.00 (88.00 w/BIP)

Secret Status: No Reserve

Use the bid history to track and monitor see what is happening with this lot. If you need to bid again, just log in and click the Bid Now button at [Auction #1118, Lot #1068](#).

Auction #1118, Lot #1068:  
Bidder: Half Dollars  
1951-D 50¢ PR65 NGC...

Note: The current bid is less than your secret maximum bid. The current bid may rise as other bidders increase their bids in an attempt to outbid you. Many times, you will win the lot for well below your maximum bid.

Use the bid history to track and monitor see what is happening with this lot. If you need to bid again, just log in and click the Bid Now button at [Auction #1118, Lot #1068](#).

Use the bid history to track and monitor see what is happening with this lot. If you need to bid again, just log in and click the Bid Now button at [Auction #1118, Lot #1068](#).

If you are outbid, we will e-mail you an email notice.

Your secret maximum bid of \$88.00 on Lot #1068 in Auction #1118 has been outbid.

Morgan Dollars: 1951-D 50¢ PR65 NGC...

Bidder Information:

Auction: #1118	Buyer: Half Dollars	Lot: 1068	Price: \$88.00
Status: Won		Date: 06/25/2008 7:00:00 PM CT	
Secret Maximum Bid:		\$88.00	

## CHOOSE YOUR BIDDING METHOD, (CONT'D.)

### 2 HERITAGE Live!™ Bidding (participate in the Live auction via the Internet)

1. Look on each auction's homepage to verify whether that auction is "HA.com/Live Enabled." All Signature® and Grand Format auctions use the HERITAGE Live!™ system, and many feature live audio and/or video. Determine your lots of interest and maximum bids.
2. Note on the auction's homepage the session dates and times (and especially time zones!) so you can plan your participation. You actually have two methods of using HERITAGE Live!™: a) you can leave a proxy bid through this system, much like the Interactive Internet™ (we recommend you do this before the session starts), or b) you can sit in front of your computer much as the audience is sitting in the auction room during the actual auction.
3. Login at HA.com/Live.
4. Until you become experienced (and this happens quickly!) you will want to login well before your lot comes up so you can watch the activity on other lots. It is as intuitive as participating in a live auction.
5. When your lot hits the auction block, you can continue to bid live against the floor and other live bidders by simply clicking the "Bid" button; the amount you are bidding is clearly displayed on the console.

### 3 Mail Bidding

(deposit your maximum Bid with the U.S.P.S. well before the auction starts)

**Mail bidding at auction is fun and easy, but by eliminating the interactivity of our online systems, some of your bids may be outbid before you lick the stamp, and you will have no idea of your overall chances until the auction is over!**

1. Look through the printed catalog, and determine your lots of interest.
2. Research their market value by checking price lists and other price guidelines.
3. Fill out your bid sheet, entering your maximum bid on each lot. Bid using whole dollar amounts only. Verify your bids, because you are responsible for any errors you make! Please consult the Bidding Increments chart in the Terms & Conditions.
4. Please fill out your bid sheet completely! We also need: a) Your name and complete address for mailing invoices and lots; b) Your telephone number if any problems or changes arise; c) Your references; if you have not established credit with Heritage, you must send a 25% deposit, or list dealers with whom you have credit established; d) Total your bid sheet; add up all bids and list that total in the box; e) Sign your bid sheet, thereby agreeing to abide by the Terms & Conditions of Auction printed in the catalog.
5. Mail early, because preference is given to the first bid received in case of a tie.
6. When bidding by mail, you frequently purchase items at less than your maximum bid. Bidding generally opens at the next published increment above the second highest mail or Internet bid previously received; if additional floor, phone, or HERITAGE Live!™ bids are made, we act as your agent, bidding in increments over any additional bid until you win the lot or are outbid. For example, if you submitted a bid of \$750, and the second highest bid was \$375, bidding would start at \$400; if no other bids were placed, you would purchase the lot for \$400.
7. You can also Fax your Bid Sheet if time is short. Use our exclusive Fax Hotline: 214-443-8425.

<img alt="A sample HERITAGE Bid Sheet form. The form includes sections for bidder information (Name, Address, Phone), bidding increments (e.g., \$25, \$50, \$75, \$100, \$125, \$150, \$175, \$200, \$225, \$250, \$275, \$300, \$325, \$350, **Take  
4  
Months to Pay...**

## **Heritage will Finance Your Purchase**

We're collectors too, and we understand that on occasion there is more to buy than there is cash. Consider Heritage's Extended Payment Plan [EPP] for your purchases totaling \$2,500 or more.

### **Extended Payment Plan [EPP] Conditions**

- Minimum invoice total is \$2,500.
- Minimum Down Payment is 25% of the total invoice.
- A signed and returned EPP Agreement is required.
- The EPP is subject to a 3% *fully refundable* Set-up Fee (based on the total invoice amount) payable as part of the first monthly payment.
- The 3% Set-up Fee is refundable provided all monthly payments are made by eCheck, bank draft, personal check drawn on good funds, or cash; and if all such payments are made according to the EPP schedule.
- Monthly payments can be automatically processed with an eCheck, Visa, or MasterCard.
- You may take up to four equal monthly payments to pay the balance.
- Interest is calculated at only 1% per month on the unpaid balance.
- Your EPP must be kept current or additional interest may apply.
- There is no penalty for paying off early.
- Shipment will be made when final payment is received.
- All traditional auction and sales policies still apply.

**There is no return privilege once you have confirmed your sale, and penalties can be incurred on cancelled invoices. To avoid additional fees, you must make your down payment within 14 days of the auction. All material purchased under the EPP will be physically secured by Heritage until paid in full.**

To exercise the EPP option, please notify **Eric Thomas** at **214.409.1241** or email at **EricT@HA.com** upon receipt of your invoice.

We appreciate your business and wish you good luck with your bidding.

## Auction Galleries

A large, illuminated "BEVERLY HILLS" sign is mounted on a hillside in Beverly Hills, California, at dusk or night. The sign is brightly lit in white against a dark sky, with trees and streetlights visible in the background.

BEVERLY  
HILLS

### JANUARY, 2010

**Heritage is coming to Beverly Hills,  
and we want you to be the first to know.**

We will be bringing our world class auctions and first class customer service to Los Angeles this coming January, 2010, with the opening of an office and auction gallery at 9478 West Olympic Blvd. in Beverly Hills, serving the high-end auction and collecting needs of West Coast collectors. This expansion represents a broadening of the Heritage horizon and a way to make our wide array of services even more convenient to our west coast clients.

This will be a full service facility specializing in coins, currency, collectibles, entertainment memorabilia, Fine & Decorative arts, jewelry, movie posters, fine timepieces, sporting memorabilia, comics, illustration art, natural history, political and Americana, stamps and beyond.

Consign to an upcoming Heritage auction, or explore the possibility of selling your collection outright to Heritage. With expert opinions in all 26 of our collecting categories, we can offer free verbal appraisals, confidential personalized assistance and will travel to your home or your bank vault.

Live auctions will be held on site, with highlights on display and preview events prior to auctions. Walk-ins and scheduled appointments are both encouraged and referral programs are available.

*Look for Heritage's expansion in New York City, coming mid-2010!*

## NATURAL HISTORY AUCTION

### JANUARY 17, 2010 • DALLAS, TEXAS

AN AUTHENTIC  
EGYPTIAN  
MUMMY HEAD

Our next Natural History Auction will feature an extremely rare authentic Egyptian mummy head. This specimen is remarkably complete and displays the original wrappings over the top of the head. Judging from its good state of mummification, exhibiting no distortion and imprints around the eye sockets suggest that they were once covered, possibly with coins, thereby indicating that this may have been a high status individual.

Receive a complimentary copy of this catalog, or one from another Heritage category, register online at HA.com/CATB17807 or call 866-835-3243 and mention reference CATB17807. The entire catalog will go online approximately December 22, 2009 at HA.com/NaturalHistory

## Selling this Fall The Mike Follett Coin Glass Collection November Americana Auction # 6032

A Rare Opportunity to own a piece from the collection of this noted coin dealer and friend, Mike Follett.

Genuine coin glass was produced by Central Glass Co. of Wheeling, West Virginia and was only in production of these pieces, simulating U.S. 1892 coinage, for 5 months before they were closed down for counterfeiting by the Treasury Department. A limited number of pieces still survive.

1. U.S. Coin Glass: Columbian World's Fair Glass Toothpick  
Estimate: \$800-1,000  
[HA.com/6032-16027](http://HA.com/6032-16027)
2. U.S. Coin Glass: Three Graduated Coin Glass Kerosene Lamps  
Estimate: \$1,200-1,500  
[HA.com/6032-16025](http://HA.com/6032-16025)

Also included in this collection:

- U.S. Coin Glass: Columbian World's Fair Glass Syrup Jug  
Estimate: \$500-600  
[HA.com/6032-16021](http://HA.com/6032-16021)
- U.S. Coin Glass: Large Lot of Dishes and Serving Pieces  
Estimate: \$600-800  
[HA.com/6032-16024](http://HA.com/6032-16024)
- U.S. Coin Glass: Large Pitcher, Two Tall Glasses  
Estimate: \$500-600  
[HA.com/6032-16018](http://HA.com/6032-16018)

Receive a free copy of this catalog, or one from another Heritage category. Register online at [HA.com/CATE17807](http://HA.com/CATE17807) or call 866-835-3243 and mention reference CATE17807. The entire catalog will go online approximately October 22 at [HA.com/Historical](http://HA.com/Historical).
